Graduate Program in Public Health

The Graduate Program in Public Health is a 42-credit, 2-year competency-based program offering a Master of Public Health degree fully accredited by the Council on Education for Public Health. Students may choose a general public health course of study or choose from several areas of specialization: global health, occupational & environmental medicine, health promotion & disease prevention, outcomes research, biostatistics, epidemiology, and health care management. Courses are conveniently offered Monday through Thursday evenings from 4 PM to 8:30 PM in three terms: Fall, Spring I and Spring II.

The mission of the Graduate Program in Public Health is to educate our graduates to prevent disease, protect the environment, and promote good health in partnership with the populations they serve. The educational and career objectives of the MPH program are to advance and complement the student’s ability to apply public health knowledge to their existing and future careers. The graduates will assume a broad array of roles in diverse settings including: public health practice, industry, academia, non-profit, private practice, and further training in a health-care related field or other fields.
