CTI BIOPHARMA AND TISCH CANCER INSTITUTE INTERNATIONAL FELLOWSHIP

The Tisch Cancer Institute at Mount Sinai is delighted to request applications for the 2016/2017 inaugural CTI BioPharma International Postdoctoral Research Fellowship, which is an endowed visiting fellowship for physician scientists with an emphasis on hematologic malignancies and immunobiology. This announcement is being circulated to all potential sponsoring scientists including all heads of laboratories, research faculty, and other potential postdoctoral mentors at The Tisch Cancer Institute.

This fellowship opportunity is intended to invite visiting physician-scientists to The Tisch Cancer Institute to advance translational science among institutions around the world and foster international collaboration in translational research in blood related cancers and immunobiology. Visiting physician-scientists will be appointed for a one-year term. Preference will be given to foreign physician-scientists.

Fellowship Available: One fellowship of $75,000 for one year, to be used for salary support and/or lab supplies
Application Deadline: July 1, 2016

The fellowship may be used to cover salary and/or research expenses. Recipients may already be at Mount Sinai or may be recruited to Mount Sinai with funds from this fellowship. Recipients should demonstrate their high-impact accomplishments in translational research and the potential for an independent scientific career. The CTI BioPharma International Postdoctoral Research Fellowship is intended to foster international collaboration in translational research in blood-related cancers and immunobiology.

APPLICATION SUBMISSION

Applications must include the following information and documents.

- Candidate’s curriculum vitae
- Candidate’s statement of general research interests (maximum one page)
- Sponsoring scientist’s curriculum vitae
- Research statement (maximum two pages)
- Letter of recommendation from the sponsoring scientist commenting on how the candidate’s research is novel, elegant, interdisciplinary and high impact, as well as the candidate’s potential for an independent career in science
- Sponsoring scientist to submit application materials to Chan-Bene Lin (chan-bene.lin@mssm.edu) by July 1, 2016 at 5:00PM.

SELECTION PROCESS

The CTI BioPharma International Postdoctoral Research Fellowship Awards Committee will make the selection. The Committee will be comprised of one outside reviewer agreed upon by The Tisch Cancer Institute and CTI and two internal reviewers from Mount Sinai. Recommendations will be presented to the Director of The Tisch Cancer Institute, who will make the final decision. Upon selection, the recipient will be notified and an announcement will be sent to all sponsoring scientists who submitted applications.
