

Department of Psychiatry

DEI Steering Committee

The Psychiatry DEI Steering Committee was formed to address systemic racism affecting our institutions and patients within psychiatry and psychology. Our committee is comprised of subcommittees that address community engagement, research equity, provider training, faculty recruitment, clinical care, and more.

Through departmental initiatives, monthly lectures, and a dedicated 40-plus member committee, we explore the social determinants of mental health and challenge existing conventions and assumptions in psychiatry and psychology.

Making mental health care more diverse, equitable, and inclusive.
