

**Funding Opportunities Monthly Edition
Nov 2024 Due Dates**

Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in Nov 2024. The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
120754	NCI Research Specialist (Core-based Scientist) Award (R50 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-23-243	01-Nov-2024	Not Specified
	<p>Contact Name Christine Siemon</p> <p>Contact Telephone 240-276-6266</p> <p>Contact Email siemonc@mail.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 01-Nov-2024 , 03-Nov-2025</p> <p>Synopsis This notice of funding opportunity (NOFO) invites grant applications for the Research Specialist Award (R50) in any area of NCI-funded cancer research. This NOFO is specifically targeted toward core/shared resource/central scientific support scientists. The Research Specialist Award is designed to encourage the development of stable research career opportunities for exceptional scientists who want to continue to pursue research within the context of an existing NCI-funded basic, translational, clinical, or population science cancer research program, but not serve as independent investigators. These scientists, such as researchers within a core/shared resource/central scientific support, are vital to sustaining the biomedical research enterprise. The Research Specialist Award is intended to provide salary support and sufficient autonomy so that individuals are not solely dependent on NCI grants held by others for career continuity.</p>				
120753	NCI Research Specialist (Laboratory-based Scientist) Award (R50 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-23-242	01-Nov-2024	Not Specified

Deadline Dates (ALL)	19-Nov-2024
Synopsis	The purpose of the NCI Predoctoral to Postdoctoral Fellow Transition Award (F99/K00) is to encourage and retain outstanding graduate students recognized by their institutions for their high potential and strong interest in pursuing careers as independent cancer researchers. The award will facilitate the transition of talented graduate students into successful cancer research postdoctoral appointments and provide opportunities for career development activities relevant to their long-term career goals of becoming independent cancer researchers. This Notice of Funding Opportunity (NOFO) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.

121928	RFA-CA-24-006 -- Translational Research Toward Development of a Kaposi Sarcoma Herpesvirus (KSHV) Vaccine (U01 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	RFA-CA-24-006	04-Nov-2024 [Optional][LOI/Pre-App]	Not Specified

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute intends to support basic and translational research that will guide the development of a prophylactic or therapeutic Kaposi sarcoma herpesvirus (KSHV) vaccine. A prophylactic KSHV vaccine could prevent primary KSHV infection, transmission, and subsequent development of KS and other KSHV-associated syndromes such as multicentric Castleman disease (MCD), primary effusion lymphoma (PEL), and KSHV inflammatory cytokine syndrome (KICS), or ameliorate the severity of disease. A therapeutic KSHV vaccine could be helpful in preventing or treating KSHV disease in people already infected with KSHV. The U01 research projects funded through this NOFO will form a cooperative group, the KSHV Vaccine Development Consortium (KVDC).</p>				
120148	Innovative Research in Cancer Nanotechnology (IRCN; R01 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-23-246	04-Nov-2024	2,375,000 USD
	<p>Contact Name Piotr Grodzinski, Ph.D. Contact Telephone 240-781-3305 Contact Email grodzinp@mail.nih.gov Sponsor Website Program URL Link to program URL Deadline Dates (ALL) 04-Nov-2024 , 05-May-2025 , 03-Nov-2025 , 04-May-2026</p> <p>Synopsis Through this Notice of Funding Opportunity (NOFO) entitled "Innovative Research in Cancer Nanotechnology (IRCN)", the National Cancer Institute (NCI) encourages applications promoting transformative discoveries in cancer biology and/or oncology through the use of nanotechnology. Proposed projects should address overcoming major barriers in cancer biology and/or oncology using nanotechnology and should focus on mechanistic studies to expand the fundamental understanding of nanomaterial and/or nano-device interactions with biological systems. These studies are expected to be relevant to the delivery of nanoparticles and/or nano-devices to desired and intended cancer targets in vivo and/or characterization of detection and diagnostic devices and sensors in vitro. IRCN awards are expected to produce fundamental knowledge to aid future and more informed development of nanotechnology-based cancer interventions. The clinical translation of these interventions is outside of scope of this NOFO.</p>				
107550	Toward Translation of Nanotechnology Cancer Interventions (TTNCI) (R01 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-22-071	17-Nov-2024	1,900,000 USD
	<p>Contact Name Piotr Grodzinski, Ph.D. Contact Telephone 240-781-3305 Contact Email grodzinp@mail.nih.gov</p>				

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 17-Nov-2024</p> <p>Synopsis This Funding Opportunity Announcement (FOA), entitled "Toward Translation of Cancer Nanotechnology Interventions (TTNCI)" is designed to enable the translation of nanotechnology-based cancer interventions relying on nanoparticle formulations and/or nano-devices. The TTNCI initiative encourages applications for advanced pre-clinical research, supporting translation of nanotechnology-based cancer diagnostics and therapeutics. TTNCI awards are expected to mature experimental nanomedicines designed for highly relevant cancer clinical objectives with a strong potential to improve cancer treatment effectiveness. It is expected that improvement of treatment effectiveness will occur due to the combination of nanoparticle/nano-device structural design and/or therapeutic/diagnostic cargo which is delivered. TTNCI awards are expected to enable further development of proposed nanotechnology-based interventions to the stage in which they could continue on a developmental path towards the NCI Experimental Therapeutics (NExT) and other NCI translational programs.</p>				
126314	Notice of Special Interest (NOSI): Conferences and Scientific Meetings in Cancer Biology	National Cancer Institute/NIH/DHHS	NOT-CA-24-059	14-Nov-2024 [LOI/Pre-App]	50,000 USD

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 08-Oct-2024 , 08-Nov-2024</p> <p>Synopsis Through this funding opportunity announcement (FOA), the National Cancer Institute (NCI) encourages the submission of exploratory/developmental research grant (R21) applications that focus on different aspects of cancer control by modifying behavior, screening, and understanding etiologic factors contributing to the development of cancer, and developing ways to control cancer. The overarching goal is to provide support to promote the early and conceptual stages of research efforts on novel scientific ideas that have the potential to substantially advance population-based cancer research, such as the development of novel techniques, agents, interventions, methodologies, models, or applications that could have a major impact on a field of cancer research (e.g. epidemiologic, biomedical, behavioral, health care delivery or clinical).</p>				
122289	<p>Exploratory Grant Award to Promote Workforce Diversity in Basic Cancer Research (R21 Clinical Trial Not Allowed)</p>	National Cancer Institute/NIH/DHHS	PAR-24-039	19-Nov-2024	275,000 USD
	<p>Contact Name Laritza M. NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 16-Oct-2024 [Optional][LOI/Pre-App], 15-Nov-2024</p> <p>Synopsis The purpose of this Notice of Funding Opportunity (NOFO) is to invite exploratory/developmental research grant applications (R21) for innovative informatics methods and algorithms to improve the acquisition, analysis, visualization, or interpretation of data across the cancer research continuum including cancer biology, cancer treatment and diagnosis, early cancer detection, risk assessment and prevention, cancer control and epidemiology, and/or cancer health disparities. As a component of the NCI's Informatics Technology for Cancer Research (ITCR) Program, the emphasis of this NOFO is on supporting the development of novel informatics capabilities that involve a high degree of innovation that have the potential to accelerate or enhance research. To be successful, there must be a clear rationale for how the proposed informatics method or algorithm is novel and how it will benefit the cancer research field. Projects with a significant level of data generation and/or data analysis will not be considered responsive to this funding opportunity.</p>				
123041	RFA-CA-24-019 -- Sustained Support for Informatics Technologies for Cancer Research and Management (U24 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	RFA- CA-24-019	16-Oct-2024 [Optional][LOI/Pre-App]	Not Specified
	<p>Contact Name Juli Klemm, Ph.D.</p> <p>Contact Telephone 202-853-7889</p> <p>Contact Email juli.klemm@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 16-Oct-2024 [Optional][LOI/Pre-App], 15-Nov-2024</p> <p>Synopsis The purpose of this Notice of Funding Opportunity (NOFO) is to invite Cooperative Agreement (U24) applications for the continued development and sustainment of high value informatics research resources to improve the acquisition, management, analysis, and dissemination of data and knowledge across the cancer research continuum including cancer biology, cancer treatment and diagnosis, early cancer detection, risk assessment and prevention, cancer control and epidemiology, and/or cancer health disparities. As a component of the NCI's Informatics Technology for Cancer Research (ITCR) Program, this NOFO focuses on sustaining operations and improving the user experience and availability of existing, widely-adopted informatics tools and resources. This is in contrast to early-stage and advanced development efforts to generate these tools and resources that are supported by companion ITCR NOFOs. The central mission of ITCR is to promote research-driven informatics technology across the development lifecycle to address priority needs in cancer research. In</p>

Deadline Dates (ALL)	16-Oct-2024 [Optional][LOI/Pre-App], 15-Nov-2024
Synopsis	The purpose of this Notice of Funding Opportunity (NOFO) is to invite Cooperative Agreement (U24) applications for advanced development and enhancement of emerging informatics technologies to improve the acquisition, analysis, visualization, and interpretation of data across the cancer research continuum including cancer biology, cancer treatment and diagnosis, early cancer detection, risk assessment and prevention, cancer control and epidemiology, and cancer health disparities. As a component of the NCI's Informatics Technology for Cancer Research (ITCR) Program, this NOFO focuses on emerging informatics technology, defined as one that has passed the initial prototyping and pilot development stage, has demonstrated potential to have a significant and broader impact, has compelling reasons for further improvement and enhancement, and has not been widely adopted in the cancer research field. To be successful, proposed development plans must have a clear rationale on why the proposed technology is needed and how it will benefit the cancer research field. In addition, mechanisms to solicit feedback from users and collaborators throughout the development process must be included. Potential applicants who are interested in early-stage development or informatics resource sustainment should consult the companion NOFOs listed above.

123030	RFA-CA-24-017 -- Early-Stage Development of Informatics Technologies for Cancer Research and Management (U01 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	RFA-CA-24-017	16-Oct-2024 [Optional][LOI/Pre-App]	900,000 USD

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>inter-disciplinary, multi-institutional research team to work in strategic alliance to implement a coherent strategy to develop and translate a solution to their chosen problem. They are expected to plan, design, and validate that the solution will be suitable for end users. Each partnership should include at least one academic and one industrial organization. Each partnership should plan to transition a technology, method, assay, device, and/or system from a demonstration of possibility to a status useful in the chosen setting. Funding may be requested to enhance, adapt, optimize, validate, and otherwise translate technologies that address problems in biology, pathology, risk assessment, diagnosis, treatment, and/or monitoring of disease status. This FOA defines "innovation" as likelihood to deliver a new capability to end users. This FOA will support clinical trials that test functionality or validate performance in the chosen setting. This FOA is not intended to support straight clinical trials that lack translation as the primary motivation. Applications that propose phase III clinical trials in any area of cancer research are not sought by and will not be supported through this FOA. This FOA does not propose to support commercial production or basic research projects.</p>				
110367	Research Projects in Physical Sciences-Oncology (U01 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	PAR-22-147	01-Nov-2024	2,000,000 USD

	Synopsis	<p>This Funding Opportunity Announcement (FOA) invites U01 cooperative agreement applications for Physical Science-Oncology Projects (PS-OP). The goal of the Physical Sciences-Oncology Network (PS-ON) is to foster the convergence of physical sciences approaches and perspectives with cancer research to advance our understanding of cancer biology and oncology by forming transdisciplinary teams of physical scientists and cancer biologists/physician scientists. Examples of physical scientists may include engineers, physicists, mathematicians, chemists, and computer scientists. The PS-OPs, individually and as a collaborative Network along with other PS-OPs and the Physical Sciences-Oncology Centers (PS-OC), will support transdisciplinary research that: (1) establishes a physical sciences perspective within the cancer research community; (2) facilitates team science and field convergence at the intersection of physical sciences and cancer research; and (3) collectively tests physical sciences-based experimental and theoretical concepts of cancer and promotes innovative solutions to address outstanding questions in cancer research.</p>

Contact Name Contact Telephone Contact Email Sponsor Website Program URL Deadline Dates (ALL) Synopsis	William C. Timmer, Ph.D 240-276-6130 william.timmer@nih.gov Link to program URL 10-Oct-2024 , 01-Nov-2024 , 13-Feb-2025 , 01-Mar-2025 , 12-Jun-2025 , 01-Jul-2025 <p>This Funding Opportunity Announcement (FOA) supports preclinical and early phase clinical research, as well as correlative studies, directly related to advancements in cancer treatment, diagnosis, prevention, comparative oncology, symptom management, or reduction of cancer disparities. This includes (but is not limited to) development and testing of the following: new molecular agents or biologics for cancer treatment; management strategies for cancer-related symptoms or treatment-related toxicity; cancer screening or diagnostic tools, such as imaging techniques; cancer preventive agents or approaches; predictive and prognostic biomarkers for patient selection or stratification; clinically relevant in vivo or in vitro tumor models (including genetically engineered mouse models, patient-derived xenograft models, organoids, and cell lines); and strategies to address therapeutic outcome disparities among underserved populations. In addition to novel agents, new treatment strategies may involve repurposed agents or novel combinations of interventions (including radiation), based on established mechanisms of action. Comparative correlative studies in cancer patients with age, gender, racial/ethnic, or health disparities are encouraged to explore mechanisms underlying their differential responses (efficacy and toxicity) and resistance to therapeutic interventions. Comparative oncology studies in dogs investigating strategies for treatment and diagnosis of human disease are supported as well. This FOA does not support research that focuses on basic cancer biology (such as studies of cancer-related pathways, molecular mechanisms, or mechanisms of metastasis), late-stage clinical trials, risk assessment studies, epidemiological studies, or studies of behavioral interventions. These applications will be deemed not responsive to this FOA and will not be reviewed (see below for a more detailed description of studies that are not responsive for this FOA). The R21 mechanism is intended to encourage exploratory and developmental research projects by providing support for the early and conceptual stages of these projects. These studies may involve considerable risk but may lead to breakthroughs in particular areas, or to the development of novel techniques, agents, methodologies, models, or applications that could have a major impact on cancer research (preclinical or clinical).</p>

This NCI initiative aims to promote fundamental studies in the emerging area of RNA modifications that underlie the oncogenic process, focusing on the central role of RNA modifications in translational reprogramming of cancer cells. RNA modifications have been recognized to exert a substantial impact on gene expression and function and their de-regulation has been linked to the cancer phenotype. In particular, recent insights point to a crucial role for mRNA, tRNA, and rRNA modifications in translational reprogramming during tumor initiation, progression, and adaptation to therapy. However, the molecular mechanisms underlying this reshaping of the transcriptome caused by dynamic changes in RNA modifications, as well as the interplay between different RNA modifications within and/or across RNA molecules during translation, are not understood and represent the focus of this initiative. This new program will be composed of up to five U01 grants that will be supported by this NOFO.</td> </tr> </table>					Contact Name	Stefan Maas, Ph.D.	Contact Telephone		Contact Email	stefan.maas@nih.gov	Sponsor Website		Program URL	Link to program URL	Deadline Dates (ALL)	05-Oct-2024 [Optional][LOI/Pre-App], 04-Nov-2024	Synopsis	Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) solicits applications for the RNA Modifications Driving Oncogenesis (RNAMoDO) initiative. 	<p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 04-Nov-2024 , 04-Nov-2025</p> <p>Synopsis Through this Funding Opportunity Announcement (FOA), the National Cancer Institute (NCI) invites applications for the Research Specialist Award (R50) specifically for clinician scientists supporting NCI-funded clinical trials research. The Research Specialist Award is designed to encourage the development of stable research career opportunities for exceptional clinician scientists who want to continue to participate in the NCI clinical trials networks through leadership in the 1) development of national clinical trials, 2) implementation of NCI clinical trials in their institutions, and 3) national service to the NCI clinical trials networks through participation in the scientific review committees, monitoring committees and other activities, but not serve as principal investigators of research project grants. These clinician scientists are vital to sustaining the NCI-funded clinical trials enterprise. The Research Specialist Award is intended to provide salary support and sufficient autonomy so that individuals are not solely dependent on NCI grants held by others or other sources of support for cancer research career continuity.</p>

	<p>Contact Email sekai.chideya@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 21-Oct-2024 , 13-Nov-2024 , 23-Jun-2025 , 17-Jul-2025 , 23-Feb-2026 , 17-Mar-2026 , 20-Oct-2026 , 13-Nov-2026</p> <p>Synopsis This Funding Opportunity Announcement (FOA) invites cooperative agreement applications for investigator-initiated mid-phase clinical trials of natural products. All applications submitted under this FOA must be supported by sufficient preliminary data of bioavailability and documentation that the natural product produces a replicable and measurable impact on a biological signature (i.e., measure of the mechanism of action). Only in cases when it is not possible/practical to measure a biological signature in the patient population of interest or when there is a fundamental understanding of the product's mechanism of action will this preliminary data requirement be waived. Applications submitted to this FOA should propose a mid-phase clinical trial to do the following: determine the optimal dose or formulation of a given natural product for use in a future multi-site clinical trial; or determine which patient phenotypes will be responders versus non-responders to the natural product to inform inclusion/exclusion criteria of a future efficacy study. Clinical trials submitted under this FOA are expected to be hypothesis based, milestone-driven, and directly related to the research priorities and mission of NCCIH. This FOA will not support single-site or multi-site efficacy or effectiveness trials, nor will it support trials to test natural products for the treatment or prevention of cancer. Applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact for the area of science for which they are planning to develop an application prior to submitting to this FOA.</p>

	Synopsis	<p>This Notice of Funding Opportunity (NOFO) encourages applications for investigator-initiated fully remotely delivered and conducted clinical trials to assess the efficacy or effectiveness of complementary and integrative health interventions in NCCIH- designated areas of high research priority. Applications submitted under this NOFO are expected to propose a remotely delivered and conducted fully powered clinical trial with no in-person contact between research staff and study participants and may utilize mHealth tools or technologies. Applicants must provide justification for the remotely delivered approach and provide preliminary data on the feasibility and safety of the approach, along with evidence that the intervention has promise of clinical benefit. Applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact for the area of science for which they are planning to develop an application prior to submitting to this NOFO. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

Briefly, mentees in an active cohort will be eligible to be supported by their host PRIDE SI to conduct SRPs during or immediately following their first SI. These pilot studies are intended to be conducted over 9-12 months in the interim between the first and second SIs with guidance from SI and institutional mentors. Updates on projects are expected to be provided at the mid-year SI meetings, the consortium-wide PRIDE Annual Meetings, and/or during the mentee's second SI.</p>

The Building Partnerships and Broadening Perspectives to Advance Ethical, Legal, and Social Implications (ELSI) Research (BBAER) Program will support: 1) transdisciplinary ELSI research addressing timely, complex, and understudied topics associated with advances in human genetics and genomics, 2) the establishment of ELSI research teams that include partnerships with relevant communities affected by and with an interest in the proposed research, 3) research capacity building to develop, conduct, and sustain ELSI research, and 4) workforce development opportunities for early career scholars, research team members, and other BBAER project staff. This Notice of Funding Opportunity (NOFO) is for a limited competition that solicits UM1 applications from domestic organizations located in the United States and its territories that received less than \$30 million per year in total NIH funding for the past three fiscal years. These organizations are underrepresented among those receiving NHGRI funding for ELSI research.</p>

Synopsis | The purpose of this Notice of Funding Opportunity (NOFO) is to support exploratory and conceptual research projects in radiation research focused on medical countermeasures, biodosimetry, and animal model development to diagnose/mitigate/treat injuries arising from radiation exposure sustained during a radiation mass casualty incident. This NOFO is intended to support development of preliminary data to help advance high-risk, high-reward projects needed for a robust early product development pipeline that can lead to the advancement of much-needed radiation-exposure related tools and products.

	Synopsis	<p>As part of the NIH's Helping to End Addiction Long-term (HEAL) Initiative, the National Institute of Arthritis and Musculoskeletal and Skin Diseases and other participating NIH Institutes and Centers invite applications for the HEAL KIDS Chronic Pain Collaborating Research Teams (HEAL KIDS CPT) Program to conduct interdisciplinary team-based research projects that combine clinical research, novel/cutting-edge technologies, and measurement science, which will improve our understanding of primary and secondary chronic pain conditions in children and adolescents. The results are expected to enhance and expand our capacity to pursue challenging biological problems, therapeutics development, and effective management of pediatric pain conditions. The HEAL KIDS CPT projects are expected to address a significant scientific challenge in the biopsychosocial model of pain that requires collaboration, synergy, knowledge integration and team interactions. Teams are encouraged to consider transformative objectives and design projects that would lead to new, innovative, and improved strategies to enhance understanding of chronic pain mechanisms at the individual level. Research may include testing of powerful tools, models, and approaches to accelerate the development and translation of pain condition-specific, age-appropriate therapeutics, and next-generation clinical management of pain. This Notice of Funding Opportunity (NOFO) complements the previously issued NOFO (RFA-HD-24-011) and NOFO (RFA-HD-24-012) focused on clinical trials of acute pain in infants, children, and adolescents and the establishment of a HEAL KIDS Resource Center, respectively. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 01-Oct-2024 [LOI/Pre-App], 01-Nov-2024</p> <p>Synopsis The purpose of this Notice of Funding Opportunity (NOFO) is to invite applications from entities/institutions to participate as a Research Center in the Stillbirth Research Consortium. This NOFO runs in parallel with the Stillbirth Research Center Data Coordinating Center (see RFA-HD-25-011). The Research Centers and the DCC together will establish an integrated and collaborative Stillbirth Research Consortium to support cutting-edge basic, translational, clinical, and/or data sciences research to generate knowledge for advancement in stillbirth-relevant research across the United States, with a particular emphasis on approaches that utilize an equity lens to identify ways to decrease the incidence of stillbirth in vulnerable populations. International collaboration is encouraged and allowable. Awarded Research Centers, with complementary expertise, will have specific goals and objectives in their efforts to understand and prevent stillbirth including (1) supporting the development of tools, devices, instrumentation, models, and other technologies that could have a direct clinical or health impact on the incidence of stillbirth; (2) enhancing understanding of the mechanisms underlying vulnerability to stillbirth; (3) elucidating conditions such as structural defects, genetic factors, infections, and/or complications that may contribute to stillbirth and investigation of the fetus, placenta, and maternal tissues; (4) leveraging secondary data analysis and integration of existing datasets (including national datasets) and database resources, with the ultimate aim to elucidate stillbirth risk or prediction and related outcomes; and (5) improving communication between health professionals and families in pregnancy care. Research Center applications must propose one to two research projects that may vary in scale and scope. Research Centers may actively collaborate on studies and projects with other NICHD Networks and initiatives to strengthen research efforts. This will likely include partnerships with the Maternal Fetal Medicine Units (MFMU) Network and the NICHD Maternal and Pediatric Precision in Therapeutics (MPRINT) initiative; NIH Institutes or Offices such as All of Us; and maternal health activities with partner Federal health agencies, including the Centers for Disease Control and Prevention, the Health and Research Services Administration, and the Office of the Assistant Secretary on Women's Health. These collaborations will foster interdisciplinary approaches, facilitate data sharing, and enhance the impact of their research on maternal and fetal health. To stimulate novel approaches, it is anticipated that key personnel in complementary disciplines (e.g., medicine, biology, nursing, environmental science, public health, biology, behavioral and social science, biostatistics/statistics, mathematics, computer science, nutrition, and engineering) will collaborate to address stillbirth-relevant research. In addition, Research Centers must include a plan for inclusion of People with Lived Experience (PWLE).</p>

	<p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 15-Oct-2024 [LOI/Pre-App], 15-Nov-2024</p> <p>Synopsis The purpose of this Notice of Funding Opportunity announcement (NOFO-) issued by the Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD) is to announce the re-competition of the Women’s Reproductive Health Research (WRHR) Career Development Program. This nationwide group of mentored institutional career development programs trains junior faculty who have recently completed postgraduate clinical training in obstetrics and gynecology and are committed to an independent research career in women's reproductive health. The goal of this program is to continue to build the national capacity of outstanding junior clinician-investigators who will strengthen the field of obstetrics and gynecology and contribute to the improvement of women’s health. This Notice of Funding Opportunity (NOFO) allows appointment of [Scholars (K12)] proposing to serve as the lead investigator of an independent clinical trial; or proposing a separate ancillary clinical trial; or proposing to gain research experience in a clinical trial led by another investigator, as part of their research and career development.</p>

Through the use of this mechanism, the NIDDK is seeking to enhance the capability of its K01, K08, K23, and K25 award recipients to conduct research as they complete their transition to fully independent investigator status. The R03 grant mechanism supports different types of projects, including pilot and feasibility studies; secondary analysis of existing data; small, self-contained research projects; development of research methodology; and development of new research technology. The R03 is, therefore, intended to support research projects that can be carried out in a short period of time with limited resources and that may provide preliminary data to support a subsequent R01, or equivalent, application.</p>

	<p>Synopsis This Notice of Funding Opportunity (NOFO) seeks to support multidisciplinary research teams with complementary expertise in HIV and pathobiology, pathophysiology, and/or metabolism in organs, tissues, and/or biological systems of specific interest to the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK). These teams will comprehensively interrogate fundamental biological mechanisms underlying HIV-associated comorbidities, co-infections, and complications relevant to the mission of NIDDK and advance progress toward preventing or alleviating them.</p>				
127470	RFA-DK-25-017 -- Limited Competition for the Continuation of Type 1 Diabetes in Acute Pancreatitis Consortium - Clinical Centers (T1DAPC-CCs) (U01 Clinical Trial Optional)	National Institute of Diabetes and Digestive and Kidney Diseases/NIH/DHHS	RFA-DK-25-017	21-Oct-2024 [Optional][LOI/Pre-App]	350,000 USD
	<p>Contact Name Aynur Unalp-Arida, M.D., Ph.D. Contact Telephone 301-594-8879 Contact Email aynur.unalp-arida@nih.gov Sponsor Website Program URL Link to program URL Deadline Dates (ALL) 21-Oct-2024 [Optional][LOI/Pre-App], 19-Nov-2024</p> <p>Synopsis This Notice of Funding Opportunity (NOFO) is a limited competition that invites U01 competing continuation applications for the continuation of the Type 1 Diabetes in Acute Pancreatitis Consortium (T1DAPC), a clinical consortium composed of one Data Coordinating Center (DCC) and up to ten Clinical Centers (CC) to continue a prospective longitudinal observational study of the incidence of diabetes that occurs during or after an acute pancreatitis (AP) episode, with an emphasis on type 1 diabetes (T1D) [the Diabetes Related to Acute Pancreatitis and its Mechanisms (DREAM) study] (NCT05197920). The study has been designed to gain insight into the incidence, clinical evolution, etiology, type, and pathophysiology of T1D and other forms of diabetes that occur during, or after one or more episodes of AP. The DREAM study is expected to be near its target enrollment of patients who have experienced AP during the current award segment, and so this NOFO will support applications largely intended for completion of recruitment and longitudinal observation of the assembled cohort, including monitoring for the incidence of T1D and other forms of diabetes, and the identification of immune, genetic, environmental, behavioral and demographic risk factors and biomarkers. This competition is limited to Clinical Centers that are currently participating in the consortium and funded by grants awarded through RFA-DK-19-022. A competing continuation application for the DCC will be submitted in response to a separate NOFO, RFA-DK-25-018: Single Source for the Continuation of the Type 1 Diabetes in Acute Pancreatitis Consortium - Data Coordinating Center (T1DAPC-DCC) (U01 Clinical Trial Optional).</p>

This NOFO is intended to embed the coordinated care model under study into the health care delivery system of applicant institutions. Coordinated pain care approaches proposed for study are expected to include interventions from multiple disciplines as described below and should aim to improve pain management based on the biopsychosocial model of pain. Emphasis should be on reaching populations of patients with greatest need. Models of coordinated care proposed by the study team should be aligned with health care resources of the participating HCS and</p>

	<p>should be informed through engagement of stakeholders including patients, providers, healthcare system executives, policymakers, and payors. The study teams are expected to include health care providers from multiple disciplines and implementation scientists. Trials will be supported by the Coordinating Center (CC) of the HEAL Pragmatic and Implementation Studies to Improve the Management of Pain and Reduce Opioid Prescribing (PRISM) Program (https://rethinkingclinicaltrials.org/.) The Coordinating Center will provide technical expertise in all aspects of research and coordination across studies awarded through this NOFO. Recipients will work with the CC to facilitate planning and refinement of proposed studies in partnership with health care delivery systems.</p>				
126258	RFA-NS-25-011 -- Functional Target Validation for Alzheimer's Disease-Related Dementias (R61/R33 Clinical Trial Not Allowed)	National Institute of Neurological Disorders and Stroke/NIH/DHHS	RFA-NS-25-011	09-Oct-2024 [Optional][LOI/Pre-App]	Not Specified
	<p>Contact Name: Pascal Laeng, PhD Contact Telephone: 301-496-7416 Contact Email: pascal.laeng@nih.gov Sponsor Website: Program URL: Link to program URL Deadline Dates (ALL): 09-Oct-2024 [Optional][LOI/Pre-App], 08-Nov-2024</p> <p>Synopsis: This NOFO invites applications that propose the comprehensive functional validation of newly identified therapeutic target candidates for Alzheimer's Disease-Related Dementias (ADRD). This NOFO seeks to promote critical target validation approaches to help de-risk subsequent translational research and accelerate the advancement of novel therapies for ADRD. Target(s) or molecular pathway(s) to be considered for validation must have been already identified using tissue expression or genetic data generated in human samples. In its initial phase, this NOFO provides support for up to two years (R61 stage) for the development of customized technologies, models, and protocols to modulate the expression or activity of target candidate(s) in cells and/or tissues and monitor their functional biological consequences in vitro or in vivo disease models. Upon demonstration of technical feasibilities, a second phase (R33 stage) will carefully and reproducibly measure and cross-validate the impact of the target modulation in different modalities across collaborating laboratories using the NIH rigor and reproducibility guidelines. This NOFO will support applications that address objectives for both the R61 and R33 phases and are expected to have a substantial collaborative effort between independent laboratories. This NOFO is not specific for anyone or group within the ADRD spectrum of disorders. Disorders covered in these applications are frontotemporal degeneration (FTD), Lewy body dementias (LBD) (including dementia with Lewy bodies (DLB)), Parkinson disease dementia (PDD), vascular contributions to cognitive impairment and dementia (VCID), and mixed dementias including the multiple etiology dementias (MED).</p>

Synopsis	<p>The purpose of this NIH HEAL Initiative PainCare Clinician Training Program (PCTP): Mentored Clinical Scientist Development Awards (K08 - Clinical Trials Not Allowed) is to support the career development of individuals with clinical doctoral degrees to create a group of new and well-trained, independent investigators. This supervised career development program will provide independent NIH research support during the early-career phase to help recipients establish independent research programs in areas supported by the NIH HEAL Initiative’s Clinical Research in Pain Management program. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Under this NOFO applicants are permitted to propose a research experience in a clinical trial led by a mentor or co-mentor. Those proposing a clinical trial or an ancillary clinical trial as lead investigator should apply to the companion NOFO. This Parent Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply</p>

In support of the program's goal, this GEMSSTAR notice of funding opportunity (NOFO) invites applications that propose to conduct transdisciplinary aging research that will yield pilot data and experience for subsequent aging research projects. The GEMSSTAR program encourages candidates to seek out a supportive research environment to achieve the program's goal of fostering the development of early-career physician- and dentist-scientists in aging- or geriatric-focused research, particularly as it applies to their clinical specialty/discipline. Toward this end, GEMSSTAR candidates should include a Professional Development Plan that reflects this supportive research environment. In selecting GEMSSTAR awardees, the National Institute on Aging (NIA) will consider the extent to which a candidate's environment is supportive of aging- or geriatric-focused research.</p>

This opportunity will provide support for experienced investigators in pertinent fields to 1) augment or redirect their research program by acquiring expertise in other fields related to comparative primate research and aging and 2) develop collaborations with research fields with which they do not commonly interact. Pertinent fields of cross-training for this NOFO include comparative biology of aging, evolutionary genetics, evolutionary biology, anthropology, primatology, and human longevity studies. Specific emphasis for this NOFO will be on cross-training independent investigators in a substantially different area of study than their current field of study in one or more of the above scientific disciplines. An academic rank of associate or full professor, or the equivalent in non-academic research settings, is required for eligibility for this award. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary study to a clinical trial. Applicants to this NOFO are permitted to propose research experience in a clinical trial led by a mentor or co-mentor.</p>				
122532	Aging Research Dissertation Awards to Promote Diversity (R36 Clinical Trial Not Allowed)	National Institute on Aging/NIH/DHHS	PAR-24-052	16-Oct-2024	Not Specified

	<p>Contact Name Bradley C. Wise, Ph.D.</p> <p>Contact Telephone 301-496-9350</p> <p>Contact Email WiseB@mail.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 12-Nov-2024</p> <p>Synopsis The goal of this Notice of Special Interest (NOSI) is to stimulate research to define and characterize neural cell populations (e.g., neurons and glia), neural activity and circuits, structural and functional networks, and brain regions that are vulnerable (or resistant) in brain aging and AD and the mechanisms underlying such selective vulnerability. Genetic and molecular signatures of different types of neurons and glial cells across the adult lifespan, in AD compared to other dementias of aging, and in different stages of AD will implicate cell processes and pathways mediating selective vulnerability in AD. Defining cell types by physiological measures such as electrophysiology and connectivity and manipulating neural activity in circuits and networks will provide a functional index of selective vulnerability. Applicants are encouraged to use new approaches to generate sophisticated data on molecular signatures of brain cells and on structure and function of brain circuits and networks. Understanding the mechanisms underlying selective vulnerability from cells to networks in AD is critical to fully define the disease process and to develop effective therapies.</p>

	<p>Contact Name Lyndon Joseph, Ph.D. Contact Telephone 301-496-6761 Contact Email lyndon.joseph@nih.gov Sponsor Website Link to sponsor website Program URL Link to program URL Deadline Dates (ALL) 07-Oct-2024 [Optional][LOI/Pre-App], 07-Nov-2024</p> <p>Synopsis The National Institute on Aging (NIA) invites R01 applications that propose human studies to better understand the mechanisms underlying compensatory gait, posture, and molecular changes that contribute to slower walking speed and increased metabolic cost of walking. This Notice of Funding Opportunity (NOFO) encourages interdisciplinary collaborations to design integrative approaches that explore interactions among multiple systems (e.g., skeletal, muscle, tendon, somatosensory, and central nervous). This NOFO also encourages innovative approaches such as computational modeling, imaging and sensor technologies, machine learning, and artificial intelligence to disentangle compensatory gait alterations with aging that contribute to increased metabolic cost of walking and fatigue. Areas of interest include: 1) mechanisms and effects of central nervous system changes; 2) neuromuscular changes; 3) skeletal muscle bioenergetics; 4) computational modeling and simulation; and 5) changes in tissue structure and function (e.g., muscle-tendon complex, extracellular matrix)).</p>

	<p>experts with the skills to make exceptionally creative contributions to the study of equity for underserved U.S. racial and/or ethnic minority groups that experience poorer outcomes related to substance use and substance use disorders. This award supports transformative, boundary-pushing applications that may be risky or at a stage too early to fare well in the traditional peer review process. This FOA is a limited-competition announcement, open to institutions meeting the eligibility criteria in Section III (below). All institutions are eligible to submit applications for the companion FOA, RFA-DA-23-026.</p>				
112858	RFA-DA-23-026 -- NIDA REI: Racial Equity Visionary Award Program for Research on Substance Use and Racial Equity (DP1 Clinical Trial Optional)	National Institute on Drug Abuse/NIH/DHHS	RFA-DA-23-026	15-Oct-2024 [Optional][LOI/Pre-App]	3,500,000 USD
	<p>Contact Name Aria Davis Crump, Sc.D. Contact Telephone 301-435-0881 Contact Email aria.crump@nih.gov Sponsor Website Program URL Link to program URL Deadline Dates (ALL) 15-Oct-2024 [Optional][LOI/Pre-App], 14-Nov-2024 Synopsis This Funding Opportunity Announcement (FOA) is a part of NIDA’s Racial Equity Initiative (REI), with goals that include promoting racial equity in NIDA’s research portfolio.. This announcement invites applications supporting independent, early career or established scholars who self-identify as health equity, health disparities, or social determinants of health experts with the skills to make exceptionally creative contributions to the study of equity for underserved U.S. racial and/or ethnic minority groups that experience poorer outcomes related to substance use and substance use disorders. This award supports transformative, boundary-pushing applications that may be risky or at a stage too early to fare well in the traditional peer review process.</p>

	<p>Contact Email tanya.ramey@nih.gov</p> <p>Sponsor Website Link to sponsor website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 27-Oct-2024 [Optional][LOI/Pre-App], 27-Nov-2024</p> <p>Synopsis The purpose of this notice of funding opportunity (NOFO) is to support the development of neuromodulatory devices with behavioral treatment as a component for Stimulant Use Disorder (StUD). Given the high rates of relapse and poor treatment outcomes in StUD, the objective is to target patients with vulnerable phenotype including those with reported qualitatively high levels of impulsivity, compulsivity, and cognitive dysfunction. Moreover, this NOFO concentrates on advancing treatment modalities combinations: pairing non-invasive neuromodulation (including, but not limited to transcranial magnetic stimulation, transcranial direct current stimulation, vagal stimulation, alternating current stimulation, low-intensity focused ultrasound, and others) with either known efficacious behavioral interventions (e.g., contingency management, cognitive behavioral therapy) or novel treatments. Applications should plan to move devices to their next step in the Food and Drug Administration (FDA) approval process, with the ultimate goal of generating new, FDA-approved device-based treatments and/or combination products for StUD.</p>

The purpose of this notice of funding opportunity (NOFO) is to seek innovative applications for Translational Resource Centers that will establish and support multidisciplinary research teams to conduct translational research between the fields of 1) substance use epidemiology and etiology and 2) substance use prevention intervention. Resource centers are expected to conduct activities that bring investigators in these fields together for active collaboration to develop research questions, design study approaches (with either collection of new data or analysis of existing data), and to develop strategies for application of findings from one field into research in the other field. Collaborative activities supported by the Center should have specific goals that lead to concrete products (e.g., publications, grant applications, intervention development or adaptation) and must include a plan for evaluating center success.</p>

Advances in technology offer unprecedented opportunities to develop clinical-grade mobile, web, or other software-based platforms designed to deliver treatments that are safe and effective for SUD. FDA authorization of DTx can play an important role in increasing the availability of treatments to patients with SUD. The primary objective of this FOA is to move DTx to their next step in the development process, with the ultimate goal of generating new, FDA authorized, disseminated treatments for SUDs. Applications may focus on the pre-clinical and/or clinical development and testing of new DTx or existing DTx developed for other indications. The UG3/UH3 Cooperative Agreement involves 2 phases. The UG3 phase, for up to 2 years, is designed to support a project with specific milestones to be accomplished by the end of the period. The UH3 phase is to provide funding for up to 3 additional years following successful completion of the UG3. UG3 projects that meet their milestones will be administratively considered by NIDA and prioritized for transition to the UH3 phase. Investigators submitting to this FOA must address both UG3 and UH3 phases.</p>

workforce to meet the nation’s biomedical, behavioral and clinical research needs. This FOA is intended to support research education activities that enhance the knowledge of substance use (SU) and substance use disorder (SUD) research. The program is intended for those in clinically focused careers and/or those training for careers as clinicians/health service providers, clinical researchers, or optimally a combination of the two. This mechanism may not be used to support non-research-related clinical training. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on Courses for Skills Development and Research Experiences. The proposed research education programs must include both courses for skills development and research experiences with primary emphasis on research experiences. Proposed courses should be developed in conjunction with and support research experiences to enhance skills development.

123276	NIDA Mentored Clinical Scientist Development Program Award in Substance Use and Substance Use Disorder Research (K12 Clinical Trial Optional)	National Institute on Drug Abuse/NIH/DHHS	PAR-24-089	13-Nov-2024	3,750,000 USD

Synopsis	<p>This notice of funding opportunity (NOFO) encourages applications for institutional research career development (K12) programs that propose to support intensive, supervised research and career development experiences leading to research independence for clinician scientists (Scholars) conducting substance use and substance use disorder (SUD) research. For this NOFO, clinician scientists may include (but are not limited to) physicians, clinical psychologists, social workers, and pharmacists. Scholars are expected to be supported for 3-4 years on consecutive 12-month appointments. Candidates selected for support as scholars must hold a doctorate and commit a minimum of 9 person months (equivalent to 75% of full-time professional effort) to conducting clinical research and career development activities associated with the proposed K12 program. Scholars appointed through the proposed program may serve as the lead for a NIH-defined clinical trial that fulfills the NIH requirement for a minimal risk trial. A minimal risk trial is one in which the probability and magnitude of harm or discomfort anticipated in the research are not greater in and of themselves than those ordinarily encountered in daily life or during the performance of routine physical or psychological examinations or tests. This Notice of Funding Opportunity (NOFO) allows appointment of Scholars (K12) proposing to serve as the lead investigator of an independent clinical trial; or proposing a separate ancillary clinical trial; or proposing to gain research experience in a clinical trial led by another</p>

	Deadline Dates (ALL)	15-Nov-2024 , 09-Dec-2024			
	Synopsis	This Funding Opportunity Announcement (FOA) encourages exploratory/developmental research grant applications, piloting innovative, collaborative research projects with low- and middle-income country (LMIC) institutions/ scientists on brain and other nervous system-related function and disorders throughout life, relevant to LMICs. Research on the full spectrum of neuro-health, neurological, neuromuscular, sensory, neuropsychiatric, cognitive, behavioral and neurodevelopmental function and disorders may span the full range of science from basic to clinical to translation and implementation research. Scientists in LMIC institutions may partner with scientists in other LMIC institutions and/or U.S. institutions . Income categories are defined by the World Bank at http://data.worldbank.org/about/country-classifications/country-and-lending-groups). These grants are expected to foster the development of more comprehensive research programs that contribute to the long-term goals of building sustainable neuro-health research capacity in LMICs to address brain, nervous system and neuromuscular related development, function and impairment throughout life and to lead to diagnostics, prevention, treatment and implementation strategies. The proposed work may also contribute to developing a base for research networking and evidence-based policy beyond the specific research project.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Applications are encouraged in any research area aligned with the BRAIN Initiative, including neuroethics. Applicants are expected to propose research training in an area that clearly complements their predoctoral research. Formal training in analytical tools appropriate for the proposed research is expected to be an integral component of the research training plan. In order to maximize the training potential of the F32 award, this program encourages applications from individuals who have not yet completed their terminal doctoral degree and expect to do so within 12 months of the application due date. On the application due date, candidates may not have completed more than 12 months of postdoctoral training. This Funding Opportunity Announcement (FOA) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>				
123794	NCCIH Natural Product Early Phase Clinical Trial Phased Innovation Award (R61/R33 Clinical Trial Required)	National Institutes of Health/DHHS	PAR-24-124	21-Oct-2024	1,750,000 USD
	Contact Name Contact Telephone Contact Email Sponsor Website Program URL Deadline Dates (ALL)	Sekai Chideya, M.D., MPH 301-827-1916 sekai.chideya@nih.gov Link to program URL 21-Oct-2024 , 13-Nov-2024 , 23-Jun-2025 , 15-Jul-2025 , 23-Feb-2026 , 17-Mar-2026 , 20-Oct-2026 , 13-Nov-2026			
	Synopsis	<p>This Funding Opportunity Announcement (FOA) encourages applications for investigator-initiated, early phase, clinical trials of natural products (i.e., botanicals, dietary supplements, and probiotics), which have a strong scientific premise to justify further clinical testing. Under this FOA, trials must be designed so that results, whether positive or negative, will provide information of high scientific utility and will support decisions about further development or testing of the natural product. This FOA will provide up to three years (R61 phase) of support for milestone-driven testing of pharmacokinetics, bioavailability, and assessment of the natural product's effect (i.e., measure of mechanism of action) when used by humans on a biological signature(s). If milestones in the R61 phase are achieved, up to 3 years of additional support (R33 phase) may be awarded to replicate the impact of the natural product on the biological signature(s) when used by humans and assess whether there is an association between the degree of the impact on the biological signature and functional or clinical outcomes in a patient population. Applications are encouraged to design R33 studies to determine how to optimize the impact of the natural product on the biological signature by optimizing the delivery of the natural product by examining different doses or formulation. In addition, applications can be designed to combine the natural product with another treatment approach that is known to impact the same biological signature; or study the impact of the natural product in a target population that is more responsive. Clinical trials submitted under this FOA are expected to be hypothesis based, milestone-driven, and directly related to the research priorities and mission of NCCIH. This R61/R33 funding mechanism is</p>

		intended to accelerate the translation of emerging basic science findings about natural products into early-stage clinical testing to determine whether continued clinical research is warranted. This FOA will not support efficacy or effectiveness trials, nor will it support trials to test natural products for the treatment or prevention of cancer. A maximum of 5 years will be supported by the two phases of the R61/R33 award. Applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact for the area of science for which they are planning to develop an application prior to submitting to this FOA.

This supervised career development program will provide independent NIH research support during the early-career phase to help awardees establish independent research programs in areas supported by the NIH HEAL Initiative’s Clinical Research in Pain Management program. This Parent Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion NOFO. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary study to an existing trial, as part of their research and career development. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial basic experimental study with humans led by another investigator, must apply to the Independent Clinical Trial Not Allowed companion NOFO.</p>

Research is needed to understand and address misinformation, uncertainty, distrust, and hesitancy regarding uptake of vaccines (e.g., SARS-CoV-2, pneumococcal, influenza, hepatitis B, human papilloma virus (HPV), varicella, tetanus, diphtheria, and pertussis [Tdap]) among individuals in the U.S. and its territories, especially in populations at increased risk for morbidity and mortality due to long-standing systemic health and social inequities, as well as chronic medical conditions. This NOSI is focused on individuals across the life span (i.e., all ages). The purpose of this NOSI is to solicit research that will: 1) understand and address barriers to increasing reach, access, and uptake of vaccinations among populations experiencing health disparities; 2) evaluate organizational, local, state, and federal policies and initiatives that mitigate or exacerbate disparities in vaccine access, uptake, and series completion, and 3) evaluate community-engaged interventions (e.g., expand reach, address psychosocial barriers, and social determinants of health [SDOH]) to facilitate vaccination uptake in clinical and community contexts.</p>				
103023	Academic-Industrial Partnerships for Translation of Technologies for Diagnosis and Treatment (R01 - Clinical Trial Not Allowed)	National Institutes of Health/DHHS	PAR-21-166	05-Oct-2024	2,495,000 USD

		<p>research to assess risk, detect, prevent, diagnose, treat, and/or manage disease. The rationale is to deliver new capabilities to meet evolving requirements for technologies and methods relevant to the advance of research and delivery of care in pre-clinical, clinical and non-clinical settings, domestic or foreign, for conditions and diseases within the missions of participating institutes. This FOA specifies a partnership structure that is expected to help bridge gaps in knowledge and experience by engaging the strengths of academic, industrial, and other investigators. The partners on each application should establish an inter-disciplinary, multi-institutional research team to work in strategic alliance to implement a coherent strategy to develop and translate a solution to their chosen problem. They are expected to plan, design, and validate that the solution will be suitable for end users. Each partnership should include at least one academic and one industrial organization. Each partnership should plan to transition a technology, method, assay, device, and/or system from a demonstration of possibility to a status useful in the chosen setting. Funding may be requested to enhance, adapt, optimize, validate, and otherwise translate technologies that address problems in biology, pathology, risk assessment, diagnosis, treatment, and/or monitoring of disease status. This FOA defines "innovation" as likelihood to deliver a new capability to end users.</p>

driven, or hypothesis-driven. Importantly, applicants must propose research approaches for which there are minimal or no preliminary data. A distinct feature for this FOA is that no preliminary data are required, expected, or encouraged. However, if available, minimal preliminary data are allowed. Preliminary data are defined as material which the applicant has independently produced and not yet published in a peer-reviewed journal. All preliminary data should be clearly marked and limited to one-half page, which may include one figure. Applications including data more than one-half page or more than one figure will be considered noncompliant with the FOA instructions and will not go forward to review.

Deadline Dates (ALL)	22-Sep-2024 [Optional][LOI/Pre-App], 21-Oct-2024 , 19-Nov-2024
Synopsis	The purpose of this Notice of Funding Opportunity (NOFO) is to resubmit PAR-23-256 “Feasibility Trials of the NIH Music-based Interventions Toolkit for Brain Disorders of Aging (R34 Clinical Trial Required)” in order to support proof-of-concept feasibility trials guided by the NIH Music-based Interventions (MBI) Toolkit for research on brain disorders of aging. These early phase clinical trials will generate evidence supporting the validity of the NIH MBI Toolkit’s guiding principles as well as the necessary pilot data to design a subsequent clinical efficacy or effectiveness study (or pragmatic clinical trial) using music-based interventions in the context of brain disorders of aging, including but not limited to Alzheimer’s disease and Alzheimer’s disease-related dementias, Parkinson’s disease, and stroke. The data collected should address gaps in scientific knowledge in order to facilitate development of a competitive large-scale clinical trial.

	<p>Contact Name Mary Evans, Ph.D.</p> <p>Contact Telephone 301-594-4578</p> <p>Contact Email evansmary@mail.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 10-Sep-2024 , 09-Oct-2024 , 07-Nov-2024 , 10-Dec-2024 , 09-Jan-2025</p> <p>Synopsis This Funding Opportunity Announcement (FOA) establishes an accelerated review/award process to support time-sensitive research to evaluate a new policy or program that is likely to influence obesity related behaviors (e.g., dietary intake, physical activity, sedentary behavior, and/or sleep) and/or weight outcomes in an effort to prevent or reduce obesity. This FOA is intended to support research where opportunities for empirical study are, by their very nature, only available through expedited review and funding. All applications submitted to this FOA must demonstrate that the evaluation of an obesity-related policy or program offers an uncommon and scientifically-compelling research opportunity that will only be available if the research is initiated with minimum delay. For these reasons, applications submitted to this time-sensitive FOA are not eligible for re-submission. It is intended that eligible applications selected for funding will be awarded within 4 months of the application due date; however, administrative requirements and other unforeseen circumstances may delay issuance dates beyond that timeline.</p>

	Synopsis	This Notice of Funding Opportunity (NOFO) supports the optimization of promising genome editing-based therapeutic leads for Alzheimer's Disease-Related Dementias (ADRD), towards IND-enabling studies. Specifically, it supports the characterization and optimization of therapeutic lead(s) that show promise as potential genome editing therapeutics, as evidenced by convincing proof-of-concept studies in appropriate models. At the end of the funding period, successful projects will have optimized a genome editing therapeutic candidate with demonstrated bioactivity, manufacturability, biodistribution, in vivo efficacy, and/or target engagement (measurement of proximal downstream effects) and optimal

A ROA is a method of solicitation that announces the anticipated availability of Other Transactions (OT) awards, a special type of legal instrument other than contracts, grants, or cooperative agreements. Purpose: The All of Us Research Program is a historic effort to gather data from at least 1 million people, with the goal of accelerating health research and medical breakthroughs, and enabling individualized prevention, treatment, and care. The program is creating a national research resource to inform thousands of studies, covering a wide variety of health conditions. Researchers will use data from the program to learn more about how individual differences in lifestyle, environment, and biological makeup can influence health and disease. The purpose of this announcement is to fund organizations who can help All of Us build its cohort of volunteers who reflect the rich diversity of the United States and are actively engaged as partners. These funded organizations will help design and implement strategies to raise awareness of the program through community and health care provider organizations, drive increased enrollment of participants, foster regular communication with participants, and engage the research community to use the data being gathered. Award Project Duration: Award periods are anticipated to be up to five (5) years but may be shortened or extended as needed. Pre-Submission Webinar: A webinar will be conducted on June 27, 2022 at [Time TBD]. Registration information will be posted here once it is available. White Paper Deadlines: This ROA will remain open for three (3) years from its issue date, unless otherwise updated via an amendment, and includes multiple white paper (WP) submission deadlines. All WP deadline times are 3:00 PM Eastern Time: Calendar Year 2022 WP Deadlines August 31, 2022 November 30, 2022 Calendar Year 2023 WP Deadlines February 28, 2023 May 31, 2023 August 31, 2023 November 30, 2023 Calendar Year 2024 WP Deadlines February 29, 2024 May 31, 2024 August 30, 2024 November 29, 2024 Calendar Year 2025 WP Deadlines February 28, 2025 May 23, 2025 Documents and Related Links: The full ROA package is attached in the 'Attachments/Links' section. Potential offerors are encouraged to carefully review the announcement before submitting questions and/or preparing a white paper submission. A link to the All of Us Research Program webpage has been provided for additional information about our program.</p>

This NOFO supports the development of resources that can be used to improve health and well-being and that lead to reductions in health disparities. Access to accurate, useful, usable, and understandable health information is an important factor when managing health and health care. Proposed projects should harness the capabilities of information technology and medical or health libraries to disseminate clear, evidence-based health-related information in formats used by individuals and their health care providers. Proposed projects should emphasize the development and deployment of new information resources or services, or expand and improve an existing resource or service, to meet the needs of populations experiencing health disparities and to promote health equity.</p>

The CDS&E meta-program supports projects that harness computation and data to advance knowledge and accelerate discovery above and beyond the goals of the participating individual programs. The intellectual drivers may be in an individual discipline or cut across more than one discipline in various Divisions and Directorates. A CDS&E proposal should enable and/or utilize the development and adaptation of advances in research and infrastructure in computational and data science. The CDS&E meta-program encourages research that pushes the envelope of science and engineering through computation and data, welcoming proposals in any research area supported by the participating divisions. A proposal may address topics that develop or enable interactions among theory, computing, experiment, and observation to achieve progress on hitherto intractable science and engineering problems. Areas of emphasis for CDS&E vary by program.</p>

physics, plasma chemistry, materials science, and space science, come together to advance knowledge for discovery and technological innovation. The primary goal of the ECosystem for Leading Innovation in Plasma Science and Engineering (ECLIPSE) program is to identify and capitalize on opportunities for bringing fundamental plasma science investigations to bear on problems of societal and technological need within the scope of science and engineering supported by the participating NSF programs. The ECLIPSE meta-program has been created to foster an inclusive community of scientists and engineers, an ecosystem spanning multiple NSF Directorates, in the pursuit of translational research at the interface of fundamental plasma science and technological innovation. The ECLIPSE program builds on the long history of NSF leadership in supporting multi-disciplinary research in plasma science and engineering, and is intended to enhance organizational unity within NSF, and potentially with other funding agencies, in considering proposals and supporting projects that may otherwise struggle to find a natural home within the existing hierarchy of Directorates, Divisions, and programs within the Foundation.

121572	Research on Innovative Technologies for Enhanced Learning	National Science Foundation	23-624	05-Nov-2024	900,000 USD

Deadline Dates (ALL)	05-Nov-2024 , 04-Nov-2025

Synopsis The purpose of the Research on Innovative Technologies for Enhanced Learning (RITEL) program is to support early-stage research in emerging technologies for teaching and learning that respond to pressing needs in authentic (real-world) educational environments. RITEL supports future-oriented exploratory and synergistic research in emerging technologies (including, but not limited to, artificial intelligence (AI), robotics, and immersive or augmenting technologies) for teaching and learning. The program accepts proposals that focus on learning, teaching, or a combination of both. The scope of the program is broad and includes teaching and learning in science, technology, engineering, and mathematics (STEM) and in foundational areas that enable STEM (e.g., self-regulation, literacy, communication, collaboration, creativity, and socio-emotional skills). RITEL supports research in all learning contexts (e.g., formal, informal, workplace) and for all learner populations. RITEL has a special interest in diverse learner/educator populations and in developing new educational technologies that are cost-effective for budget-limited school districts, colleges and universities. Research in this program should be informed by the convergence (synthesis) of multiple disciplines: e.g., learning sciences; discipline-based education research; computer and information science and engineering; design; and cognitive, behavioral, and social sciences. RITEL is

Program URL	Link to program URL
Deadline Dates (ALL)	13-Nov-2024 , 12-Nov-2025
Synopsis	Computational neuroscience provides a theoretical foundation and a rich set of technical approaches for understanding the nervous system at all levels, building on the theory, methods, and findings of computer science, neuroscience, and numerous other disciplines to accelerate the understanding of nervous system structure and function, mechanisms underlying nervous system disorders, and computational strategies used by the nervous system. Through the CRCNS program, the participating funding organizations support collaborative activities that span a broad spectrum of computational neuroscience research, as appropriate to the missions and strategic objectives of each agency. Two classes of proposals will be considered in response to this solicitation: Research Proposals describing collaborative research projects; and Data Sharing Proposals to support sharing of data and other resources.

127132	Dear Colleague Letter: Planning Grants to Create Artificial Intelligence (AI)-Ready Test Beds	National Science Foundation	NSF 24-111	13-Nov-2024	200,000 USD

existing test beds and infrastructure to make them AI-ready and appropriate for use in evaluating the impact and effect of AI tools and systems on users. To do this, proposers are encouraged to create teams of researchers who have expertise in AI as well as domain experts and staff managing existing test beds. Existing test beds and infrastructure can be found in a range of settings, including, but not limited to: NSF-funded centers (e.g., Engineering Research Centers) and facilities, infrastructure funded by other federal agencies (e.g., Department of Energy, National Institute of Standards and Technology, National Oceanic and Atmospheric Administration, Department of Homeland Security, Department of Transportation, etc. or at <https://www.nitrd.gov/apps/ai-rd-testbed-inventory/>), state agencies (e.g., <https://testbed.cityofnewyork.us/>) and industry. These Planning Grants will support costs associated with the formation of teams, the planning of the desired or envisioned AI-Ready infrastructure, the collection of preliminary pilot data and creation of governance and management plans for scalable AI-Ready Test Beds.

127500	U.S. National Science Foundation Research Traineeship (NRT) Program	National Science Foundation	24-597	14-Nov-2024	3,000,000 USD

Deadline Dates (ALL)	14-Nov-2024 , 08-Sep-2025

Synopsis The NSF Research Traineeship (NRT) program seeks proposals that explore ways for graduate students in research-based master's and doctoral degree programs to develop the skills, knowledge, and competencies needed to pursue a range of STEM careers. The program is dedicated to effective training of STEM graduate students in high priority interdisciplinary or convergent research areas, through a comprehensive traineeship model that is innovative, evidence-based, and aligned with changing workforce and research needs. Proposals are requested that address any interdisciplinary or convergent research theme of national priority. The NRT program addresses workforce development, emphasizing broad participation, and institutional capacity building needs in graduate education. The program encourages proposals that involve strategic collaborations with the private sector, non-governmental organizations (NGOs), government agencies, national laboratories, field stations, teaching and learning centers, informal science centers, and academic partners. NRT especially welcomes proposals that reflect collaborations between NRT proposals and existing NSF Eddie Bernice Johnson Inclusion across the Nation of Communities of Learners of Underrepresented Discoverers in Engineering and Science (INCLUDES) Initiative, Research Experiences for Undergraduates (REU), Louis Stokes Alliances for Minority Participation (LSAMP), NSF Scholarships

	Synopsis	<p>The Science and Technology Centers (STC): Integrative Partnerships program supports exceptionally innovative, complex research and education projects that require large-scale, long-term awards. STCs focus on creating new scientific paradigms, establishing entirely new scientific disciplines, and developing transformative technologies which have the potential for broad scientific or societal impact. STCs conduct world-class research through partnerships among institutions of higher education, national laboratories, industrial organizations, other public or private entities, and via international collaborations, as appropriate. They provide a means to undertake potentially groundbreaking investigations at the interfaces of disciplines and/or highly innovative approaches within disciplines. STCs may involve any area of science and engineering that NSF supports. STC investments support the NSF vision of creating and exploiting new concepts in science and engineering and providing global leadership in research and education.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>The Ecology and Evolution of Infectious Diseases (EEID) program (https://new.nsf.gov/funding/opportunities/ecology-evolution-infectious-diseases-eeid) supports research that provides predictive understanding of pathogen transmission dynamics. This program includes partnerships with the US Department of Agriculture, National Institute of Food and Agriculture (USDA/NIFA), National Institutes of Health (NIH), United Kingdom Research and Innovation (UKRI), United States-Israel Binational Science Foundation (BSF), and National Natural Science Foundation of China (NSFC). The intent of the program is discovery of principles of infectious disease (re)emergence and transmission and testing mathematical or computational models that elucidate infectious disease systems. Those models can be of any type that advance causal or mechanistic understanding, including, but not limited to, models that use artificial intelligence or machine learning. The Program also encourages projects that take advantage of emerging technologies, such as remote sensing and precision treatment, especially those that will enhance food security.</p>

	Deadline Dates (ALL)	20-Nov-2024			
	Synopsis	<p>The multi-agency Ecology and Evolution of Infectious Diseases program supports research on the ecological, evolutionary, organismal, and social drivers that influence the transmission dynamics of infectious diseases. The central theme of submitted projects must be the quantitative, mathematical, or computational understanding of pathogen transmission dynamics. The intent is discovery of principles of infectious disease (re)emergence and transmission and testing mathematical or computational models that elucidate infectious disease systems. Projects should be broad, interdisciplinary efforts that go beyond the scope of typical studies. They should focus on the determinants and interactions of (re)emergence and transmission among any host species, including but not limited to humans, non-human animals, and/or plants. This includes, for example, the spread of pathogens; the influence of environmental factors such as climate; the population dynamics and genetics of vectors and reservoir species or hosts; how the physiology or behavior of the pathogen, vector, or host species biology affects transmission dynamics; the feedback between ecological transmission and evolutionary dynamics; and the cultural, social, behavioral, and economic dimensions of pathogen transmission and disease. Research may be on zoonotic, environmentally-borne, vector-borne, enteric, or respiratory pathogens of either terrestrial, aquatic, or marine systems and organisms, including diseases of animals and plants, at any scale from specific pathogens to inclusive</p>

		<p>environmental systems. Proposals for research on disease systems of public health concern to Low- or Middle-Income Countries (LMICs) are strongly encouraged, as are disease systems of concern in agricultural systems. Investigators are encouraged to develop the appropriate multidisciplinary team, including for example, anthropologists, modelers, ecologists, bioinformaticians, genomics researchers, social scientists, economists, oceanographers, mathematical scientists, behaviorists, epidemiologists, evolutionary biologists, entomologists, immunologists, parasitologists, microbiologists, bacteriologists, virologists, pathologists or veterinarians, with the goal of integrating knowledge across disciplines to enhance our ability to predict and control infectious diseases.</p>

	Synopsis	<p>The Science and Technology Centers (STC): Integrative Partnerships program supports exceptionally innovative, complex research and education projects that require large-scale, long-term awards. STCs focus on creating new scientific paradigms, establishing entirely new scientific disciplines, and developing transformative technologies which have the potential for broad scientific or societal impact. STCs conduct world-class research through partnerships among institutions of higher education, national laboratories, industrial organizations, other public or private entities, and via international collaborations, as appropriate. They provide a means to undertake potentially groundbreaking investigations at the interfaces of disciplines and/or highly innovative approaches within disciplines. STCs may involve any area of science and engineering that NSF supports. STC investments support the NSF vision of creating and exploiting new concepts in science and engineering and providing global leadership in research and education.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis</p> <p>Applicant Types</p> <p>Funding Limit</p> <p>Limited Submission</p>	<p>The American Occupational Therapy Foundation (AOTF) awards Intervention Research Grants (IRG) as part of its mission to advance the science of occupational therapy to support people's full participation in meaningful life activities. The purpose of this grant program is to lay the necessary groundwork for larger intervention studies and for larger implementation studies and support the profession's Vision 2025 of occupational therapy as an evidence-based profession. The intent of the IRG program is to provide seed funding for the development of new and/or novel ideas in order to generate preliminary data as proof of concept. Most larger funders, including federal sources and most of the major nonprofit foundations, require this data in order to apply to them, yet sources to fund this preliminary work are limited at best. The AOTF IRG occupies a very important niche and fills a critical gap by investing in the development of ideas and data in the early state of the occupational therapy research enterprise. One-year non-renewable proposals for up to \$50K (including indirect costs) will be considered. Indirect expenses will be funded up to 10%.</p> <p>50,000.00 maximum</p> <p>No</p>

	<p>Synopsis</p> <p>Applicant Types</p> <p>Funding Limit</p> <p>Limited Submission</p>	<p>Breakthrough T1D has issued a request for applications (RFA) to accelerate research and development of next generation beta cell replacement therapies for type 1 diabetes (T1D) by leveraging advancements in artificial intelligence and machine learning. This initiative will award grants to academic investigators and industry partners of up to \$750,000 over 3 years.</p> <p>750,000.00 see detail</p> <p>No</p>			
127166	<p>Request for Applications -- Development Of Devices And Drugs For Fully Automated Insulin Delivery At Meals</p>	Breakthrough T1D		17-Sep-2024 [LOI/Pre-App]	Not Specified
	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email</p> <p>Sponsor Website</p> <p>Program URL</p> <p>Deadline Dates (ALL)</p> <p>Synopsis</p>	<p>Michael Meyer, MPA</p> <p>mmeyer@breakthroughT1D.org</p> <p>Link to sponsor website</p> <p>Link to program URL</p> <p>17-Sep-2024 [LOI/Pre-App], 18-Nov-2024</p> <p>Breakthrough T1D is a longstanding supporter of automated insulin delivery (AID) systems. Today's commercially available AID systems are hybrid closed loop (HCL), meaning they require manual management of insulin dosing around meals, exercise, and other events that cause significant changes to glucose levels. Fully closed loop (FCL) systems that automate insulin delivery with no need for manual input from the user can reduce the burden of living with T1D and achieve superior glycemic outcomes. Toward the ultimate goal of achieving completely FCL AID systems, Breakthrough T1D invites letters of intent to develop technologies to allow for automated insulin delivery at meals. In response to this announcement, Letters of Intent (LOI) can be submitted under the following mechanism(s): Strategic Research Agreements (SRAs)-- Strategic Research Agreements are intended for support of research activities at non-for-profit entities such as academic institutions. Industry Discovery and Development Partnerships</p>

	Synopsis	<p>In an effort to assure that all meritorious cystic fibrosis-related research is supported, and to support the career development of CF-focused researchers, the Cystic Fibrosis Foundation has developed the CF Foundation/NIH K-Unfunded Award mechanism to provide bridge funding for well-qualified applicants. The Cystic Fibrosis Foundation does not intend to assume the role of the National Institutes of Health (NIH) or other governmental funding agencies, but instead wishes to ensure that the momentum in CF research and development of a cohort of CF-focused researchers are not irreversibly slowed due to budget constraints. The CFF/NIH K-Unfunded Award offers a temporary mechanism for supporting highly meritorious K-award applicants until NIH funding can be obtained. The Foundation will continue to vigorously encourage the NIH to assume support of meritorious CF-focused projects and investigators. To be considered for this program, applications clearly relevant to advancing the Foundation mission must have been submitted to NIH as a K01, K08, K22, K23, K24, K25 or K99/R00 application. The application must have been reviewed by an NIH study section and presented to an institute council within 12 months of applying for Foundation support.</p>

	Synopsis	<p>The Fibrolamellar Cancer Foundation (FCF) is accepting proposals to support innovative research leading to improved understanding and curative treatments for fibrolamellar carcinoma (FLC). FLC, also known as fibrolamellar hepatocellular carcinoma (FL-HCC), is an aggressive liver cancer that tends to strike teens and young adults. The research must focus specifically on FLC. Studies should be intended to advance knowledge relevant to the understanding, diagnosis, epidemiology, or treatment of FLC. Of particular interest are applications showing a clear path towards a novel therapy or clinical trials with the ultimate goal of achieving a cure for FLC. The Foundation will accept grant applications to support innovative and promising research projects towards the listed goals. The FCF believes that collaboration engaging the best talent across institutions, together with early sharing of data and resources, often accelerates the path to a cure for rare cancers.</p>

	Synopsis	The Spinal Cord Injury Research on the Translational Spectrum (SCIRTS) grants Portfolio is intended to advance novel approaches to improving function and developing curative therapies after spinal cord injury (SCI). This portfolio emphasizes SCI (vs. spinal cord disease or related disorders) and is intended to fill gaps in the field and to further develop new strategies to restore function resulting from SCI. The Neilsen Foundation does not intend to provide continuous funding to individual labs but to fund novel research throughout the translational spectrum.

	Synopsis	<p>This highly competitive three-year fellowship aims to attract exceptional new Ph.D. scientists and engineers from across the nation. Truman Fellows are given the opportunity to conduct groundbreaking, independent research that directly supports Sandia’s national-security mission. They have the freedom to choose their own research topics and benefit from access to state-of-the-art facilities at Sandia’s principal locations in New Mexico and California.</p> <p>Collaborating with some of the nation’s most accomplished scientists and engineers, Truman Fellows gain invaluable expertise and contribute to cutting-edge advancements in their respective fields. To ensure a fruitful and enriching experience, each Fellow is assigned a mentor from Sandia’s technical staff who possesses relevant experience and shares an interest in the Fellow’s proposed research area. This emphasis on research mentoring allows Fellows to seamlessly integrate into Sandia’s R&D teams, fostering a collaborative environment that nurtures their early career development.</p>
