

**Funding Opportunities Monthly Edition  
March 2025 Due Dates**

## Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in March 2025.

The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

The Development Office offers assistance with many not for profit opportunities. Please contact the Development Office's Corporate and Foundation Relations team at [DevCorpFound@mountsinai.org](mailto:DevCorpFound@mountsinai.org) / 212-659-8500 below for assistance or questions.

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis</p>	<p>The purpose of the International Research Scientist Development Award (IRSDA) is to provide support and protected time (three to five years) to advanced postdoctoral U.S. research scientists and recently-appointed U.S. junior faculty (applicants must be at least two years beyond conferral of doctoral degree) for an intensive, mentored research career development experience in a low- or middle-income country (LMIC), as defined by the World Bank (<a href="http://data.worldbank.org/about/country-classifications/country-and-lending-groups">http://data.worldbank.org/about/country-classifications/country-and-lending-groups</a>), including "low-income," "lower-middle-income," and "upper-middle-income" countries) leading to an independently-funded research career focused on global health. This Notice of Funding Opportunity (NOFO) invites applications from postdoctoral research scientists and junior faculty from any health-related discipline who propose career development activities and a research project that is relevant to the health priorities of the LMIC under the mentorship of LMIC and U.S. mentors. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary study to a clinical trial. Applicants to this NOFO are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. Applicants proposing a clinical trial or an ancillary study to an ongoing clinical trial as lead investigator should apply to the companion NOFO ( PAR-24-114).</p>			
112442	<p><a href="#">NCI Clinical and Translational Exploratory/Developmental Studies (R21 Clinical Trial Optional)</a></p>	National Cancer Institute/NIH/DHHS	PAR-25-139	13-Feb-2025	275,000 USD
	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email</p> <p>Sponsor Website</p> <p>Program URL</p> <p>Deadline Dates (ALL)</p> <p>Synopsis</p>	<p>Morgan O'Hayre, Ph.D.</p> <p>240-276-7482</p> <p><a href="mailto:ohayrem@mail.nih.gov">ohayrem@mail.nih.gov</a></p> <p></p> <p><a href="#">Link to program URL</a></p> <p>13-Feb-2025 , 01-Mar-2025 , 12-Jun-2025 , 01-Jul-2025</p> <p>This Funding Opportunity Announcement (FOA) supports preclinical and early phase clinical research, as well as correlative studies, directly related to advancements in cancer treatment, diagnosis, prevention, comparative oncology, symptom management, or reduction of cancer disparities. This includes (but is not limited to) development and testing of the following: new molecular agents or biologics for cancer treatment; management strategies for cancer-related symptoms or treatment-related toxicity; cancer screening or diagnostic tools, such as imaging techniques; cancer preventive agents or approaches; predictive and prognostic biomarkers for patient selection or stratification; clinically relevant in vivo or in vitro tumor models (including genetically engineered mouse models, patient-derived xenograft models, organoids, and cell lines); and strategies to address therapeutic outcome disparities among underserved populations. In addition to novel agents, new treatment strategies may involve repurposed agents or novel combinations of interventions (including radiation), based on established mechanisms of action. Comparative correlative studies in cancer patients with age, gender, racial/ethnic, or</p>

---------	---------------	--------------	----------------	---------------	----------------

health disparities are encouraged to explore mechanisms underlying their differential responses (efficacy and toxicity) and resistance to therapeutic interventions. Comparative oncology studies in dogs investigating strategies for treatment and diagnosis of human disease are supported as well. This FOA does not support research that focuses on basic cancer biology (such as studies of cancer-related pathways, molecular mechanisms, or mechanisms of metastasis), late-stage clinical trials, risk assessment studies, epidemiological studies, or studies of behavioral interventions. These applications will be deemed not responsive to this FOA and will not be reviewed (see below for a more detailed description of studies that are not responsive for this FOA). The R21 mechanism is intended to encourage exploratory and developmental research projects by providing support for the early and conceptual stages of these projects. These studies may involve considerable risk but may lead to breakthroughs in particular areas, or to the development of novel techniques, agents, methodologies, models, or applications that could have a major impact on cancer research (preclinical or clinical).

129585	<a href="#">RFA-CA-25-005 -- Revision Applications for Incorporation of Novel NCI-Supported Technology to Accelerate Cancer Research (R01 Clinical Trial Optional)</a>	National Cancer Institute/NIH/DHHS	RFA-CA-25-005	05-Mar-2025 [Optional][LOI/Pre-App]	150,000 USD

Deadline Dates (ALL)	05-Mar-2025 [Optional][LOI/Pre-App], 04-Apr-2025 , 03-Sep-2025 [Optional][LOI/Pre-App], 03-Oct-2025
Synopsis	The purpose of this Notice of Funding Opportunity (NOFO) is to encourage revision applications from currently funded NCI R01 research projects. The applicants should propose to expand upon the original research question(s) or otherwise accelerate progress for the parent study by incorporating a new technical approach or instrument developed through support from the NCI Innovative Molecular Analysis Technologies (IMAT) program. Awards from this NOFO are meant to incentivize independent validation and accelerate the adoption of these emerging technologies by appropriate research communities. As a component of the NCI IMAT program, this NOFO aims to promote interdisciplinary collaboration in the development of innovative tools and methods that enable cancer research and accelerate scientific discovery.

This includes new capabilities to address issues related to pre-analytical degradation of targeted analytes during the collection, processing, handling, and/or storage of cancer-relevant biospecimens. The overall goal is to support the development of highly innovative technologies capable of maximizing or otherwise interrogating the quality and utility of biological samples used for downstream analyses. This NOFO will support the development of tools, devices, instrumentation, and associated methods to preserve or protect sample integrity, or establish verification criteria for quality assessment/quality control and handling under diverse conditions. These technologies are expected to accelerate and/or enhance research in cancer biology, early detection and screening, clinical diagnosis, treatment, or epidemiology, or address issues associated with cancer health disparities, by reducing pre-analytical variations that affect biospecimen sample quality. Projects proposing the application of existing technologies where the novelty resides in the biological or clinical target/question being pursued are not responsive to this solicitation and will not be reviewed. This funding opportunity is part of a broader NCI-sponsored Innovative Molecular Analysis Technologies (IMAT) Program.</p>

Deadline Dates (ALL)	20-Feb-2025 , 10-Mar-2025 , 20-Jun-2025 , 14-Jul-2025 , 20-Oct-2025 , 17-Nov-2025 , 20-Feb-2026 , 17-Mar-2026 , 22-Jun-2026 , 13-Jul-2026 , 20-Oct-2026 , 17-Nov-2026
Synopsis	<p>The goal of this notice of funding opportunity (NOFO) is to support feasibility trials of complementary and integrative health approaches with physical and/or psychological therapeutic inputs (often called mind and body interventions) for conditions that have been identified by NCCIH as high-priority research topics. This funding opportunity is intended to support feasibility clinical trials that provide new information that are scientifically necessary for the planning and conduct of a subsequent clinical efficacy or effectiveness study, pragmatic trial, or dissemination and implementation trial within NCCIH’s mission. NCCIH expects that applications to this NOFO will describe the planned future clinical trial and in so doing demonstrate that the proposed (R34) research is scientifically necessary to design or plan the subsequent competitive full-scale clinical trial. Under this R34, the data collected should be used to fill gaps in scientific knowledge necessary to develop a competitive full-scale clinical trial, including, but not limited to the following: examining feasibility and acceptability of interventions lacking published data; tailoring or adapting the content or structure of an intervention to a specific population, modality, or setting; refining the intervention to determine the most appropriate frequency or duration; determining feasibility of recruitment, retention, and data collection procedures; refining and assessing the feasibility of protocolized multi-component interventions; or examining acceptability and adherence of control conditions. The subsequent full-scale clinical trial should have the potential to make a significant impact on public health. Prior to submitting to this NOFO, applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact person for the science area of the planned application. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

This Notice of Funding Opportunity (NOFO) supports research directed at preventing, reducing, or eliminating disparities in eye and vision health. Applications responding to this NOFO must involve multilevel interventions that simultaneously address vision health conditions and social determinants of health (SDOH) at one or more levels of influence, such as individual, interpersonal, organizational, and community. Research must include a focus on improving vision health in one or more NIH-designated Populations with Health Disparities. Additionally, research must demonstrate meaningful community engagement in the research process.</p>

This program is designed to facilitate a timely transition of outstanding blood science researchers with a clinical doctorate degree from mentored research positions to independent, tenure-track or equivalent faculty positions. This is a limited competition Notice of Funding Opportunity (NOFO) offering the opportunity for current RFA-HL-20-001 or RFA-HL-20-002 K99 recipients to apply for the independent phase (R00) of the program. In the R00 phase, successful blood science physician scientist scholars will receive up to three years of funding to continue their research activity with support from this NOFO, which will require updated research plans and a limited competition review.</p>

Synopsis	<p>This Notice of Funding Opportunity Announcement (NOFO) solicits cooperative agreement (UG3/UH3) applications for implementation of investigator-initiated, single or multi-site, interventional clinical trials (all phases). Investigators who have completed all necessary preparation (e.g., the trial design, protocol synopsis, data analysis plan, etc.) through other means may apply for a NIAMS UG3/UH3. The UG3 phase is designed to allow the investigators to prepare the final aspects needed to start the trial, (e.g., establishing the single IRB (sIRB), contracts and reliance agreements with sites, hiring of staff, etc.). Transition to the UH3 phase to begin the trial is dependent upon completion of the UG3 milestones proposed by the investigator and approved by NIAMS. UG3 projects that meet their milestones will be administratively considered by NIAMS and prioritized for transition to the UH3 phase. NIAMS expects trials to be hypothesis-driven and have the potential for high clinical impact within the research mission of NIAMS.</p>

The goal is to attract and nurture a new and geographically-diverse cadre of clinically trained rehabilitation researchers and support their transition to independent funding. The program should support scholars with a clinical background in medical rehabilitation (e.g., psychiatry, physical/occupational therapy and allied health). This Notice of Funding Opportunity (NOFO) allows appointment of Scholars (K12) proposing to serve as the lead investigator of an independent clinical trial; or proposing a separate ancillary clinical trial; or proposing to gain research experience in a clinical trial led by another investigator, as part of their research and career development.</p>

	<p>Cooperative Centers of Excellence in Hematology (CCEH) Program. The HCC is expected to work collaboratively with up to 5 CCEHs as part of the NIDDK CCEH Program, which serves as a national resource for the larger nonmalignant hematology research community. The HCC will (1) provide central administrative support for the NIDDK CCEH Program, including monitoring the usage and progress of all CCEH sites, (2) develop and execute a communication and promotion plan to disseminate all CCEH resources, news, seminars, funding opportunities and activities to their intended audience(s), (3) develop and implement a multipronged education/enrichment plan for junior researchers and students interested in conducting hematology research to maximize national outreach and impact, (4) create and administer an Opportunity Pool of funds to support national and regional enrichment programs, a national Pilot and Feasibility Grant program, and other innovative programs to address gaps in the field and promote collaboration. All activities within the Program are expected to address the overall goal of supporting the national multidisciplinary research effort to study normal hematopoiesis and to combat nonmalignant hematologic diseases.</p>

	Synopsis	<p>This Funding Opportunity Announcement (FOA) establishes an accelerated review/award process to support time-sensitive research to evaluate a new policy or program that is likely to influence obesity related behaviors (e.g., dietary intake, physical activity, sedentary behavior, and/or sleep) and/or weight outcomes in an effort to prevent or reduce obesity. This FOA is intended to support research where opportunities for empirical study are, by their very nature, only available through expedited review and funding. All applications submitted to this FOA must demonstrate that the evaluation of an obesity-related policy or program offers an uncommon and scientifically-compelling research opportunity that will only be available if the research is initiated with minimum delay. For these reasons, applications submitted to this time-sensitive FOA are not</p>

Synopsis	<p>This Notice of Funding Opportunity (NOFO) invites grant applications for Environmental Health Sciences Core Centers (EHSCC). As intellectual hubs for environmental health science research, the EHSCC are expected to be the thought leaders for the field and advance the goals of the 2025-2029 NIEHS Strategic Plan (<a href="http://www.niehs.nih.gov/about/strategicplan/">http://www.niehs.nih.gov/about/strategicplan/</a>).</p> <p>The Core Centers provide critical research infrastructure, shared facilities, services and/or resources, to groups of investigators conducting environmental health sciences research. An EHSCC enables researchers to conduct their independently-funded individual and/or collaborative research projects more efficiently and/or more effectively. The overall goal of an EHSCC is to identify and capitalize on emerging issues that advance improving the understanding of the relationships among environmental exposures, human biology, and disease. The EHSCC supports community engagement and translational research as key approaches to improving public health. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).</p>

	Contact Name Contact Telephone Contact Email Sponsor Website Program URL Deadline Dates (ALL) Synopsis	Laura D. Wandner  <a href="mailto:Laura.Wandner@nih.gov">Laura.Wandner@nih.gov</a> <a href="#">Link to sponsor website</a> <a href="#">Link to program URL</a> 12-Feb-2025 , 12-Mar-2025 , 12-Jun-2025 , 12-Jul-2025 , 12-Oct-2025 , 12-Nov-2025 , 12-Feb-2026 , 12-Mar-2026 , 12-Jun-2026 , 12-Jul-2026 , 12-Oct-2026 , 12-Nov-2026 , 12-Feb-2027 , 12-Mar-2027 , 12-Jun-2027 , 12-Jul-2027  The purpose of this NIH HEAL Initiative PainCare Clinician Training Program (PCTP): Mentored Clinical Scientist Development Awards (K08 - Clinical Trials Not Allowed) is to support the career development of individuals with clinical doctoral degrees to create a group of new and well-trained, independent investigators. This supervised career development program will provide independent NIH research support during the early-career phase to help recipients establish independent research programs in areas supported by the NIH HEAL Initiative’s Clinical Research in Pain Management program. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Under this NOFO applicants are permitted to propose a research experience in a clinical trial led by a mentor or co-mentor. Those proposing a clinical trial or an ancillary clinical trial as lead investigator should apply to the companion NOFO. This Parent Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion NOFO. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions.

	Synopsis	<p>The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that encourage individuals from diverse backgrounds, including those from groups underrepresented in the biomedical and behavioral sciences, to pursue further studies or careers in research. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on: Research Experiences Courses for Skills Development This funding opportunity announcement (FOA) provides support to eligible, domestic institutions to develop and implement effective approaches to biomedical research education and mentoring that will keep pace with the rapid evolution of the research enterprise. This Neuroscience Doctoral Readiness Program (DR Program) expects that the proposed research education programs will incorporate extensive research experiences within the participating NIH Institutes missions and well-designed courses for skills development and education to prepare recent baccalaureates from diverse backgrounds to transition into and complete rigorous, research-focused doctoral degree programs (e.g., Ph.D., M.D./Ph.D., or D.D.S./Ph.D.) in biomedical fields. This is a limited competition funding opportunity announcement to support postbaccalaureate programs that will be affiliated with a funded NIH T32 program. Eligibility is limited to PD(s)/PI(s) or MPI teams that include at least one PD/PI of a grant supported by the following T32 NOFOs: Jointly Sponsored Institutional Predoctoral Training Program (JSPTPN), PAR-22-265; NINDS Advanced Institutional Research Training Program, PAR-21-149; NINDS Institutional Translational Research Training Program, PAR-19-228 and PAR-24-108; NINDS Institutional AD/ADRD Research Training Program, PAR-23-113; or Ruth L. Kirschstein National Research Service Award (NRSA) Institutional Research Training Grant, PA-23-048. In all cases, a PD/PI of the T32 grant from a NOFO cited above must be the PD/PI or an MPI of this R25. These postbaccalaureate programs are intended to exclusively support participants from institutions that do not offer undergraduates access to substantive research opportunities. This NOFO does not allow appointed participants to lead an independent clinical trial but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor.</p>

Synopsis	Some projects initiated with SBIR or STTR funding require considerable financing beyond the SBIR/STTR Phase II award to achieve commercialization. The development of medical biotechnology products is often impeded by a significant funding gap (known as the “Valley of Death”) between the end of the SBIR/STTR Phase II award and the commercialization stage. The goal of this NOFO is to assist applicants in pursuing the next appropriate milestone(s) necessary to advance a product/technology that requires Federal regulatory approval or to bring a complex research tool to market. This opportunity aims to facilitate the transition of previously funded SBIR and STTR Phase II projects to the commercialization stage by promoting partnerships between NINDS SBIR or STTR recipients and third-party investors and/or strategic partners in the Phase IIB competing renewal. Applicants are strongly encouraged to secure independent third-party funding throughout the Phase IIB project period. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

		<p>research applications that are exploratory and developmental in nature and focus on understanding the neurobiological mechanisms underlying substance use disorders (SUD), including fundamental circuitry and behavior relevant to substance use. This NOFO is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and studies that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Studies conducted with specific applications toward processes or products in mind should submit under the companion NOFO - Exploratory Clinical Neuroscience Research on Substance Use Disorders (R61/R33 Clinical Trial Optional) PAR-23-157. For projects not requiring a phased research approach, applicants are encouraged to apply under a different activity code (e.g., PA-20-184 “Research Project Grant (Parent R01 Basic Experimental Studies with Humans Required)”).</p>

	<p>pharmacists. Scholars are expected to be supported for 3-4 years on consecutive 12-month appointments. Candidates selected for support as scholars must hold a doctorate and commit a minimum of 9 person months (equivalent to 75% of full-time professional effort) to conducting clinical research and career development activities associated with the proposed K12 program. Scholars appointed through the proposed program may serve as the lead for a NIH-defined clinical trial that fulfills the NIH requirement for a minimal risk trial. A minimal risk trial is one in which the probability and magnitude of harm or discomfort anticipated in the research are not greater in and of themselves than those ordinarily encountered in daily life or during the performance of routine physical or psychological examinations or tests. This Notice of Funding Opportunity (NOFO) allows appointment of Scholars (K12) proposing to serve as the lead investigator of an independent clinical trial; or proposing a separate ancillary clinical trial; or proposing to gain research experience in a clinical trial led by another investigator, as part of their research and career development. Applicants may review the information found on the NIH Office of Extramural Research "Clinical Trial Requirements for Grants and Contracts": <a href="https://grants.nih.gov/policy/clinical-trials.htm">https://grants.nih.gov/policy/clinical-trials.htm</a> for more details about how NIH is enhancing accountability and transparency of clinical research.</p>					
124329	<a href="#">Developing Digital Therapeutics for Substance Use Disorders (UG3/UH3 Clinical Trial optional)</a>	National Institute on Drug Abuse/NIH/DHHS	PAR-24-064	26-Mar-2025	Not Specified	
	Contact Name Contact Telephone Contact Email Sponsor Website Program URL Deadline Dates (ALL)	Will M. Aklin, Ph.D. 301-827-5909 <a href="mailto:aklinwm@nida.nih.gov">aklinwm@nida.nih.gov</a>  <a href="#">Link to program URL</a> 26-Mar-2025 , 17-Jul-2025 , 19-Nov-2025 , 26-Mar-2026 , 17-Jul-2026 , 19-Nov-2026				
	Synopsis	The purpose of this Funding Opportunity Announcement (FOA) is to accelerate the development of Digital Therapeutics (DTx) to treat Substance Use Disorders (SUDs). Advances in technology offer unprecedented opportunities to develop clinical-grade mobile, web, or other software-based platforms designed to deliver treatments that are safe and effective for SUD. FDA authorization of DTx can play an important role in increasing the availability of treatments to patients with SUD. The primary objective of this FOA is to move DTx to their next step in the development process, with the ultimate goal of generating new, FDA authorized, disseminated treatments for SUDs. Applications may focus on the pre-clinical and/or clinical development and testing of new DTx or existing DTx developed for other indications. The UG3/UH3 Cooperative Agreement involves 2 phases. The UG3 phase, for up to 2 years, is designed to support a project with specific milestones to be accomplished by the end of the period. The UH3 phase is to provide funding for up to 3 additional years following successful completion of the UG3. UG3 projects that meet their milestones will be administratively considered by NIDA and prioritized for transition to the UH3 phase. Investigators submitting to this FOA must address both UG3 and UH3 phases.

Synopsis | This notice of funding opportunity (NOFO) invites applications for research to address systemic and structural factors that impede or facilitate the pre-exposure prophylaxis (PrEP) uptake and persistence among people who use substances in the U.S. and worldwide. Research projects supported by this NOFO will develop, implement, and evaluate system/structural-directed strategies that meet the needs of people who use substances to improve the PrEP uptake and persistence. Particular emphasis is placed on strategies designed to benefit populations disproportionately affected by substance use and human immunodeficiency viruses (HIV), including but not limited to: women, transgender people, people with a history of criminal legal involvement, sex workers, and men who have sex with men, for whom PrEP uptake and persistence rates are the lowest. This NOFO requires an intersectional perspective. Projects should focus on equitable, scalable, and sustainable approaches for accelerating the improvement of the PrEP uptake and persistence for marginalized and underserved people who use substances. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

	<p>Synopsis</p>	<p>This notice of funding opportunity (NOFO) invites applications for research to address systemic and structural factors that impede or facilitate the pre-exposure prophylaxis (PrEP) uptake and persistence among people who use substances in the U.S. and worldwide. Research projects supported by this NOFO will develop, implement, and evaluate system/structural-directed strategies that meet the needs of people who use substances to improve the PrEP uptake and persistence. Particular emphasis is placed on strategies designed to benefit populations disproportionately affected by substance use and human immunodeficiency viruses (HIV), including but not limited to: women, transgender people, people with a history of criminal legal involvement, sex workers, and men who have sex with men, for whom PrEP uptake and persistence rates are the lowest. This NOFO requires an intersectional perspective. Projects should focus on equitable, scalable, and sustainable approaches for accelerating the improvement of the PrEP uptake and persistence for marginalized and underserved people who use substances. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).</p>

	<p>Contact Email <a href="mailto:tristan.mcclure-begley@nih.gov">tristan.mcclure-begley@nih.gov</a></p> <p>Sponsor Website</p> <p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 10-Mar-2025 , 12-Aug-2025 , 10-Mar-2026 , 05-Aug-2026 , 10-Mar-2027 , 11-Aug-2027</p> <p>Synopsis The National Institute on Drug Abuse (NIDA) Cutting-Edge Basic Research Award (CEBRA) is designed to foster highly innovative or conceptually creative research related to the etiology, pathophysiology, prevention, or treatment of substance use disorders (SUDs). It supports high-risk and potentially high-impact research that is underrepresented or not included in NIDA's current portfolio that has the potential to transform SUD research. The proposed research should: 1. develop, and/or adapt, revolutionary techniques or methods for addiction research or that show promising future applicability to SUD research; and /or 2. test an innovative and significant hypothesis for which there are scant precedent or preliminary data and which, if confirmed, would transform current thinking.</p>				
112755	<a href="#">RFA-DA-25-078 -- HEAL Initiative: Translating Research to Practice to End the Overdose Crisis (R61/R33 Clinical Trial Optional)</a>	National Institute on Drug Abuse/NIH/DHHS	RFA-DA-25-078	20-Feb-2025 [Optional][LOI/Pre-App]	Not Specified
	<p>Contact Name Carrie Mulford, Ph.D.</p> <p>Contact Telephone 301-827-6473</p> <p>Contact Email <a href="mailto:carrie.mulford@nih.gov">carrie.mulford@nih.gov</a></p> <p>Sponsor Website</p> <p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 20-Feb-2025 [Optional][LOI/Pre-App], 20-Mar-2025</p> <p>Synopsis The goal of this initiative is to support action-oriented research that accelerates the translation of research to practice to address the overdose crisis. There remains an urgent need for research that advances the design of stigma-free patient-centered systems of care such that people who experience addiction can recover and sustain their recovery over the long-term. This notice of funding opportunity (NOFO) solicits applications that address understudied areas of opportunity, particularly those that focus on fundamental barriers or facilitators to reducing overdose deaths at the individual, provider, organizational, community, or system levels. Projects should be in alignment with the overall goals of the HEAL Initiative, and should focus on replicable, scalable, equitable approaches for accelerating the movement of evidence-based and promising treatments into routine use. This NOFO invites phased applications to support projects for which preliminary or feasibility data is not available at the time of submission. This NOFO is a companion to RFA-DA-25-077, which solicits applications for which pilot data is available. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives</p>

Synopsis	This Notice of Funding Opportunity (NOFO) invites applications to submit samples to NIH INCLUDE Project (INvestigation of Co-occurring conditions across the Lifespan to Understand Down syndromE)-supported resources to generate a large volume of integrated genomic and multi-omics data that will facilitate discovery of the molecular mechanisms of health conditions related to Down syndrome. The resulting data, and associated clinical and phenotypic data, will become part of the INCLUDE Data Hub for sharing with the research community. No funding will be provided directly to applicants under this NOFO. Applicants are encouraged to propose omics assays of existing biospecimens collected from individuals with Down syndrome and controls. The program will accept applications that propose whole genome sequencing, including both short-read and

	Deadline Dates (ALL)	12-Feb-2025 , 12-Mar-2025 , 12-Jun-2025 , 12-Jul-2025 , 12-Oct-2025 , 12-Nov-2025 , 12-Feb-2026 , 12-Mar-2026 , 12-Jun-2026 , 12-Jul-2026 , 12-Oct-2026 , 12-Nov-2026 , 12-Feb-2027 , 12-Mar-2027 , 12-Jun-2027 , 12-Jul-2027			
	Synopsis	<p>The purpose of this NIH HEAL Initiative PainCare Clinician Training Program (PCTP): Mentored Clinical Scientist Development Awards (K08) (BESH) is to support the career development of individuals with clinical doctoral degrees to create a group of new and well-trained, independent investigators. This supervised career development program will provide independent NIH research support during the early-career phase to help awardees establish independent research programs in areas supported by the NIH HEAL Initiative’s Clinical Research in Pain Management program. This Parent Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion NOFO. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary study to an existing trial, as part of their research and career development. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial basic experimental study with</p>

Synopsis	<p>The purpose of this Funding Opportunity Announcement (FOA) is to encourage exploratory/developmental research applications that propose to study the development, validation, feasibility, and effectiveness of innovative mobile health (mHealth) interventions or tools specifically suited for low- and middle-income countries (LMICs) that utilize new or emerging technology, platforms, systems, or analytics. The overall goal of the program is to catalyze innovation through multidisciplinary research that addresses global health problems, develop an evidence base for the use of mHealth technology to improve clinical and public health outcomes, and strengthen mHealth research capacity in LMICs. This FOA provides support for up to two years (R21 phase) for technology development and feasibility studies, followed by a possible transition to expanded research support (R33 phase) for validation, larger-scale feasibility, and effectiveness studies. Transition to the R33 depends on the completion of applicant-defined milestones, as well as program priorities and the availability of funds. All applicants must address both the R21 and R33 phases.</p>

Synopsis	The purpose of this Notice of Funding Opportunity (NOFO) is to leverage NICHD clinical research network infrastructure relevant to infants, children, women, pregnant and lactating individuals, and persons with disabilities to conduct innovative, multisite, investigator-initiated clinical trials and observational studies. This NOFO will utilize a bi-phasic (UG3/UH3), milestone-driven mechanism consisting of a start-up phase (UG3) and a full enrollment and clinical study implementation phase (UH3). Applications submitted in response to this NOFO must address specific aims and milestones for both the UG3 and UH3 phases. A UG3 project (phase I) that meets its milestones will be administratively considered by NICHD and prioritized for transition to the UH3 award (phase II). This NOFO provides an opportunity to leverage NICHD clinical research network infrastructure as a platform for investigator-initiated innovative hypotheses by any investigator in the extramural community. Applications must be submitted as investigator-initiated, multi-Project Director/Principal Investigator (PD/PI) grant applications in conjunction with the respective NICHD-supported Network Data Coordinating Center (DCC), or equivalent as determined by the NICHD. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

A Trailblazer project may be exploratory, developmental, proof of concept, or high risk-high impact, and may be technology design-directed, discovery-driven, or hypothesis-driven. Importantly, applicants must propose research approaches for which there are minimal or no preliminary data. A distinct feature for this FOA is that no preliminary data are required, expected, or encouraged. However, if available, minimal preliminary data are allowed. Preliminary data are defined as material which the applicant has independently produced and not yet published in a peer-reviewed journal. All preliminary data should be clearly marked and limited to one-half page, which may include one figure. Applications including data more than one-half page or more than one figure will be considered noncompliant with the FOA instructions and will not go forward to review.</p>

Projects proposed in response to this NOSI are required to meet the needs of the substance using populations who are at high risk for contracting HIV or living with HIV in the geographically defined EHE priority areas within the U.S.</p>				
125562	<a href="#">Small Business Transition Grant for New Entrepreneurs (R43/R44 Clinical Trial Not Allowed)</a>	National Institutes of Health/DHHS	PAR-24-131	06-Mar-2025 [Optional][LOI/Pre-App]	Not Specified
	<p style="text-align: center;">Synopsis</p> <p>Through this Notice of Funding Opportunity (NOFO), the National Institutes of Health (NIH) and Centers for Disease Control and Prevention (CDC) aim to foster the advancement and accelerate the growth of early-career scientists transitioning to entrepreneurship by simultaneously supporting their entrepreneurial development and the conduct of research and development under their direction. This NOFO supports small business concerns (SBCs) in employing and developing researchers as entrepreneurial Program Directors/Principal Investigators (PDs/Pis). In addition to supporting research and development efforts at the SBC, a major component of this NOFO is entrepreneurial training, mentoring, and career development of the PD/PI. Optimal PDs/Pis for this award are scientists and professionals with research, technology development, and/or healthcare delivery skills and experience, but limited entrepreneurial and independent (non-mentored) research leadership experience. PDs/Pis are expected to grow their entrepreneurial skillset while working in a small business to develop promising technologies and products that align with NIH's or CDC's missions to improve health and save lives.</p>

It promotes robust multi-directional collaborations among laboratory ("bench") and patient-focused ("bedside") investigators. Through the NIH BtB Program, this funding opportunity will invite two-year administrative supplement applications for collaborations between the NIH intramural research investigators, who conduct translational and clinical research and extramural NIH recipients. This NOSI is intended for the Extramural collaborators of awarded Bench to Bedside (BtB) proposals. Selected Applicants will be notified by the BtB Program Officer to apply for an administrative supplement in response to this NOSI. Every project must include an NIH intramural investigator who is responsible for submitting the BtB Letter of Intent (LOI) and application online (ProposalCentral; PC; <a href="https://proposalcentral.com/">https://proposalcentral.com/</a>). This NOSI is intended for the extramural collaborators of awarded Bench to Bedside (BtB) proposals. Selected Applicants will be notified by the BtB Program Officer to apply for an administrative supplement in response to this NOSI. Projects may have single or multiple Principal Investigator(s). Extramural investigators may initiate or</p>

frontiers of quantum information science and technology (QIST). Institutes are expected to catalyze breakthroughs on important problems underpinning QIST, for example in the focus areas of quantum computation, quantum communication, quantum simulation and/or quantum sensing. Successful institutes will coordinate a variety of approaches to specific scientific, technological, and educational goals in these fields, including multiple institutions and building upon multiple disciplines, as motivated by the science and engineering challenges. In so doing, Institutes will nurture a culture of discovery, provide education, training, and workforce development opportunities in the context of cutting-edge research, and demonstrate value-added from synergistic coordination within the institute and with the broader community. Partnerships, infrastructure, industry engagement, outreach, international collaboration, and new applications for QIST should be fostered by Institutes in support of their research, education, and coordination goals. The QLCI program can support awards to continue existing Quantum Leap Challenge Institutes or to establish and operate new Quantum Leap Challenge Institutes. In either case, proposers should follow the same guidance for Challenge Institute proposal preparation described in this solicitation. While this is a crosscutting program, proposals responding to this solicitation must be submitted to the Office of Strategic Initiatives (OSI) in the Directorate of Mathematical and Physical Sciences (MPS). They will subsequently be managed by a cross-disciplinary team of NSF Program Directors.

Synopsis	The Emerging Mathematics in Biology (eMB) program seeks to stimulate the development of innovative mathematical theories, techniques, and approaches to investigate challenging questions of great interest to biologists and public health policymakers. It supports truly integrative research projects in mathematical biology that address challenging and significant biological questions through novel applications of traditional, but nontrivial, mathematical tools and methods or the development of new mathematical theories particularly from foundational mathematics, including the mathematical foundation of Artificial Intelligence/Deep Learning/Machine Learning (AI/DL/ML) enabling explainable AI or mechanistic insight. The program emphasizes the uses of mathematical methodologies to advance our understanding of complex, dynamic, and heterogenous biological systems at all scales (molecular, cellular, organismal, population, ecosystems,

Deadline Dates (ALL)	17-Mar-2025
Synopsis	<p>The U.S. National Science Foundation (NSF) and the Paul G. Allen Family Foundation (the foundation) are continuing their partnership to support this program, to be administered by NSF, supporting conservation science and science-informed conservation practice in the United States. The objective of the PACSP Program is to support conservation research that investigates organismal biology, ecology, and/or evolution and is designed to contribute to the development and implementation of evidence-based activities and/or technology solutions to advance biodiversity conservation. The sponsor seeks proposals that involve the implementation of conservation activities based on conservation science principles via academic-conservation organization partnerships. The strongest projects will involve ongoing assessment of biodiversity outcomes, for instance via an adaptive management framework, that inform both scientific understanding and conservation actions. Proposals submitted to the PACSP program must make clear and well-defined connections between basic research questions and the implementation of conservation focused actions. The Program's focus is on conservation goal-related research that will directly translate to on-the-ground biodiversity conservation efforts. Proposals that adopt a convergent approach between a changing environment, conservation, and the health of ecosystems and the organisms therein are especially encouraged. Proposals are also expected to incorporate project outcomes within the context of broader societal impacts and, as appropriate for the research proposed, engage non-academic partners in collaboration. For proposals</p>

	Synopsis	<p>The purpose of the Rehabilitation Engineering Research Center (RERC) program is to improve the effectiveness of services authorized under the Rehabilitation Act by conducting advanced engineering research on and development of innovative technologies designed to solve rehabilitation problems or remove environmental barriers for people with disabilities. RERCs also demonstrate and evaluate such technologies, facilitate service delivery system changes, stimulate the production and distribution of new technologies and equipment in the private sector, and provide training opportunities. Under this RERC priority, the grantee must conduct research, development, and evaluation activities toward universally designed products or environments that promote positive outcomes among people with disabilities in one or more of the following domains: health and function, employment, or community living and participation. This grant will have a 60-month project period, with five 12-month budget periods.</p>

	Synopsis	The mission of California Institute for Regenerative Medicine (CIRM) is to accelerate world class science to deliver transformative regenerative medicine treatments in an equitable manner to a diverse California and world. The objective of this funding opportunity is to support completion of a clinical trial for a regenerative medicine-based therapy (stem cell-based or genetic therapy) that addresses an unmet medical need. Under this program, CIRM will act not only as a funding agency, but will also devote significant internal resources and leverage its external team of world-class subject matter experts to actively advance the project. The result of a successful application will be the formation of a true partnership that both accelerates the program and gives it the greatest opportunity for success.

	Deadline Dates (ALL)	13-Mar-2025			
	Synopsis	The Conquer Cancer – Breast Cancer Research Foundation Young Investigator Award (YIA) for Diversity and Inclusion in Breast Cancer Research is designed with the primary goal of increasing diversity in the oncology workforce and breast cancer research. The YIA will provide funding to promising investigators who identify as members of racial and/or ethnic groups traditionally excluded in academic medicine and biomedical research. The purpose of this award is to fund physicians during the transition from a fellowship program to a faculty appointment as they seek to build a career in clinical breast cancer research. The YIA is a mentored award, and the research project must be conducted under the guidance of a scientific mentor. Applications are accepted from U.S. and international applicants.

	Synopsis	The Robert Wood Johnson Foundation's Health Policy Research Scholars (HPRS) is a four-year national leadership development program for full-time doctoral students from a wide range of nonclinical, research-focused disciplines in which policy is a key lever for change. HPRS builds on RWJF's vision of leadership as a dynamic, transformative, relational process of change aimed at repairing damage from historical and structural injustices and oppression. The program is for doctoral students who are deeply committed to research that works to advance antiracism and structural change work aligned with the health needs of the most impacted communities. HPRS supports researchers from diverse backgrounds, particularly those with lived experiences of inequity, marginalization, and oppression.

Synopsis	Neurocritical care is one of the newest and fastest-growing specialties in medicine. Critical care neurology entails a multidisciplinary approach to treating life-threatening neurological diseases. The Neurocritical Care Division at Mayo Clinic in Rochester, Minnesota, is responsible for two services: A primary care service in a 20-bed Neuroscience Intensive Care Unit (ICU). The model of care in the ICU is closed: All orders in patients under the Division's care are written by its team, in agreement with neurosurgery when pertinent. Anesthesia support is available for supervision of invasive procedures, but all procedures are expected to be performed by the neurocritical care fellow. A consulting service, in which the Division staffs neurological consultations in all other adult ICUs at Saint Mary's and Methodist hospitals.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	PCF Young Investigator Awards will be three (3) years in duration and will provide \$75,000 per year. The award funds may be used innovatively and flexibly to advance the career and research efforts of the awardee. This for example, includes funding "protected time" or direct costs for laboratory science. This award does not support indirect costs such as institutional overhead. Every PCF Young Investigator is required to be under the direct supervision of 1-3 mentors. Young Investigator awardees are required to attend the Annual PCF Scientific Retreat and Young Investigator Forum, typically held in October, throughout the duration of their award.

	<p>mechanisms underlying autism and NDD. SFARI will facilitate coordination across all funded projects through a research consortium. SFARI will offer two tracks within this RFA: Explorer and Collaboration. 1. The Explorer track is especially suited for those who have experience studying rat models but are new to studying autism/NDD and/or are focused on a functional domain or question that is not well represented in existing consortium projects. Explorer projects are meant to support individual labs or small collaborative groups. For the Explorer track, applicants may request up to \$200,000, inclusive of 20 percent indirect costs, for each year of funding over a period of two (2) years, with the possibility of an additional two (2) years of funding for successful projects based on progress in the first two years. 2. The Collaboration track is appropriate for multi-lab collaborative projects that are based on existing work in autism/NDD-relevant rat models. For the Collaboration track, each lab within a Collaboration project may request a maximum of \$300,000, inclusive of 20 percent indirect costs, for each year of funding over a period of three (3) to four (4) years.</p> <p>Applicant Types</p> <p>Funding Limit 0.00 see detail</p> <p>Limited Submission No</p>
