

Alejandro Carrasquilla, MD

Neurosurgery Resident, Class of 2024
Department of Neurosurgery
Icahn School of Medicine at Mount Sinai

Clinical and Academic Interest in Skull Base Surgery, Neuro-Oncology, Surgical and Medical Technology

What made me choose Mount Sinai...

Mount Sinai is a large, comprehensive academic medical health system with a prominent and exceptional neurosurgical department, and I knew it would allow me to gain well-rounded surgical and academic training alongside renowned faculty. It offers a favorable environment for residents in a world-class city. I saw that the Mount Sinai residency program encourages residents to individualize their education and build their own niche within the field of neurosurgery. New York City has such a wide patient population. I enjoy connecting them to experts within neurosurgery as well as a multidisciplinary team of consultants to provide the most comprehensive care.
