Mission Statement

[Download Page as PDF \(/files/ISMMS/Assets/About the School/Faculty-Resources/Mission Statement _ Icahn School of Medicine.pdf\)](#)

Mission Statement: The Icahn School of Medicine at Mount Sinai advances science, medicine, and health care delivery for the benefit of humanity through a culture of excellence, innovation, collaboration, and inclusive diversity. We conduct groundbreaking research; educate and nurture the next generation of exceptional clinicians, researchers, teachers, and leaders; and deliver the most advanced compassionate care with an unwavering commitment to health equity.

Article I: Patient Care

In this academic medical center, the responsibility to teach and do research in the laboratory, at the bedside and in the community enhances the fundamental goal of entirely personal, compassionate patient care. Mount Sinai will strive to provide superlative patient care, considered to be the requisite model for learning.

Article II: Education

The educational process will aim to graduate individuals who will be committed to a lifetime of continuing education while they are contributing in many and varied ways to the health needs of people. Mount Sinai will be responsible for the certification of physicians at the undergraduate, graduate and postgraduate levels, as well as the certification of biomedical scientists at the graduate level; and, as appropriate, will undertake the education of other health and allied professionals.

Article III: Research

Since medicine is a derivative science and must draw upon at least the biological, social and physical sciences, no discipline will intentionally be excluded as irrelevant. Fundamental and applied research will be primarily centered in geographic proximity to clinical facilities. Mount Sinai will encourage, support and evaluate innovative ideas and programs in health services delivery.

Article IV: Dissemination of Knowledge

Mount Sinai will participate as a national and international resource in the gathering, analysis and dissemination of information pertaining to the prevention, diagnosis and treatment of disease.

Article V: Concern for the Community

Mount Sinai will be ever-sensitive to the social and health care needs of the many different communities it serves. Mount Sinai will be a participant in efforts to define and solve health problems in population groups and communities through its capability in developing scientific knowledge, education and service.

Article VI: Organization

In a framework of free participation, Mount Sinai will strive to create an evolving work environment conducive to individual creativity.
