

**Funding Opportunities Monthly Edition
Dec 2024 Due Dates**

Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in Dec 2024.

The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

The Development Office offers assistance with many not for profit opportunities. Please contact the Development Office's Corporate and Foundation Relations team at DevCorpFound@mountsinai.org / 212-659-8500 below for assistance or questions.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
121928	RFA-CA-24-006 -- Translational Research Toward Development of a Kaposi Sarcoma Herpesvirus (KSHV) Vaccine (U01 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	RFA-CA-24-006	04-Nov-2024 [Optional][LOI/Pre-App]	Not Specified
	<p>Contact Name Rebecca Liddell Huppi, Ph.D.</p> <p>Contact Telephone 240-781-3324</p> <p>Contact Email liddellr@exchange.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 04-Nov-2024 [Optional][LOI/Pre-App], 04-Dec-2024</p> <p>Synopsis Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute intends to support basic and translational research that will guide the development of a prophylactic or therapeutic Kaposi sarcoma herpesvirus (KSHV) vaccine. A prophylactic KSHV vaccine could prevent primary KSHV infection, transmission, and subsequent development of KS and other KSHV-associated syndromes such as multicentric Castleman disease (MCD), primary effusion lymphoma (PEL), and KSHV inflammatory cytokine syndrome (KICS), or ameliorate the severity of disease. A therapeutic KSHV vaccine could be helpful in preventing or treating KSHV disease in people already infected with KSHV. The U01 research projects funded through this NOFO will form a cooperative group, the KSHV Vaccine Development Consortium (KVDC).</p>				
126314	Notice of Special Interest (NOSI): Conferences and Scientific Meetings in Cancer Biology	National Cancer Institute/NIH/DHHS	NOT-CA-24-059	14-Nov-2024 [LOI/Pre-App]	50,000 USD
	<p>Contact Name Yin Liu, Ph.D.</p> <p>Contact Telephone 240-276-6251</p> <p>Contact Email liyuy@exchange.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 14-Nov-2024 [LOI/Pre-App], 12-Dec-2024</p> <p>Synopsis The purpose of this Notice of Special Interest (NOSI) is to solicit applications to support innovative conferences, symposia, and workshops that explore basic, fundamental questions in areas of cancer biology supported by the Division of Cancer Biology, National Cancer Institute, and preferably have not yet been a major focus of a scientific meeting.</p>				
127453	RFA-CA-25-011 -- The Confluence of Cancer Stigma and HIV Stigma in HIV-	National Cancer Institute/NIH/DHHS	RFA-	10-Nov-2024	2,500,000

	(NCCIH) participation, effective immediately, in PAR-22-097 “Global Brain and Nervous System Disorders Research Across the Lifespan” and companion notice of funding opportunity PAR-22-098 “Global Brain and Nervous System Disorders Research Across the Lifespan” NCCIH will not support a clinical trial through this announcement.				
127720	RFA-AT-25-001--HEAL Initiative: Pain Research Enhancement Program (PREP) (R15 Clinical Trial Optional)	National Center for Complementary and Integrative Health/NIH/DHHS	RFA-AT-25-001	20-Oct-2024 [Optional][LOI/Pre-App]	Not Specified
	<p>Contact Name: Alex Tuttle, Ph.D.</p> <p>Contact Telephone: 301-814-6115</p> <p>Contact Email: alex.tuttle@nih.gov</p> <p>Sponsor Website: Link to sponsor website</p> <p>Program URL: Link to program URL</p> <p>Deadline Dates (ALL): 20-Oct-2024 [Optional][LOI/Pre-App], 19-Nov-2024 , 18-Dec-2024 , 28-Sep-2025 [Optional][LOI/Pre-App], 28-Oct-2025 , 24-Nov-2025 , 27-Sep-2026 [Optional][LOI/Pre-App], 27-Oct-2026 , 23-Nov-2026</p> <p>Synopsis: The purpose of this HEAL Initiative program is to: (1) support basic and mechanistic pain research from R15-eligible undergraduate-focused serving institutions, health professional schools or graduate schools; (2) promote integrated, interdisciplinary research partnerships between Principal Investigators (PIs) from R15-eligible institutions and investigators from U.S. domestic institutions; and (3) enhance the pain research environment at the R15-eligible institution for health professional students, undergraduate and/or graduate students through active engagement in pain research. Applications in response to this notice of funding opportunity (NOFO) should include plans to accomplish these goals. Specifically, applications should include a rigorous plan for conducting basic and mechanistic pain research in the Research Strategy section of the application. In addition, a research partnership between the PI’s institution and at least one investigator from a separate U.S. domestic institution that provides resources and/or expertise that will enhance the proposed pain research program must be included in a separate Team Management Plan. The proposed partnership will be a sub-award agreement(s) with at least one partnering institution, which does not need to be R15-eligible. The budget of all sub-awards must not exceed one third of the total budget. Furthermore, applications must include a Facilities & Other Resources document that demonstrates active involvement of health professional students, undergraduate and/or graduate students from the R15-eligible institution(s) in the proposed pain research projects. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).</p>

	Deadline Dates (ALL)	21-Nov-2024 , 20-Dec-2024			
	Synopsis	<p>This Funding Opportunity Announcement (FOA) solicits grant applications to further develop enabling technologies and transformative platforms to catalyze next-generation predictive, diagnostic and therapeutic products to address heart, lung, blood, and sleep (HLBS)-related disorders and diseases. This FOA solicits R33 applications where major feasibility gaps for the enabling technology or transformative platform have already been overcome, as demonstrated with supportive preliminary data, but still requires further development and rigorous validation to encourage downstream demonstration, utilization and adoption. Well-suited applications must offer the potential to accelerate and/or transform the areas of early detection and screening, model development, clinical diagnosis, treatment, control, prevention or epidemiology, while addressing issues associated with HLBS-related diseases and disorders. Projects proposing application of existing technologies where the novelty resides in the biological or clinical target/question being pursued are not appropriate for this solicitation. Applications considered nonresponsive to the FOA will not be reviewed. This FOA is part of a suite of Catalyze innovation grants to advance projects to the point where they can meet the entry criteria for the NHLBI Catalyze Product Definition or Preclinical FOAs.</p>

This two-phased award will facilitate completion of a doctoral dissertation (F99) and transition to a strong postdoctoral research position (K00) focused on the scientific, medical, ethical, social and/or legal areas of genomics research. It is anticipated that successful completion of this phased award program will provide students sufficient scientific and career development activities to set them on the path to becoming independent genomics researchers.</p>

	<p>Synopsis</p> <p>2025 , 16-Jun-2025 , 06-Aug-2025 , 07-Sep-2025 , 05-Oct-2025 , 16-Oct-2025 , 05-Dec-2025 , 07-Jan-2026 , 05-Feb-2026 , 16-Feb-2026 , 07-May-2026 , 05-Jun-2026 , 16-Jun-2026 , 07-Sep-2026 , 05-Oct-2026 , 16-Oct-2026 , 07-Jan-2027</p> <p>The purpose of this announcement is to notify the research community that the National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS) is interested in receiving Exploratory/Developmental grant applications focused on NIAMS core mission areas. Awards will provide support for innovative projects that introduce novel scientific ideas, model systems, tools, agents, targets, and technologies that have the potential for significant impact, and to substantially advance research within the NIAMS mission. These studies often assess the feasibility of a novel avenue of investigation and involve considerable risk, but have the potential to bring about breakthroughs of high value to the NIAMS research community.</p>

	<p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 06-Dec-2024 , 09-Apr-2025 , 06-Aug-2025 , 05-Dec-2025</p> <p>Synopsis This Funding Opportunity Announcement (FOA) solicits applications that propose to conduct time-sensitive ancillary studies related to the NIAMS mission in conjunction with privately or publicly funded, active, ongoing clinical projects (parent projects). The parent project can be an interventional clinical trial, or a clinical study such as an observational study, or a disease-specific repository that will be actively collecting patient samples or clinical data. The parent project(s) should provide a cohort of well-characterized patients, infrastructure, data, and biological samples for the ancillary study. Applications submitted in response to this FOA will undergo an accelerated review and award process. The objective of this FOA is to provide a flexible mechanism to leverage currently funded resources and maximize the return on existing investments in parent projects. Successful ancillary studies will enhance the scientific content and value of the parent projects, improve the research community’s understanding of a disease or organ system in the NIAMS portfolio, and thus may identify novel targets for diagnosis, treatment, and prevention of disease.</p>

	<p>Synopsis: The purpose of the NIDCR Dual Degree Dentist Scientist Predoctoral to Postdoctoral Transition Award (F99/K00) is to provide support and mentorship to graduate students enrolled in integrated dual degree dental (DDS/DMD) and PhD programs during the transition from predoctoral student to postdoctoral scholar. This phased award will facilitate completion of predoctoral dual degree dentist scientist training (F99) and ensure transition to mentored postdoctoral positions in dental, oral, and craniofacial (DOC) research (K00). It is anticipated that successful completion of this phased award program will enhance dual degree dentist scientists' research career trajectories. This Notice of Funding Opportunity (NOFO) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>				
126380	Notice of Special Interest (NOSI): Administrative Supplements to Enhance Engagement Activity with Underserved Populations Within the Type 1 Diabetes Community (Admin Supp Clinical Trial Not Allowed)	National Institute of Diabetes and Digestive and Kidney Diseases/NIH/DHHS	NOT-DK-24-020	02-Dec-2024	150,000 USD
	<p>Contact Name: Miranda M. Broadney MD, MPH Contact Telephone: 301-594-1176 Contact Email: Miranda.Broadney@nih.gov Sponsor Website: Program URL: Link to program URL Deadline Dates (ALL): 02-Dec-2024 , 03-Mar-2025</p> <p>Synopsis: NIDDK aims to achieve equitable engagement in research across all persons impacted by type 1 diabetes (T1D). Understanding that participation in research is inequitable across many groups impacted by T1D, this supplement opportunity supports activities which enhance outreach to and engagement with underserved populations which experience diabetes-related health disparities. (ref. NIH designated health disparities populations). Improved engagement, participation, and incorporation of leadership from underserved T1D populations is deemed essential for addressing disparities and advancing health equity in T1D outcomes. This supplement opportunity is available to PD(s)/PI(s) of active NIDDK research grants investigating T1D. Administrative supplements must support work within the scope of the original project and cannot be used to support planning activities for future grants.</p>

These T1D RS will leverage the existing resources of the Kidney Precision Medicine Project (KPMP). T1D RS will collaborate directly with the KPMP to obtain and evaluate kidney biopsies from participants, create a Kidney Tissue Atlas, define disease subgroups, and identify critical cells, interstitial components, pathways, and targets for novel therapies. Current KPMP RS are not eligible to apply.</p>

119809	RFA-ES-23-011 -- Time-Sensitive Research Opportunities in Environmental Health Sciences (R21 Clinical Trial Not Allowed)	National Institute of Environmental Health Sciences/NIH/DHHS	RFA-ES-23-011	01-Oct-2024	275,000 USD
	<p>Contact Name Toccara Chamberlain, M.A.</p> <p>Contact Telephone 984-287-4482</p> <p>Contact Email toccara.chamberlain@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 01-Oct-2024 , 02-Dec-2024 , 03-Mar-2025 , 02-Jun-2025 , 01-Aug-2025 , 01-Oct-2025 , 01-Dec-2025</p> <p>Synopsis This Notice of Funding Opportunity (NOFO) is intended to support novel environmental health research in which an unpredictable event or policy change provides a limited window of opportunity to collect human biological samples or environmental exposure data. The primary motivation of the NOFO is to understand the consequences of natural and human-made disasters, emerging environmental public health threats, and policy changes in the U.S. and abroad. A distinguishing feature of an appropriate study is the need for rapid review and funding, substantially shorter than the typical NIH grant review/award cycle, for the research question to be addressed and swiftly implemented. The shortened timeframe will be achieved by more frequent application due dates and expediting peer review, council concurrence and award issuance. The entire cycle, from submission to award, is expected to be within 4-6 months.</p>

---------	---------------	--------------	----------------	---------------	----------------

	<p style="text-align: center;">Synopsis</p>	<p>This Notice of Funding Opportunity (NOFO) from the NIH Brain Research through Advancing Innovative Neurotechnologies (BRAIN) Initiative is intended to support the scaling up of brain cell type-specific molecular or genetic access reagents to study circuit function. Scaled engineering and validation of cell type-specific reagents are priorities to be supported. Applications are sought for Reagent Resource for Design and Development projects that scale up the creation of these tools for several vertebrate species, including in experimental animals and human ex vivo tissues or cells. Projects will integrate: scaled engineering, validation, cataloguing, and adaptation into easily disseminable formats of reagents. Scaled up projects are sought that will develop tens to hundreds of cell type-selective reagents. Validated reagents produced in these projects are intended to be distributed to neuroscience researchers via centralized Production and Distribution Facilities to be supported separately. This NOFO is part of the BRAIN Initiative Armamentarium project, whose overall goal is to generate tools to specifically access, manipulate, and monitor brain cell types across multiple vertebrate species. This NOFO will foster close interaction between technologists, disseminators, and neurobiologists in a research consortium including investigators funded by other Armamentarium NOFOs. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn.</p>

Tools used for measuring and analyzing behavior should be multi-modal, with the appropriate accuracy, specificity, temporal resolution, and flexibility necessary for integration with existing tools used to measure and modulate the brain circuits that give rise to those behaviors. This R61/R33 FOA is intended to support biphasic applications for novel tools development (i.e., hardware/software) in the R61 phase, followed by the integration/synchronization of these novel tools with established methods for recording human brain activity in the R33 phase. Applications must propose one or more milestones, which clearly define the criteria for the success of the R61 project objectives. Transition to the R33 phase will depend on demonstration of milestone completion. Applications should be submitted by multi-disciplinary teams with expertise spanning behavior and behavioral measurement, neurobiology, social systems, computer/data systems, engineering, biostatistics, neuroethics, and artificial intelligence. Applicants pursuing brain-behavior quantification and</p>

To recognize the crucial role great mentors play in the development of future leaders in neuroscience, the National Institute of Neurological Disorders and Stroke (NINDS) created the Landis Award for Outstanding Mentorship. Each year, this award provides \$100,000.00 (direct costs) to up to five (5) faculty members, who have demonstrated a dedication to outstanding mentorship and training. This funding is intended to help foster the research career development of current or additional students and post-doctorates under the guidance of outstanding mentors. NINDS hopes that this tangible award will impress upon the scientific community as a whole, and faculty and institutional leaders in particular, the high value NINDS places on outstanding training and mentorship. Further, NINDS hopes that it encourages institutions to reward individuals not only for outstanding research accomplishments but also for their impact on the lives of others, and the future of neuroscience, through outstanding mentorship and training.</p>

	<p>Contact Email michael.oshinsky@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 02-Oct-2024 , 06-Dec-2024</p> <p>Synopsis The purpose of this Funding Opportunity Announcement (FOA) is to promote the discovery and validation of novel therapeutic targets to facilitate the development of pain therapeutics. Specifically, the focus of this FOA is on the basic science discovery of targets in the peripheral nervous system, central nervous system, immune system or other tissues in the body that can be used to develop treatments that have minimal side effects and little to no abuse/addiction liability. Research supported by this FOA must include rigorous validation studies to demonstrate the robustness of the target as a pain treatment target. This will lower the risk of adopting the target in translational projects to develop small molecules, biologics, natural substances, or devices that interact with this target for new pain treatments. Translational research to develop new medical devices is not the focus of this FOA. Basic science studies of pain and related systems in the body are responsive to this FOA and are encouraged in the context of novel pain therapeutic target discovery. This FOA is not specific for any one or group of pain conditions. Projects to identify novel targets for acute pain, chronic pain, migraine, other headache disorders, osteoarthritis, diabetic neuropathy, chemotherapy-induced neuropathy, sickle-cell pain, post stroke pain, orofacial pain, etc. will be considered. Projects to identify novel targets for a combination of chronic overlapping pain conditions or for specific pathological conditions will be considered. Projects that seek to identify novel targets in specific populations such as women, children, older adults or other underrepresented groups will also be responsive to this FOA.</p>

Synopsis	The purpose of this funding opportunity is to support research that advances health equity through development, testing, and evaluation of interventions that prevent and address housing instability. Applications responding to this Notice of Funding Opportunity should develop, test, and/or evaluate the impact of a housing intervention on both health and housing outcome(s). NINR is interested in applications that focus on social determinants of health (SDOH) interventions that modify housing opportunities and/or interventions that address housing instability as a social risk by addressing individual and/or interpersonal-level housing needs. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis</p> <p>The purpose of this Notice of Special Interest (NOSI) is to attract early stage physician-scientists and clinical psychologist-scientists from the U.S. Department of Veterans Affairs (VA) to an Alzheimer’s disease and Alzheimer’s disease-related dementias (AD/ADRD) research career. To accomplish this goal, the VA and the National Institute on Aging (NIA) have created a two-part opportunity for eligible VA researchers to pair with both VA- and NIA-funded mentors in the AD/ADRD field through an IK2 career development award from the VA (described in VA RFAs BX-24-030, CX-24-030, HX-24-030, and RX-24-030) and an administrative supplement from NIA. The research can focus on any aspect of the AD/ADRD field (e.g., disease mechanisms, biomarker discovery, diagnosis/clinical assessment, therapeutics, patient care, community care/social determinants of health, caregiver issues, and models of care). The VA RFAs and NIA NOSI will also promote developing and implementing a collaborative framework to facilitate co-funding and support of shared research priorities between NIA and the VA, enabling increased coordination between the two organizations.</p>				
104399	<p>NIA Postdoctoral Fellowship Award to Promote Diversity in Translational Research for AD/ADRD (F32 Clinical Trial Not Allowed)</p>	National Institute on Aging/NIH/DHHS	PAR-21-217	08-Dec-2024	Not Specified

	<p>Contact Email yuan.luo@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 08-Dec-2024</p> <p>Synopsis The purpose of this Funding Opportunity Announcement (FOA) is to promote diversity in the translational research workforce for Alzheimer's disease and Alzheimer's disease-related dementias (AD/ADRD). This predoctoral fellowship program will emphasize the development of skills in data science and drug discovery and their application to various aspects of AD/ADRD research (from populations studies to research that can lead to new treatments and diagnostics, including all aspects of behavioral and social research). It will support research training of promising predoctoral candidates from diverse backgrounds to help them gain critical translational skills in data science and drug discovery. The long-term goal of this program is to develop a diverse translational workforce that can effectively participate in and/or lead a team-science, precision medicine approach to studies of AD/ADRD treatment, prevention, early detection, and disease management and care. This Funding Opportunity Announcement (FOA) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>

As a starting point, eligible applicants must identify a therapeutic candidate with a robust body of background data in the basic science and early discovery phases to be ready for transition to the preclinical and clinical phases of development. Data may include having sufficient bioactivity, stability, manufacturability, bioavailability, in vivo efficacy and/or target engagement, and other favorable properties that are consistent with the desired clinical application. Projects responsive to this announcement could be undertaken at any point along the drug development continuum, from late discovery (i.e., lead optimization/early safety) up to early-stage clinical trials. For small molecules, the earliest stage of eligibility for this Award is already having small-molecule compounds with proof of desired pharmacological activity. For biologics, the profiling of promising product candidates in animal models of AUD or AAOD will be allowed as the earliest entry point. The ultimate purpose and goal of this FOA is to advance molecules closer to U.S. Food and Drug Administration (FDA) approval. Milestones will be commensurate with the project proposed and the purpose of this FOA. This FOA supports early-phase clinical trials, although these are not required. Women-owned and socially or economically disadvantaged small business are encouraged to apply.</p>

the overdose crisis. Given the recent evolution of both the epidemiology of the overdose crisis and public policies intended to support overdose prevention efforts, new research is needed to take effective interventions to scale in law enforcement, jails, courts, and community corrections. There is also a pressing need to rigorously test new and emerging models for effectively addressing the complex needs of individuals with substance use disorder (SUD) and/or high overdose risk in these settings. Of particular importance is the coordination of services between public health and public safety agencies, to ensure continuity of care for individuals as they transition between these systems. To support research on effective interventions and implementation strategies for addressing SUD, overdose risk, and common co-occurring conditions in these populations and systems, the National Institute on Drug Abuse (NIDA) intends to continue the Justice Community Overdose Innovation Network (JCOIN) – Phase II. The purpose of the network is to bring together a national consortium of investigators and practitioner partners to conduct an array of research and capacity building activities to improve the delivery of effective interventions for adults and youth, spanning the key points of the sequential intercept model (i.e., crisis intervention, emergency response, law enforcement diversion/deflection, pre-trial services, courts, jail, prison, re-entry services, probation, parole). The structure of the network will include multiple research centers, working in collaboration with four complementary resource and support centers. This notice of funding opportunity (NOFO) seeks applications for JCOIN Phase II Clinical Research Hubs. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

of researchers both within and across LMICs to address this critical burden. This initiative is expected to stimulate new research on the interplay between HIV and development of NCDs in persons living with HIV (PLWH). This includes exploratory studies to uncover the extent to which HIV infection influences the etiopathogenesis of the NCDs; and to identify and develop appropriate approaches for effective diagnosis, prevention, therapeutic interventions and integrated clinical care for PLWH with the comorbid conditions. Applicants should develop their studies in keeping with the NIH HIV/AIDS Research Priorities (<https://www.oar.nih.gov/hiv-policy-and-research/research-priorities>; <https://grants.nih.gov/grants/guide/notice-files/NOT-OD-20-018.html>). Research teams should contain an appropriate mix of expertise to accomplish the proposed studies, including partnerships between HIV and NCD researchers who can initiate new ideas, and determine feasibility of novel approaches to understand and reduce the long-term suffering from the comorbid disorders. Applicants will also be asked to address the needs of collaborating LMIC institutions to develop capacity for carrying out research in this field.

 Deadline Dates (ALL) 15-Nov-2024 , 09-Dec-2024

Synopsis This Funding Opportunity Announcement (FOA) encourages exploratory/developmental research grant applications, piloting innovative, collaborative research projects with low- and middle-income country (LMIC) institutions/ scientists on brain and other nervous system-related function and disorders throughout life, relevant to LMICs. Research on the full spectrum of neuro-health, neurological, neuromuscular, sensory, neuropsychiatric, cognitive, behavioral and neurodevelopmental function and disorders may span the full range of science from basic to clinical to translation and implementation research. Scientists in LMIC institutions may partner with scientists in other LMIC institutions and/or U.S. institutions . Income categories are defined by the World Bank at <http://data.worldbank.org/about/country-classifications/country-and-lending-groups>). These grants are expected to foster the development of more comprehensive research programs that contribute to the long-term goals of building sustainable neuro-health research capacity in LMICs to address brain, nervous system and neuromuscular related development, function and impairment throughout life and to lead to diagnostics, prevention, treatment and implementation strategies. The proposed work may also contribute to developing a base for research networking and evidence-based policy beyond the specific research project.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 07-Dec-2024</p> <p>Synopsis The objective of this Notice of Funding Opportunity (NOFO) is to support the continued development of new and innovative on-demand, event-driven, and long-acting (systemic and non-systemic) multipurpose prevention technologies (MPTs). It supports development of MPTs that prevent HIV infection and pregnancy (hormonal and non-hormonal methods); sexually transmitted infections (STI) and pregnancy; or multiple non-HIV STI or HIV/STI MPTs in cis and trans males and females of all ages. Applications for MPT development may involve pharmacokinetic (PK), pharmacodynamic (PD), safety and, drug-drug interactions (DDI) studies using drug development, and formulation science supported by animal model testing. Also supported are biobehavioral and behavioral/social studies to identify MPT user-desired rheological and biophysical factors (look, feel, effectiveness, safety, and duration of action) and other behavioral/social factors that could promote increased MPT adoption and use.</p>				
117361	<p>RFA-MH-23-110 -- BRAIN Initiative Fellows: Ruth L. Applications are encouraged in any research area aligned with the BRAIN Initiative, including neuroethics. Applicants are expected to propose research training in an area that clearly complements their predoctoral research. Formal training in analytical tools appropriate for the proposed research is expected to be an integral component of the research training plan. In order to maximize the training potential of the F32 award, this program encourages applications from individuals who have not yet completed their terminal doctoral degree and expect to do so within 12 months of the application due date. On the application due date, candidates may not have completed more than 12 months of postdoctoral training. This Funding Opportunity Announcement (FOA) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>	National Institutes of Health/DHHS	RFA- MH-23- 110	10-Nov-2024 [Optional][LOI/Pre- App]	Not Specified

	Synopsis	This Notice of Funding Opportunity (NOFO) will support students at institutions with NIH-funded institutional predoctoral dual-degree training programs. The purpose of the Kirschstein-NRSA, dual-doctoral degree, predoctoral fellowship (F30) is to enhance the integrated research and clinical training of promising predoctoral students, who are matriculated in a combined MD/PhD or other dual-doctoral degree training program (e.g. DO/PhD, DDS/PhD, AuD/PhD, DVM/PhD), and who intend careers as physician/clinician-scientists. Candidates must propose an integrated research and clinical training plan and a dissertation research project in scientific health-related fields relevant to the missions of the participating NIH Institutes and Centers. The fellowship experience is expected to clearly enhance the individual's potential to develop into a productive, independent physician/clinician-scientist. This Notice of Funding Opportunity (NOFO) is designed specifically for candidates proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial, but does allow candidates to propose research experience in a clinical trial led by a sponsor or co-sponsor. This Notice of Funding Opportunity (NOFO) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.

Synopsis	The purpose of this Ruth L. Kirschstein National Research Service Award (NRSA) Individual Predoctoral Fellowship to Promote Diversity in Health-Related Research award is to enhance the diversity of the health-related research workforce by supporting the research training of predoctoral students from diverse backgrounds, including those from groups that are underrepresented in the biomedical, behavioral, or clinical research workforce. Through this award program, promising predoctoral students will obtain individualized, mentored research training from outstanding faculty sponsors while conducting well-defined research projects in scientific health-related fields relevant to the missions of the participating NIH Institutes and Centers. The proposed mentored research training is expected to clearly enhance the individual's potential to develop into a productive, independent research scientist. This Notice of Funding Opportunity (NOFO) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.

attachment describing the change in research direction. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. This Parent Notice of Funding Opportunity is for basic science experimental studies involving humans, referred to in NIH Grants Policy Statement Section 4.1.3.1 as prospective basic science studies involving human participants. These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Studies conducted with specific applications toward processes or products in mind should submit under the appropriate Clinical Trials Required or Clinical Trial Optional NOFO.

Synopsis	The Stephen I. Katz Early Stage Investigator Research Project Grant supports an innovative project that represents a change in research direction for an early stage investigator (ESI) and for which no preliminary data exist. Applications submitted to this notice of funding opportunity (NOFO) must not include preliminary data. Applications must include a separate attachment describing the change in research direction. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. This notice of funding opportunity does not accept applications proposing clinical trials.

	<p>Contact Email evansmary@mail.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 09-Oct-2024 , 07-Nov-2024 , 10-Dec-2024 , 09-Jan-2025</p> <p>Synopsis This Funding Opportunity Announcement (FOA) establishes an accelerated review/award process to support time-sensitive research to evaluate a new policy or program that is likely to influence obesity related behaviors (e.g., dietary intake, physical activity, sedentary behavior, and/or sleep) and/or weight outcomes in an effort to prevent or reduce obesity. This FOA is intended to support research where opportunities for empirical study are, by their very nature, only available through expedited review and funding. All applications submitted to this FOA must demonstrate that the evaluation of an obesity-related policy or program offers an uncommon and scientifically-compelling research opportunity that will only be available if the research is initiated with minimum delay. For these reasons, applications submitted to this time-sensitive FOA are not eligible for re-submission. It is intended that eligible applications selected for funding will be awarded within 4 months of the application due date; however, administrative requirements and other unforeseen circumstances may delay issuance dates beyond that timeline.</p>				
122410	Phased Research to Support Substance Use Epidemiology, Prevention, and Services Studies (R61/R33 Clinical Trials Optional)	National Institutes of Health/DHHS	PAR-24-062	11-Oct-2024	Not Specified

	<p>Contact Name Amy B. Goldstein, PhD</p> <p>Contact Telephone 301-827-4124</p> <p>Contact Email amy.goldstein@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 11-Oct-2024 , 13-Dec-2024 , 14-Feb-2025 , 17-Mar-2025 , 13-Jun-2025 , 14-Aug-2025 , 10-Oct-2025 , 15-Dec-2025 , 13-Feb-2026 , 16-Mar-2026 , 15-Jun-2026 , 14-Aug-2026 , 14-Oct-2026 , 14-Dec-2026</p> <p>Synopsis The purpose of this notice of this funding opportunity (NOFO) is to support translational research across epidemiology, addiction services, and prevention to, ultimately, reduce the burden of substance use on public health. This NOFO encourages research that facilitates rapid translation from one discipline to another (e.g., epidemiology to prevention); supports community/stakeholder engagement in substance use treatment and prevention clinical trials; or reduces the research to practice gap through the rapid transition from pilot study to clinical trial, or effectiveness to implementation study. The goal is to support translational research improving our ability to 1) identify and characterize malleable individual, familial, behavioral, developmental, and socio-cultural/environmental factors (within the population or precise subgroups)</p>

		<p>with the potential for multi-directional transfer of knowledge; 2) prevent initiation of substance use or progression to misuse or use disorder; and 3) maximize the efficient delivery of high-quality, personalized addiction treatment and related services to ultimately inform and facilitate real world responses designed to reduce the burden of substance use, misuse and/or addiction on the health of the population. This NOFO invites projects for which preliminary feasibility or pilot data are not available. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>			
127644	NLM Information Resource Grants to Reduce Health Disparities and Promote Health Equity (G08 Clinical Trial Not Allowed)	National Library of Medicine/NIH/DHHS	PAR-24-281	13-Nov-2024 [Optional][LOI/Pre-App]	600,000 USD

This NOFO supports the development of resources that can be used to improve health and well-being and that lead to reductions in health disparities. Access to accurate, useful, usable, and understandable health information is an important factor when managing health and health care. Proposed projects should harness the capabilities of information technology and medical or health libraries to disseminate clear, evidence-based health-related information in formats used by individuals and their health care providers. Proposed projects should emphasize the development and deployment of new information resources or services, or expand and improve an existing resource or service, to meet the needs of populations experiencing health disparities and to promote health equity.</p>

---------	---------------	--------------	----------------	---------------	----------------

physics, plasma chemistry, materials science, and space science, come together to advance knowledge for discovery and technological innovation. The primary goal of the ECosystem for Leading Innovation in Plasma Science and Engineering (ECLIPSE) program is to identify and capitalize on opportunities for bringing fundamental plasma science investigations to bear on problems of societal and technological need within the scope of science and engineering supported by the participating NSF programs. The ECLIPSE meta-program has been created to foster an inclusive community of scientists and engineers, an ecosystem spanning multiple NSF Directorates, in the pursuit of translational research at the interface of fundamental plasma science and technological innovation. The ECLIPSE program builds on the long history of NSF leadership in supporting multi-disciplinary research in plasma science and engineering, and is intended to enhance organizational unity within NSF, and potentially with other funding agencies, in considering proposals and supporting projects that may otherwise struggle to find a natural home within the existing hierarchy of Directorates, Divisions, and programs within the Foundation.

Deadline Dates (ALL)	05-Nov-2024 , 04-Nov-2025

Synopsis The purpose of the Research on Innovative Technologies for Enhanced Learning (RITEL) program is to support early-stage research in emerging technologies for teaching and learning that respond to pressing needs in authentic (real-world) educational environments. RITEL supports future-oriented exploratory and synergistic research in emerging technologies (including, but not limited to, artificial intelligence (AI), robotics, and immersive or augmenting technologies) for teaching and learning. The program accepts proposals that focus on learning, teaching, or a combination of both. The scope of the program is broad and includes teaching and learning in science, technology, engineering, and mathematics (STEM) and in foundational areas that enable STEM (e.g., self-regulation, literacy, communication, collaboration, creativity, and socio-emotional skills). RITEL supports research in all learning contexts (e.g., formal, informal, workplace) and for all learner populations. RITEL has a special interest in diverse learner/educator populations and in developing new educational technologies that are cost-effective for budget-limited school districts, colleges and universities. Research in this program should be informed by the convergence (synthesis) of multiple disciplines: e.g., learning sciences; discipline-based

---------	---------------	--------------	----------------	---------------	----------------

	<p>Synopsis</p>	<p>This Dear Colleague Letter (DCL) seeks to address these limitations by encouraging the community to pursue Planning Grants designed to develop AI-Ready Test Beds that can be used by researchers to test novel AI methods in potential real-world application scenarios. Because of the current limits in scalability and scope, the AI community is encouraged to expand existing test beds and infrastructure to make them AI-ready and appropriate for use in evaluating the impact and effect of AI tools and systems on users. To do this, proposers are encouraged to create teams of researchers who have expertise in AI as well as domain experts and staff managing existing test beds. Existing test beds and infrastructure can be found in a range of settings, including, but not limited to: NSF-funded centers (e.g., Engineering Research Centers) and facilities, infrastructure funded by other federal agencies (e.g., Department of Energy, National Institute of Standards and Technology, National Oceanic and Atmospheric Administration, Department of Homeland Security, Department of Transportation, etc. or at https://www.nitrd.gov/apps/ai-rd-testbed-inventory/), state agencies (e.g., https://testbed.cityofnewyork.us/) and industry. These Planning Grants will support costs associated with the formation of teams, the planning of the desired or envisioned AI-Ready infrastructure, the collection of preliminary pilot data and creation of governance and management plans for scalable AI-Ready Test Beds.</p>

Deadline Dates (ALL)	14-Nov-2024 , 08-Sep-2025

<p>Synopsis</p>	<p>The NSF Research Traineeship (NRT) program seeks proposals that explore ways for graduate students in research-based master's and doctoral degree programs to develop the skills, knowledge, and competencies needed to pursue a range of STEM careers. The program is dedicated to effective training of STEM graduate students in high priority interdisciplinary or convergent research areas, through a comprehensive traineeship model that is innovative, evidence-based, and aligned with changing workforce and research needs. Proposals are requested that address any interdisciplinary or convergent research theme of national priority. The NRT program addresses workforce development, emphasizing broad participation, and institutional capacity building needs in graduate education. The program encourages proposals that involve strategic collaborations with the private sector, non-governmental organizations (NGOs), government agencies, national laboratories, field stations, teaching and learning centers, informal science centers, and academic partners. NRT</p>

Sponsor Website	Link to sponsor website
Program URL	Link to program URL
Deadline Dates (ALL)	15-Nov-2024 , 14-Nov-2025 , 16-Nov-2026

Synopsis The Major Research Instrumentation (MRI) Program serves to increase access to multi-user scientific and engineering instrumentation for research and research training in our Nation's institutions of higher education and not-for-profit scientific/engineering research organizations. An MRI award supports the acquisition or development of a multi-user research instrument that is, in general, too costly and/or not appropriate for support through other NSF programs. MRI provides support to acquire critical research instrumentation without which advances in fundamental science and engineering research may not otherwise occur. MRI also provides support to develop next-generation research instruments that open new opportunities to advance the frontiers in science and engineering research. Additionally, an MRI award is expected to enhance research training of students who will become the next generation of instrument users, designers and builders. An MRI proposal may request up to \$4 million for either acquisition or development of a research instrument.

Deadline Dates (ALL)	20-Nov-2024
Synopsis	<p>The multi-agency Ecology and Evolution of Infectious Diseases program supports research on the ecological, evolutionary, organismal, and social drivers that influence the transmission dynamics of infectious diseases. The central theme of submitted projects must be the quantitative, mathematical, or computational understanding of pathogen transmission dynamics. The intent is discovery of principles of infectious disease (re)emergence and transmission and testing mathematical or computational models that elucidate infectious disease systems. Projects should be broad, interdisciplinary efforts that go beyond the scope of typical studies. They should focus on the determinants and interactions of (re)emergence and transmission among any host species, including but not limited to humans, non-human animals, and/or plants. This includes, for example, the spread of pathogens; the influence of environmental factors such as climate; the population dynamics and genetics of vectors and reservoir species or hosts; how the physiology or behavior of the pathogen, vector, or host species biology affects transmission dynamics; the feedback between ecological transmission and evolutionary dynamics; and the cultural, social, behavioral, and economic dimensions of pathogen transmission and disease. Research may be on zoonotic, environmentally-borne, vector-borne, enteric, or respiratory pathogens of either terrestrial, aquatic, or marine systems and organisms, including diseases of animals and plants, at any scale from specific pathogens to inclusive environmental systems. Proposals for research on disease systems of public health concern to Low- or Middle-Income Countries (LMICs) are strongly encouraged, as are disease systems of concern in agricultural systems. Investigators are encouraged to develop the appropriate multidisciplinary team, including for</p>

Deadline Dates (ALL)	20-Nov-2024 [LOI/Pre-App], 02-Jun-2025
Synopsis	The Science and Technology Centers (STC): Integrative Partnerships program supports exceptionally innovative, complex research and education projects that require large-scale, long-term awards. STCs focus on creating new scientific paradigms, establishing entirely new scientific disciplines, and developing transformative technologies which have the potential for broad scientific or societal impact. STCs conduct world-class research through partnerships among institutions of higher education, national laboratories, industrial organizations, other public or private entities, and via international collaborations, as appropriate. They provide a means to undertake potentially groundbreaking investigations at the interfaces of disciplines and/or highly innovative approaches within disciplines. STCs may involve any area of science and engineering that NSF supports. STC investments support the NSF vision of creating and exploiting new concepts in science and engineering and providing global leadership in research and education.

The foundation seeks to identify outstanding inventors and innovators who harness science and technology to enhance the conduct of scientific research, strengthen environmental conservation, or improve the experience and outcomes of patient care. The Moore Inventor Fellows fellowship focuses on supporting scientist-inventors at a critical prototyping stage to capture opportunities that otherwise might be missed. The foundation seeks to provide freedom and support to promising inventors with the most compelling ideas to pursue creative and disruptive innovations. Each fellow will receive \$200,000 per year from the foundation for three years. In addition, the foundation will provide the host institution with \$25,000 each year to cover costs associated with administering the grant, resulting in a total three-year award of \$675,000.</p> <p>Applicant Types</p> <p>Funding Limit 0.00 see detail</p> <p>Limited Submission Yes</p>

	Synopsis	Research Seed Money Grants are awarded to independent researchers to support new and innovative studies that are relevant to the cause, pathogenesis or treatment of hereditary or sporadic ataxias. This 1-year grant provides \$50,000 in direct research funding. These research grants are offered primarily as “seed monies” to assist investigators in the early or pilot phase of their studies and as additional support for ongoing investigations on demonstration of need. Based on the emergent needs of the patient and research community, priority areas of ataxia research may be identified in the Seed Money Research Grant call for applications. In rare circumstances, these

	Synopsis	<p>The Translational Research Institute for Space Health (TRISH) is seeking proposals for its 2025 postdoctoral research program, which supports early career scientists pursuing research with the potential to reduce the human health risks associated with spaceflight. Selected TRISH postdoctoral fellows lead their own two-year research projects. Selected TRISH postdoctoral fellows lead their own two-year research projects. The fellows also receive a two-year stipend and work with a mentor. Proposers must include an identified mentor with their submitted research proposal. Funds to support the research, apart from the awardee's salary, must be supplied by the mentor. Independent investigators with existing research grant support may request to be listed as prospective mentors for this program. To be added as a prospective mentor open to working with a proposer, please contact Dr. Guillaume Vignaux. TRISH encourages qualified candidates to apply, even if new to space health research. Selected fellows will also have the opportunity to participate in the Institute's Academy of Bioastronautics, a program that gathers current TRISH postdoctoral fellows and allows for discussion, presentations and networking. Annually, postdoctoral fellows selected in response to the TRISH-RFA will be required to attend a meeting of postdoctoral fellows at the annual NASA Human Research Program Investigators' Workshop in the Houston/Galveston area. Fellows are also encouraged to attend one scientific meeting of the postdoctoral fellow's choice.</p>

	Synopsis	The Program on U.S.-Japan Relations at Harvard University’s Weatherhead Center for International Affairs will offer postdoctoral fellowships during the 2025-26 academic year. Applications are sought from outstanding recent PhDs in the social sciences who are conducting research that illuminates Japan’s relations with the rest of the world in the broadest sense. Applications are welcomed from anthropology, business, economics, history, international relations, law, political science, psychology, public health, public policy, and sociology, among other fields. Scholars may examine domestic issues that bear on Japan’s external relations or problems that it shares with other countries, and we encourage projects that compare Japan’s experience cross-nationally.
