

**Funding Opportunities Monthly Edition
July 2025 Due Dates**

Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in July 2025.

The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

The Development Office offers assistance with many not for profit opportunities. Please contact the Development Office's Corporate and Foundation Relations team at DevCorpFound@mountsinai.org / 212-659-8500 below for assistance or questions.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
112442	NCI Clinical and Translational Exploratory/Developmental Studies (R21 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	PAR-25-139	12-Jun-2025	275,000 USD
	<div> <div>Contact Name</div> <div>Contact Telephone</div> <div>Contact Email</div> <div>Sponsor Website</div> <div>Program URL</div> <div>Deadline Dates (ALL)</div> <div>Synopsis</div> </div> <div> <div>Morgan O'Hayre, Ph.D.</div> <div>240-276-7482</div> <div>ohayrem@mail.nih.gov</div> <div></div> <div>Link to program URL</div> <div>12-Jun-2025 , 01-Jul-2025</div> <div> <p>This Funding Opportunity Announcement (FOA) supports preclinical and early phase clinical research, as well as correlative studies, directly related to advancements in cancer treatment, diagnosis, prevention, comparative oncology, symptom management, or reduction of cancer disparities. This includes (but is not limited to) development and testing of the following: new molecular agents or biologics for cancer treatment; management strategies for cancer-related symptoms or treatment-related toxicity; cancer screening or diagnostic tools, such as imaging techniques; cancer preventive agents or approaches; predictive and prognostic biomarkers for patient selection or stratification; clinically relevant in vivo or in vitro tumor models (including genetically engineered mouse models, patient-derived xenograft models, organoids, and cell lines); and strategies to address therapeutic outcome disparities among underserved populations. In addition to novel agents, new treatment strategies may involve repurposed agents or novel combinations of interventions (including radiation), based on established mechanisms of action. Comparative correlative studies in cancer patients with age, gender, racial/ethnic, or health disparities are encouraged to explore mechanisms underlying their differential responses (efficacy and toxicity) and resistance to therapeutic interventions. Comparative oncology studies in dogs investigating strategies for treatment and diagnosis of human disease are supported as well. This FOA does not support research that focuses on basic cancer biology (such as studies of cancer-related pathways, molecular mechanisms, or mechanisms of metastasis), late-stage clinical trials, risk assessment studies, epidemiological studies, or studies of behavioral interventions. These applications will be deemed not responsive to this FOA and will not be reviewed (see below for a more detailed description of studies that are not responsive for this FOA). The R21 mechanism is intended to encourage exploratory and developmental research projects by providing support for the early and conceptual stages of these projects. These studies may involve considerable risk but may lead to breakthroughs in particular areas, or to the development of novel techniques, agents, methodologies, models, or applications that could have a major impact on cancer research (preclinical or clinical).</p> </div> </div>				
121826	Revision Applications for Validation of Biomarker Assays Developed Through NIH-Supported Research Grants (R01 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-24-304	11-Jul-2025	450,000 USD

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Contact Name Sumana Dey, Ph.D.</p> <p>Contact Telephone 240-276-5748</p> <p>Contact Email sumana.dey@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 11-Jul-2025 , 15-Oct-2025 , 13-Feb-2026 , 10-Jul-2026 , 14-Oct-2026</p> <p>Synopsis Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) encourages revision applications (formerly called "competing revisions") from currently funded NCI R01 research projects. The applicants should propose projects that are expected to accelerate the pace of translation of NCI-supported methods/assays/technologies (referred to as "assays") to the clinic. Specifically, the focus of applications submitted in response to this NOFO should be on the adaption and clinical validation of molecular/cellular/imaging markers (referred to as "markers" or "biomarkers") for cancer detection, diagnosis, prognosis, monitoring, and prediction of response in treatment, as well as markers for cancer prevention and control. Applications may support the acquisition of well-annotated specimens from NCI-supported or other clinical trials or observational cohorts/consortia for the purpose of clinical validation of the assay. Research projects proposed in response to this NOFO encourage multidisciplinary interaction among scientific investigators, assay developers, clinicians, statisticians, and clinical laboratory staff. Clinical laboratory scientist(s) and statistical experts are highly encouraged to comprise integral parts of the application. This NOFO is not intended to support early-stage development of technology or the conduct of clinical trials, but rather the adaption and validation of assays to the point where they could be integrated into clinical trials as investigational assays/tools/devices.</p>				
113232	Bioengineering Research Grants (BRG) (R01 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-22-242	07-May-2025	Not Specified
	<p>Contact Name Rao Divi, Ph.D.</p> <p>Contact Telephone 240-276-6913</p> <p>Contact Email divir@mail.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-May-2025 , 05-Jun-2025 , 05-Jul-2025 , 07-Sep-2025</p> <p>Synopsis The purpose of this funding opportunity announcement is to encourage collaborations between the life and physical sciences that: 1) apply a multidisciplinary bioengineering approach to the solution of a biomedical problem; and 2) develop, integrate,</p>				

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	optimize, validate, translate or accelerate adoption of promising tools, methods and techniques: a) that fulfill an unmet need and address specific research or clinical problem in basic, translational, and/or clinical science and practice, b) capable of enhancing our understanding of health and disease, and/or c) improve practice of medicine. Applications may propose design-directed, developmental, discovery-driven, or hypothesis-driven research, and this FOA is appropriate for small teams applying an integrative approach to increase our understanding of and solve problems in biological, clinical or translational science.				
113233	Bioengineering Research Grants (BRG) (R01 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	PAR-22-243	07-May-2025	Not Specified
	<div>Contact Name</div> <div>Contact Telephone</div> <div>Contact Email</div> <div>Sponsor Website</div> <div>Program URL</div> <div>Deadline Dates (ALL)</div> <div>Synopsis</div>	<div>Rao Divi, Ph.D.</div> <div>240-276-6913</div> <div>divir@mail.nih.gov</div> <div></div> <div>Link to program URL</div> <div>07-May-2025 , 05-Jun-2025 , 05-Jul-2025 , 07-Sep-2025</div> <div>The purpose of this funding opportunity announcement is to encourage collaborations between the life and physical sciences that: 1) apply a multidisciplinary bioengineering approach to the solution of a biomedical problem; and 2) integrate, optimize, validate, translate or otherwise accelerate the adoption of promising tools, methods, and techniques for a specific research or clinical problem in basic, translational, or clinical science and practice. An application may propose design-directed, developmental, discovery-driven, or hypothesis-driven research and is appropriate for small teams applying an integrative approach to increase our understanding of and solve problems in biological, clinical, or translational science. This FOA will support clinical trials that test functionality or validate performance in the chosen setting. This FOA is not intended to support conventional clinical trials that lack translation as the primary motivation. Applications that propose phase III clinical trials in any area of research are not sought by and will not be supported through this FOA. This FOA does not propose to support commercial production.</div>			
113746	Notice of Special Interest (NOSI): Utilization of Cohorts and Prospective Study Designs for Liquid Biopsy Assay Validation for Early Detection of Cancers	National Cancer Institute/NIH/DHHS	NOT-CA-23-004	07-May-2025	Not Specified

Proposals that facilitate early cancer biomarker assay development, verification, qualification, and validation utilizing statistically powered retrospective cohorts and/or through prospective studies in the appropriate populations with a sound study design are responsive to this NOSI.</p>				
123791	NCCIH Natural Product Mid Phase Clinical Trial Cooperative Agreement (R01 Clinical Trial Required)	National Center for Complementary and Integrative Health/NIH/DHHS	PAR-25-271	23-Jun-2025	1,750,000 USD
	<p>Contact Name Sekai Chideya, M.D., MPH</p> <p>Contact Telephone 301-827-1916</p> <p>Contact Email sekai.chideya@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 23-Jun-2025 , 17-Jul-2025 , 23-Feb-2026 , 17-Mar-2026 , 20-Oct-2026 , 13-Nov-2026</p> <p>Synopsis This Funding Opportunity Announcement (FOA) invites cooperative agreement applications for investigator-initiated mid-phase clinical trials of natural products. All applications submitted under this FOA must be supported by sufficient preliminary data of bioavailability and documentation that the natural product produces a replicable and measurable impact on a biological signature (i.e., measure of the mechanism of action). Only in cases when it is not possible/practical to measure a biological signature in the patient population of interest or when there is a fundamental understanding of the product's mechanism of action will this preliminary data requirement be waived. Applications submitted to this FOA should propose a mid-phase clinical trial to do the following: determine the optimal dose or formulation of a given natural product for use in a future multi-site clinical trial; or determine which patient phenotypes will be responders versus non-responders to the natural product to inform inclusion/exclusion criteria of a future efficacy study. Clinical trials submitted under this FOA are expected to be hypothesis based, milestone-driven, and directly related to the research priorities and mission of NCCIH. This FOA will not support single-site or multi-site efficacy or effectiveness trials, nor will it support trials to test natural products for the treatment or prevention of cancer. Applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact for the area of science for which they are planning to develop an application prior to submitting to this FOA.</p>

123147	NCCIH Multi-Site Feasibility Clinical Trials of Mind and Body Interventions (R01 Clinical Trial Required)	National Center for Complementary and Integrative Health/NIH/DHHS	PAR-25-267	20-Jun-2025	Not Specified
	<div>Contact Name</div> <div>Contact Telephone</div> <div>Contact Email</div> <div>Sponsor Website</div> <div>Program URL</div> <div>Deadline Dates (ALL)</div> <div>Synopsis</div>	<div>Pete Murray, Ph.D.</div> <div>301-496-4054</div> <div>peter.murray@nih.gov</div> <div></div> <div>Link to program URL</div> <div>20-Jun-2025 , 15-Jul-2025 , 20-Oct-2025 , 18-Nov-2025 , 20-Feb-2026 , 17-Mar-2026 , 22-Jun-2026 , 14-Jul-2026 , 20-Oct-2026 , 17-Nov-2026</div> <div>This notice of funding opportunity (NOFO) invites applications for investigator-initiated clinical trials of complementary and integrative health approaches with physical and/or psychological therapeutic inputs (often called mind and body interventions) in NCCIH-designated areas of high research priority. Applications submitted under this NOFO are expected to propose a multisite feasibility clinical trial that will provide new information that is scientifically necessary for the planning and conduct of a subsequent clinical efficacy or effectiveness study, pragmatic trial, or dissemination and implementation trial within NCCIH’s mission. NCCIH expects that applications to this NOFO will describe the planned future clinical trial and in so doing demonstrate that the proposed (R01) research is scientifically necessary to design or plan the subsequent fully powered, full-scale clinical trial. Under this R01, the data collected should be used to fill gaps in scientific knowledge, including, but not limited to the following: assessing whether the intervention can be delivered with fidelity across sites; demonstrating feasibility of recruitment, accrual, and randomization of participants across sites; demonstrating participant adherence to the intervention, as well as retention of participants throughout the study across sites; refining and assessing the feasibility of protocolized multimodal interventions, and/or demonstrating feasibility of data collection across sites in preparation for a future fully powered, multisite efficacy or effectiveness trial. The need for multisite feasibility trials is expected to be justified by sufficient preliminary data from previous single site feasibility or acceptability trial(s) or the published literature. The data collected should be used to fill gaps in scientific knowledge and be necessary to develop a competitive fully powered multisite clinical trial that has the potential to make a significant impact on public health. Prior to submitting to this NOFO, applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact person for the science area of the planned application. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</div>			
123153	Investigator Initiated Clinical Trials of Complementary and Integrative	National Center for Complementary	PAR-	20-Jun-2025	Not

Applications submitted under this NOFO are expected to propose a remotely delivered and conducted fully powered clinical trial with no in-person contact between research staff and study participants and may utilize mHealth tools or technologies. Applicants must provide justification for the remotely delivered approach and provide preliminary data on the feasibility and safety of the approach, along with evidence that the intervention has promise of clinical benefit. Applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact for the area of science for which they are planning to develop an application prior to submitting to this NOFO. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</div>				
123152	Feasibility Clinical Trials of Mind and Body Interventions for NCCIH High Priority Research Topics (R34 Clinical Trial Required)	National Center for Complementary and Integrative Health/NIH/DHHS	PAR-25-274	20-Jun-2025	450,000 USD

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>, 17-Nov-2026</p> <p>The goal of this notice of funding opportunity (NOFO) is to support feasibility trials of complementary and integrative health approaches with physical and/or psychological therapeutic inputs (often called mind and body interventions) for conditions that have been identified by NCCIH as high-priority research topics. This funding opportunity is intended to support feasibility clinical trials that provide new information that are scientifically necessary for the planning and conduct of a subsequent clinical efficacy or effectiveness study, pragmatic trial, or dissemination and implementation trial within NCCIH's mission. NCCIH expects that applications to this NOFO will describe the planned future clinical trial and in so doing demonstrate that the proposed (R34) research is scientifically necessary to design or plan the subsequent competitive full-scale clinical trial. Under this R34, the data collected should be used to fill gaps in scientific knowledge necessary to develop a competitive full-scale clinical trial, including, but not limited to the following: examining feasibility and acceptability of interventions lacking published data; tailoring or adapting the content or structure of an intervention to a specific population, modality, or setting; refining the intervention to determine the most appropriate frequency or duration; determining feasibility of recruitment, retention, and data collection procedures; refining and assessing the feasibility of protocolized multi-component interventions; or examining acceptability and adherence of control conditions. The subsequent full-scale clinical trial should have the potential to make a significant impact on public health. Prior to submitting to this NOFO, applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact person for the science area of the planned application. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

Research data from observational studies supported by this NOFO can enhance clinical study design by providing essential information about disease symptoms, stages, and timing of disease progression; comorbid conditions; availability of potential research participants; and outcomes that are important to patients. They also can facilitate efforts to develop and/or validate objective biomarkers or subjective outcome measures for use in a future clinical study. A future clinical study may include a clinical trial or an observational study. Applicants to this NOFO are encouraged to propose studies that address significant obstacles or questions in the design of a clinical project, such as determining the appropriate primary or secondary outcome measures or identifying the stages of disease during which patients are most likely to respond to an intervention. Only observational studies will be supported through this NOFO.</p>				
126137	NIAMS Clinical Trial Implementation Cooperative Agreement (UG3/UH3 Clinical Trial Required)	National Institute of Arthritis and Musculoskeletal and Skin Diseases/NIH/DHHS	PAR-25-141	02-Jul-2025	Not Specified

Investigators who have completed all necessary preparation (e.g., the trial design, protocol synopsis, data analysis plan, etc.) through other means may apply for a NIAMS UG3/UH3. The UG3 phase is designed to allow the investigators to prepare the final aspects needed to start the trial, (e.g., establishing the single IRB (sIRB), contracts and reliance agreements with sites, hiring of staff, etc.). Transition to the UH3 phase to begin the trial is dependent upon completion of the UG3 milestones proposed by the investigator and approved by NIAMS. UG3 projects that meet their milestones will be administratively considered by NIAMS</p>

	Synopsis	The purpose of this notice of funding opportunity (NOFO) is to encourage community-engaged research that broadens the conceptualization of qualities of the environment that can support language development in children and that focuses on the development of novel measures of children's language development. The overall goal is to build the number of strengths-focused, culturally and linguistically responsive, and generalizable tools to further our understanding of children's language development and/or impairment, and predictors thereof. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

This FOA is intended to support research where opportunities for empirical study are, by their very nature, only available through expedited review and funding. All applications submitted to this FOA must demonstrate that the evaluation of an obesity-related policy or program offers an uncommon and scientifically-compelling research opportunity that will only be available if the research is initiated with minimum delay. For these reasons, applications submitted to this time-sensitive FOA are not eligible for re-submission. It is intended that eligible applications selected for funding will be awarded within 4 months of the application due date; however, administrative requirements and other unforeseen circumstances may delay issuance dates</p>

Synopsis	The National Institute of Mental Health (NIMH) Division of AIDS Research (DAR) encourages applications for Center Core grants (P30) to support Developmental HIV/AIDS Research Centers (D-ARC). The D-ARC is intended to provide infrastructure support that facilitates the development of high impact science in HIV/AIDS and mental health that is relevant to the NIMH mission. This Funding Opportunity Announcement (FOA) intends to support innovative, interdisciplinary research in several areas, including basic, NeuroHIV, behavioral and social, integrated biobehavioral, applied, clinical, translational, and implementation science. The intent of D-ARC support is that the proposed core activities will allow the D-ARC to compete successfully for a full NIMH AIDS Research Center (ARC) after the D-ARC award period.

	Synopsis	<p>The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that complement and/or enhance the training of a workforce to meet the nation's biomedical, behavioral and clinical research needs. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on: Courses for Skills Development Research Experiences The purpose of this funding opportunity announcement is to encourage applications for the initiation or continuation of nationally available neuroscience research education programs that will significantly advance the mission of NINDS. The primary focus of programs submitted under this FOA should be on intensive hands-on experience that will provide research experience, an in-depth understanding of techniques, analytic approaches and theory, and expertise that is only possible from a nationally organized program. Within the context of gaining expertise primarily through hands-on experience, programs must also include immersive coursework and expert discussion when appropriate. Programs appropriate for this NOFO must include a nationwide recruitment process to encourage applications from prospective participants and an established application and selection process.</p>

This supervised career development program will provide independent NIH research support during the early-career phase to help recipients establish independent research programs in areas supported by the NIH HEAL Initiative's Clinical Research in Pain Management program. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Under this NOFO applicants are permitted to propose a research experience in a clinical trial led by a mentor or co-mentor. Those proposing a clinical trial or an ancillary clinical trial as lead investigator should apply to the companion NOFO. This Parent Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion NOFO. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions.</p>

	Synopsis	This Funding Opportunity Announcement (FOA) invites applications that propose to develop novel research infrastructure that will advance the science of aging in specific areas requiring interdisciplinary partnerships or collaborations. This FOA utilizes NIH's R61/R33 Exploratory/Developmental Phased Award activity code. The R61 phase provides up to 2 years of support for initial developmental activities. The R33 phase provides up to 3 years of support for expanded activities. Through this award, investigators will endeavor to develop a sustainable research infrastructure to support projects that address key interdisciplinary aging research questions.			
123977	NIA Career Transition Award (K22 Independent Clinical Trial Not Allowed)	National Institute on Aging/NIH/DHHS	PAR-24-120	12-Jun-2025	Not Specified
	Contact Name	Jamie Lahvic, Ph.D.			
	Contact Telephone

	Deadline Dates (ALL)	12-Jun-2025 , 12-Jul-2025 , 12-Oct-2025 , 12-Nov-2025			
	Synopsis	The purpose of the NIA Career Transition Award (CTA) is to facilitate the transition of mentored, postdoctoral researchers to tenure-track or equivalent faculty positions conducting research that advances the mission of NIA. This award does not provide postdoctoral phase funding; therefore, candidates should be prepared to transition to tenure-track or equivalent faculty positions within 12 months after confirmation of a positive funding decision. After transition to an approved faculty position at an extramural institution/organization, the award will provide three years of protected research time through salary and research support. This Notice of Funding Opportunity (NOFO) is designed specifically for candidates proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial.

	Synopsis	The purpose of this notice of funding opportunity (NOFO) is to accelerate the development of devices to treat Substance Use Disorders (SUDs). The continuing advances in technologies offer unprecedented opportunities to develop neuromodulatory or neurophysiological devices that are safe and effective SUD treatments. The objective is to move devices to their next step in the FDA approval process, with the ultimate goal of generating new, FDA approved device-based treatments for SUDs. Applications may focus on the pre-clinical and/or clinical development and testing of new devices or existing devices approved for other indications. Applications may evaluate the mechanism of action of a device. The UG3/UH3 Cooperative Agreement involves two phases. The UG3 phase, for up to two years, is designed to support a project with specific milestones to be accomplished by the end of the period. The UH3 phase is to provide funding for up to three additional years following successful completion of the UG3. UG3 projects that meet their milestones will be administratively considered by the National Institute on Drug Abuse and prioritized for transition to the UH3 phase. Investigators submitting to this NOFO must address both UG3 and UH3 phases.

Synopsis	Avenir means future in French, and this Avenir Award Program looks toward the future by supporting early stage investigators proposing highly innovative research in the area of chemistry and pharmacology of substance use disorders and addiction. The purpose of this award is to support those in an early stage of their career who may lack the preliminary data required for an R01 grant, but who propose high impact research and who show promise of being tomorrow's leaders in the field.

This NOFO invites research projects with the potential to open new areas of HIV/AIDS research and/or lead to new avenues for prevention, treatment and cure of HIV among people who use addictive substances. Applications submitted under this NOFO are required to have a detailed research plan, preliminary data, and a clear description of the nexus with substance use. This initiative is open to both individual researchers and research teams. It addresses basic science, epidemiologic, clinical, intervention, and implementation research related to HIV in people with substance use and substance use disorders (SUDs). The proposed research areas must align with the NIH's HIV/AIDS Research Priorities: NOT-OD-20-018: UPDATE: NIH HIV/AIDS Research Priorities and Guidelines for Determining HIV/AIDS Funding. 124329	<p>Deadline Dates (ALL) 23-Jul-2025 , 11-Feb-2026 , 23-Jul-2026 , 11-Feb-2027</p> <p>Synopsis The purpose of the National Institute on Drug Abuse (NIDA) Animal Genetics Program is to identify genetic, genomic, and molecular (epi)genetic variants that underlie neural and behavioral processes and phenotypes relevant to SUD risk, the SUD trajectory and SUD comorbidities. This opportunity supports research that links genetic, genomic and molecular mechanisms to neural circuit function and behavior. Applications may seek to identify any type of genomic and/or epigenomic variants that contribute to the genetic architecture of addiction, including single nucleotide variants (SNVs), indels, large and small structural variants, and all types of mobile DNA. NIDA encourages applications that take genomics, multi-omics, data-based, and/or artificial intelligence/machine learning approaches that integrate multi-level 'omics data, delineate gene networks, and/or uncover the function of known or newly discovered genetic or epigenetic variants. Other areas of interest include variant identification at the circuit level and the application of neuroscience to variant identification studies in tissues and cells. NIDA expects these studies to uncover novel mechanisms that contribute to various stages across the SUD trajectory and inform future studies about potential targets and therapeutic strategies for addiction. 	Synopsis	<p>This Funding Opportunity Announcement (FOA) encourages joint applications for the Global Infectious Disease (GID) Research Training programs from low- and middle-income country (LMIC) and U.S. institutions. The application should propose a collaborative training program that will strengthen the capacity of a LMIC institution to conduct infectious disease research (not including HIV/AIDS). FIC will support research training programs that focus on 1) major endemic or life-threatening emerging infectious diseases, 2) neglected tropical diseases, 3) infections that frequently occur as co-infections in HIV infected individuals or 4) infections or microbiomes associated with non-communicable disease conditions of public health importance in LMICs. Advanced scientific training related to prevention, treatment or public health approaches to any technical area of basic, epidemiological, clinical, behavioral or social science health research may be supported. Research training programs should incorporate didactic, mentored research and professional development skills components to prepare individuals for sustainable careers that will have significant impact on the priority health research needs of LMICs. This Notice of Funding Opportunity (NOFO) allows appointment of Trainees (D43) proposing to serve as the lead investigator of an independent clinical trial; or proposing a separate ancillary clinical trial; or proposing to gain research experience in a clinical trial led by another investigator, as part of their research and career development.</p>

	<p>be awarded to replicate the impact of the natural product on the biological signature(s) when used by humans and assess whether there is an association between the degree of the impact on the biological signature and functional or clinical outcomes in a patient population. Applications are encouraged to design R33 studies to determine how to optimize the impact of the natural product on the biological signature by optimizing the delivery of the natural product by examining different doses or formulation. In addition, applications can be designed to combine the natural product with another treatment approach that is known to impact the same biological signature; or study the impact of the natural product in a target population that is more responsive. Clinical trials submitted under this FOA are expected to be hypothesis based, milestone-driven, and directly related to the research priorities and mission of NCCIH. This R61/R33 funding mechanism is intended to accelerate the translation of emerging basic science findings about natural products into early-stage clinical testing to determine whether continued clinical research is warranted. This FOA will not support efficacy or effectiveness trials, nor will it support trials to test natural products for the treatment or prevention of cancer. A maximum of 5 years will be supported by the two phases of the R61/R33 award. Applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact for the area of science for which they are planning to develop an application prior to submitting to this FOA.</p>

This supervised career development program will provide independent NIH research support during the early-career phase to help awardees establish independent research programs in areas supported by the NIH HEAL Initiative's Clinical Research in Pain Management program. This Parent Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion NOFO. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their</p>

	<p>scientific missions. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary study to an existing trial, as part of their research and career development. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial basic experimental study with humans led by another investigator, must apply to the Independent Clinical Trial Not Allowed companion NOFO.</p>				
129338	Leveraging Network Infrastructure to Conduct Innovative Research for Women, Children, Pregnant and Lactating Individuals, and Persons with Disabilities (UG3/UH3 - Clinical Trial Optional)	National Institutes of Health/DHHS	PAR-25-311	15-Jul-2025	6,250,000 USD
	<p>Contact Name Robert Tamburro, MD, MSc</p> <p>Contact Telephone 301-480-2619</p> <p>Contact Email NICHD-Network-ClinicalResearch@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 15-Jul-2025 , 14-Nov-2025 , 15-Mar-2026 , 15-Jul-2026 , 13-Nov-2026 , 15-Mar-2027 , 15-Jul-2027 , 15-Nov-2027</p> <p>Synopsis The purpose of this Notice of Funding Opportunity (NOFO) is to leverage NICHD clinical research network infrastructure relevant to infants, children, women, pregnant and lactating individuals, and persons with disabilities to conduct innovative, multisite, investigator-initiated clinical trials and observational studies. This NOFO will utilize a bi-phasic (UG3/UH3), milestone-driven mechanism consisting of a start-up phase (UG3) and a full enrollment and clinical study implementation phase (UH3). Applications submitted in response to this NOFO must address specific aims and milestones for both the UG3 and UH3 phases. A UG3 project (phase I) that meets its milestones will be administratively considered by NICHD and prioritized for transition to the UH3 award (phase II). This NOFO provides an opportunity to leverage NICHD clinical research network infrastructure as a platform for investigator-initiated innovative hypotheses by any investigator in the extramural community. Applications must be submitted as investigator-initiated, multi-Project Director/Principal Investigator (PD/PI) grant applications in conjunction with the respective NICHD-supported Network Data Coordinating Center (DCC), or equivalent as determined by the NICHD. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).</p>				
114250	Trailblazer Award for New and Early Stage Investigators (R21 Clinical Trial Optional)	National Institutes of Health/DHHS	PA-25-169	07-May-2025	400,000 USD

A Trailblazer project may be exploratory, developmental, proof of concept, or high risk-high impact, and may be technology design-directed, discovery-driven, or hypothesis-driven. Importantly, applicants must propose research approaches for which there are minimal or no preliminary data. A distinct feature for this FOA is that no preliminary data are required, expected, or encouraged. However, if available, minimal preliminary data are allowed. Preliminary data are defined as material which the applicant has independently produced and not yet published in a peer-reviewed journal. All preliminary data should be clearly marked and limited to one-half page, which may include one figure. Applications including data more than one-half page or more than one figure will be considered noncompliant with the FOA instructions and will not go forward to review.</p>				
122317	Blueprint Neurotherapeutics Network (BPN): Small Molecule Drug Discovery and Development for Disorders of the Nervous System (U44 Clinical Trial Optional)	National Institutes of Health/DHHS	PAR-24-063	15-Jul-2025	Not Specified

---------	---------------	--------------	----------------	---------------	----------------

Discovery phase the goal is to characterize and optimize promising hit compounds using medicinal chemistry to establish structure activity relationships (SAR) and structure property relationships (SPR) including in vitro and in vivo properties such as metabolism, selectivity, toxicity, etc. As projects enter or advance to the Development stage the goal is to advance a single development candidate through Investigational New Drug (IND)-enabling toxicology studies and phase I clinical testing. Projects can enter the program at the Development stage and progress in a shorter period to IND enabling toxicology studies and phase I clinical testing. BPN recipient Institutions retain their assignment of intellectual property (IP) rights and gain assignment of IP rights from the BPN contractors and consultants (and thereby control the patent prosecution and licensing negotiations) for drug candidates developed in this program.

	Deadline Dates (ALL)	01-Jul-2025			
	Synopsis	<p>This Broad Agency Announcement (BAA) for the Foundational Science Research Unit (FSRU) of the U.S. Army Research Institute for the Behavioral and Social Sciences (ARI) solicits new proposals for its fiscal year 2026 program of basic research in behavioral science. It is issued under the provisions of paragraph 6.102(d) (2) and 35.016 of the Federal Acquisition Regulation (FAR), which provides for the acquisition of basic and applied research and that part of development not related to the development of a specific system or hardware procurement through the competitive selection of proposals and 10 U.S.C. 4001, 10 U.S.C. 4021, and 10 U.S.C. 4022. To meet the operational objectives of the U.S. Army over the next two decades, the Army must improve its capability to acquire, develop, employ, and retain Soldiers and leaders who can individually and as part of a group: • Prepare for and adapt quickly to dynamic missions, unpredictable operational environments, and a wide spectrum of contexts; • Effectively function autonomously and as part of larger systems in complex, information-rich environments; • Perform in extended, hybrid, and continuous operations; • Interact and collaborate effectively in joint-service and multi-national operations. ARI requests proposals to conduct basic research that will provide a scientific foundation to support these broad capabilities. The Basic Research program focuses on four strategic areas for advancing personnel science. 1. Measurement of Individuals and Collectives: Advanced psychometric theory for deriving valid measurements from complex assessments and continuous streams of data 2. Teams and Small Groups: Understanding dynamic restructuring, coordination, and composition processes in teams and promoting optimal team adaptation 3. Organizations and Systems: Multilevel theory and methods for complex organizations 4. Formal and Informal Learning and Development: Holistic models of individual and collective learning and development across work settings and contexts throughout the career span To be eligible for an award under this announcement, a prospective awardee must meet certain minimum standards pertaining to financial resources and responsibility, ability to comply with the performance schedule, past performance, integrity, experience, technical capabilities, operational controls, and facilities. In accordance with Federal statutes, regulations, and Department of Defense (DoD) and Army policies, no person shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving financial</p>

	Program URL	Link to program URL			
	Deadline Dates (ALL)	25-Jul-2025 [LOI/Pre-App], 08-Aug-2025			
	Synopsis	<p>The fiscal year 2025 (FY25) Duchenne Muscular Dystrophy Research Program (DMDRP) Clinical/Translational Research Award (CTRA) mechanism supports advanced translational research that will accelerate the movement of promising ideas in Duchenne muscular dystrophy (DMD) research into clinical applications. Research must address at least one of the FY25 CTRA focus areas. Research projects investigating therapies that will be efficacious across the life span, including infants, toddlers, and nonambulatory individuals, are strongly encouraged. Distinctive Features: Applications must include preliminary and/or published data relevant to DMD to support the proposed research project. Pilot, proof-of-principle clinical trials, and correlative studies to better inform development of drugs, devices, and other interventions are allowed. The CTRA offers two funding levels: Funding Level 1 to support smaller, less complex preclinical and/or clinical research; and Funding Level 2 to support larger, more complex preclinical and/or clinical research. Early-Career Partnering PI Option (PPIO): The Partnering PI must be an independent, early1career investigator within 10 years of their first faculty appointment (or equivalent) by the time of application submission. Lapses in research time or appointments as denoted in the biographical sketch should be explained in the application. It is encouraged, but not required, that the partnering PI is an M.D. or M.D./Ph.D. to increase collaboration between clinical and nonclinical aspects of DMD research. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$8.56 million (M) to fund approximately 5 CTRA applications with direct cost caps of \$0.65M for Funding Level 1; \$0.75M for Funding Level 1 with a PPIO; \$1.25M for Funding Level 2; and \$1.35M for Funding Level 2 with a PPIO. The maximum period of performance is 3 years for Funding Level 1. The maximum period of</p>

	Synopsis	<p>This Broad Agency Announcement (BAA) for the Foundational Science Research Unit (FSRU) of the U.S. Army Research Institute for the Behavioral and Social Sciences (ARI) solicits new proposals for its fiscal year 2026 program of basic research in behavioral science. It is issued under the provisions of paragraph 6.102(d) (2) and 35.016 of the Federal Acquisition Regulation (FAR), which provides for the acquisition of basic and applied research and that part of development not related to the development of a specific system or hardware procurement through the competitive selection of proposals and 10 U.S.C. 4001, 10 U.S.C. 4021, and 10 U.S.C. 4022. To meet the operational objectives of the U.S. Army over the next two decades, the Army must improve its capability to acquire, develop, employ, and retain Soldiers and leaders who can individually and as part of a group: Prepare for and adapt quickly to dynamic missions, unpredictable operational environments, and a wide spectrum of contexts; Effectively function autonomously and as part of larger systems in complex, information-rich environments; Perform in extended, hybrid, and continuous operations; Interact and collaborate effectively in joint-service and multi-national operations.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<div>Program URL Link to program URL</div> <div>Deadline Dates (ALL) 25-Jul-2025 [LOI/Pre-App], 08-Aug-2025</div> <div>Synopsis <p>The fiscal year 2025 (FY25) Duchenne Muscular Dystrophy Research Program (DMDRP) Idea Development Award (IDA) promotes new ideas that are still in the early stages of development and have the potential to yield impactful data and new avenues of investigation. This award supports conceptually innovative, high-risk/high-reward research that could lead to critical discoveries or major advancements that will accelerate progress in improving outcomes for individuals with Duchenne muscular dystrophy (DMD). Applications should include a well1formulated, testable hypothesis based on strong scientific rationale. The FY25 DMDRP IDA mechanism has a New Investigator category for applicants early in their careers (i.e., within 10 years of their first faculty appointment or equivalent) or for established investigators new to DMD research. The New Investigator - Early Stage category is designed to allow applicants early in their faculty appointments to compete for funding separately from established investigators. The New Investigator - Transitioning category is designed for investigators in an area other than muscular dystrophy, at or above the level of Assistant Professor, seeking to transition to a career in DMD, thereby bringing their expertise to the field. Preliminary data relevant to DMD that supports the feasibility of the research hypotheses and research approaches are required. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$1.68 million (M) to fund approximately 3 Idea Development Award applications with direct cost caps of \$350,000. The maximum period of performance is 2 years. It is anticipated that awards made from this FY25 funding opportunity will be funded with FY25 funds, which will expire for use on September 30, 2031. Awards supported with FY25 funds will be made no later than September 30, 2026.</p> </div>				
131164	Rare Cancers Research Program--Resource and Community Development Award	Department of the Army/Department of Defense	HT942525RCRPRCDA	01-Jul-2025 [LOI/Pre-App]	1,120,000 USD

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
		<p>communication and dissemination strategies within scientific and patient communities for sharing rare cancers research and clinical findings. Lack of infrastructure for sharing data and other resources. Lack of therapeutics and mechanistic research to inform treatment development. Distinctive Features: Engagement and partnerships with Patient Advocates must be integrated into the project from development of the research question through the execution of the study. Community building and enhancement are key components. Dissemination and sustainability of the platform for scientific and/or clinical, and patient community must be described. Preliminary data not required but may be included to address feasibility. Funding Details: (New for FY25) Funding limits are now listed as total cost limits, which is the combination of both direct and indirect costs. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$5.60 million (M) to fund approximately five Resource and Community Development Award applications with total cost caps of \$1.12M. The maximum period of performance is 4 years. It is anticipated that awards made from this fiscal year 2025 (FY25) funding opportunity will be funded with FY25 funds, which will expire for use on September 30, 2031. Awards supported with FY25 funds will be made no later than September 30, 2026.</p>

	Deadline Dates (ALL)	22-Jul-2025 [LOI/Pre-App], 26-Aug-2025			
	Synopsis	<p>The fiscal year 2025 (FY25) Rare Cancers Research Program (RCRP) Concept Award (CA) supports highly innovative, untested, potentially groundbreaking novel concepts in rare cancers. This award mechanism supports high-risk studies that have the potential to reveal entirely new avenues for investigation in rare cancers. Applications must describe how the new idea will be innovative and present as a novel course of investigation in the field of rare cancers. Distinctive Features: Preliminary data are not required. Due to the blinded nature of the review process, identifying or making references to the Principal Investigator (PI), collaborator(s), or their organization(s) in the proposal (Project Narrative, Supporting Documentations, Impact Statement, Justification Statement, and Statement of Work [SOW]) is prohibited and will result in administrative rejection of the application. (New for FY25) Funding limits are now listed as total cost limits, which is the combination of both direct and indirect costs. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$2.38M to fund approximately 17 Concept Award applications with total cost caps of \$0.14M. The maximum period of performance is 2 years. It is anticipated that awards made from this FY25 funding opportunity will be funded with FY25 funds,</p>

	Deadline Dates (ALL)	08-Jul-2025			
	Synopsis	<p>MATHEMATICS IS THE SOURCE OF SIGNIFICANT TECHNOLOGICAL ADVANCES; HOWEVER, PROGRESS IN MATH IS SLOW. Recent advances in artificial intelligence (AI) suggest the possibility of increasing the rate of progress in mathematics. Still, a wide gap exists between state-of-the-art AI capabilities and pure mathematics research. Advances in mathematics are slow for two reasons. First, decomposing problems into useful lemmas is a laborious and manual process. To advance the field of mathematics, mathematicians use their knowledge and experience to explore candidate lemmas, which, when composed together, prove theorems. Ideally, these lemmas are generalizable beyond the specifics of the current problem so they can be easily understood and ported to new contexts. Second, proving candidate lemmas is slow, effortful, and iterative. Putative proofs may have gaps, such as the one in Wiles' original proof of Fermat's last theorem, which necessitated more than a year of additional work to fix. In theory, formalization in programming languages, such as Lean, could help automate proofs, but translation from math to code and back remains exceedingly difficult. The significant recent advances in AI fall short of the automated decomposition or auto(in)formalization challenges. Decomposition in formal settings is currently a manual process, as seen in the Prime number theorem and beyond and the Polynomial Freiman-Ruzsa conjecture, with existing tools, such as Blueprint for Lean, only facilitating the structuring of math and code. Auto(in)formalization is an active area of research in the AI literature, but current approaches show poor performance and have not yet advanced to even graduate-level textbook problems. Formal languages with automated theorem-proving tools, such as Lean and Isabelle, have traction in the community for problems where the investment in manual formalization is worth it. The goal of expMath is to radically accelerate the rate of progress in pure mathematics by developing an AI co-author capable of proposing and proving useful abstractions. expMath will be comprised of teams focused on developing AI capable of auto decomposition and auto(in)formalization and teams focused on evaluation with respect to professional-level mathematics. We will robustly engage with the math and AI communities toward fundamentally reshaping the practice of mathematics by mathematicians.</p>

The Development Office offers assistance with many not for profit opportunities. Please contact the Development Office's Corporate and Foundation Relations team at DevCorpFound@mountsinai.org / 212-659-8500 for assistance or questions.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Applicant Types	Studies should be intended to advance knowledge relevant to the understanding, diagnosis, epidemiology, or treatment of FLC. Of particular interest are applications showing a clear path towards a novel therapy or clinical trials with the ultimate goal of achieving a cure for FLC. The Foundation will accept grant applications to support innovative and promising research projects towards the listed goals. The FCF believes that collaboration engaging the best talent across institutions, together with early sharing of data and resources, often accelerates the path to a cure for rare cancers.

	Deadline Dates (ALL)	01-Jul-2025			
	Synopsis	RPB Unrestricted Grants provide maximum flexibility in developing and expanding eye research programs. These annual \$115,000 grants provide opportunities for creative planning that go beyond the scope of restricted project grants which scientists normally depend upon for their principal support. Only departments of ophthalmology with a full-time, permanent chair at university-connected medical schools are eligible for support. Unrestricted Grants may only be used for the following: salaries (new or existing research faculty, not administrative support staff); equipment (new purchase); small pilot research in vision science; research support (including lab supplies, consumables, data gathering, statistical analysis, etc.); and travel related to research.

	Synopsis	This award is designed for individuals in the early stages of their career, typically Fellows or those without significant research experience who plan to embark on careers in rheumatic diseases. The purpose of this award is to provide a structured research training program for rheumatologists or health professionals in the field of rheumatology. This mentored career development award provides support for salary as well as research and/or education costs for the early years of research training in an environment where trainees may interact with established rheumatology investigators. The goal of funding at this level is to provide an opportunity for young scientists to embark on focused research and research training that will allow them to be competitive for the next level of career development awards. Through this award, the Foundation provides a means for ensuring more qualified, highly trained investigators in the field of rheumatology.

	Deadline Dates (ALL)	01-Jul-2025			
	Synopsis	The Henry and Marilyn Taub Foundation (HMTF) 2025 Pilot award will provide seed money to pursue transformative ideas that can forge new scientific directions and strategies in MDS research. The one-year award provides \$100,000 for proof-of-concept studies addressing critical roadblocks to understanding MDS and its treatment. Successful projects will generate preliminary data needed to support their extension and expansion through other funding mechanisms. The research must be non-incremental and may include high-risk/high-reward or collaborative efforts to incorporate new technologies and approaches from other fields.
