An SHM-affiliated Meeting
The success of the hospitalist model has led to greater demands on hospitalists, including caring for increasing numbers of patients, the critically ill, and patients who have historically been cared for solely by subspecialists, such as Oncology and HIV patients. In the face of these demands, hospitalists strive to become Master Clinicians – to be able to diagnose and manage complex diseases, incorporate high-quality evidence, and provide individualized care in an efficient manner.

Through concise plenary lectures and stimulating workshops our 7th Annual Hospital Medicine Symposium will provide the necessary knowledge and skills to allow hospitalists to return to their hospitals and deliver care of the highest quality.

Our faculty consists of nationally and internationally renowned experts chosen to ensure attendees develop expertise in essential topics. Highlights include our keynote speaker, Dr. Jennifer Myers, Patient Safety Officer at the University of Pennsylvania, discussing how hospitalists can transform the culture of safety at their hospitals; essentials from the new ACCP Anticoagulation Guidelines; a Pearls for Practice series presenting rapid fire lectures on core topics; and our Update in Hospital Medicine session summarizing the most important studies over the past year.

Our highly rated WORKSHOPS provide participants with a choice of Three Tracks in which to gain expertise. Concentrate in one of these tracks to develop expertise or mix-and-match tracks to experience a greater variety of topics:

1. **HOSPITALIST AS GENERALIST** — Enhance skills in core topics such as Pain Management
2. **HOSPITALIST AS SPECIALIST** — Learn how Handheld Ultrasound for Bedside Diagnosis may be replacing the stethoscope and develop expertise in Oncologic Emergencies
3. **ENHANCING QUALITY & VALUE** — Become proficient in Developing and Implementing Checklists and other key QI topics

Come to increase your knowledge of core topics, learn more of subspecialty conditions, enhance your QI skills, increase your value to your hospital, and network with colleagues. In short, come to continue your quest to become a Master Clinician!

**PROGRAM OBJECTIVES**

At the conclusion of this CME activity, the participant should be able to:

- Apply new recommendations from the 2012 ACCP Anticoagulation & Thrombosis guidelines to patient care
- Recognize and treat life-threatening oncologic emergencies, such as tumor lysis syndrome
- Diagnose common and serious dermatologic manifestations of infectious and systemic disease
- Prescribe opioid narcotics and manage side effects in a safe and effective manner
- Treat sickle cell crisis using evidence-based practices and strategies, including recognizing the indications for exchange transfusion
- Diagnose delirium at an early stage and institute an appropriate diagnostic workup and management strategy

**WHO SHOULD ATTEND?**

Hospitalists, General Internists, Nurse Practitioners, Physician Assistants, House Staff, Medical Students.

**ACCREDITATION**

Mount Sinai School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.
