

**Funding Opportunities Monthly Edition
Aug 2024 Due Dates**

Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in Aug 2024. The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>The Fogarty HIV Research Training (HIVRT) Program supports research training that strengthens HIV research capacity of institutions in low-and middle-income countries (LMICs). This FOA offers an opportunity for LMIC institutions to submit a planning grant application to prepare to participate in the Fogarty HIV Research Training Program. This Funding Opportunity Announcement (FOA) does not allow appointed Trainees to lead an independent clinical trial, but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor.</p>			
110642	Fogarty HIV Research Training Program for Low-and Middle-Income Country Institutions (D43 Clinical Trial Optional)	Fogarty International Center/NIH/DHHS	PAR-22-151	22-Aug-2024	1,400,000 USD
	Contact Name	Geetha P Bansal Ph.D.

	Program URL	Link to program URL			
	Deadline Dates (ALL)	22-Aug-2024			
	Synopsis	<p>The purpose of this Funding Opportunity Announcement (FOA) is to encourage applications for research training programs to strengthen the scientific capacity of institutions in low- and middle-income countries (LMICs) to conduct HIV research relevant to the evolving HIV epidemic in their country. This FOA can support training for conducting research in a broad range of HIV research areas across HIV prevention, treatment, care, and quality of life continuum. This includes basic, epidemiologic, clinical, behavioral and social sciences, data science, community-based, implementation, operations, health services, and health systems research. Cross-disciplinary research as well as HIV associated comorbidities and coinfections affecting the HIV epidemic will be supported under this FOA. An application should focus the proposed training program to strengthen research capacity in a defined high priority HIV scientific area aligned with NIH HIV/AIDS research priorities (NOT-OD-20-018) at a specific LMIC institution and collaborating LMIC partner institutions. This FOA allows qualified Trainees to serve as the lead investigator of an independent clinical trial; or to propose a separate ancillary study to an existing trial under the mentorship of an appropriate clinical researcher or to gain research experience in a clinical trial led by another investigator, as part of their research and career development.</p>			
125493	RFA-CA-24-022 -- SBIR Phase IIB Bridge Awards to Accelerate the Development of Cancer-Relevant Technologies Toward Commercialization (R44 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	RFA-CA-24-022	21-Jul-2024 [Optional][LOI/Pre-App]	4,500,000 USD
	Contact Name	Jonathan Franca-Koh, PhD, MBA

	<p>Contact Email fracakohjc@mail.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 21-Jul-2024 [Optional][LOI/Pre-App], 21-Aug-2024</p> <p>Synopsis Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) solicits Small Business Innovation Research (SBIR) applications from small business concerns (SBCs) that seek additional funding to support the next stage of development for cancer-relevant projects that were previously funded under SBIR or STTR Phase II awards from any Federal agency. The purpose of this NOFO is to facilitate the transition of SBIR or STTR Phase II projects to the commercialization stage. This NOFO is expected to promote partnerships between Federally-funded SBIR or STTR Phase II awardees and third-party investors and/or strategic partners to facilitate and accelerate the capital-intensive steps that are required to commercialize new products and services. Applicants must submit a Commercialization Plan, which should include details on any independent third-party investor funding that has already been secured or is anticipated during the Phase IIB Bridge Award project period. It is expected that the level of this independent third-party funding will be equal to or greater than the NCI funds being requested throughout the Phase IIB Bridge Award project period. Proposed projects may address preclinical and/or clinical stages of technology development. Clinical trials may be proposed as appropriate but are not required.</p>				
124937	<p>RFA-CA-24-020 -- Specialized Programs of Research Excellence (SPOREs) in Cancer Health Disparities and Minority Health (CHD-MH) (U54 Clinical Trial Optional)</p>	National Cancer Institute/NIH/DHHS	RFA-CA-24-020	27-Aug-2024 [Optional][LOI/Pre-App]	8,000,000 USD
	<p>Contact Name Leah Hubbard, Ph.D.</p> <p>Contact Telephone 240-276-5693</p> <p>Contact Email leah.hubbard@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 27-Aug-2024 [Optional][LOI/Pre-App], 26-Sep-2024</p> <p>Synopsis The National Cancer Institute (NCI) invites applications for U54 Specialized Programs of Research Excellence in Cancer Health Disparities and Minority Health (CHD-MH SPOREs). The program will fund a network of multidisciplinary, multi-institutional U54 CHD-MH SPOREs uniquely focused on health disparities and/or minority health translational research for improved prevention, early detection, diagnosis, and treatment of cancer in populations who are underserved (and/or underrepresented). U54 CHD-MH SPOREs can investigate more than one cancer type in underserved populations, including groups of highly related cancers (e.g., gastrointestinal, neuroendocrine, and head and neck). The research supported through</p>

		<p>this program must be translational and must stem from knowledge of human biology, addressing the interplay of various determinants of health with the biology of the disease. U54 CHD-MH SPORE projects must have the goal of reaching a translational human endpoint within the project period of the grant.</p>			
126029	RFA-EY-24-003--NEI Research for Low Vision and Blindness Accessibility Tools (R61/R33 Clinical Trial Optional)	National Eye Institute/NIH/DHHS	RFA-EY-24-003	12-Jul-2024 [Optional][LOI/Pre-App]	Not Specified
	<p>Contact Name Cheri Wiggs, PhD</p> <p>Contact Telephone 301-402-0276</p> <p>Contact Email wiggsc@mail.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 12-Jul-2024 [Optional][LOI/Pre-App], 13-Aug-2024</p> <p>Synopsis The purpose of this Notice of Funding Opportunity (NOFO) is to stimulate translational efforts in developing and implementing accessibility devices or interventions that apply new technologies to address challenges faced by individuals living with visual impairment. Critical elements of applications include a clear set of milestones that support development and testing of the tool, device, or intervention proposed; multidisciplinary and collaborative teams that include individuals with lived experience; and a tractable dissemination plan. The overall goal of the program is to push the boundaries of innovation in technology development to address accessibility needs of individuals with visual impairment and create resources that will be made available to the community. This NOFO uses a milestone driven and phased mechanism of award. Initial technology development and feasibility activities (R61 phase) may transition to expanded research support (R33 phase) for validation, larger-scale feasibility, and effectiveness studies. All applications must address both R61 and R33 phases.</p>

Deadline Dates (ALL)	08-Aug-2024
Synopsis	The purpose of the NHGRI Predoctoral to Postdoctoral Transition Award for a Diverse Genomics Workforce (F99/K00) is to support a defined pathway across career stages for talented graduate students from diverse backgrounds, including those from groups underrepresented in biomedical, clinical, behavioral and social sciences. This two-phased award will facilitate completion of a doctoral dissertation (F99) and transition to a strong postdoctoral research position (K00) focused on the scientific, medical, ethical, social and/or legal areas of genomics research. It is anticipated that successful completion of this phased award program will provide students sufficient scientific and career development activities to set them on the path to becoming independent genomics researchers.

The parent project can be an interventional clinical trial, or a clinical study such as an observational study, or a disease-specific repository that will be actively collecting patient samples or clinical data. The parent project(s) should provide a cohort of well-characterized patients, infrastructure, data, and biological samples for the ancillary study. Applications submitted in response to this FOA will undergo an accelerated review and award process. The objective of this FOA is to provide a flexible mechanism to leverage currently funded resources and maximize the return on existing investments in parent projects. Successful ancillary studies will enhance the scientific content and value of the parent projects, improve the research community’s understanding of a disease or organ system in the NIAMS portfolio, and thus may identify novel targets for diagnosis, treatment, and prevention of disease.</p>

	Deadline Dates (ALL)	08-Aug-2024 , 07-Sep-2024 , 08-Dec-2024 , 07-Jan-2025 , 08-Apr-2025 , 07-May-2025 , 08-Aug-2025 , 07-Sep-2025 , 08-Dec-2025 , 07-Jan-2026 , 08-Apr-2026 , 07-May-2026 , 08-Aug-2026 , 07-Sep-2026 , 08-Dec-2026 , 07-Jan-2027 , 08-Apr-2027 , 07-May-2027			
	Synopsis	The purpose of the NIDCR Predoctoral to Postdoctoral Transition Award to Promote a Diverse Dental, Oral and Craniofacial (DOC) Research Workforce (F99/K00) is to support graduate students from diverse backgrounds, including those from groups underrepresented in biomedical and behavioral sciences, over the transition from predoctoral to postdoctoral research training. This phased award program will facilitate completion of graduate PhD or dual degree clinician scientist programs (F99) and smooth transition to mentored postdoctoral positions in DOC research (K00). This Notice of Funding Opportunity (NOFO) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.			
126076	NIDCR Dual Degree Dentist Scientist Predoctoral to Postdoctoral Transition Award (F99/K00 Independent Clinical Trial Not Allowed)	National Institute of Dental and Craniofacial Research/NIH/DHHS	PAR-25-021	08-Aug-2024	Not Specified

	Deadline Dates (ALL)	08-Aug-2024 , 07-Sep-2024 , 08-Dec-2024 , 07-Jan-2025 , 08-Apr-2025 , 07-May-2025 , 08-Aug-2025 , 07-Sep-2025 , 08-Dec-2025 , 07-Jan-2026 , 08-Apr-2026 , 07-May-2026 , 08-Aug-2026 , 07-Sep-2026 , 08-Dec-2026 , 07-Jan-2027 , 08-Apr-2027 , 07-May-2027			
	Synopsis	The purpose of the NIDCR Dual Degree Dentist Scientist Predoctoral to Postdoctoral Transition Award (F99/K00) is to provide support and mentorship to graduate students enrolled in integrated dual degree dental (DDS/DMD) and PhD programs during the transition from predoctoral student to postdoctoral scholar. This phased award will facilitate completion of predoctoral dual degree dentist scientist training (F99) and ensure transition to mentored postdoctoral positions in dental, oral, and craniofacial (DOC) research (K00). It is anticipated that successful completion of this phased award program will enhance dual degree dentist scientists' research career trajectories. This Notice of Funding Opportunity (NOFO) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>This Notice of Funding Opportunity (NOFO) is intended to support novel environmental health research in which an unpredictable event or policy change provides a limited window of opportunity to collect human biological samples or environmental exposure data. The primary motivation of the NOFO is to understand the consequences of natural and human-made disasters, emerging environmental public health threats, and policy changes in the U.S. and abroad. A distinguishing feature of an appropriate study is the need for rapid review and funding, substantially shorter than the typical NIH grant review/award cycle, for the research question to be addressed and swiftly implemented. The shortened timeframe will be achieved by more frequent application due dates and expediting peer review, council concurrence and award issuance. The entire cycle, from submission to award, is expected to be within 4-6 months.</p>

These studies should result in clinically validated biomarkers and clinical outcome assessment measures appropriate for use in upcoming clinical trials. Through the support of trial readiness studies, NINDS expects to enhance the quality and increase the likelihood of success of clinical trials in these rare diseases.</p>				
108301	<p>RFA-NS-22-034 -- HEAL Initiative: Discovery and Validation of Novel Targets for Safe and Effective Pain Treatment (R01 Clinical Trial Not Allowed)</p>	National Institute of Neurological Disorders and Stroke/NIH/DHHS	RFA-NS-22-034	04-Jun-2024	Not Specified
	<p>Contact Name Michael L. Oshinsky, PhD</p> <p>Contact Telephone 301-496-9964</p> <p>Contact Email michael.oshinsky@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 04-Jun-2024 , 07-Aug-2024 , 02-Oct-2024 , 06-Dec-2024</p> <p>Synopsis The purpose of this Funding Opportunity Announcement (FOA) is to promote the discovery and validation of novel therapeutic targets to facilitate the development of pain therapeutics. Specifically, the focus of this FOA is on the basic science discovery of targets in the peripheral nervous system, central nervous system, immune system or other tissues in the body that can be used to develop treatments that have minimal side effects and little to no abuse/addiction liability. Research supported by this FOA must include rigorous validation studies to demonstrate the robustness of the target as a pain treatment target. This will lower the risk of adopting the target in translational projects to develop small molecules, biologics, natural substances, or devices that interact with this target for new pain treatments. Translational research to develop new medical devices is not the focus of this FOA. Basic science studies of pain and related systems in the body are responsive to this FOA and are encouraged in the context of novel pain therapeutic target discovery. This FOA is not specific for any one or group of pain conditions. Projects to identify novel targets for acute pain, chronic pain, migraine, other headache disorders, osteoarthritis, diabetic neuropathy, chemotherapy-induced neuropathy, sickle-cell pain, post stroke</p>

		<p>pain, orofacial pain, etc. will be considered. Projects to identify novel targets for a combination of chronic overlapping pain conditions or for specific pathological conditions will be considered. Projects that seek to identify novel targets in specific populations such as women, children, older adults or other underrepresented groups will also be responsive to this FOA.</p>			
104435	NIA Predoctoral Fellowship Award to Promote Diversity in Translational Research for AD/ADRD (F31)	National Institute on Aging/NIH/DHHS	PAR-21-218	08-Aug-2024	Not Specified
	<p>Contact Name Yuan Luo, Ph.D.</p> <p>Contact Telephone 301-496-9350</p> <p>Contact Email yuan.luo@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 08-Aug-2024</p> <p>Synopsis The purpose of this Funding Opportunity Announcement (FOA) is to promote diversity in the translational research workforce for Alzheimer's disease and Alzheimer's disease-related dementias (AD/ADRD). This predoctoral fellowship program will emphasize the development of skills in data science and drug discovery and their application to various aspects of AD/ADRD research (from populations studies to research that can lead to new treatments and diagnostics, including all aspects of behavioral and social research). It will support research training of promising predoctoral candidates from diverse backgrounds to help them gain critical translational skills in data science and drug discovery. The long-term goal of this program is to develop a diverse translational workforce that can effectively participate in and/or lead a team-science, precision medicine approach to studies of AD/ADRD treatment, prevention, early detection, and disease management and care. This Funding Opportunity Announcement (FOA) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>

Synopsis	This notice of funding opportunity (NOFO) will support high risk high impact studies that 1) develop or apply novel tools or technologies or 2) test novel hypotheses to investigate mechanistic questions in HIV infection, replication, latency, and/or pathogenesis (including neuroHIV) in the context of Substance Use Disorders (SUDs). This initiative focuses on exploration and characterization of signaling pathways that are involved in CNS HIV establishment and expansion. The NOFO aims to promote milestone-driven research to investigate the underlying molecular mechanisms by which HIV infection is initiated, established, and maintained in the CNS and to determine how addictive substances modulate HIV infection, latency and the size and persistence of CNS HIV reservoirs.

Deadline Dates (ALL)	15-Aug-2024 , 15-Aug-2025
Synopsis	Avenir means future in French. Accordingly, the Avenir Award Program for research on Substance Use Disorders (SUD) and HIV looks towards the future by supporting early stage investigators (ESI) proposing highly innovative studies at the intersection of HIV and substance use. Applications responding to this Funding Opportunity Announcement (FOA) must clearly describe the nexus of HIV and substance use and propose research that aligns with NIH HIV/AIDS Research Priorities NOT-OD-20-018. This FOA aims to support broad spectrum of approaches spanning both basic and clinical research that have the potential to benefit substance using populations with or at risk for HIV. Some examples of research areas of interest to NIDA are reducing HIV incidence, optimizing therapies for HIV and SUD, minimizing the the impact of comorbidities, and achieving long-term suppression of HIV in the absence of antiretroviral (ARV) therapy.

Deadline Dates (ALL)	14-Aug-2024 , 14-Aug-2025
Synopsis	The NIDA Avant-Garde Award Program for HIV Research supports exceptionally creative scientists, who propose high-impact studies that open new areas of HIV research in the context of substance use and Substance Use Disorders (SUD) and/or lead to new avenues for prevention and treatment of HIV in people with SUD. The term “avant-garde” refers to highly innovative

---------	---------------	--------------	----------------	---------------	----------------

ideas and/or approaches that have the potential to be transformative. Accordingly, applications responding to this FOA must propose pioneering research that aligns with the NIH HIV/AIDS Research Priorities <https://grants.nih.gov/grants/guide/notice-files/NOT-OD-20-018.html> and is substantially different from what is currently being pursued by the principal investigator or others in the field. In essence, this funding opportunity supports innovative basic, clinical and translational research that may lead to improved therapies or preventive interventions for HIV in people with SUD. Some examples of research studies include developing creative strategies to prevent HIV transmission in high-risk substance using populations, to improve outcomes of HIV and HIV-related comorbidities, and to achieve functional or sterilizing cure of HIV.

This program is a multidisciplinary platform to support basic, epidemiologic, and clinical research on HIV and HIV-associated co-morbidities and co-infections among populations with substance use and substance use disorders (SUDs) and to address research questions at the individual and population level. The purpose of this notice of funding opportunity (NOFO) is to support the continuation of NIDA's HIV Cohorts Program, encouraging existing and new sites to address new emerging and/or high priority research on multidisciplinary aspects of HIV/AIDS and substance use in alignment with NIH-HIV research priorities in order to inform policy or practice. Cohort sites supported under this program are required to report to and collaborate with a NIDA funded Coordinating Center, including participating in research agendas addressing NIDA's high priority areas. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

Deadline Dates (ALL)	14-Jul-2024 [Optional][LOI/Pre-App], 14-Aug-2024
Synopsis	<p>This initiative will support intervention or implementation research that increases public health capacity to reduce the number of new HIV infections among sexual and gender minority (SGM) persons. Studies that address social and structural health determinants and their consequences such as homelessness, criminal justice involvement or forms of intersectional stigma are welcome and consideration should be given to HIV as a syndemic including comorbidities such as sexually transmitted infections, hepatitis C virus, and psychiatric disorder. Studies can include individuals, couples, peers, providers and/or health care systems as their primary foci. Research is invited that adds substance use content to existing, widely used evidence-based HIV interventions, as well as novel intervention approaches that provide new ways of addressing substance use among SGM persons. This notice of funding opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

Synopsis	<p>The purpose of this notice of funding opportunity (NOFO) is to encourage clinical research that will identify and validate Novel targets for non-invasive brain stimulation (NIBS) to treat substance use disorders (SUD) and Substance use disorder (SUD)-relevant neurobiological, cognitive, and behavioral responses to NIBS that may precede clinical outcomes like reduced craving or substance use Applications are expected to be exploratory and developmental in nature. As such, these studies may involve considerable risk of failure but may lead to a breakthrough in a particular area that could have a major impact on SUD research involving NIBS. This NOFO uses a R61/R33 Phased Innovation award activity code to support applications that propose Basic Experimental Studies Involving Humans (BESH) that meet both the definition of basic research and the NIH definition of a clinical trial. Types of studies that should submit under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

This NOFO invites research projects with the potential to open new areas of basic and clinical HIV/AIDS research and/or lead to new avenues for prevention, treatment and cure of HIV among people who use addictive substances. This initiative is open only to research teams of three to six PD/Pis proposing to pursue challenging research questions at the intersection of HIV and substance use. Teams are encouraged to consider far-reaching objectives that will produce major advances in high priority HIV research areas for the institute and the NIH (NOT-OD-20-018: UPDATE: NIH HIV/AIDS Research Priorities and Guidelines for Determining HIV/AIDS Funding). This NOFO addresses basic science, epidemiologic, clinical, intervention, and implementation research related to HIV in people with substance use and substance use disorders (SUDs). This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. 	Synopsis	The purpose of this notice of funding opportunity (NOFO) is to accelerate the development of devices to treat Substance Use Disorders (SUDs). The continuing advances in technologies offer unprecedented opportunities to develop neuromodulatory or neurophysiological devices that are safe and effective SUD treatments. The objective is to move devices to their next step in the FDA approval process, with the ultimate goal of generating new, FDA approved device-based treatments for SUDs. Applications may focus on the pre-clinical and/or clinical development and testing of new devices or existing devices approved for other indications. Applications may evaluate the mechanism of action of a device. The UG3/UH3 Cooperative Agreement involves two phases. The UG3 phase, for up to two years, is designed to support a project with specific milestones to be accomplished by the end of the period. The UH3 phase is to provide funding for up to three additional years following successful completion of the UG3. UG3 projects that meet their milestones will be administratively considered by the National Institute on Drug Abuse and prioritized for transition to the UH3 phase. Investigators submitting to this NOFO must address both UG3 and UH3 phases.

research on social behavior and its relationships with the onset, trajectory, and impact of Substance Use Disorders (SUDs) and comorbidities. This NOFO is intended to support basic or early translational studies that may, but need not, be considered NIH clinical trials; this may include mechanistic clinical trials, observational studies, or secondary analysis of human data. This NOFO is not intended to support studies designed to test the safety or demonstrate the efficacy of an intervention, or studies in animal models. Applications in which all the research meets the criteria for Basic Experimental Studies involving Humans (BESH) should be submitted under the companion NOFO, RFA-DA-25-033. Studies involving animals should be submitted under the companion 'Clinical Trials Not Allowed' NOFO, RFA-DA-25-034. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.

Synopsis | The purpose of this notice of funding opportunity (NOFO) is to solicit applications proposing studies that meet the NIH definition of Basic Experimental Studies involving Humans (BESH) and consist of mechanistic, transdisciplinary research on social behavior and its relationships with the onset, trajectory, and impact of Substance Use Disorders (SUDs) and comorbidities. This NOFO is specifically soliciting applications proposing BESH research, referred to in NOT-OD-18-212 as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Applications proposing observational studies in humans, secondary analysis of human data, or research aiming to examine specific disease processes should be submitted under the companion 'Clinical Trials Optional' NOFO RFA-DA-25-032. Research involving animal models should be submitted under the companion 'Clinical Trials Not Allowed' NOFO RFA-DA-25-034. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.

Deadline Dates (ALL)	14-Jul-2024 [Optional][LOI/Pre-App], 14-Aug-2024																		
Synopsis	<p>The purpose of this notice of funding opportunity (NOFO) is to solicit applications proposing mechanistic transdisciplinary research in animal models that integrates approaches across social/cognitive neuroscience with perspectives from fields with complementary approaches to the study of social behavior, with the goal of developing a testable conceptual or computational model that provides mechanistic insights into social behavior and its relationships with the onset, trajectory and impact of Substance Use Disorders (SUDs) and comorbidities. This NOFO is intended to support basic or translational research in non-human animal models, including secondary analysis of data from research in animal models. Applications including studies involving human subjects should submit under one of the companion NOFOs. Applications with observational research in humans, secondary analysis of human subjects data, or research specifically aimed at studying disease processes or evaluating clinical interventions should submit under the companion Clinical Trials Optional NOFO, RFA-DA-25-032. Applications proposing Basic Experimental Studies involving Humans should be submitted under the companion “Basic Experimental Studies with Humans (BESH) Required” NOFO, RFA-DA-25-033. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 13-Aug-2024</p> <p>Synopsis The National Institute on Drug Abuse (NIDA) Cutting-Edge Basic Research Award (CEBRA) is designed to foster highly innovative or conceptually creative research related to the etiology, pathophysiology, prevention, or treatment of substance use disorders (SUDs). It supports high-risk and potentially high-impact research that is underrepresented or not included in NIDA's current portfolio that has the potential to transform SUD research. The proposed research should: 1. develop, and/or adapt, revolutionary techniques or methods for addiction research or that show promising future applicability to SUD research; and /or 2. test an innovative and significant hypothesis for which there are scant precedent or preliminary data and which, if confirmed, would transform current thinking.</p>				
108340	RFA-DA-22-037 -- Accelerating the Pace of Drug Abuse Research Using Existing Data (R01 Clinical Trial Optional)	National Institute on Drug Abuse/NIH/DHHS	RFA-DA-22-037	05-Aug-2024	Not Specified
	<p>Contact Name Marsha F. Lopez, Ph.D., M.H.S.</p> <p>Contact Telephone 301-443-6504</p> <p>Contact Email marsha.lopez@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 05-Aug-2024 , 15-Nov-2024</p> <p>Synopsis The purpose of this Funding Opportunity Announcement (FOA) is to invite applications proposing innovative analysis of existing social science, behavioral, administrative, and neuroimaging data to study the etiology and epidemiology of substance using behaviors (defined as alcohol, tobacco, prescription, and other substances) and related disorders, prevention of substance use and HIV, and health service utilization. This FOA encourages the analyses of public use and other extant community-based or clinical datasets to their full potential in order to increase our knowledge of etiology, trajectories of substance using behaviors and their consequences including morbidity and mortality, risk and resilience in the development of psychopathology, strategies to guide the development, testing, implementation, and delivery of high quality, effective and efficient services for the prevention and treatment of substance use disorder and HIV. Primary data collection is not allowed for applications in response to this FOA.</p>				
123276	NIDA Mentored Clinical Scientist Development Program Award in Substance Use and Substance Use Disorder Research (K12 Clinical Trial Optional)	National Institute on Drug Abuse/NIH/DHHS	PAR-24-089	05-Aug-2024	3,750,000 USD
	Contact Name Dr. Lindsey Friend				

NIH Funding Opportunities

	<p>Contact Telephone 301-402-1428</p> <p>Contact Email NIDA_Training@nida.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 05-Aug-2024 , 13-Nov-2024 , 06-Mar-2025 , 05-Aug-2025 , 13-Nov-2025 , 06-Mar-2026 , 05-Aug-2026 , 13-Nov-2026</p> <p>Synopsis This notice of funding opportunity (NOFO) encourages applications for institutional research career development (K12) programs that propose to support intensive, supervised research and career development experiences leading to research independence for clinician scientists (Scholars) conducting substance use and substance use disorder (SUD) research. For this NOFO, clinician scientists may include (but are not limited to) physicians, clinical psychologists, social workers, and pharmacists. Scholars are expected to be supported for 3-4 years on consecutive 12-month appointments. Candidates selected for support as scholars must hold a doctorate and commit a minimum of 9 person months (equivalent to 75% of full-time professional effort) to conducting clinical research and career development activities associated with the proposed K12 program. Scholars appointed through the proposed program may serve as the lead for a NIH-defined clinical trial that fulfills the NIH requirement for a minimal risk trial. A minimal risk trial is one in which the probability and magnitude of harm or discomfort anticipated in the research are not greater in and of themselves than those ordinarily encountered in daily life or during the performance of routine physical or psychological examinations or tests. This Notice of Funding Opportunity (NOFO) allows appointment of Scholars (K12) proposing to serve as the lead investigator of an independent clinical trial; or proposing a separate ancillary clinical trial; or proposing to gain research experience in a clinical trial led by another investigator, as part of their research and career development. Applicants may review the information found on the NIH Office of Extramural Research "Clinical Trial Requirements for Grants and Contracts": https://grants.nih.gov/policy/clinical-trials.htm for more details about how NIH is enhancing accountability and transparency of clinical research.</p>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>arching goal of this NIDA R25 program is to support educational activities that complement and/or enhance the training of a workforce to meet the nation’s biomedical, behavioral and clinical research needs. This FOA is intended to support research education activities that enhance the knowledge of substance use (SU) and substance use disorder (SUD) research. The program is intended for those in clinically focused careers and/or those training for careers as clinicians/health service providers, clinical researchers, or optimally a combination of the two. This mechanism may not be used to support non-research-related clinical training. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on Courses for Skills Development and Research Experiences. The proposed research education programs must include both courses for skills development and research experiences with primary emphasis on research experiences. Proposed courses should be developed in conjunction with and support research experiences to enhance skills development.</p>

	<p>Contact Telephone 301-827-5909</p> <p>Contact Email aklinwm@mail.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 09-Aug-2024 , 21-Mar-2025</p> <p>Synopsis The purpose of this Funding Opportunity Announcement (FOA) is to encourage research grant applications on the development and testing of behavioral and integrative treatments for substance use and dependence. This FOA reaffirms the continued commitment of NIDA to major programs of research on behavioral and integrative treatments. The term "behavioral treatments" is used here in a broad sense and includes but is not limited to psychotherapies, cognitive, relapse prevention, remediative, rehabilitative, skills training, counseling, family, and exercise therapies. Screening, brief, computerized, adherence, prevention interventions for HIV risk behaviors, and interventions that target therapist training and fidelity also are included. Integrative refers to combinations with other treatments, including pharmacotherapies or other complementary approaches. The development and testing of putative targets and mechanisms of behavior change, as well as the use and development of valid and reliable assessment tools are crucial to the three stages of treatment research supported under this initiative: Stage I (treatment generation, refinement) encompasses all activities related to the creation of a new behavioral intervention. This stage also includes the modification, adaptation, or refinement of an existing intervention (Stage IA). Stage I culminates in feasibility and pilot testing (Stage 1B). For example, one can conduct Stage I studies in research settings, with research therapists and research subjects, or in community settings with community providers. Stage II ("Efficacy") research consists of experimental testing of promising behavioral interventions in research settings, with research-based therapists/providers. Stage III ("Efficacy in Real-World") research consists of experimental testing of promising behavioral interventions in community settings, with community-based therapists/providers and patients, while maintaining a high level of control necessary to establish internal validity. Stages I, II, and III all include a focus on theory-derived, targets/putative moderators, mediators, and change mechanisms that underlie the treatment, and studies that optimize combined, sequential, or integrated behavioral/pharmacological treatments.</p>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

	<p>Synopsis</p>	<p>Invasive surgical procedures offer the opportunity for unique intracranial interventions such as the ability to record and stimulate intracranially within precisely localized brain structures in humans. Human studies using invasive technology are often constrained by a limited number of patients and available resources, and frequently the resulting datasets need to be aggregated across sites to achieve sufficient statistical power. To overcome these fundamental barriers and to investigate high-impact questions in human neuroscience, this Notice of Funding Opportunity (NOFO) seeks applications to assemble diverse, integrated, multi-disciplinary teams that cross boundaries of interdisciplinary collaboration. The research should be proposed as exploratory research and planning activities to establish feasibility, proof-of-principle and early-stage development that, if successful, would support, enable, and/or lay the groundwork for a potential, subsequent Research Opportunities Using Invasive Neural Recording and Stimulating Technologies in the Human Brain, as described in the companion NOFO (RFA-NS-22-041). Projects should maximize opportunities to conduct innovative in vivo neuroscience research made available by direct access to the brain from invasive surgical procedures. Projects should employ approaches guided by specified theoretical constructs and by quantitative, mechanistic models where appropriate. Recipients will join a consortium working group, coordinated by the NIH, to identify consensus standards of practice, including neuroethical considerations, to collect and provide data for ancillary studies, and to aggregate and standardize data for dissemination among the wider scientific community.</p>

engineering and end-user feedback, appropriate for a path towards sustainable dissemination and user-friendly incorporation into routine neuroscience research. Applications may propose development of instrumentation hardware and/or devices and associated software. Approaches may utilize any modality such as optical, electrical, magnetic, or acoustic recording/manipulation, to target neuronal electrical signals or other forms of neural activity, including intracellular signaling and engagement of non-neuronal cells in circuit function. This FOA is a re-issue of RFA-NS-21-027, but unlike the previous FOA the focus is narrowed to technologies associated with recording/manipulation instrumentation and devices, and excludes projects primarily focused on development of molecular reagents. Potential applicants primarily optimizing molecular constructs should consider RFA-MH-22-245, BRAIN Initiative: Engineering and optimization of molecular technologies for functional dissection of neural circuits (UM1 Clinical Trial Not Allowed). For projects at an earlier stage of development of molecular reagents, potential applicants should consider the companion FOA (RFA-NS-24-004) or alternative BRAIN Initiative announcements including RFA-MH-21-175 and RFA-EY-21-001. For this and the companion FOA, the aim of the proposed technologies should be to reduce major barriers to conducting neurobiological experiments, including considerations of cost and ease of access, and to enable new discoveries for understanding neural circuit function. Technologies should address major challenges associated with recording and modulating CNS activity, at cellular or circuit resolution, and should contribute to an overall ecosystem of technologies spanning multiple spatial and temporal scales in any region throughout the CNS. The approaches should be compatible with experiments in behaving animals, with an expectation that they will be validated with in vivo experiments during the course of the project. Proposed validation experiments must focus on demonstrating the capabilities and potential impact of the technology, rather than advancing the state of biological knowledge as the primary project goal. Applications are encouraged to integrate multiple approaches, and where appropriate, to leverage diverse domains of expertise from biological, chemical, and physical sciences, engineering, computational modeling, and statistical analysis. This FOA requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn.

116939	RFA-NS-24-004 -- BRAIN Initiative: New Technologies and Novel Approaches for Recording and Modulation in the Nervous System (R01 Clinical Trial Not Allowed)	National Institutes of Health/DHHS	RFA-NS-24-004	02-Aug-2024 [Optional][LOI/Pre-App]	Not Specified

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 02-Aug-2024 [Optional][LOI/Pre-App], 01-Oct-2024 , 03-Apr-2025 [Optional][LOI/Pre-App], 02-Jun-2025 , 21-Nov-2025 [Optional][LOI/Pre-App], 20-Jan-2026</p> <p>Synopsis This FOA seeks applications for proof-of-concept testing and development of new technologies and novel approaches for recording and modulation of neural cells and circuits, to address major challenges and enable transformative understanding of dynamic signaling in the central nervous system. Preliminary feasibility data are not required, and it is expected that the proposed research may be high-risk, but if successful could profoundly change the course of neuroscience research. Applications may propose development of instrumentation hardware and/or devices and associated software, and/or molecular constructs for sensing and manipulating neural activity. Approaches may utilize any modality such as optical, electrical, magnetic, or acoustic recording/manipulation, to target neuronal electrical signals or other forms of neural activity, including intracellular signaling and engagement of non-neuronal cells in circuit function. A companion FOA (RFA-NS-24-005) is targeted to projects focused on optimization of instrumentation and devices that are later in the development cycle, where iterative optimization and end-user testing is needed. The companion FOA does not allow projects primarily focused on development or optimization of molecular constructs for recording and manipulating neural activity. Projects of this nature are supported by this FOA and other BRAIN Initiative announcements including RFA-MH-22-245, RFA-MH-21-175, and RFA-EY-21-001. For this and the companion FOA, the aim of the proposed technologies should be to reduce major barriers to conducting neurobiological experiments, including considerations of cost and ease of access, and to enable new discoveries for understanding neural circuit function. Technologies should address major challenges associated with recording and modulating CNS activity, at cellular or circuit resolution, and should contribute to an overall ecosystem of technologies spanning multiple spatial and temporal scales in any region throughout the CNS. The approaches should be compatible with experiments in behaving animals, with an expectation that they will be validated with in vivo experiments during the course of the project. Proposed validation experiments must focus on demonstrating the capabilities and potential impact of the technology, rather than advancing the state of biological knowledge as the primary project goal. Applications are encouraged to integrate multiple approaches, and where appropriate, to leverage diverse domains of expertise from biological, chemical, and physical sciences, engineering, computational modeling, and statistical analysis. NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 21-Aug-2024</p> <p>Synopsis This Notice of Funding Opportunity (NOFO) solicits applications for one or more Data Coordinating Centers (DCCs) to support BRAIN CONNECTS, a networked consortium of Comprehensive Centers and Specialized Projects funded under RFA-NS-22-047, RFA-NS-22-048, and RFA-NS-22-049. The goals of BRAIN CONNECTS awards are to develop the research capacity and technical capabilities for comprehensive brain-wide connectivity mapping in mouse, human, and non-human primate (NHP). BRAIN CONNECTS projects will collect and process unprecedented volumes of anatomical data by scaling up cutting-edge acquisition modalities and analysis methods, to demonstrate the feasibility and potential impact of production, analysis, dissemination, and interpretation of connectivity maps from entire brains. The resulting feasibility data from these awards are expected to inform NIH decisions on program continuation in a potential subsequent five-year funding period for production of brain-wide wiring diagrams. Through this NOFO, NIH expects to fund one or more BRAIN CONNECTS DCCs, which will collaborate with the technology development projects to (1) coordinate activities of the BRAIN CONNECTS Network, (2) develop and harmonize common data processing pipelines, (3) integrate and disseminate data analytic tools and capabilities, (4) establish a unified knowledge base for connectivity data of diverse modalities, and (5) organize and implement outreach and engagement to the wider research community and the general public. Awards will be integrated into the BRAIN CONNECTS Network as a coordinated effort aimed at developing the ability to generate whole-brain wiring diagrams across multiple scales and species.</p>				
122370	<p>Multi-Sectoral Preventive Interventions That Address Social Determinants of Health in Populations That Experience Health Disparities (UG3/UH3, Clinical Trial Required)</p>	National Institutes of Health/DHHS	PAR-24-053	05-Jul-2024 [Optional][LOI/Pre-App]	Not Specified

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

Funded under a cooperative agreement, projects participating in the MSPI Research Network will collaborate to share approaches, methods, and data, working closely with NIH Institutes, Offices and Centers. Applicants applying to this NOFO are encouraged to review the Coordinating Center NOFO to fully understand the MSPI Research Network structure and activities. This NOFO solicits bi-phasic research projects proposed in UG3/UH3 Phased Innovation Awards Cooperative Agreement applications. Funding for the UG3 phase (phase I) will be used to demonstrate sufficient preparation, feasibility and capacity to meet foundational milestone targets specific to the work proposed. A UG3 project that meets its milestones will be administratively considered by NIH and prioritized for transition to the UH3 award (phase II). Applicants responding to this NOFO must address specific aims and milestones for both the UG3 and UH3 phases.

111545	FCO-- AMENDMENT -- Research Opportunity Announcement (ROA): NIH All of Us Engagement, Communications, and Enrollment Partnerships	National Institutes of Health/DHHS	OTA-22-006	31-May-2024	Not Specified

Deadline Dates (ALL)	31-May-2024 , 30-Aug-2024 , 29-Nov-2024 , 28-Feb-2025 , 23-May-2025
Synopsis	<p>Research Opportunity Announcement (ROA) Title: All of Us Engagement, Communications, and Enrollment Partnerships ROA Number: OTA-22-006 ROA Open Period: May 26, 2022 to May 23, 2025 (Note: open period includes multiple white paper deadlines) Overview: The All of Us Research Program, within the Office of the Director (OD) at the National Institutes of Health (NIH), has issued a research opportunity announcement to solicit white papers supporting various Areas of Interest (AOIs). A ROA is a method of solicitation that announces the anticipated availability of Other Transactions (OT) awards, a special type of legal instrument other than contracts, grants, or cooperative agreements. Purpose: The All of Us Research Program is a historic effort to gather data from at least 1 million people, with the goal of accelerating health research and medical breakthroughs, and enabling individualized prevention, treatment, and care. The program is creating a national research resource to inform thousands of studies, covering a wide variety of health conditions. Researchers will use data from the program to learn more about how individual differences in lifestyle, environment, and biological makeup can influence health and disease. The purpose of this announcement is to fund organizations who can help All of Us build its cohort of volunteers who reflect the rich diversity of the United States and are actively engaged as partners. These funded organizations will help design and implement strategies to raise awareness of the program through community and health care provider organizations, drive increased enrollment of participants, foster regular communication with participants, and engage the research community to use the data being gathered. Award Project Duration: Award periods are anticipated to</p>

 Deadline Dates (ALL) | 05-Aug-2024 , 15-Nov-2024

Synopsis | The purpose of this Funding Opportunity Announcement (FOA) is to invite applications proposing innovative analysis of existing social science, behavioral, administrative, and neuroimaging data to study the etiology and epidemiology of substance using behaviors (defined as alcohol, tobacco, prescription, and other substances) and related disorders, prevention of substance use and HIV, and health service utilization. This FOA encourages the analyses of public use and other extant community-based or clinical datasets to their full potential in order to increase our knowledge of etiology, trajectories of substance using behaviors and their consequences including morbidity and mortality, risk and resilience in the development of psychopathology, strategies to guide the development, testing, implementation, and delivery of high quality, effective and efficient services for the prevention and treatment of substance use disorder and HIV. Primary data collection is not allowed for applications in response to this FOA.

124566	RFA-MD-24-006 -- Innovations for Healthy Living - Improving Minority Health and Eliminating Health Disparities (R43/R44 - Clinical Trial Optional)	National Institutes of Health/DHHS	RFA-MD-24-	10-Jun-2024	Not Specified

Deadline Dates (ALL)	30-Jul-2024 [Optional][LOI/Pre-App], 30-Aug-2024
Synopsis	This NOFO encourages applications for the Lasker Clinical Research Scholars Program for the purpose of supporting the research activities during the early stage careers of independent clinical researchers. The program offers the opportunity for a unique bridge between the NIH intramural and extramural research communities and contains two phases. In the first phase, Lasker Scholars will receive appointments for up to 5-7 years as tenure-track investigators within the NIH Intramural Research Program with independent research budgets. In the second phase, successful scholars will receive up to 3 years of NIH support for their research at an extramural research facility; or, the Scholar can be considered to remain as an investigator within the intramural program.

	<p>Contact Name Barbara Sina Ph.D.</p> <p>Contact Telephone 301-402-9467</p> <p>Contact Email sinab@mail.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jul-2024 [Optional][LOI/Pre-App], 06-Aug-2024 , 07-Jul-2025 [Optional][LOI/Pre-App], 06-Aug-2025 , 07-Jul-2026 [Optional][LOI/Pre-App], 06-Aug-2026</p> <p>Synopsis This Funding Opportunity Announcement (FOA) encourages joint applications for the Global Infectious Disease (GID) Research Training programs from low- and middle-income country (LMIC) and U.S. institutions. The application should propose a collaborative training program that will strengthen the capacity of a LMIC institution to conduct infectious disease research (not including HIV/AIDS). FIC will support research training programs that focus on 1) major endemic or life-threatening emerging infectious diseases, 2) neglected tropical diseases, 3) infections that frequently occur as co-infections in HIV infected individuals or 4) infections or microbiomes associated with non-communicable disease conditions of public health importance in LMICs. Advanced scientific training related to prevention, treatment or public health approaches to any technical area of basic, epidemiological, clinical, behavioral or social science health research may be supported. Research training programs should incorporate didactic, mentored research and professional development skills components to prepare individuals for sustainable careers that will have significant impact on the priority health research needs of LMICs. This Notice of Funding Opportunity (NOFO) allows appointment of Trainees (D43) proposing to serve as the lead investigator of an independent clinical trial; or proposing a separate ancillary clinical trial; or proposing to gain research experience in a clinical trial led by another investigator, as part of their research and career development.</p>				
123146	Stephen I. Katz Early Stage Investigator Research Project Grant (R01 Basic Experimental Studies with Human Required)	National Institutes of Health/DHHS	PAR-24-076	29-May-2024	Not Specified

Katz Early Stage Investigator Research Project Grant supports an innovative project that represents a change in research direction for an early stage investigator (ESI) and for which no preliminary data exist. Applications submitted to this Notice of Funding Opportunity (NOFO) must not include preliminary data. Applications must include a separate attachment describing the change in research direction. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. This Parent Notice of Funding Opportunity is for basic science experimental studies involving humans, referred to in NIH Grants Policy Statement Section 4.1.3.1 as prospective basic science studies involving human participants. These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Studies conducted with specific applications toward processes or products in mind should submit under the appropriate Clinical Trials Required or Clinical Trial Optional NOFO.</p>

Deadline Dates (ALL)	15-Jul-2024 , 18-Aug-2024 , 15-Jan-2025 , 18-Apr-2025 , 15-Jul-2025 , 18-Aug-2025 , 15-Jan-2026 , 17-Apr-2026 , 15-Jul-2026 , 18-Aug-2026
Synopsis	<p>The Blueprint Neurotherapeutics Network (BPN) invites applications from neuroscience investigators seeking support to advance their small molecule drug discovery and development projects into the clinic. Participants in the BPN are responsible for conducting all studies that involve disease- or target-specific assays, models, and other research tools and receive funding for all activities to be conducted in their own laboratories. In addition, applicants will collaborate with NIH-funded consultants and can augment their project with NIH contract research organizations (CROs) that specialize in medicinal chemistry, pharmacokinetics, toxicology, formulations development, chemical synthesis including under Good Manufacturing Practices (GMP), and Phase I clinical testing. Projects can enter either at the Discovery or the Development stage. In the Discovery phase the goal is to characterize and optimize promising hit compounds using medicinal chemistry to establish structure activity relationships (SAR) and structure property relationships (SPR) including in vitro and in vivo properties such as metabolism, selectivity, toxicity, etc. As projects enter or advance to the Development stage the goal is to advance a single development candidate through Investigational New Drug (IND)-enabling toxicology studies and phase I clinical testing. Projects can enter the program at the Development stage and progress in a shorter period to IND enabling toxicology studies and phase I clinical testing. BPN recipient Institutions retain their assignment of intellectual property (IP) rights and gain assignment of IP rights from the BPN contractors and consultants (and thereby control the patent prosecution and licensing negotiations) for drug candidates developed in this program.</p>

This NOFO supports small business concerns (SBCs) in employing and developing researchers as entrepreneurial Program Directors/Principal Investigators (PDs/Pis). In addition to supporting research and development efforts at the SBC, a major component of this NOFO is entrepreneurial training, mentoring, and career development of the PD/PI. Optimal PDs/Pis for this award are scientists and professionals with research, technology development, and/or healthcare delivery skills and experience, but limited entrepreneurial and independent (non-mentored) research leadership experience. PDs/Pis are expected to grow their entrepreneurial skillset while working in a small business to develop promising technologies and products that align with NIH's or CDC's missions to improve health and save lives.</p>

Goldstein, PhD</p> <p>Contact Telephone 301-827-4124</p> <p>Contact Email amy.goldstein@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 14-Jun-2024 , 14-Aug-2024 , 11-Oct-2024 , 13-Dec-2024 , 14-Feb-2025 , 17-Mar-2025 , 13-Jun-2025 , 14-Aug-2025 , 10-Oct-2025 , 15-Dec-2025 , 13-Feb-2026 , 16-Mar-2026 , 15-Jun-2026 , 14-Aug-2026 , 14-Oct-2026 , 14-Dec-2026</p> <p>Synopsis The purpose of this notice of this funding opportunity (NOFO) is to support translational research across epidemiology, addiction services, and prevention to, ultimately, reduce the burden of substance use on public health. This NOFO encourages research that facilitates rapid translation from one discipline to another (e.g., epidemiology to prevention); supports community/stakeholder engagement in substance use treatment and prevention clinical trials; or reduces the research to practice gap through the rapid transition from pilot study to clinical trial, or effectiveness to implementation study. The goal is to support translational research improving our ability to 1) identify and characterize malleable individual,</p>

familial, behavioral, developmental, and socio-cultural/environmental factors (within the population or precise subgroups) with the potential for multi-directional transfer of knowledge; 2) prevent initiation of substance use or progression to misuse or use disorder; and 3) maximize the efficient delivery of high-quality, personalized addiction treatment and related services to ultimately inform and facilitate real world responses designed to reduce the burden of substance use, misuse and/or addiction on the health of the population. This NOFO invites projects for which preliminary feasibility or pilot data are not available. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.

Synopsis	Through this Notice of Funding Opportunity (NOFO), the National Institutes of Health (NIH) and Centers for Disease Control and Prevention (CDC) aim to foster the advancement and accelerate the growth of early-career scientists transitioning to entrepreneurship by simultaneously supporting their entrepreneurial development and the conduct of research and development under their direction. This NOFO supports small business concerns (SBCs) in employing and developing researchers as entrepreneurial Program Directors/Principal Investigators (PDs/PIs). In addition to supporting research and development efforts at the SBC, a major component of this NOFO is entrepreneurial training, mentoring, and career development of the PD/PI. Optimal PDs/PIs for this award are scientists and professionals with research, technology development, and/or healthcare delivery skills and experience, but limited entrepreneurial and independent (non-mentored) research leadership experience. PDs/PIs are expected to grow their entrepreneurial skillset while working in a small business to develop promising technologies and products that align with NIH's or CDC's missions to improve health and save lives.

Both small businesses and universities are drivers of technological innovation in the United States (U.S.), often working together to advance innovative ideas into products that can benefit the U.S. population. While most NIH funding supports basic research in university laboratories, the NIH also supports innovative technology development in U.S. small businesses through its SBIR and STTR programs. As technologies transition from academic discovery to small businesses, two common challenges arise, identifying the right team with the right expertise to take the product into a small business, and funding for early-stage technology development. This NOFO seeks to address both challenges simultaneously by having two equally important goals: entrepreneurial mentoring support, and product development support.</p>

Synopsis	The purpose of this Ruth L. Kirschstein National Research Service Award (NRSA) Individual Predoctoral Fellowship to Promote Diversity in Health-Related Research award is to enhance the diversity of the health-related research workforce by supporting the research training of predoctoral students from diverse backgrounds, including those from groups that are underrepresented in the biomedical, behavioral, or clinical research workforce. Through this award program, promising predoctoral students will obtain individualized, mentored research training from outstanding faculty sponsors while conducting well-defined research projects in scientific health-related fields relevant to the missions of the participating NIH Institutes and Centers. The proposed mentored research training is expected to clearly enhance the individual's potential to develop into a productive, independent research scientist. This Notice of Funding Opportunity (NOFO) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>This Funding Opportunity Announcement (FOA) establishes an accelerated review/award process to support time-sensitive research to evaluate a new policy or program that is likely to influence obesity related behaviors (e.g., dietary intake, physical activity, sedentary behavior, and/or sleep) and/or weight outcomes in an effort to prevent or reduce obesity. This FOA is intended to support research where opportunities for empirical study are, by their very nature, only available through expedited review and funding. All applications submitted to this FOA must demonstrate that the evaluation of an obesity-related policy or program offers an uncommon and scientifically-compelling research opportunity that will only be available if the research is initiated with minimum delay. For these reasons, applications submitted to this time-sensitive FOA are not eligible for re-submission. It is intended that eligible applications selected for funding will be awarded within 4 months of the application due date; however, administrative requirements and other unforeseen circumstances may delay issuance dates beyond that timeline.</p>			
102724	Blueprint Neurotherapeutics Network (BPN): Biologic-based Drug Discovery and Development for Disorders of the Nervous System (UG3/UH3 Clinical Trial Optional)	National Institutes of Health/DHHS	PAR-21-163	15-Jul-2024	Not Specified

	Deadline Dates (ALL)	15-Jul-2024 , 19-Aug-2024			
	Synopsis	<p>The Blueprint Neurotherapeutics Network for Biologics (BPN-Biologics) provides support for biologic-based therapeutic discovery and development, from lead optimization through phase I clinical testing. This Funding Opportunity Announcement (FOA) supports preclinical discovery and development of potential therapeutic Biotechnology Products and Biologics including, but not limited to, large biologic macromolecules, (e.g., proteins, antibodies, and peptides), gene-based therapies (i.e., oligonucleotide- and viral-based), cell therapies, and novel emerging therapies (e.g., microbial and microbiome therapies). Applicants will collaborate with NIH-funded consultants and can augment their project with NIH contract research organizations (CROs) that specialize in manufacturing, scaling, pharmacokinetics, toxicology, and Phase I clinical testing. BPN-Biologics awardee institutions retain their assignment of IP rights and gain assignment of IP rights from the BPN-Biologics contractors (and thereby control the patent prosecution and licensing negotiations) for biotherapeutic candidates developed in this program.</p>

		<p>(FOA) supports preclinical discovery and development of potential therapeutic Biotechnology Products and Biologics including, but not limited to, large biologic macromolecules, (e.g., proteins, antibodies, and peptides), gene-based therapies (i.e., oligonucleotide- and viral-based), cell therapies, and novel emerging therapies (e.g., microbial and microbiome therapies). Applicants will collaborate with NIH-funded consultants and can augment their project with NIH contract research organizations (CROs) that specialize in manufacturing, scaling, pharmacokinetics, toxicology, and Phase I clinical testing. BPN-Biologics awardee institutions retain their assignment of IP rights and gain assignment of IP rights from the BPN-Biologics contractors (and thereby control the patent prosecution and licensing negotiations) for biotherapeutic candidates developed in this program.</p>

The primary goal of the ECosystem for Leading Innovation in Plasma Science and Engineering (ECLIPSE) program is to identify and capitalize on opportunities for bringing fundamental plasma science investigations to bear on problems of societal and technological need within the scope of science and engineering supported by the participating NSF programs. The ECLIPSE meta-program has been created to foster an inclusive community of scientists and engineers, an ecosystem spanning multiple NSF Directorates, in the pursuit of translational research at the interface of fundamental plasma science and technological innovation. The ECLIPSE program builds on the long history of NSF leadership in supporting multi-disciplinary research in plasma science and engineering, and is intended to enhance organizational unity within NSF, and potentially with other funding agencies, in considering proposals and supporting projects that may otherwise struggle to find a natural home within the existing hierarchy of Directorates, Divisions, and programs within the Foundation.</p>

Synopsis	Correctness for Scientific Computing Systems (CS2) is a joint program of the National Science Foundation (NSF) and the Department of Energy (DOE). The program addresses challenges that are both core to DOE's mission and essential to NSF's mission of ensuring broad scientific progress. The program's overarching goal is to elevate correctness as a fundamental requirement for scientific computing tools and tool chains, spanning low-level libraries through complex multi-physics simulations and emerging scientific workflows.

This seminar provides an opportunity for physician trainees to present their case and literature review to a national scientific audience. It is anticipated that each case will spark lively discussion regarding complex areas of metabolic bone disease, engaging both clinicians and scientists. The clinical cases session aims to foster interest in the bone field amongst advanced trainees and senior clinicians and hopes to engage them into the wider clinician-researcher network. The highest ranked abstracts submitted will be selected for oral presentation. Presentations will be adjudicated by a judging panel and a winner selected, to be announced at the ANZBMS Conference Dinner.</p>

The Damon Runyon-St. Jude Pediatric Cancer Research Fellowship Award provides funding to early career scientists conducting research with the potential to significantly impact the prevention, diagnosis, or treatment of one or more pediatric cancers. The aim is to identify and support the future breakthrough scientists working on addressing difficult questions in pediatric cancer research. Damon Runyon-St. Jude Pediatric Cancer Research Fellowship Awards are granted for a four-year term with second-, third- and fourth- year funding contingent upon satisfactory progress reports. Fellows in their first and third years of funding will attend Damon Runyon Fellows' Retreats designed to foster collaboration and interaction between scientists working in different fields relevant to cancer. Fellows will also attend an annual meeting at St. Jude Children’s Research Hospital where they will have the opportunity to network with pediatric cancer-focused colleagues, present their research, participate in professional development activities, and forge new collaborations.</p>

	Synopsis	<p>The NASPGHAN Foundation Advanced Fellowship in Pediatric Endoscopy will provide up to \$75,000 in direct funding to support one year of advanced training in pediatric endoscopy for a member of NASPGHAN in good standing. The award is expected to begin on July 1st of each academic term although alternate start dates will be considered to accommodate non-traditional academic schedules. Innovative or multidisciplinary training opportunities in addition to those structured in a traditional medical school and academic university hospital setting are all encouraged. Fellowships may be conducted in a variety of settings, including hospital-based programs, university endoscopy programs, government programs, or not-for-profit entities.</p>

Pardee Foundation funds research to investigators in United States non-profit institutions proposing research directed toward identifying new treatments or cures for cancer. The Foundation funds projects for a one-year period which will allow the establishment of capabilities of new cancer researchers or new cancer approaches by established cancer researchers. It is anticipated that this early-stage funding by the Foundation may lead to subsequent and expanded support using government agency funding. Project relevance to cancer detection, treatment, or cure should be clearly identified. By design, there are no limits set on the grant amount that can be requested. It must be reasonable and clearly supported by the scope of the project outlined in the application.</p>

Translational medicine is a scientific discipline focused on turning observations in the laboratory, clinic, and community into medicines, diagnostics, or other interventions that improve human health. Translational medicine fosters a patient-focused research cycle that stretches from the lab bench to the patient bedside and back to the lab again. This includes adapting hypothesis-driven basic research discoveries in cells, tissues, and animals for application in humans and then taking the knowledge of what did and didn’t work in the clinic back to the bench.</p> <p>30,000.00 per year</p> <p>No</p>

The purpose of this award is to provide a structured research training program for rheumatologists or health professionals in the field of rheumatology. This mentored career development award provides support for salary as well as research and/or education costs for the early years of research training in an environment where trainees may interact with established rheumatology investigators. The goal of funding at this level is to provide an opportunity for young scientists to embark on focused research and research training that will allow them to be competitive for the next level of career development awards. Through this award, the Foundation provides a means for ensuring more qualified, highly trained investigators in the field of rheumatology.</p>

	<p>Deadline Dates (ALL) 08-Jul-2024 [LOI/Pre-App], 26-Aug-2024</p> <p>Synopsis These grants are not for a specific research project, but rather for resources to allow more research to be done. They support institutions with the potential for more participation in childhood cancer clinical trials, but which currently lack necessary resources (support for Clinical Research Associates). Preference is given to institutions with high needs and low philanthropic support in geographical areas where St. Baldrick’s funds are raised. Institutions which do not currently receive other St. Baldrick’s grants are also given preference. The award is for one year of infrastructure support. Grants will be \$25,000 to \$50,000.</p> <p>Applicant Types</p> <p>Funding Limit 50,000.00 maximum</p> <p>Limited Submission Yes</p>
