2022 NY SKIN CLUB PROGRAM

December 12th, 9AM - 6PM

Davis Auditor	rium, Hess Building, 2nd Floor, 1470 Madison Ave, New York, NY 10029
9:00am - 9:15am	Welcome address Elena Ezhkova, Ph.D., Director of SBDRC at Mount Sinai
Session I: Skin homeostasis and repair Moderator: Katie Stewart, Ph.D., Rockefeller University	
9:15am - 9:30am	<i>"A monocyte-leptin-angiogenesis pathway critical for repair post infection"</i> Rachel Kratofil, Ph.D., Postdoctoral Fellow, NYU
9:30am - 9:45am	"Apoptosis recognition receptors regulate skin tissue repair in mice" Olivia Justynski, Ph.D. Candidate, Yale
9:45am - 10:00am	<i>"Neurotransmitter signaling specifies sweat gland stem cell fate through intracellular calcium regulation"</i> Juliana Remark, M.D./Ph.D. Candidate, NYU
10:00am - 10:15am	<i>"Hair follicle dermal stem cell function and regulation"</i> Raghav Sunkara, Ph.D., Postdoctoral Fellow, Mount Sinai
10:15am - 10:30am	Coffee Break
10:30am - 11:00am	SBDRC Cores and Resources Session I Elena Ezhkova, Ph.D., <i>Core A: Administration and Programs</i> Dan Hasson, Ph.D., <i>Core D: Data Analysis and Integration</i>
11:00am - 12:00pm	Carreer Panel Carmit Bar, Ph.D. (Imprint Science), Evan Bardot, Ph.D. (Nature Press), Aaron Mertz, Ph.D. (Aspen Institute), Amy Shyer, Ph.D. (Rockefeller University) Moderator: Ali May, Ph.D., Mount Sinai
:	Please submit your questions for the panelists using the QR code
12:00pm - 1:00pm	Lunch
12:00pm - 1:00pm 1:00pm - 2:00pm	
	Lunch Keynote Talk: Pantelis Rompolas, Ph.D. Assistant Professor, Department of Dermatology, Institute for Regenerative Medicine, University of Pennsylvania "Resolving the dynamic cellular environment of the skin"
	Lunch Keynote Talk: Pantelis Rompolas, Ph.D. Assistant Professor, Department of Dermatology, Institute for Regenerative Medicine, University of Pennsylvania "Resolving the dynamic cellular environment of the skin" Moderator: Matt Tierney, Ph.D., Rockefeller University Session II: Mechanisms of skin diseases
1:00pm - 2:00pm	Lunch Keynote Talk: Pantelis Rompolas, Ph.D. Assistant Professor, Department of Dermatology, Institute for Regenerative Medicine, University of Pennsylvania "Resolving the dynamic cellular environment of the skin" Moderator: Matt Tierney, Ph.D., Rockefeller University Session II: Mechanisms of skin diseases Moderator: Raghav Sunkara, Ph.D., Mount Sinai "Bioorthogonal labeling identifies tumor-shed CSPG4 as a driver of lymph node pre- metastatic niche development in melanoma"
1:00pm - 2:00pm 2:00pm - 2:15pm	Lunch Keynote Talk: Pantelis Rompolas, Ph.D. Assistant Professor, Department of Dermatology, Institute for Regenerative Medicine, University of Pennsylvania "Resolving the dynamic cellular environment of the skin" Moderator: Matt Tierney, Ph.D., Rockefeller University Session II: Mechanisms of skin diseases Moderator: Raghav Sunkara, Ph.D., Mount Sinai "Bioorthogonal labeling identifies tumor-shed CSPG4 as a driver of lymph node pre- metastatic niche development in melanoma" Haley Du Bois, Ph.D. Candidate, NYU "Monogenic mutations implicate STAT1 in hidradenitis suppurativa pathogenesis"
1:00pm - 2:00pm 2:00pm - 2:15pm 2:15pm - 2:30pm	Lunch Keynote Talk: Pantelis Rompolas, Ph.D. Assistant Professor, Department of Dermatology, Institute for Regenerative Medicine, University of Pennsylvania "Resolving the dynamic cellular environment of the skin" Moderator: Matt Tierney, Ph.D., Rockefeller University Session II: Mechanisms of skin diseases Moderator: Raghav Sunkara, Ph.D., Mount Sinai "Bioorthogonal labeling identifies tumor-shed CSPG4 as a driver of lymph node pre- metastatic niche development in melanoma" Haley Du Bois, Ph.D. Candidate, NYU "Monogenic mutations implicate STAT1 in hidradenitis suppurativa pathogenesis" Annelise Colvin, M.D. Candidate, Columbia
1:00pm - 2:00pm 2:00pm - 2:15pm 2:15pm - 2:30pm 2:30pm - 2:45pm	Lunch Keynote Talk: Pantelis Rompolas, Ph.D. Assistant Professor, Department of Dermatology, Institute for Regenerative Medicine, University of Pennsylvania "Resolving the dynamic cellular environment of the skin" Moderator: Matt Tierney, Ph.D., Rockefeller University Session II: Mechanisms of skin diseases Moderator: Raghav Sunkara, Ph.D., Mount Sinai "Bioorthogonal labeling identifies tumor-shed CSPG4 as a driver of lymph node pre- metastatic niche development in melanoma" Haley Du Bois, Ph.D. Candidate, NYU "Monogenic mutations implicate STAT1 in hidradenitis suppurativa pathogenesis" Annelise Colvin, M.D. Candidate, Columbia "Ras drives malignancy through stem cell crosstalk with the microenvironment" Leo Yuan, Ph.D., Postdoctoral Associate, Rockefeller University "Hair follicle keratinocytes as a potential origin of MCC"
1:00pm - 2:00pm 2:00pm - 2:15pm 2:15pm - 2:30pm 2:30pm - 2:45pm 2:45pm - 3:00pm	Lunch Keynote Talk: Pantelis Rompolas, Ph.D. Assistant Professor, Department of Dermatology, Institute for Regenerative Medicine, University of Pennsylvania "Resolving the dynamic cellular environment of the skin" Moderator: Matt Tierney, Ph.D., Rockefeller University Session II: Mechanisms of skin diseases Moderator: Raghav Sunkara, Ph.D., Mount Sinai "Bioorthogonal labeling identifies tumor-shed CSPG4 as a driver of lymph node pre- metastatic niche development in melanoma" Haley Du Bois, Ph.D. Candidate, NYU "Monogenic mutations implicate STAT1 in hidradenitis suppurativa pathogenesis" Annelise Colvin, M.D. Candidate, Columbia "Ras drives malignancy through stem cell crosstalk with the microenvironment" Leo Yuan, Ph.D., Postdoctoral Associate, Rockefeller University "Hair follicle keratinocytes as a potential origin of MCC" Madison Weber, Ph.D. Candidate, Mount Sinai
1:00pm - 2:00pm 2:00pm - 2:15pm 2:15pm - 2:30pm 2:30pm - 2:45pm 2:45pm - 3:00pm 3:00pm - 4:00pm	Lunch Keynote Talk: Pantelis Rompolas, Ph.D. Assistant Professor, Department of Dermatology, Institute for Regenerative Medicine, University of Pennsylvania "Resolving the dynamic cellular environment of the skin" Moderator: Matt Tierney, Ph.D., Rockefeller University Session II: Mechanisms of skin diseases Moderator: Raghav Sunkara, Ph.D., Mount Sinai "Bioorthogonal labeling identifies tumor-shed CSPG4 as a driver of lymph node pre- metastatic niche development in melanoma" Haley Du Bois, Ph.D. Candidate, NYU "Monogenic mutations implicate STAT1 in hidradenitis suppurativa pathogenesis" Annelise Colvin, M.D. Candidate, Columbia "Ras drives malignancy through stem cell crosstalk with the microenvironment" Leo Yuan, Ph.D., Postdoctoral Associate, Rockefeller University "Hair follicle keratinocytes as a potential origin of MCC" Madison Weber, Ph.D. Candidate, Mount Sinai Coffee Break and Poster Session SBDRC Cores and Resources Session II Sameule Marro, Ph.D., Core B: Skin Disease Modeling
