Academic freedom and individualized learning for 21st century medicine

Building on our tradition of progressive education, and in response to major societal changes in the priorities of biomedical science and health care, Icahn School of Medicine is the first medical school in the United States to drive a fundamental shift in pre-medical education by offering early assurance of acceptance to college sophomores from any major, with no MCAT requirement. Up to half of each entering class will consist of students accepted through this unique approach to pre-med preparation.

FlexMed
Academic freedom and individualized learning for 21st century medicine

At Icahn School of Medicine at Mount Sinai, our educational foundation is based on a set of values that provide our students with the knowledge, attitude, and support they need to become the next generation of change agents in medicine and biomedical science. For half a century, our forward-thinking educational philosophy has proven successful—Icahn School of Medicine is ranked 19th out of 153 medical schools nationwide by U.S. News & World Report and our institution and graduates are known the world over for integrity, discovery, altruism, clinical excellence, and a commitment to social justice.

FlexMed allows talented students with life of initiative to ‘flex’ their intellectual, creative, humanistic and scientific muscles during college, unencumbered by traditional pre-med requirements and the Medical College Admission Test (MCAT).

David Muller, MD
Marietta and Charles C. Morchand Chair in Medical Education
Dean for Medical Education

FlexMed allows talented students with a love of initiative to flex their intellectual, creative, humanistic, and scientific muscles during college, unencumbered by traditional pre-med requirements and the Medical College Admission Test (MCAT).

To learn more about the program, and to apply, please visit http://icahn.mssm.edu/flexmed. Application submission deadline: January 15.
The FlexMed program is open to all undergraduates. The three broad academic categories we look for are Humanities and Social Sciences, Computational Sciences and Engineering, and Biomedical Sciences. However, we are interested in talented students from all areas of study, including Physics; Mathematics; Computer Science; Public Health and Policy; Psychology; Global Health; the Arts; Biochemistry; Genetics; Molecular and Cell Biology; and Neuroscience. Once accepted, students will be free to pursue their area of study, unencumbered by the traditional science requirements and MCAT.

FlexMed builds on the success of Icahn School of Medicine at Mount Sinai’s Humanities and Medicine (HuMed) program, which in 1987 was the first program in the United States to offer early assurance of acceptance to sophomores with a humanities background. Data from the HuMed program shows that these graduates perform as well as their classmates in areas such as honors grades in clerkships, class ranking, research and publications, school leadership, and community service.

About FlexMed
From Argentina to Uganda, East Harlem to India, Icahn School of Medicine at Mount Sinai works to improve the health of underserved populations by training tomorrow’s leaders in global health.

From day one, students learn in a variety of settings – from lectures and labs to field work and research presentations.

How to Apply to FlexMed
Students who are interested in FlexMed must apply during their sophomore year of college. Applicants must have completed either one year of Chemistry, Biology, or Physics.

Letters of acceptance will be mailed out by the summer of applicants’ sophomore year.

Icahn School of Medicine is a highly competitive institution with the goal of preparing physicians and scientists to enter the medical field as informed advocates and activists ready to advance research and clinical care. We expect our applicants to have a strong educational background, outstanding values and personal attributes, and the ability to articulate their passion and commitment to a career using science in the service of society.

For more information, contact admissions at admissions@mssm.edu or 212-241-6696.

The following must be submitted.

- Completed FlexMed Application
- High School Transcripts
- College Transcripts
- SAT/ACT Scores
- Letters of Recommendations
- $110 Application Fee

Application Checklist

Students who are accepted to FlexMed must adhere to the requirements below before matriculation.

1. Complete their Bachelor’s Degree from their current college/university
2. Minimum of one year of Biology
3. One year of Chemistry
4. One year of English
5. One semester of Physics (or AP Physics with a score of 4 or higher)
6. Two semesters of lab in any science
7. One semester of Health Policy, Public Health, or Global Health
8. One semester of Ethics
9. One semester of Statistics

Experiences
- A senior thesis or equivalent in an area of academic concentration
- An in-depth exposure to human illness
- Proficiency in Spanish or Mandarin encouraged

Summer Enrichment Program
Six weeks prior to matriculation, FlexMed students who have not had advanced science courses will be required to participate in a Summer Enrichment Program, providing basic competency in Cell Biology, Biochemistry, and Genetics.

Important Dates

- August 1: Applications open
- January 15: Application submissions deadline
- July 1: Acceptances sent

Location, Location, Location
Icahn School of Medicine at Mount Sinai is located in New York City, one of the most dynamic and exciting cities in the world. The School is adjacent to two of New York City’s principal hospitals, Mount Sinai Hospital, and Beth Israel, which lie at the heart of medically underserved communities. The diversity of the students reflects that of the community, and Mount Sinai, Beth Israel, and Beth Israel White Plains Hospital are explicitly committed to serving the underprivileged patients populated in the area.

In New York City, we believe that medicine almost always involves transformation – the art of turning suffering into health. Our programs are designed to help you become a respected leader in medicine and public health, improving the human condition and reducing suffering throughout the world.

The MD Program combines the most progressive, technologically advanced, scientifically-based education with the goal of meeting societal health care needs locally and globally. We explicitly blur the traditional distinction between pre-clinical and clinical years by integrating the basic sciences across courses, as well initiating students into the clinical environment from the very first day of school.
