DEPARTMENT of OBSTETRICS, GYNECOLOGY and REPRODUCTIVE SCIENCE

DIVISION OF OBSTETRICS AND GYNECOLOGY

LEADERS IN WOMEN’S HEALTHCARE

Personalized care for women of all ages and at all stages of life.
Mount Sinai Gynecologists offer a wide range of detailed and complex gynecological services to meet today’s women’s healthcare needs. We provide comprehensive gynecology care throughout all stages of a woman’s life, beginning in the teenage years, onto childbearing years, into post-menopause, and retirement. We utilize the latest medical technology to make your visits as comfortable as possible.

**Our Gynecologists have expertise in:**
- General wellness and annual examinations including PAP smears and breast exams
- Evaluation of gynecologic diseases and symptoms, including abnormal pap smears and pelvic pain
- Infertility evaluation and treatment
- Evaluation, diagnosis and treatment of benign and malignant diseases of female organs, including sexually-transmitted and infectious diseases
- Minimally-invasive laparoscopic and hysteroscopic procedures, as well as traditional surgery
- Colposcopy equipment to evaluate the cervix in case of an abnormal pap exam
- Leep treatment for abnormal cervical cells
- Comprehensive family planning counseling and services, including birth control and emergency contraception
- Menopause evaluations, education and treatment options, including hormone replacement therapy
- Premenstrual syndrome evaluation, education and treatment options

For expectant mothers, the prospect of having a baby is both a joyous and exciting one. Mount Sinai offers expert, personalized care for women before, during and after pregnancy. Our Division is comprised of board-certified physicians in Obstetrics and Gynecology and certified Nurse Midwives who have delivered thousands of babies. We believe that sensitivity and the highest clinical standards are the way to nurture the complex opportunities that new life brings. Our doctors are available 24 hours a day and we are always happy to answer questions about your health and the health of your baby.

Our integrated practice easily allows for collaboration with specialists in Maternal Fetal Medicine, Medical Genetics, Reproductive Endocrinology and other medical and surgical specialties, as needed. Our specially trained physicians work hand-in-hand with each woman to develop a plan of care tailored to her personal needs and medical history throughout her pregnancy through delivery. Services include clinical care, monitoring, in-office ultrasound examinations and state-of-the-art diagnostic testing and more. Smooth teamwork and good communication with other specialists ensure both mother and baby receive the best possible care.

**Our Obstetricians have expertise in:**
- Prenatal testing
- Routine comprehensive care through all stages of pregnancy
- Pre-pregnancy visits
- Prenatal care
- Care and evaluations for pregnancies with high risks of abnormalities
- Perinatology program for high risk pregnancies
- Nurse practitioner/midwife obstetric care and assistance
