The Mount Sinai PEHSU participates in educational, clinical and community activities:

### Clinical consultations
- Parents, educators and health care professionals may contact our experts on children's environmental health issues

### Educational materials and training
- Lectures and teaching for physicians, fellows and residents on exposure topics

### Referrals and Medical Management
- Evaluation and management of children with known or suspected exposure to environmental toxins

### Community Outreach
- Seminars for schools and community based organizations
- Development of toxic substances fact sheets for the general public

### The Mount Sinai PEHSU responds to a host of topics:

#### Indoor Pollutants
- Environmental Tobacco Smoke
- Carbon Monoxide
- Mold
- Pesticides
- Volatile Organic Compounds
- Asbestos
- Drinking Water Contaminants

#### Outdoor Pollutants
- Air Pollutants
- Diesel Exhaust
- Water and Soil Contaminants
- Sun Exposure
- Toxic Waste Sites

  Fellow in Pediatric Environmental Health
- **Mana Mann, MD**
  Fellow in Pediatric Environmental Health
- **Andrea Deierlein, PhD**
  Fellow in Pediatric Environmental Health
- **Andrea Schwartz, MD**
  Fellow in Pediatric Environmental Health
- **Alice Freund, CIH, MSPH**
  Industrial Hygienist
- **Norman Zuckerman, MS**
  Industrial Hygienist
Our Mission:

We provide consultations for children with toxic environmental exposures and diseases of suspected environmental origin. The unit sponsors educational fellowships, research, seminars, and career development and serves as the clinical practice for the Mount Sinai Pediatric Environmental Health Fellowship Training Program.

Support

- Agency for Toxic Substances and Disease Registry
- Association of Occupational and Environmental Clinics
- Mount Sinai Department of Community and Preventive Medicine
- Mount Sinai Department of Pediatrics
- Mount Sinai Auxiliary Board
- United States Environmental Protection Agency
- Academic Pediatric Association
- New York State Department of Health

For Emergencies or to speak to a toxicologist prior to referral, call 911 or the local poison control center:
