Mount Sinai Health Hackathon

Creating Novel Technology Solutions For Healthcare

Rare Diseases

Sponsor Prospectus

As part of the SINAIInnovations conference, the Icahn School of Medicine at Mount Sinai is hosting its annual institution-wide healthcare innovation challenge, called Mount Sinai Health Hackathon, focused on prototyping novel solutions for assessing, monitoring, managing, and treating the problems related to rare diseases. Over the course of a few days in October, a group of motivated individuals from a variety of backgrounds will form multi-disciplinary teams to work intensely on novel technology solutions to these problems involving apps, software, and devices.

Mount Sinai Health Hackathon is now seeking sponsors to participate by providing financial support, technical resources, and/or mentorship for teams participating in the event.

Mount Sinai Health Hackathon has developed the following sponsorship opportunities:

Event Sponsor – Sponsors will provide financial support for Mount Sinai Health Hackathon to offset the costs of running the event.

Technology Sponsor – Sponsors will provide equipment, software and technical advice during Mount Sinai Health Hackathon. Each Technology Sponsor will provide mentors for a Technology Station at Mount Sinai Health Hackathon and be given an opportunity to give a brief presentation about their technology.

Sponsors can participate in either or both of the above sponsorship opportunities.

By sponsoring Mount Sinai Health Hackathon, corporate sponsors will receive the following benefits:

- Access to tech-savvy, healthcare minded talent to recruit to their company
- Exposure to innovative problem-solving methods and ideas
- Advertising in event programming and other marketing opportunities during the event (scaled with level of contribution)

For more information and to discuss participating in Mount Sinai Health Hackathon, please email health-hackathon@mssm.edu
