Hatch Auditorium, New York, New York

DIRECTOR
Joshua B. Bederson, MD
Professor and Chair
Department of Neurosurgery
The Mount Sinai Medical Center

LOCATION
The Mount Sinai Medical Center
Hatch Auditorium
Guggenheim Pavilion
1468 Madison Avenue at 100th Street
New York, New York

SYMPOSIUM OVERVIEW
The Annual Mount Sinai Symposium on Neurosurgical Simulation brings together healthcare simulation experts and practitioners from around the globe to share best practices and new simulation technologies. The aim of the symposium is to highlight and discuss advances in simulation, with an emphasis on neurosurgical applications.

EDUCATIONAL OBJECTIVES
Upon completion of this course, participants should be able to:

• Evaluate the use of Neurosurgical Simulation in the training of ACGME residency programs
• Identify technological advances in patient specific surgical rehearsal through the neurosurgical simulator
• Compare and contrast the use of traditional training and simulation training on ventriculostomy outcomes
• Demonstrate the use of neurosurgical simulation for patients with benign brain tumors

TARGET AUDIENCE
The symposium has been designed to meet the educational needs of Neurosurgeons, Head and Neck Surgeons, Radiologists and Neuroradiologists, Residents from these fields as well as OR Nurses, Technicians and Engineers in the fields of: Haptics, Visualization, Computational Sciences and Simulation, as well as professionals from the fields of Aviation, Defense and Gaming.
