

### Andrew Lee, MD

Resident (PGY2), Anesthesiology

Mount Sinai Morningside/Mount Sinai West

**Service to their peers:** “Since the start of residency, Dr. Lee has been a true source of support for the PGY-1 Anesthesia class. He went above and beyond to ensure our transition into intern year was as smooth and seamless as possible. Dr. Lee is always accessible, making himself available at all hours-whether through text, phone call, or in person-to answer questions or address concerns. His positive energy is contagious; he has a natural ability to make everyone around him feel comfortable, often lifting spirits with his smile and sense of humor. What truly sets him apart is his proactive approach: he reaches out with thoughtful advice and guidance, often before we, as a class, even realize we need it. Dr. Lee is the epitome of a role model resident-embodiment both clinical excellence and the kind of kindness that fosters a supportive, family-like atmosphere among his peers. His empathy and unwavering dedication to helping others make him not only a phenomenal colleague but also a leader and mentor to all.”

## Resident Peer Nominees for February

### Waqas Ashraf, MBBS
