Mount Sinai Campus  
**Climate Survey**

Academic Year 2023-2024

## Introduction

**In June 2024**, an online survey was implemented in the Icahn School of Medicine at Mount Sinai (Icahn Mount Sinai) to collect information on issues related to sexual misconduct and assault. The New York State “Enough is Enough” statute (NYS 129-B) requires the implementation of a campus climate assessment every other year. The survey was sent to all students enrolled at Icahn Mount Sinai during Spring 2024. In total, the survey was sent to 1,241 students. The response rate for the survey was 6%.

Students received the link to the online survey via their Mount Sinai email and were told the survey would take 10-20 minutes to complete. Because of the sensitive nature of the information being collected, confidentiality was a priority, and responses were not linked to any individuals.
