Maternal Fetal Medicine Fellows

2025-2026

Elizabeth Kravitz

First Year Fellow

Medical School: Baylor College of Medicine

Residency: Hospital of the University of Pennsylvania

Research Interests: How reproductive health and abortion access influence maternal health outcomes, with an emphasis on the social and structural systems that shape obstetric and reproductive care for immigrant and low-resource populations

Why Mount Sinai?

I chose Sinai for the outstanding hands-on ultrasound and procedural experiences, the opportunity for multidisciplinary collaboration, research opportunities, and for the warm, supportive, and passionate

Kavya Shivashankar

First Year Fellow

Medical School: Sidney Kimmel Medical College at Thomas Jefferson University

Residency: University of Illinois at Chicago

Research Interests: Reproductive genetics, fetal congenital disorders, advanced fetal imaging

Why Mount Sinai?

I was drawn to this program because of the genuine camaraderie and warmth I felt from everyone I met on interview day. Now as a fellow, I continue to be impressed by the diversity, breadth of clinical exposure, depth of expertise, and the interdisciplinary collaboration fostered at Mount Sinai.

Jacqueline Thompson

First Year Fellow

Medical School: Columbia University Vagelos College of Physicians and Surgeons

Residency: Hospital of the University of Pennsylvania

Research Interests: Labor induction, diabetes in pregnancy and quality improvement

Why Mount Sinai?

I chose training at Mount Sinai because of the ability to serve diverse and underserved populations and to be exposed to complex maternal and fetal pathology. Additionally, we have faculty who are leaders in the field and dedicated to trainee education.

Sara Hachey

Second Year Fellow

Medical School: Lewis Katz School of Medicine at Temple University

Residency: Pennsylvania Hospital

Research Interests: The impact of environment and lifestyle factors on pregnancy outcomes and the use of machine learning to develop prediction models for adverse pregnancy outcomes.

Why Mount Sinai?

I chose Mount Sinai for the breadth of maternal and fetal conditions, hands-on ultrasound and inpatient training, and access to research opportunities. The culture of camaraderie and emphasis on education was palpable and has been an incredible environment for personal and professional growth.

Victoria Ly

Second Year Fellow

Medical School: Renaissance School of Medicine at Stony Brook University

Residency: University of Rochester

Research Interests: Diabetes in pregnancy and maternal health disparities

Why Mount Sinai?

I chose Mount Sinai because I wanted to train at an institution where I would be exposed to a wide variety of maternal and fetal pathologies given the diverse patient population. I was also drawn to the robust ultrasound and procedural training. Everyone at Sinai is genuinely supportive, and it truly feels like a family!
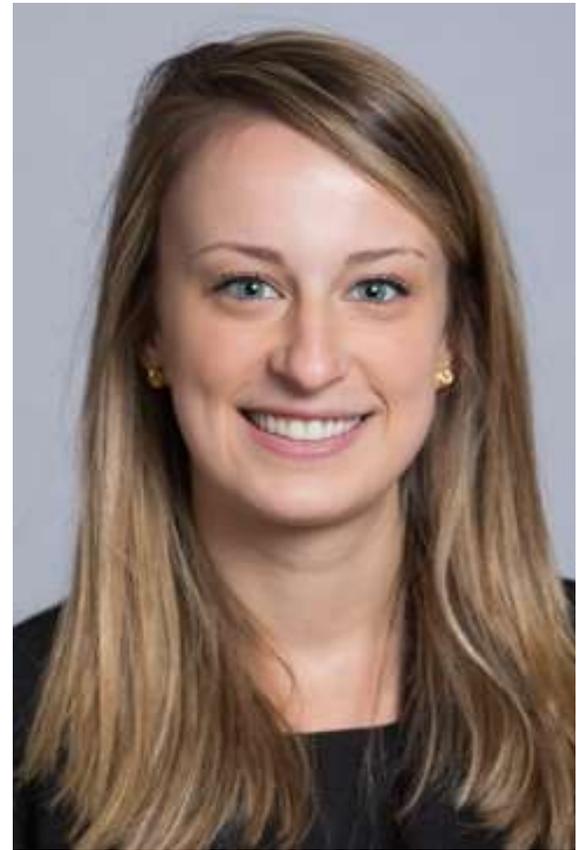

Leslie Warren

Second Year Fellow

Medical School: Icahn School of Medicine at Mount Sinai Hospital

Residency: Icahn School of Medicine at Mount Sinai Hospital

Research Interests: Adult congenital heart disease, ultrasound, health policy

Why Mount Sinai?

Having been a resident at this program, I was exposed to how knowledgeable, kind, and supportive the environment of the MFM division is in teaching the fellows. I was excited about the complexity of patients that we have the privilege to take care of!

Sara Edwards

Third Year Fellow

Medical School: Thomas Jefferson University/Sidney Kimmel Medical College

Residency: University of Illinois Chicago College of Medicine

Research Interests: Fetal and neonatal effects of maternal medications, social determinants of health, and labor management

Why Mount Sinai?

I chose Sinai because of the combination of academic excellence and true camaraderie in the MFM division. I knew that by choosing Sinai for fellowship I would get excellent training in the breadth and depth of MFM, all while learning dexterity in the full range of ultrasound-guided procedures and I love my colleagues!

Allison Perelman

Third Year Fellow

Medical School: NYU Grossman School of Medicine

Residency: NYU Grossman School of Medicine

Research Interests: Management of multifetal gestations, prevention of preterm birth, induction of labor

Why Mount Sinai?

I wanted to train at Mount Sinai for MFM fellowship because of the wide variety of pathology and patient care we get to be involved with. I love working on a busy, high acuity labor floor, spending a lot of time in the ultrasound unit (and mastering needle procedures!), and working with the residents in our high-risk OB clinic. Above all, I love the collegial environment of the MFM division - our attendings are the best!
