

Icahn School of Medicine at
Mount Sinai

Grants and Contracts Office

**Funding Opportunities Monthly Edition
Jan 2025 Due Dates**

Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in Jan 2025.

The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

The Development Office offers assistance with many not for profit opportunities. Please contact the Development Office's Corporate and Foundation Relations team at DevCorpFound@mountsinai.org / 212-659-8500 below for assistance or questions.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 08-Jan-2025 [Optional][LOI/Pre-App], 07-Feb-2025 , 07-May-2025 , 06-Oct-2025 [Optional][LOI/Pre-App], 05-Nov-2025 , 07-Jan-2026</p> <p>Synopsis The National Institutes of Health (NIH) participating Institutes, Centers, and Offices (ICOs), in collaboration with the Global Alliance for Chronic Diseases (GACD), invite applications for implementation research that aims to improve the availability of effective, equitable, efficient, integrated, patient-centered, safe, and timely care for people living with multiple long-term conditions (non-communicable disease (NCD) multimorbidity) in low- and middle-income countries (LMICs) and/or within American Indian/Alaska Native (AI/AN) populations in the United States. This Notice of Funding Opportunity (NOFO) supports innovative approaches to identifying, understanding, developing, and implementing strategies for overcoming barriers to the adoption, adaptation, integration, scale-up, and sustainability of evidence-based interventions, tools, policies, and guidelines. In addition, studies to advance dissemination and implementation research methods and measures into application are encouraged. This NOFO uses the bi-phasic, milestone driven R61/R33 grant mechanism. Awards made under this NOFO will initially support a one-year milestone-driven initiation (R61) phase, with possible transition to an implementation (R33) phase of up to four additional years. Only projects that meet the scientific milestones and award requirements of the R61 phase may transition to the R33 phase. Applications submitted in response to this NOFO must address both the R61 and R33 phases. All applications must be within the scope of the mission of one of the Institutes/Centers listed above (see "Components of Participating Organizations," excluding the Fogarty International Center which manages this program but does not support awards). Applications will be accepted from US and World Bank-defined LMIC institutions only.</p>				
121292	Intervention Research to Improve Native American Health (R01 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	PAR-23-298	07-Jan-2025	Not Specified
	<p>Contact Name Alexa Romberg Ph.D.</p> <p>Contact Telephone 301-435-0264</p> <p>Contact Email alexa.romberg@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2025 , 21-Oct-2025 , 07-Jan-2026 , 25-Oct-2026 , 07-Jan-2027</p> <p>Synopsis The purpose of this notice of funding opportunity (NOFO) is to support research on interventions to improve health in Native American populations. This includes 1) etiologic research that will directly inform intervention development or adaptations, 2) research that develops, adapts, or tests interventions for health promotion, prevention, treatment, or recovery, and 3) where a sufficient body of knowledge on intervention efficacy exists, research on dissemination and implementation that develops and tests strategies to overcome barriers to the adoption, integration, scale-up, and sustainability of effective interventions. Through this initiative, intervention and related research is sought to build upon community knowledge,</p>

resources, and resilience to identify and rigorously test culturally appropriate solutions to reduce morbidity and mortality. Interventions should be designed with a consideration for sustainability within the communities where they are tested, and have the flexibility to be readily adapted, disseminated, and scaled up to other communities where culturally appropriate. This NOFO is part of the Intervention Research to Improve Native American Health (IRINAH) initiative, which also includes NOFOs using the R21 Exploratory/Developmental Research Grant mechanism (PAR-23-299) and the Clinical Trial Planning Grant mechanism (PAR-23-285). For the purposes of this NOFO, Native Americans include the following populations: Alaska Natives, American Indians (whose ancestral lands fall at least partially within the U.S. mainland border), and Native Hawaiians. The term ‘Native Hawaiian’ means any individual any of whose ancestors were natives, prior to 1778, of the area which now comprises the State of Hawaii.

Deadline Dates (ALL)	07-Jan-2025 , 21-Oct-2025 , 07-Jan-2026 , 25-Oct-2026 , 07-Jan-2027
Synopsis	<p>The purpose of this notice of funding opportunity (NOFO) is to support developmental/exploratory research to improve health in Native American populations. This includes 1) etiologic research that will directly inform intervention development or adaptations, 2) research that develops, adapts, or tests interventions for health promotion, prevention, treatment, or recovery, and 3) where a sufficient body of knowledge on intervention efficacy exists, research on strategies to overcome barriers to the adoption, integration, scale-up, and sustainability of effective interventions. Through this initiative, culturally appropriate and community-engaged exploratory/developmental research is sought that builds upon Native community knowledge, resources, and resilience to provide foundational knowledge that will inform effective and scalable interventions. This NOFO is part of the Intervention Research to Improve Native American Health (IRINAH) initiative, which also includes PAR-23-298, which uses the Research Project Grant (R01) mechanism and PAR-23-285, which uses the Clinical Trial Planning Grant (R34) mechanism. For the purposes of this NOFO, Native Americans include the following populations: Alaska Natives, American Indians (whose ancestral lands fall at least partially within the U.S. mainland border), and Native Hawaiians. The term ‘Native Hawaiian’ means any individual any of whose ancestors were natives, prior to 1778, of the area which now comprises the State of Hawaii.</p>

Deadline Dates (ALL)	25-Jan-2025 , 25-May-2025 , 25-Sep-2025
Synopsis	<p>This Funding Opportunity Announcement (FOA) invites applications for P30 Cancer Center Support Grants (CCSGs) to support NCI-designated Cancer Centers. CCSGs support three types of Cancer Centers: 1) Comprehensive Cancer Centers, which demonstrate reasonable depth and breadth of research activities in each of three major areas: basic laboratory; clinical; and prevention, control and population-based research, and which have substantial transdisciplinary research that bridges these scientific areas; and 2) Clinical Cancer Centers, which are primarily focused on basic laboratory; clinical; and prevention, cancer control, and population-based research; or some combination of these areas, and 3) Basic Cancer Centers, which focus on basic laboratory research. The purpose of all types of NCI-designated Cancer Centers is to capitalize on all institutional cancer research capabilities, integrating meritorious research into a single transdisciplinary research enterprise across all institutional boundaries. Cancer Centers supported through this FOA are expected to serve as major sources of discovery of the nature of cancer and of development of more effective approaches to prevention, diagnosis, and therapy; to contribute significantly to the development of Shared Resources that support research; to collaborate and coordinate their research efforts with other NCI-funded programs and investigators; and to disseminate research findings for the benefit of the community.</p>

105645	Integration of Imaging and Fluid-Based Tumor Monitoring in Cancer Therapy (R01 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	PAR-21-290	07-Jan-2025	499,999 USD

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	National Cancer Institute (NCI) invites applications for research projects that integrate imaging and fluid-based tumor monitoring (liquid biopsy) assays during cancer therapy in patients to determine the optimal use of those modalities in the characterization of therapy response and/or emergence of resistance. This FOA will use the NIH Research Project (R01) award mechanism.			
112021	Cancer Prevention and Control Clinical Trials Planning Grant Program (U34 Clinical Trials Optional)	National Cancer Institute/NIH/DHHS	PAR-22-174	07-Jan-2025	Not Specified
	Contact Name	Brandy Heckman-Stoddard, Ph.D., M.P.H.			
	Contact Telephone	240-276-7048

	Sponsor Website				
	Program URL	Link to program URL			
	Deadline Dates (ALL)	07-Jan-2025 , 25-Feb-2025 , 07-May-2025 , 25-Jun-2025			
	Synopsis	Through this Funding Opportunity Announcement (FOA), the National Cancer Institute (NCI) intends to facilitate well planned clinical trials across the cancer prevention and control spectrum aimed at improving prevention/ interception, cancer-related health behaviors, screening, early detection, healthcare delivery, management of treatment-related symptoms, supportive care, and the long-term outcomes of cancer survivors. Although the scientific literature or preliminary data may provide the rationale for conducting a clinical trial, investigators often lack critical information about the study population, accrual challenges, intervention, outcome/ endpoints, data/statistical challenges or operational risks necessary to finalize the trial protocol completely. These information gaps can result in multiple protocol changes before and after trial start-up, leading to the need for additional time and expenses that may prevent study completion. Further, the suitability and feasibility of new trial designs, which minimize infrastructure and reduce costs may need to be tested in the context of a particular intervention, at-risk group, symptom or venue. Preparatory studies may fill information gaps and address unknowns this can include a pilot/feasibility clinical trial if necessary, improving trial design and rigor.

	<p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2025 , 05-Feb-2025 , 12-Feb-2025 , 16-Feb-2025 , 07-May-2025 , 05-Jun-2025 , 12-Jun-2025 , 16-Jun-2025 , 07-Sep-2025 , 05-Oct-2025 , 12-Oct-2025 , 16-Oct-2025 , 07-Jan-2026</p> <p>Synopsis Through this Notice of Scientific Interest (NOSI), the National Cancer Institute intends to stimulate research on the role of RNA modifications in the area of cancer biology. Despite the recognition that RNA modifications and editing exert a substantial impact on gene expression and function, there is a lack of mechanistic insights into the dynamic regulation of RNA modifications and their de-regulation as drivers of cancer formation. A better understanding of the extent, diversity, and crosstalk between different types of RNA modification, and the elucidation of the molecular players that read and interpret the modification code are needed to reveal the mechanisms of RNA modifications that underlie cancer formation and the cancer phenotype.</p>				
113232	Bioengineering Research Grants (BRG) (R01 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-22-242	05-Nov-2024	Not Specified

Synopsis	The purpose of this funding opportunity announcement is to encourage collaborations between the life and physical sciences that: 1) apply a multidisciplinary bioengineering approach to the solution of a biomedical problem; and 2) integrate, optimize, validate, translate or otherwise accelerate the adoption of promising tools, methods, and techniques for a specific research or clinical problem in basic, translational, or clinical science and practice. An application may propose design-directed, developmental, discovery-driven, or hypothesis-driven research and is appropriate for small teams applying an integrative approach to increase our understanding of and solve problems in biological, clinical, or translational science. This FOA will support clinical trials that test functionality or validate performance in the chosen setting. This FOA is not intended to support conventional clinical trials that lack translation as the primary motivation. Applications that propose phase III clinical trials in any area of research are not sought by and will not be supported through this FOA. This FOA does not propose to support commercial production.

Synopsis	Through this Funding Opportunity Announcement (FOA), the National Cancer Institute (NCI) invites applications for investigator-initiated Program Project (P01) applications. The proposed Program may address any of the broad areas of cancer research, including (but not limited to) cancer biology, cancer prevention, cancer diagnosis, cancer treatment, and cancer control. Basic, translational, clinical, and/or population-based studies in all of these research areas are appropriate.

The proposed project must involve at least 1 clinical trial related to the scientific interests of one or more of the following research programs: Cancer Therapy Evaluation Program, Cancer Imaging Program, Cancer Diagnosis Program, Radiation Research Program, Complementary and Alternative Medicine Program and/or the HIV and AIDS Malignancies Research Programs. Applicants may propose to conduct an early phase trial by itself, or in combination with another research aim(s) as appropriate. This NOFO does not accept Phase III clinical trials.</p>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis Through this notice of funding opportunity (NOFO), the National Cancer Institute (NCI) invites applications for support of investigator-initiated clinical trials related to the programmatic interests of the NCI Division of Cancer Prevention and/or the NCI Division of Cancer Control and Population Sciences that have the potential to reduce the burden of cancer through improvements in early detection, screening, prevention and interception, healthcare delivery, quality of life, and/or survivorship related to cancer; with such attributes, the proposed studies should also have the potential to improve clinical practice and/or public health. Applications submitted to this NOFO must include studies that meet the National Institutes of Health (NIH) definition of a clinical trial (see NOT-OD-15-015 for details) and provide specific clinical trial information as described in this NOFO and the application instructions. This NOFO does not and will not support clinical trials for studies of cancer diagnosis and/or oncologic therapy in patients.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 23-Jan-2025</p> <p>Synopsis The purpose of this trans-NCI Funding Opportunity Announcement (FOA) is to promote new cancer disparities research among investigators who do not normally conduct it and to encourage the partnership of experienced cancer research investigators with cancer disparities-focused researchers. This FOA is intended to accelerate and strengthen multi-disciplinary cancer disparities research in wide ranging areas. Cancer disparities research includes, but is not limited to basic, translational, behavioral, observational, interventional, environmental and population research studies that address the adverse differences in cancer incidence, prevalence, mortality, survivorship, burden and/or response to treatment in racial/ethnic minorities and/or underserved population groups. Proposed collaborations should focus on achieving research objectives that by necessity rely on diverse and complementary expertise, technical capabilities, and resource sets. Importantly, the supplemental request is required to be within the scope of the parent award and should expand the original aims to include a cancer disparity component and possible inclusion of international comparator cohorts. A trans NCI effort, the concept reissuance of the Collaborative Program is supported by NCI's Division of Cancer Biology (DCB), Division of Cancer Treatment and Diagnosis (DCTD), Division of Cancer Prevention (DCP), Division of Cancer Control and Population Sciences (DCCPS), Center to Reduce Cancer Health Disparities (CRCHD) and now, also included Center for Global Health.</p>

	Synopsis	<p>This notice of funding opportunity (NOFO) encourages applications for investigator-initiated multisite clinical trials (e.g., efficacy, effectiveness, or pragmatic trials) to study the effects of complementary and integrative health approaches with physical and/or psychological therapeutic inputs (often called mind and body interventions), and/or multicomponent interventions that include physical, psychological, and/or nutritional approaches in NCCIH-designated areas of high research priority. Clinical coordinating centers (CCC) should develop and implement the proposed fully powered multisite clinical trial (Phase III and beyond). The objective of a CCC application is to present the scientific rationale and a comprehensive scientific and operational plan for the clinical trial. CCC applications are expected to describe plans for project management, participant recruitment and retention strategies, performance milestones, scientific conduct, and dissemination of results. CCC applications submitted under this NOFO will utilize a two-phase, milestone-driven cooperative agreement (UG3/UH3) funding mechanism. In addition, an accompanying data coordinating center (DCC) application (U24), submitted under PAR-24-087 and proposing a data analysis and data management plan for the clinical project, is required. Both a CCC application and a corresponding DCC application need to be submitted simultaneously for consideration by NCCIH. For additional information about the mission, strategic vision, and research priorities of NCCIH, applicants are encouraged to consult the NCCIH website (https://nccih.nih.gov/about/plans). Applicants are encouraged to contact the appropriate Scientific/Research Contact for the area of science for which they are planning to develop an application prior to submitting to this NOFO. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).</p>

	Deadline Dates (ALL)	07-Jan-2025 , 16-Feb-2025 , 07-May-2025			
	Synopsis	<p>The National Eye Institute (NEI) supports regenerative medicine clinical trials. Before a research team undertakes a clinical trial, it is critical to have clear delineation and documentation of the trial's rationale, design, analytic techniques, protocols, and procedures in a Manual of Procedures (MOP). Additionally, there are other elements essential to the launching of a trial, such as obtaining regulatory authorizations or approvals and establishing agreements with requisite partners including cell manufacturing and production facilities, assay or cell analysis centers, and data coordinating centers. These activities are often costly and time-consuming, and they may involve collection of preliminary data to assess feasibility. The Regenerative Medicine Clinical Trial Planning Grant may be used by applicants to support the preparation of a clinical trial MOP and procedures necessary for implementing a clinical trial to evaluate interventions (or new treatments) that restore</p>

Synopsis	<p>This FOA encourages applications from institutions/organizations that propose to conduct vision-related secondary data analyses utilizing existing database resources. Applications may be related to, but must be distinct from, the specific aims of the original data collection. The NEI supports an extensive portfolio of clinical trials and large-scale epidemiologic research projects wherein numerous data collection activities are required to meet each project's specific aims. The resultant wealth of data generated by these studies often provides unique, cost-effective opportunities to investigate additional research questions or develop new analytical approaches secondary to a project's originally-intended purpose. Data are not limited to those collected under NEI support, but such data are of the highest programmatic interest. The purpose of this FOA is for secondary data analysis using existing data sets from vision-related clinical trials, epidemiologic, and other clinical research studies. This FOA may be used to develop new statistical methodologies or test hypotheses using existing data, but this FOA must not be used to support the collection of new data.</p>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>The NEI uses UG1 cooperative agreement awards to support investigator-initiated large-scale clinical trials, human gene-transfer, stem cell therapy trials, and other complex or high resource- or safety-risk clinical trials. These projects are multifaceted and of high public health significance requiring clear delineation of study organization including roles and responsibilities and require careful performance oversight and monitoring. For purposes of this Notice of Funding Opportunity (NOFO), the proposed study must be intended to evaluate interventions aimed at screening, diagnosing, preventing, or treating vision disorders, or to compare the effectiveness of two or more established interventions. The NEI UG1-supported studies are typically funded as a group of single-component companion grant awards including the Chair's Grant, the Coordinating Center, and Resource Centers, when appropriate. Specifically, this NOFO encourages applications for the Coordinating Center grant, which provides details of the Coordinating Center's responsibilities and operations.</p>

Deadline Dates (ALL)	07-Jan-2025 , 24-Jan-2025 , 07-May-2025
Synopsis	The NEI uses U01 cooperative agreement awards to support investigator-initiated early-stage clinical trials that are greater than minimal risk and typically are Phase I or II trials. The risk level of the U01 trial requires appropriate performance oversight and safety monitoring. For purposes of this FOA, the proposed study must be intended to evaluate interventions aimed at screening, diagnosing, preventing, or treating vision disorders. Applicants are strongly advised to consult with NEI program staff prior to submitting an application with human subjects to determine the appropriate funding opportunity.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis</p> <p>The purpose of the NHLBI Emerging Investigator Award (EIA) is to promote scientific productivity and innovation by providing long-term support and increased flexibility to experienced Program Directors/Principal Investigators (PD/PIs) who are currently PD/PIs on at least two NHLBI R01-equivalent awards and whose outstanding record of research demonstrate their ability to make major contributions to heart, lung, blood and sleep (HLBS) research. The EIA is intended to support a research program, rather than a research project, by providing the primary and most likely sole source of NHLBI funding on individual grant awards. The EIA will support the research program of NHLBI-funded investigators for up to seven years. The EIA will provide investigators increased freedom to conduct research that breaks new ground or extends previous discoveries in new directions. It will also allow PD/PIs to take greater risks and to pursue research that requires a longer timeframe. Research supported by the EIA must be within the scope of the NHLBI mission. It is anticipated that the EIA will: Provide a stable funding environment, thereby improving productivity and facilitating nimble, ambitious, creative research; Accelerate scientific innovation by enabling flexibility in pursuing new research directions as they arise, since PD/PIs will not be bound to specific aims proposed in advance of the studies; Reduce the time researchers spend writing grant applications and managing multiple grant awards, thereby allowing more time to be devoted to conducting research; Facilitate PD/PIs' commitment to research through increased stability of funding; and Enable PD/PIs to devote more time and energy to mentoring students and junior scientists and providing scientific service</p>

125805	RFA-HL-25-009 -- Mentored Career Development Award to Promote Faculty Diversity in Biomedical Research (K01 Independent Clinical Trial Not Allowed)	National Heart, Lung, and Blood Institute/NIH/DHHS	RFA-HL-25-009	07-Jan-2025	Not Specified
	<p>Contact Name: Karin F. Lidman, Ph.D. Contact Telephone: 301-435-0535 Contact Email: karin.fredriksson@nih.gov Sponsor Website: Program URL: Link to program URL Deadline Dates (ALL): 07-Jan-2025 , 11-Feb-2025 , 07-May-2025 , 15-Oct-2025 , 07-Jan-2026 , 11-Feb-2026 , 07-May-2026 , 14-Oct-2026 , 07-Jan-2027 , 11-Feb-2027 , 07-May-2027 Synopsis: This Notice of Funding Opportunity (NOFO) invites applications to provide career development activities for a diverse pool of highly trained investigators in research areas of interest to the NHLBI. The career development will take place under the guidance of an experienced mentor in the biomedical, behavioral or clinical sciences leading to research independence. It is targeted toward individuals whose basic, clinical, and translational research interests are grounded in the advanced methods and experimental approaches needed to solve problems related to cardiovascular, pulmonary, and hematologic diseases and sleep disorders in the general and health disparities populations. This NOFO is designed specifically to support candidates proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or a separate ancillary clinical trial. Applicants to this NOFO are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. Applicants proposing a clinical trial or an ancillary study to an ongoing clinical trial to support the lead investigator should apply to the companion NOFO (RFA-HL-25-008).</p>

Synopsis This Notice of Funding Opportunity (NOFO), issued by the National Heart, Lung, and Blood Institute (NHLBI) invites submission of investigator-initiated Program Project (P01) applications. The proposed programs may address scientific areas relevant to the NHLBI mission including the biology and diseases of the heart, blood vessels, lung, and blood; blood resources; and sleep disorders. Programs may also include implementation science, health disparities, and translation research that addresses the mission of the Institute. Each application submitted in response to this NOFO must include at least three related research projects that share a common central theme, focus, and/or overall objective. Higher budgets may be requested for applications that include at least four projects, one of which includes an Early Stage Investigator as Project Leader.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	The purpose of this NOSI is to promote research characterizing the pathobiological processes and mechanisms that drive the onset and progression of lung diseases at a molecular/cellular level, providing a systems-level understanding by studying experimental systems with cellular heterogeneity and 3-D architecture. It is expected that projects supported by this NOSI will utilize ex vivo preparations (e.g., thin human lung slices) or 3-D multi-cellular in vitro systems (e.g., organoids) of human lung cells and will employ state-of-art multi-omics measures (e.g., spatial or single cell/nucleus omics) to better understand specific pathobiological processes in systems of interacting cell types.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis</p>	<p>The objective of this funding opportunity is to support investigator-initiated, Phase I clinical trials for diagnostic and therapeutic interventions for heart, lung, blood, and sleep (HLBS) disorders in adults and children. In addition to supporting clinical trial start-up and implementation activities, this FOA will provide support for final stage preclinical activities needed for the implementation of the proposed trial. All the activities proposed in the R61 phase must be directly related to the therapeutic/diagnostic in preparation for the clinical trial. The proposed trial can be single or multisite. This FOA will utilize a bi-phasic, milestone-driven mechanism of award where the first phase can be used to finalize required pre-trial activities such as stability, shipping studies, and site training.</p>

Synopsis	This NOSI aims to stimulate research on understanding how circadian rhythms regulate cell function and metabolism of peripheral tissues, and to find new avenues for the investigation of heart, lung, and blood disease risk, pathogenesis, diagnosis, treatment, and prevention. Basic, translational, and clinical research applications to elucidate circadian-dependent mechanisms contributing to the pathophysiology of HLBS disorders are invited. This NOSI encourages multidisciplinary and multiple investigator teams of experts in heart, lung, and blood research fields to synergistically work with circadian biologists and sleep researchers to provide a comprehensive understanding of the circadian biology in relation to HLBS conditions. The purpose is to facilitate translational research to identify potential applications of circadian science to the diagnosis, prevention and treatment of HLBS conditions. Mechanism-based studies investigating the circadian rhythm dysregulation, clinical markers, and/or therapeutic targets of HLBS conditions are encouraged. Behavioral, physiological, pharmacological, molecular, and genomic studies aimed at elucidating the relationship between circadian-dependent mechanisms and disease are appropriate. Studies to delineate circadian-based mechanisms, therapeutic targets, epidemiological risk and clinical trials to assess therapeutic safety, efficacy, effectiveness, or implementation may be proposed.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Contact Email Qing.Lu@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2025 , 13-Feb-2025 , 07-May-2025 , 13-Jun-2025 , 07-Sep-2025 , 13-Oct-2025 , 07-Jan-2026</p> <p>Synopsis The purpose of this funding opportunity announcement (FOA) is to solicit current or recently completed NHLBI K01, K08, K23, and K25 recipients for small grant support to expand their current research objectives or to branch out to a new study that resulted from the research conducted under the K award. Active NHLBI K01, K08, K23, and K25 recipients may apply for R03 support after the notice of award (NoA) for their first type-5 K awards has been issued. Recently completed NHLBI K01, K08, K23, and K25 recipients are eligible to apply for the R03 if the earliest possible R03 start date falls within 2 years of their prior NHLBI K award Project Period end date. This FOA is intended to enhance the capability of NHLBI K01, K08, K23, and K25 recipients to conduct research as they complete their transition to fully independent investigator status. This R03 program is intended to support research projects that can be carried out and completed within a short period of time (no more than two years) with limited resources and that may generate preliminary data to support a subsequent R01-equivalent application. These studies include, but are not limited to, pilot or feasibility studies; proof of concept studies; secondary analysis of existing data; small, self-contained research projects; development of new research methodologies or technologies, or development of novel experimental models. A minimum of 40% protected overall research effort, not necessarily limited to the proposed R03 project, is required from applicants. For current and previous K23 recipients, research proposed in the R03 application may or may not include patient-oriented research.</p>				
116586	Notice of Special Interest (NOSI): Integrative Omics Analysis of NHLBI TOPMed Data (Parent R01 Clinical Trial Not Allowed)	National Heart, Lung, and Blood Institute/NIH/DHHS	NOT-HL-23-067	07-Jan-2025	Not Specified
	<p>Contact Name James Luo, Ph.D.</p> <p>Contact Telephone 301-435-0533</p> <p>Contact Email luoja@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2025 , 05-Feb-2025 , 07-May-2025 , 05-Jun-2025 , 07-Sep-2025 , 05-Oct-2025 , 07-Jan-2026 , 05-Feb-2026 , 07-May-2026</p> <p>Synopsis The symptom-based diagnosis and treatment of heart, lung, blood, and sleep (HLBS) diseases has vastly improved in recent years, yet an understanding of the molecular mechanisms underlying many of these diseases has remained elusive.</p>				

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

Furthermore, in most cases the impact of genetic variation on severity of disease and treatment outcomes remains unknown. Therefore, the NHLBI has created the Trans-omics for Precision Medicine (TOPMed) program, which aims to utilize genomics data to characterize a variety of HLBS diseases. TOPMed is well on its way to collecting whole genome sequence (WGS) from over 194,270 well-phenotyped individuals and is currently generating multi-omics data (e.g., over 31,852 RNA sequences, over 44,342 DNA methylation profiles, and 26,124 metabolomics profiles) from many of these individuals to complement whole genome sequence information. Having produced an unprecedented volume of high-throughput data, TOPMed now seeks to turn its attention to effectively leveraging this resource to uncover biological function and disease pathobiology through novel systems biology analyses and the power of artificial intelligence (AI) and Machine Learning (ML). Although lower costs and technological improvements in sequencing technology have vastly expanded our ability to generate large volumes of omics data, the ability to analyze such large datasets to extract biologically meaningful insights remains challenging. Systems level models incorporating trans-omics analyses will be an important step in uncovering the underlying biological networks and the gene-gene and gene-environment interactions influencing disease and treatment outcomes. Thus, advanced analyses that incorporate genotype and phenotype datasets from thousands to tens of thousands of individuals are essential to move TOPMed to the next phase of discovery.

122332	NHLBI Clinical Trial Pilot Studies (R34 Clinical Trial Optional)	National Heart, Lung, and Blood Institute/NIH/DHHS	PAR-24-049	07-Jan-2025	450,000 USD

Deadline Dates (ALL)	07-Jan-2025 , 16-Feb-2025 , 07-May-2025 , 16-Jun-2025 , 07-Sep-2025 , 16-Oct-2025 , 07-Jan-2026 , 16-Feb-2026 , 07-May-2026 , 16-Jun-2026 , 07-Sep-2026 , 16-Oct-2026 , 07-Jan-2027
Synopsis	This Notice of Funding Opportunity (NOFO) supports studies that are both necessary and sufficient to inform the planning of a Phase II-IV clinical trial within NHLBI's mission. The NHLBI expects that applications to this NOFO will describe the planned clinical trial and in so doing demonstrate that the proposed (R34) research is scientifically necessary to design or plan the subsequent trial. Furthermore, this NOFO will support research projects that are designed to provide results that will be sufficient to inform the future trial without further studies. The planned Phase II, III, or IV trial must be primarily intended to test the efficacy, safety, clinical management, or implementation of intervention(s) in the prevention and/or treatment of heart, lung, blood, or sleep disorders. In contrast to the study start up or preparation phase of NHLBI funding opportunities for clinical trials (as described at Clinical Trial Development Continuum NHLBI, NIH), the R34 mechanism is intended to

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

provide new information that answers a scientific or operational question(s) which may be pragmatic in nature and, therefore, informs the final development of a Phase II-IV clinical trial. Regardless of the results of the R34, support of the proposed future clinical trial will require a new application. Plan for Enhancing Diverse Perspectives The NIH recognizes that diverse teams working together and capitalizing on innovative ideas and distinct perspectives outperform homogeneous teams. There are many benefits that flow from a diverse scientific workforce, including: fostering scientific innovation, enhancing global competitiveness, contributing to robust learning environments, improving the quality of the research, advancing the likelihood that underserved populations participate in, and benefit from research, and enhancing public trust. To support the best science, the NIH encourages inclusivity in research. Examples of structures that promote diverse perspectives include but are not limited to: -Transdisciplinary research projects and collaborations among neuroscientists and researchers from fields such as computational biology, physics, engineering, mathematics, computer and data sciences, as well as bioethics. - Engagement from different types of institutions and organizations (e.g., research-intensive, undergraduate-focused, minority-serving, community-based). - Individual applications and partnerships that enhance geographic and regional heterogeneity. - Investigators and teams composed of researchers at different career stages. - Participation of individuals from diverse backgrounds, including groups historically underrepresented in the biomedical, behavioral, and clinical research workforce (see NOT-OD-20-031), such as underrepresented racial and ethnic groups, those with disabilities, those from disadvantaged backgrounds, and women. - Opportunities to enhance the research environment to benefit early- and mid-career investigators. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.

These trials may include ones that test different therapeutic, behavioral, and/or prevention strategies. Trials for which this FOA applies must be relevant to the research mission of the NHLBI and meet the NIH definition of a clinical trial (see NOT-OD-15-015). For additional information about the mission, strategic vision, and research priorities of the NHLBI, applicants are encouraged to consult the NHLBI website. This FOA will utilize a milestone-driven cooperative agreement mechanism of award and runs in parallel with a companion FOA PAR-22-192() that encourages applications for a collaborating Clinical Coordinating Center (CCC). The objective of the DCC application is to present a comprehensive plan to provide overall project coordination, administration, data management, and biostatistical support for the clinical trial proposed in the collaborating CCC application. The application should also describe its approaches to collaborate with the CCC on implementation of the clinical trial community engagement and diversity plans. Both a DCC application and a collaborating CCC application must be submitted on the same application due date for consideration by NHLBI. Applicants are strongly encouraged to contact the appropriate Scientific/Research contact prior to submitting an application.

underrepresented students and/or institutions that provide clinical services to populations that experience health disparities, with the potential to develop meritorious training programs in cardiovascular, pulmonary, and hematologic diseases, and sleep disorders. These institutions are uniquely positioned to educate and train students from diverse backgrounds, including those from underrepresented groups, in research, translation, and implementation of research advances that impact health outcomes, as well as provide health care for populations experiencing health disparities. Please note that institution eligibility is outlined in Section III, and funding decisions are based on the outcome of the peer review process and scientific priorities of the NHLBI. This Notice of Funding Opportunity (NOFO) does not allow appointed Trainees to lead an independent clinical trial, but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor.

122747	RFA-HL-22-012 -- Short-Term Research Education Program to Enhance Diversity in Health-Related Research (R25 Clinical Trial Not Allowed)	National Heart, Lung, and Blood Institute/NIH/DHHS	RFA-HL-25-001	29-Jan-2025	875,000 USD

Deadline Dates (ALL)	29-Jan-2025 , 19-Aug-2025 , 29-Jan-2026 , 19-Aug-2026
Synopsis	The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that encourage individuals from diverse backgrounds, including those from groups underrepresented in the biomedical and behavioral sciences, to pursue further studies or careers in research. To accomplish the stated over-arching goal, this NOFO will support educational activities with a primary focus on: Research Experiences

The overarching goal of this R25 program is to support educational activities that complement and/or enhance the training of a workforce to meet the nation’s biomedical, behavioral and clinical research needs. To accomplish the stated over-arching goal, this NOFO will support educational activities with a primary focus on: Courses for Skills Development Research Experiences Another overarching goal of this R25 program is to support and integrate educational and mentorship activities that encourage individuals from diverse backgrounds, including those from groups underrepresented in the biomedical and behavioral sciences, to pursue further studies or careers in genomics research. This notice of funding opportunity (NOFO) seeks to expose undergraduate and post-baccalaureate level students to the foundational sciences relevant to genomics to enable them to pursue careers that span all areas of interest to NHGRI - genome sciences, genomic medicine, genomics and society, genomic data science, and genomics and health equity. For the purposes of this NOFO, the term “genomics” encompasses issues and activities in these five areas. To accomplish the stated overarching goal, this NOFO will support creative educational activities with a primary focus on Research Experiences for undergraduate and/or post-baccalaureate trainees that include extensive mentorship activities. Programs should fall under the following categories: 1) summer,</p>				

NIH Funding Opportunities

---------	---------------	--------------	----------------	---------------	----------------

semester, or academic year programs for undergraduate trainees; 2) year-long program (duration of at least 12 months) for post-baccalaureate trainees. The research experiences must be based on the foundational sciences relevant to genomics: genomic sciences; genomic medicine; genomics and society; computational genomics and data science, or genomics and health equity. A secondary focus is on Courses for Skills Development. Complementary didactic activities are encouraged, especially those academic courses that have the potential to increase opportunities for success at the next career level. The proposed research education programs must include both research experiences and courses for skills development, with primary emphasis on the former. Proposed courses should be developed in conjunction with and support research experiences to enhance skills development.

125159	Notice of Special Interest (NOSI): Competitive Revision Supplements to Existing T32 Programs to Include Institutional Research Training in Data Science for Infectious and Immune Mediated Diseases	National Institute of Allergy and Infectious Diseases/NIH/DHHS	NOT-AI-24-012	07-Jan-2025	Not Specified

 Deadline Dates (ALL) | 07-Jan-2025

Synopsis | This Notice of Special Interest (NOSI) solicits competitive revision applications from existing T32 recipients to support additional training slots within the NIAID Data Science Training Program (NDSTP) for pre-doctoral data science training. Applications must propose a data science training program that will include research and mentoring opportunities, as well as coursework for pre-doctoral biomedical trainees. Through this NOSI, applicants may increase the number of training slots beyond the T32 maximum allowed; the training slots proposed via this NOSI must support trainees pursuing a data science curriculum, described below. It is anticipated that an application will propose 2-3 additional data science training slots and 3-4 awards are expected. Research and mentorship opportunities will include faculty mentorship for trainees in data science topics and peer-to-peer collaborative research activities (e.g., postdoctoral to graduate student, senior graduate student to junior graduate student, etc.) during which trainees from biomedical and computational programs will collaborate on research projects with supervision from researchers with expertise in both infectious and immune-mediated diseases (IID) and computational methods. For the purposes of this NOSI, IID may include the subject areas of infectious, immunologic, and allergic diseases. Coursework will include structured classes in computational methods, data management and sharing, and social and ethical considerations of data science technologies. Applications are expected to propose collaborations between departments of biomedical and computational sciences to develop courses that provide instruction in these areas of data

Synopsis	The purpose of the NIAID Physician-Scientist Pathway to Independence Award (K99/R00) program is to increase and maintain a strong cohort of new and talented independent physician-scientists. This program is designed to facilitate a timely transition of outstanding postdoctoral researchers with a clinical doctorate degree from mentored, postdoctoral research positions to independent, tenure-track or equivalent faculty positions. The program will provide independent NIAID research support during this transition to help awardees launch competitive, independent research careers in biomedical fields and thereby help to address the national physician-scientist workforce shortage. This Funding Opportunity Announcement (FOA) is designed specifically for candidates proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary clinical trial, as part of their research and career development. Those not planning an independent clinical trial, or proposing to gain research experience in a clinical trial led by another investigator, must apply to companion FOA (PAR-23-071)

	<p>Deadline Dates (ALL) 13-Jan-2025 , 13-May-2025 , 15-Sep-2025 , 13-Jan-2026 , 13-May-2026 , 14-Sep-2026 , 13-Jan-2027</p> <p>Synopsis This Notice of Funding Opportunity (NOFO) encourages cooperative agreement applications for implementation of investigator-initiated, high-risk clinical trials and mechanistic studies associated with high-risk clinical trials. Mechanistic work in clinical trials may be of great value because it promotes the understanding of human diseases and the development of future therapeutic modalities. Investigators are encouraged to visit the NIAID website for additional information about the research mission and high-priority research areas of the NIAID (https://www.niaid.nih.gov/research/role). Only one clinical trial may be proposed in each NIAID Clinical Trial Implementation Cooperative Agreement (U01) application.</p>				
119017	NIAID Clinical Trial Planning Grant (R34 Clinical Trial Not Allowed)	National Institute of Allergy and Infectious Diseases/NIH/DHHS	PAR-23-206	13-Jan-2025	150,000 USD

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 29-Dec-2024 [Optional][LOI/Pre-App], 28-Jan-2025</p> <p>Synopsis The purpose of this notice of funding opportunity (NOFO) is to support milestone-driven, early-stage translational research focused on drug discovery and development of novel therapeutics against select fungal pathogens including: Candida species, specifically Candida auris; Aspergillus fumigatus; Coccidioides; and Mucorales. This NOFO will use a milestone-driven, biphasic award mechanism. Transition to the R33 phase will depend on the successful completion of specific milestones during the R21 phase.</p>				
122331	<p>NIAID Research Education Program Advancing the Careers of a Diverse Research Workforce (R25 Clinical Trial Not Allowed)</p> <p>Contact Name Madelyn Reyes, DNP, FAAN</p> <p>Contact Telephone 301-594-5945</p> <p>Contact Email AITrainingHelpDesk@niaid.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 25-Jan-2025 , 25-May-2025 , 27-May-2025 , 07-Sep-2025 , 25-Sep-2025 , 25-Jan-2026 , 25-May-2026 , 27-May-2026 , 07-Sep-2026</p> <p>Synopsis The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that encourage individuals from diverse backgrounds, including those from groups underrepresented in the biomedical and behavioral sciences, to pursue further studies or careers in research. To accomplish the stated over-arching goal, this NOFO will support educational activities with a primary focus on: Courses for Skills Development Research Experiences Mentoring Activities</p>	National Institute of Allergy and Infectious Diseases/NIH/DHHS	PAR-23-282	25-Jan-2025	1,755,000 USD

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	The purpose of this notice of funding opportunity (NOFO) is to solicit applications to establish Centers for Accelerating Phage Therapy to Combat ESKAPE Pathogens (CAPT-CEP). The CAPT-CEPs will focus on developing preclinical assays, tools, and models for robust phage therapy research and development (R&D) and advancing phage clinical research.			
117716	Notice of Special Interest (NOSI): Supporting Exploratory/Developmental Research Focused on NIAMS Core Mission Areas	National Institute of Arthritis and Musculoskeletal and Skin Diseases/NIH/DHHS	NOT-AR-23-006	06-Dec-2024	Not Specified

	Deadline Dates (ALL)	06-Dec-2024 , 07-Jan-2025 , 05-Feb-2025 , 16-Feb-2025 , 09-Apr-2025 , 07-May-2025 , 05-Jun-2025 , 16-Jun-2025 , 06-Aug-2025 , 07-Sep-2025 , 05-Oct-2025 , 16-Oct-2025 , 05-Dec-2025 , 07-Jan-2026 , 05-Feb-2026 , 16-Feb-2026 , 07-May-2026 , 05-Jun-2026 , 16-Jun-2026 , 07-Sep-2026 , 05-Oct-2026 , 16-Oct-2026 , 07-Jan-2027			
	Synopsis	The purpose of this announcement is to notify the research community that the National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS) is interested in receiving Exploratory/Developmental grant applications focused on NIAMS core mission areas. Awards will provide support for innovative projects that introduce novel scientific ideas, model systems, tools, agents, targets, and technologies that have the potential for significant impact, and to substantially advance research within the NIAMS mission. These studies often assess the feasibility of a novel avenue of investigation and involve considerable risk, but have the potential to bring about breakthroughs of high value to the NIAMS research community.

	Deadline Dates (ALL)	05-Jan-2025 , 05-Apr-2025 , 05-Sep-2025			
	Synopsis	<p>This Funding Opportunity Announcement (FOA) solicits Small Business Innovation Research (SBIR) grant applications from small business concerns (SBCs) that translate technology and therapeutic innovations from academic and other non-profit research sectors to the marketplace to advance the development of diagnostic and prevention tools or treatments for musculoskeletal, rheumatic, or skin diseases. It supports late-stage pre-clinical research and development, such as moving products towards regulatory approval for clinical testing or making the new lab technologies more practical to use in a clinical setting. It requires close collaboration between the original developers of these technologies and the SBCs.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Special Interest (NOSI) to announce that research on the effects of: emerging and evolving public health crises; and/or policy changes on the health, development, and well-being of populations of interest to the NICHD is of high program priority. The NICHD populations of interest are neonates, infants, children, adolescents, and young adults, pregnant and post-partum and nursing people, individuals of reproductive age, and individuals with intellectual, developmental, or physical disabilities, as well as the families of these individuals. For information on the NICHD Strategic Plan 2020, see NICHD Strategic Plan 2020 NICHD - Eunice Kennedy Shriver National Institute of Child Health and Human Development (nih.gov)</p>				
113468	Notice of Special Interest (NOSI): High Priority Areas in Placental Research for Healthy Pregnancies (Reissue)	National Institute of Child Health and Human Development/NIH/DHHS	NOT-HD-22-049	07-Jan-2025	Not Specified
	<p>Contact Name John V. Ilekis, PhD Contact Telephone 301-435-6895 Contact Email ilekij@nih.gov Sponsor Website Program URL Link to program URL Deadline Dates (ALL) 07-Jan-2025 , 05-Feb-2025 , 16-Feb-2025 Synopsis Although the placenta is a short-lived organ limited to pregnancy, its importance is often underappreciated in being a crucial organ for the propagation of our species and future health of our progeny. Perturbations in any one of its many functions may result in many common adverse pregnancy outcomes. These include early pregnancy loss, preeclampsia, fetal growth restriction, stillbirth, and preterm birth. In addition, a poorly functioning placenta can lead to aberrant programming of the fetus that can impact the health of the individual later in adult life. This includes an increased incidence of adult diseases such as obesity, cardiovascular disease, and diabetes. Thus, a more comprehensive understanding of the placenta is necessary to help address a number of major gaps in knowledge.</p>				
103657	NICHD Small Research Grant Program (R03 Basic Experimental Studies with Humans Required)	National Institute of Child Health and Human Development/NIH/DHHS	PA-21-231	07-Jan-2025	50,000 USD

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 07-Jan-2025</p> <p>Synopsis The NICHD Small Research Grant Program (Clinical Trial Required) supports clinical trials that fall within the NICHD mission. This funding opportunity announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Studies conducted with specific applications toward processes or products in mind should submit under the appropriate ‘Clinical Trials Required’ FOA.</p>				
127983	NICHD Resource Program Grants in Bioinformatics (P41 Clinical Trial Not Allowed)	National Institute of Child Health and Human Development/NIH/DHHS	PAR-24-301	26-Dec-2024 [Optional][LOI/Pre-App]	8,750,000 USD

	Program URL	Link to program URL			
	Deadline Dates (ALL)	13-Jan-2025			
	Synopsis	<p>The goal of Future Manufacturing is to support fundamental research, education, and training of a future workforce to overcome scientific, technological, educational, economic, and social barriers in order to catalyze new manufacturing capabilities that do not exist today. Future Manufacturing seeks inventive approaches to invigorate the manufacturing ecosystem and seed nascent future industries that can only be imagined today. Future Manufacturing supports research and education that will enhance U.S. leadership in manufacturing by providing new capabilities for companies and entrepreneurs, by improving our health, quality of life, and national security, by expanding job opportunities to a diverse STEM workforce, and by reducing adverse impacts of manufacturing on the environment. At the same time, Future Manufacturing enables new manufacturing that will address urgent social challenges arising from climate change, global pandemics and health disparities, social and economic divides, infrastructure deficits of marginalized populations and communities, and environmental sustainability. Future Manufacturing will complement existing efforts, supported by NSF and other federal agencies, in advanced manufacturing, but the focus of this program is to enable new, potentially transformative, manufacturing capabilities rather than to improve current manufacturing. Proposals that are incremental improvements over existing advanced manufacturing technologies will not be competitive.</p>			
124016	ACED: Accelerating Computing-Enabled Scientific Discovery	National Science Foundation	24-541	14-Jan-2025	Not Specified

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Contact Telephone 703-292-8111</p> <p>Contact Email ACED@nsf.gov</p> <p>Sponsor Website Link to sponsor website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 14-Jan-2025</p> <p>Synopsis The ACED program seeks to harness computing to accelerate scientific discovery, while driving new computing advancements. The intent is to catalyze advancements on both sides of a virtuous cycle that: (a) benefit scientific disciplines through computational technologies and (b) foster novel computing technologies that will enable advances beyond the specific use cases or domains originally targeted. The program seeks continuous collaborations between at least two groups of researchers. One group is expected to consist of researchers in computing, which, for the purposes of this solicitation are those disciplines that are supported by the Core Programs of National Science Foundation's (NSF) Computer and Information Science and Engineering (CISE) directorate. The other group of researchers are expected to represent another scientific or engineering discipline, which, for the purposes of this solicitation, are defined as those supported within existing programs of the following NSF directorates: Biological Sciences, Engineering, or Mathematical and Physical Sciences.</p>				
127913	Pathways to Enable Open-Source Ecosystems	National Science Foundation	24-606	14-Jan-2025	27,800,000 USD
	<p>Contact Name Jeff Stanton</p> <p>Contact Telephone 703-292-7794</p> <p>Contact Email pose@nsf.gov</p> <p>Sponsor Website Link to sponsor website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 14-Jan-2025 , 02-Sep-2025</p> <p>Synopsis The Pathways to Enable Open-Source Ecosystems (POSE) program aims to harness the power of open-source development for the creation of new technology solutions to problems of national and societal importance. Many NSF-funded projects result in publicly accessible, modifiable, and distributable open-source products, including software, hardware, models, specifications, programming languages, or data platforms that catalyze further innovation. In some cases, an open-source product that shows potential for wide adoption forms the basis for a self-sustaining open-source ecosystem (OSE) that comprises a leadership team; a managing organization with a well-defined governance structure and distributed development model; a cohesive community of external intellectual content developers; and a broad base of users across</p>				

National Science Foundation (NSF) Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>academia, industry, and/or government. The overarching vision of POSE is that proactive and intentional formation of managing organizations will ensure broader and more diverse adoption of open-source products; increased coordination of external intellectual content developer contributions; and a more focused route to technologies with broad societal impact. Toward this end, the POSE program supports the formation of new OSE managing organizations based on an existing open-source product or class of products, whereby each organization is responsible for the creation and management of processes and infrastructure needed for the efficient and secure development and maintenance of an OSE.</p>				
127976	Safety, Security, and Privacy of Open-Source Ecosystems	National Science Foundation	24-608	14-Jan-2025 [LOI/Pre-App]	500,000 USD
	<p>Contact Name Nina Amla Contact Telephone 703-292-7991 Contact Email pose@nsf.gov Sponsor Website Link to sponsor website Program URL Link to program URL Deadline Dates (ALL) 14-Jan-2025 [LOI/Pre-App], 22-Apr-2025</p> <p>Synopsis Vulnerabilities in an open-source product and/or its continuous development, integration and deployment infrastructure can potentially be exploited to attack any user (human, organization, and/or another product/entity) of the product. To respond to the growing threats to the safety, security, and privacy of open-source ecosystems (OSEs), NSF is launching the Safety, Security, and Privacy for Open-Source Ecosystems (Safe-OSE) program. This program solicits proposals from OSEs, including those not originally funded by NSF's Pathways to Enable Open-Source Ecosystems (POSE) program, to address significant safety, security, and/or privacy vulnerabilities, both technical (e.g., vulnerabilities in code and side-channels) and socio-technical (e.g., supply chain, insider threats, and social engineering). Although most open-source products are software-based, it is important to note that Safe-OSE applies to any type of OSE, including those based on scientific methodologies, models, and processes; manufacturing processes and process specifications; materials formulations; programming languages and formats; hardware instruction sets; system designs or specifications; and data platforms. The goal of the Safe-OSE program is to catalyze meaningful improvements in the safety, security, and privacy of the targeted OSE that the OSE does not currently have the resources to undertake. Funds from this program should be directed toward efforts to enhance the safety, security, and privacy characteristics of the open-source product and its supply chain as well as to bolster the ecosystem's capabilities for managing current and future risks, attacks, breaches, and responses.</p>				
128314	Dear Colleague Letter: Announcing the Opportunity for NSF Researchers to Participate in BioMADE Project Calls as Part of an Integrated Project Team	National Science Foundation	NSF 25-012	22-Jan-2025 [LOI/Pre-App]	Not Specified

Program URL	Link to program URL
Deadline Dates (ALL)	22-Jan-2025 [LOI/Pre-App], 18-Apr-2025
Synopsis	<p>With this Dear Colleague Letter, NSF announces its partnership with BioMADE, one of the Manufacturing Innovation Institutes (MIIs) established under the auspices of the Manufacturing USA program, funded by the Department of Defense as the Bioindustrial Manufacturing Innovation Institute. As with other MIIs, BioMADE engages its university and industrial membership to undertake projects that transition manufacturing technologies from Manufacturing Readiness Level (MRL) 4 (laboratory demonstration) to MRL 7 (implementation in an environment representative of production). The objectives of the MIIs are highly complementary to those of NSF, which focus on MRL 1 (basic research) to MRL 3 (proof of concept), providing opportunities to speed the translation of NSF-sponsored research to use. NSF and BioMADE encourage researchers to create integrated projects that span from MRL 1-3 levels typically supported by NSF all the way to MRL 4-7 levels supported by BioMADE. Via a joint review mechanism, such projects that respond to one of BioMADE's Project Calls will be jointly supported by NSF and BioMADE, with NSF supporting basic research and BioMADE funding higher MRL research and translation efforts.</p>

127826	Ethical and Responsible Research	National Science Foundation	24-604	23-Jan-2025	Not Specified

Deadline Dates (ALL)	23-Jan-2025
Synopsis	<p>The ER2 program supports projects that focus on what constitutes or promotes responsible and ethical research in science, technology, engineering, and mathematics (STEM) fields. The ER2 program promotes the development, improvement, and dissemination of responsible and ethical research practices and aims to build on organizational cultures that value and reward such practices. Proposers to the ER2 program may examine responsible and ethical research practices across one or</p>

National Science Foundation (NSF) Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

more career stages. This can include, for example, the research practices of students, postdoctoral fellows, faculty, or practitioners. ER2 projects could seek to improve responsible and ethical research practices in teams, organizations, or communities, or between researchers and the public. ER2 projects may include the development of interventions that promote responsible and ethical research practices, including in multidisciplinary, inter-organizational, cross-sector, translational, or international contexts. An ER2 project can also identify challenges that undermine or erode responsible and ethical research practices in STEM fields and evaluate measures to prevent or mitigate such challenges. A comprehensive approach to responsible and ethical research not only influences individual behavior, but it also contributes to an inclusive, equitable, and respectful research culture. Thus, proposers could examine organizational or other factors that positively influence responsible and ethical research practices in STEM fields.

Deadline Dates (ALL)	23-Jan-2025
Synopsis	Proposals to the ORCC Solicitation are encouraged that build on NSF's investment in growing convergence research by developing integrative, cross-disciplinary approaches that examine the organismal mechanisms that underlie adaptive and maladaptive responses to environmental factors associated with climate change, how these responses affect fitness in changing and/or novel climates and the genetic and evolutionary processes (eco-evolutionary) through which these traits originate, persist, and are transmitted across generations. Further, this solicitation encourages creative approaches to use the results of these foundational research investigations to develop use-inspired ways to address societal challenges in anticipating and managing effects of climate change on organisms across spatial and temporal scales and biological hierarchies.

	Synopsis Applicant Types Funding Limit	The Lustgarten Foundation-AACR Career Development Award for Pancreatic Cancer Research has been established to honor the life and legacy of Representative Lewis, who worked tirelessly to advance the civil rights of all Americans, even while battling pancreatic cancer. The intent of this program is to support the development and diversity of talent working in pancreatic cancer research. Eligibility is limited to members of racial or ethnic groups that have been shown to be underrepresented in the cancer related sciences workforce. Selection is competitive and will be based on outstanding accomplishments in scientific research. Applications are invited from researchers currently in the field as well as investigators with experience in other areas of cancer or biomedical research who have promising ideas and approaches that can be applied to pancreatic cancer research. 300,000.00 maximum

	Synopsis	The American Otological Society is committed to the non-promotional advancement of knowledge and science and to a free exchange of medical education in otology and neurotology. All of the AOS grant awards may involve research on any topic related to ear disorders. The research need not be directly on an otological disease but may explore normal functions of the cochlea, labyrinth or central auditory or vestibular systems. However, the applicant must describe how the proposed research will benefit understanding, diagnosis or treatment of otological disorders. Research can relate to any aspects of the ear, hearing and balance disorders. The sponsor welcomes applications that address quality and safety of care as well as to improve education and training in otology. Clinical investigation grants have open eligibility and are \$66K for one year.

	Synopsis	<p>JDRF’s Strategic Research Agreements provide research funding for single or multiple investigators to address critical gaps and challenges and potential breakthroughs in Type 1 diabetes research. The Strategic Research Agreement is a partnership between Investigator(s) and JDRF Scientists to help address roadblocks and accelerate JDRF’s mission through support of cutting-edge scientific investigation. Further, this mechanism embodies cooperative development of a research plan, interim quarterly reporting on milestones and interaction with JDRF scientists prior to and during the award period. The budget and duration of funding are variable and continued funding is based on satisfactory effort and quarterly progress on milestones.</p>

	Synopsis	The Litwin IBD Pioneers initiative supports innovative clinical and translational research projects with the potential to impact the treatment of IBD patients in the near future. The program encourages novel research into the diagnosis, identification of clinically relevant subsets, treatments, and cures for inflammatory bowel diseases (IBD) and funds innovative pilot research so that scientists can test their initial ideas and generate preliminary data. Litwin IBD Pioneers supports researchers who are exploring all possible opportunities for diagnostic and therapeutic improvements, including novel, out-of-the-box ideas, and funds innovative and pioneering ideas that have a clinically relevant focus. Additionally, the program is open to investigators from other disciplines new to the IBD field, as well as countries outside the United States.

	Synopsis	The Greenwall Faculty Scholars Program in Bioethics is a career development award to enable junior faculty members to carry out innovative bioethics research. It supports research that goes beyond current work in bioethics to help resolve pressing ethical issues in clinical care, biomedical research, and public policy, and creates a community that enhances future bioethics research by Scholars and Alumni/ae. Each year, the Foundation selects approximately three Greenwall Faculty Scholars to receive 50 percent salary support for three years to enable them to carry out a specific research proposal and develop their research program.

	Synopsis	<p>The NATO Science for Peace and Security (SPS) Programme enhances security-related civil science and technology to address emerging security challenges and their impact on international security. It connects scientists, experts and officials from NATO and its Partner nations to address these challenges through scientific research, technological innovation, and exchange of expertise and know-how. Advanced Training Courses (ATC) are tailor-made, modular courses designed to enable specialists in NATO countries to share their security-related expertise in one of the SPS Key Priority areas. ATCs are not intended to be lecture-driven, but to be intensive, interactive and practical in nature. Courses contribute to the training of experts in Partner nations and enable the formation and strengthening of international expert networks. Courses may be 5 to 7 working days, with a target audience of 20 to 50 trainees primarily from Partner nations. These trainees are chosen on the basis of their qualifications and experience, and the benefit they may draw from the ATC in their future activities. The budget is EUR 60,000 on average.</p>

	Synopsis	OSA and SPIE offer a congressional fellowship program providing members with an invaluable opportunity of public policy learning. Fellows gain a perspective that enhances their industrial, academic or government careers and the optics community's ability to more effectively communicate with Congress. The Fellowship is an ideal way to spend an academic sabbatical or leave of absence from a company. The Arthur H. Guenther Congressional Fellow works in the office of a U.S. senator or representative or with a congressional committee to get first-hand knowledge of congressional operations, contribute to the policymaking process and forge links among the engineering, scientific and public policy communities.

	Synopsis	<p>Currently there are three Scholarships: North America, Europe, and Australasia. Each Scholarship provides a hands-on introduction to underwater and other aquatic-related endeavors for a young person considering a career in an underwater-related discipline. One scholar is selected from each of the three regions and each scholar spends approximately one year working side by side with current leaders in underwater fields. Each scholar travels primarily within their region, but may have opportunities throughout the underwater world. The range of experiences may include active participation in field studies, underwater research, scientific expeditions, laboratory assignments, equipment testing and design, photographic instruction, and other specialized assignments.</p>

	Synopsis	<p>This award is designed to foster clinical research into any aspect of Parkinson's disease conducted by young investigators who are under-represented in current research. By recognizing and honoring the exceptional contributions of young talented individuals, the award seeks to break down barriers and create a more inclusive and diverse healthcare community. It is expected that this initiative will spur innovation and promote the translation of cutting-edge scientific discoveries into efficient and practical health measures that will benefit people with Parkinson's disease. This is a 1-year award for a total of \$50,000. Funds can be used to support research expenses such as salary support for additional trained personnel (e.g., research assistants, study coordinators), equipment or consumables specifically needed for the research plan. Indirect costs are not allowed.</p>
