

**Funding Opportunities Monthly Edition
August 2025 Due Dates**

Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in August 2025.

The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

The Development Office offers assistance with many not for profit opportunities. Please contact the Development Office's Corporate and Foundation Relations team at DevCorpFound@mountsinai.org / 212-659-8500 below for assistance or questions.

NIH Funding Opportunities

	<p>underrepresented students and/or institutions that provide clinical services to populations that experience health disparities, with the potential to develop meritorious training programs in cardiovascular, pulmonary, and hematologic diseases, and sleep disorders. These institutions are uniquely positioned to educate and train students from diverse backgrounds, including those from underrepresented groups, in research, translation, and implementation of research advances that impact health outcomes, as well as provide health care for populations experiencing health disparities. Please note that institution eligibility is outlined in Section III, and funding decisions are based on the outcome of the peer review process and scientific priorities of the NHLBI. This Notice of Funding Opportunity (NOFO) does not allow appointed Trainees to lead an independent clinical trial, but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor.</p>				
128905	RFA-HL-26-019 -- Catalyze Product Definition – Medical Device Prototype Design/Testing and Disease Target Identification and Assay Development (R61/R33 - Clinical Trial Not Allowed)	National Heart, Lung, and Blood Institute/NIH/DHHS	RFA-HL-26-019	18-Jun-2025	900,000 USD

	<p>adoption. Well-suited applications must offer the potential to accelerate and/or transform the areas of early detection and screening, model development, clinical diagnosis, treatment, control, prevention or epidemiology, while addressing issues associated with HLBS-related diseases and disorders. Projects proposing application of existing technologies where the novelty resides in the biological or clinical target/question being pursued are not appropriate for this solicitation. Applications considered nonresponsive to the FOA will not be reviewed. This FOA is part of a suite of Catalyze innovation grants to advance projects to the point where they can meet the entry criteria for the NHLBI Catalyze Product Definition or Preclinical FOAs.</p>				
126963	RFA-HG-24-026 -- Limited Competition: Building Partnerships and Broadening Perspectives to Advance Ethical, Legal, and Social Implications (ELSI) Research (BBAER) Program (UM1), Clinical Trial Optional	National Human Genome Research Institute/NIH/DHHS	RFA-HG-24-026	01-Aug-2025	3,250,000 USD
	<p>Contact Name: Rene Sterling, Ph.D., M.H.A.</p> <p>Contact Telephone: 301-435-1275</p> <p>Contact Email: rene.sterling@nih.gov</p> <p>Sponsor Website:</p> <p>Program URL: Link to program URL</p> <p>Deadline Dates (ALL): 01-Aug-2025 , 31-Jul-2026</p> <p>Synopsis: The National Human Genome Research Institute (NHGRI) seeks to broaden the types of knowledge, skills, expertise, experience, and perspectives brought to bear in research addressing the ethical, legal, and social implications (ELSI) of advances in human genetics or genomics. The Building Partnerships and Broadening Perspectives to Advance Ethical, Legal, and Social Implications (ELSI) Research (BBAER) Program will support: 1) transdisciplinary ELSI research addressing timely, complex, and understudied topics associated with advances in human genetics and genomics, 2) the establishment of ELSI research teams that include partnerships with relevant communities affected by and with an interest in the proposed research, 3) research capacity building to develop, conduct, and sustain ELSI research, and 4) workforce development opportunities for early career scholars, research team members, and other BBAER project staff. This Notice of Funding Opportunity (NOFO) is for a limited competition that solicits UM1 applications from domestic organizations located in the United States and its territories that received less than \$30 million per year in total NIH funding for the past three fiscal years. These organizations are underrepresented among those receiving NHGRI funding for ELSI research.</p>				
117716	Notice of Special Interest (NOSI): Supporting Exploratory/Developmental Research Focused on NIAMS Core Mission Areas	National Institute of Arthritis and Musculoskeletal and Skin Diseases/NIH/DHHS	NOT-AR-23-006	05-Jun-2025	Not Specified

	Synopsis	The purpose of this announcement is to notify the research community that the National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS) is interested in receiving Exploratory/Developmental grant applications focused on NIAMS core mission areas. Awards will provide support for innovative projects that introduce novel scientific ideas, model systems, tools, agents, targets, and technologies that have the potential for significant impact, and to substantially advance research within the NIAMS mission. These studies often assess the feasibility of a novel avenue of investigation and involve considerable risk, but have the potential to bring about breakthroughs of high value to the NIAMS research community.

	<p>Contact Name Toccara Chamberlain, M.A.</p> <p>Contact Telephone 984-287-4482</p> <p>Contact Email toccara.chamberlain@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 01-Aug-2025 , 01-Oct-2025 , 01-Dec-2025</p> <p>Synopsis This Notice of Funding Opportunity (NOFO) is intended to support novel environmental health research in which an unpredictable event or policy change provides a limited window of opportunity to collect human biological samples or environmental exposure data. The primary motivation of the NOFO is to understand the consequences of natural and human-made disasters, emerging environmental public health threats, and policy changes in the U.S. and abroad. A distinguishing feature of an appropriate study is the need for rapid review and funding, substantially shorter than the typical NIH grant review/award cycle, for the research question to be addressed and swiftly implemented. The shortened timeframe will be achieved by more frequent application due dates and expediting peer review, council concurrence and award issuance. The entire cycle, from submission to award, is expected to be within 4-6 months.</p>

	<p>consultants and can augment their project with NIH contract research organizations (CROs) that specialize in medicinal chemistry, pharmacokinetics, toxicology, formulations development, chemical synthesis including under Good Manufacturing Practices (GMP), and Phase I clinical testing. Projects can enter either at the Discovery or the Development stage. In the Discovery phase the goal is to characterize and optimize promising hit compounds using medicinal chemistry to establish structure activity relationships (SAR) and structure property relationships (SPR) including in vitro and in vivo properties such as metabolism, selectivity, toxicity, etc. As projects enter or advance to the Development stage the goal is to advance a single development candidate through Investigational New Drug (IND)-enabling toxicology studies and phase I clinical testing. Projects can enter the program at the Development stage and progress in a shorter period to IND enabling toxicology studies and phase I clinical testing. BPN recipient Institutions retain their assignment of intellectual property (IP) rights and gain assignment of IP rights from the BPN contractors and consultants (and thereby control the patent prosecution and licensing negotiations) for drug candidates developed in this program.</p>

	Synopsis	<p>This notice of funding opportunity (NOFO) aims to encourage research grant applications for initial translational efforts that will enable a drug discovery program for novel, non-opioid, and non-addictive treatments for pain. The program provides funding to develop and validate assays to support a distinct testing funnel and conduct screening efforts to identify and characterize potential therapeutic agents including small molecules, biologics, and natural products. Preliminary in vivo pharmacokinetic, pharmacodynamic, and efficacy studies may also be supported. The goal of this NOFO is to advance projects to the point where they meet the entry criteria for the Pain Therapeutics Development Program or other later-stage translational programs. This NOFO is part of the NIH Helping to End Addiction Long Term (HEAL) initiative to accelerate the discovery and preclinical development of safe and effective therapeutics to treat pain with little or no addiction liability.</p>

This NOFO invites research projects with the potential to open new areas of basic and clinical HIV/AIDS research and/or lead to new avenues for prevention, treatment and cure of HIV among people who use addictive substances. This initiative is open only to research teams of three to six PD/PIs proposing to pursue challenging research questions at the intersection of HIV and substance use. Teams are encouraged to consider far-reaching objectives that will produce major advances in high priority HIV research areas for the institute and the NIH (NOT-OD-20-018: UPDATE: NIH HIV/AIDS Research Priorities and Guidelines for Determining HIV/AIDS Funding). This NOFO addresses basic science, epidemiologic, clinical, intervention, and implementation research related to HIV in people with substance use and substance use disorders (SUDs). This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

Synopsis		<p>The NIDA Avant-Garde Award Program for HIV Research supports exceptionally creative scientists, who propose high-impact studies that open new areas of HIV research in the context of substance use and Substance Use Disorders (SUD) and/or lead to new avenues for prevention and treatment of HIV in people with SUD. The term “avant-garde” refers to highly innovative ideas and/or approaches that have the potential to be transformative. Accordingly, applications responding to this FOA must propose pioneering research that aligns with the NIH HIV/AIDS Research</p> <p>Priorities https://grants.nih.gov/grants/guide/notice-files/NOT-OD-20-018.html and is substantially different from what is currently being pursued by the principal investigator or others in the field. In essence, this funding opportunity supports innovative basic, clinical and translational research that may lead to improved therapies or preventive interventions for HIV in people with SUD. Some examples of research studies include developing creative strategies to prevent HIV transmission in high-risk substance using populations, to improve outcomes of HIV and HIV-related comorbidities, and to achieve functional or sterilizing cure of HIV.</p>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis</p> <p>Avenir means future in French. Accordingly, the Avenir Award Program for research on Substance Use Disorders (SUD) and HIV looks towards the future by supporting early stage investigators (ESI) proposing highly innovative studies at the intersection of HIV and substance use. Applications responding to this Funding Opportunity Announcement (FOA) must clearly describe the nexus of HIV and substance use and propose research that aligns with NIH HIV/AIDS Research Priorities NOT-OD-20-018. This FOA aims to support broad spectrum of approaches spanning both basic and clinical research that have the potential to benefit substance using populations with or at risk for HIV. Some examples of research areas of interest to NIDA are reducing HIV incidence, optimizing therapies for HIV and SUD, minimizing the the impact of comorbidities, and achieving long-term suppression of HIV in the absence of antiretroviral (ARV) therapy.</p>				
120104	RFA-DA-25-063 -- Microglial Pathophysiology in Comorbid Substance Use Disorder (SUD) and HIV (R61/R33 Clinical Trial Not Allowed)	National Institute on Drug Abuse/NIH/DHHS	RFA-DA-25-063	14-Jul-2025 [Optional][LOI/Pre-App]	Not Specified

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	This notice of funding opportunity (NOFO) will support high risk high impact studies that 1) develop or apply novel tools or technologies or 2) test novel hypotheses to investigate mechanistic questions in HIV infection, replication, latency, and/or pathogenesis (including neuroHIV) in the context of Substance Use Disorders (SUDs). This initiative focuses on exploration and characterization of signaling pathways that are involved in CNS HIV establishment and expansion. The NOFO aims to promote milestone-driven research to investigate the underlying molecular mechanisms by which HIV infection is initiated, established, and maintained in the CNS and to determine how addictive substances modulate HIV infection, latency and the size and persistence of CNS HIV reservoirs.			
126998	Device Based Treatments for Substance Use Disorders (UG3/UH3 Clinical Trial Optional)	National Institute on Drug Abuse/NIH/DHHS	PAR-25-023	14-Jul-2025 [Optional][LOI/Pre-App]	Not Specified
	Contact Name	Will M. Aklin, Ph.D			
	Contact Telephone	301-827-5909

	Sponsor Website				
	Program URL	Link to program URL			
	Deadline Dates (ALL)	14-Jul-2025 [Optional][LOI/Pre-App], 13-Aug-2025 , 18-Nov-2025 [Optional][LOI/Pre-App], 18-Dec-2025 , 14-Jul-2026 [Optional][LOI/Pre-App], 13-Aug-2026			
	Synopsis	The purpose of this notice of funding opportunity (NOFO) is to accelerate the development of devices to treat Substance Use Disorders (SUDs). The continuing advances in technologies offer unprecedented opportunities to develop neuromodulatory or neurophysiological devices that are safe and effective SUD treatments. The objective is to move devices to their next step in the FDA approval process, with the ultimate goal of generating new, FDA approved device-based treatments for SUDs. Applications may focus on the pre-clinical and/or clinical development and testing of new devices or existing devices approved for other indications. Applications may evaluate the mechanism of action of a device. The UG3/UH3 Cooperative Agreement involves two phases. The UG3 phase, for up to two years, is designed to support a project with specific milestones to be accomplished by the end of the period. The UH3 phase is to provide funding for up to three additional years following successful completion of the UG3. UG3 projects that meet their milestones will be administratively considered by the National Institute on Drug Abuse and prioritized for transition to the UH3 phase. Investigators submitting to this NOFO must address both UG3 and UH3 phases.			
123276	NIDA Mentored Clinical Scientist Development Program Award in Substance Use and Substance Use Disorder Research (K12 Clinical Trial)	National Institute on Drug Abuse/NIH/DHHS	PAR-24-089	05-Aug-2025	3,750,000 USD

Deadline Dates (ALL)	05-Aug-2025 , 13-Nov-2025 , 06-Mar-2026 , 05-Aug-2026 , 13-Nov-2026
Synopsis	<p>This notice of funding opportunity (NOFO) encourages applications for institutional research career development (K12) programs that propose to support intensive, supervised research and career development experiences leading to research independence for clinician scientists (Scholars) conducting substance use and substance use disorder (SUD) research. For this NOFO, clinician scientists may include (but are not limited to) physicians, clinical psychologists, social workers, and pharmacists. Scholars are expected to be supported for 3-4 years on consecutive 12-month appointments. Candidates selected for support as scholars must hold a doctorate and commit a minimum of 9 person months (equivalent to 75% of full-time professional effort) to conducting clinical research and career development activities associated with the proposed K12 program. Scholars appointed through the proposed program may serve as the lead for a NIH-defined clinical trial that fulfills the NIH requirement for a minimal risk trial. A minimal risk trial is one in which the probability and magnitude of harm or discomfort anticipated in the research are not greater in and of themselves than those ordinarily encountered in daily life or during the performance of routine physical or psychological examinations or tests. This Notice of Funding Opportunity (NOFO) allows appointment of Scholars (K12) proposing to serve as the lead investigator of an independent clinical trial; or proposing a separate ancillary clinical trial; or proposing to gain research experience in a clinical trial led by another investigator, as part of their research and career development. Applicants may review the information found on the NIH Office of Extramural Research "Clinical Trial Requirements for Grants and Contracts": https://grants.nih.gov/policy/clinical-trials.htm for more details about how NIH is enhancing accountability and transparency of clinical research.</p>

129572 Cutting-Edge Basic Research Awards (CEBRA) (R21 Clinical Trial Optional)	National Institute on Drug Abuse/NIH/DHHS	PAR-25-101	12-Aug-2025	275,000 USD

128799	<p>Deadline Dates (ALL) 12-Aug-2025 , 10-Mar-2026 , 05-Aug-2026 , 10-Mar-2027 , 11-Aug-2027</p> <p>Synopsis The National Institute on Drug Abuse (NIDA) Cutting-Edge Basic Research Award (CEBRA) is designed to foster highly innovative or conceptually creative research related to the etiology, pathophysiology, prevention, or treatment of substance use disorders (SUDs). It supports high-risk and potentially high-impact research that is underrepresented or not included in NIDA's current portfolio that has the potential to transform SUD research. The proposed research should: 1. develop, and/or adapt, revolutionary techniques or methods for addiction research or that show promising future applicability to SUD research; and /or 2. test an innovative and significant hypothesis for which there are scant precedent or preliminary data and which, if confirmed, would transform current thinking.</p>	National Institute on Drug Abuse/NIH/DHHS	PAR-25-204	12-Aug-2025	1,750,000 USD
	<p>NIDA Research Education Program for Clinical Researchers and Clinicians (R25 Clinical Trial Not Allowed)</p> <p>Contact Name Aria Davis Crump, Sc.D.</p> <p>Contact Telephone 301-435-0881</p> <p>Contact Email acrump@nida.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 12-Aug-2025 , 12-Nov-2025 , 11-Mar-2026 , 12-Aug-2026 , 12-Nov-2026 , 11-Mar-2027 , 12-Aug-2027 , 12-Nov-2027</p> <p>Synopsis The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that complement and/or enhance the training of a workforce to meet the nation's biomedical, behavioral and clinical research needs. To accomplish the stated over-arching goal, this NOFO will support educational activities with a primary focus on: Courses for Skills Development Research Experiences This notice of funding opportunity (NOFO) is intended to support research education activities for clinicians, clinicians in training, and clinical researchers that enhance the knowledge of substance use and substance use disorder (SUD) research and provide opportunities for active participation in related research. This mechanism may not be used to support non-research-related clinical training. The proposed research education programs must include both courses for skills development and research experiences with primary emphasis on research experiences.</p>				
114003	<p>Notice of Special Interest (NOSI): Targeting Epigenetic Regulators for Treating Addiction and Substance Use Disorders</p> <p>Contact Name Sam Ananthan, Ph.D.</p>	National Institute on Drug Abuse/NIH/DHHS	NOT-DA-24-004	05-Jun-2025	Not Specified

	<p>[Optional][LOI/Pre-App], 04-May-2026 , 10-Aug-2026 [Optional][LOI/Pre-App], 09-Sep-2026 , 12-Dec-2026 [Optional][LOI/Pre-App], 11-Jan-2027 , 03-Apr-2027 [Optional][LOI/Pre-App], 03-May-2027 , 10-Aug-2027 [Optional][LOI/Pre-App], 09-Sep-2027</p> <p>Synopsis This notice of funding opportunity (NOFO) will support pilot, feasibility or exploratory research in priority areas in substance use epidemiology, prevention, and health services, including: 1) Research in response to sudden and severe emerging drug issues (e.g. the ability to look into a large and sudden spike in opioid or synthetic cannabinoid use/overdoses in a particular community); 2) Research in response to emerging trends and topics related to a change in federal, state, or local drug policy. The work proposed must be related to imminent policy change; 3) Research in response to unexpected and time-sensitive medical system issues (e.g. opportunities to understand addiction services in the evolving health care system); 4) Responses to unexpected and time-sensitive criminal or juvenile justice opportunities (e.g. new system and/or structural level changes) that relate to drug misuse and access and provision of health care service; 5) Research that examines the early implementation of new or newly changed federal, state, or local programs, policy, financing, or payment approaches related to substance use, substance use epidemiology, prevention, treatment, or recovery. Activities may include infrastructure-building partnerships among researchers and state or local organizations to address later implementation phases; 6) Research in response to natural disasters or newly emergent public health emergencies, to understand their impacts on drug markets, substance use epidemiology, prevention, treatment or recovery outcomes. For the purposes of this NOFO, "time-sensitive" is defined as in need of expedited review and funding in order to answer the scientific research question(s) posed (e.g. an imminent policy change will not allow for standard review and funding timeline). Applications whose aims can be accomplished with standard NIH submission, review, and award cycles will not be considered time-sensitive.</p>

Kirschstein National Research Service Award (NRSA) Individual Predoctoral Fellowship to Promote Diversity in Health-Related Research award is to enhance the diversity of the health-related research workforce by supporting the research training of predoctoral students from diverse backgrounds, including those from groups that are underrepresented in the biomedical, behavioral, or clinical research workforce. Through this award program, promising predoctoral students will obtain individualized, mentored research training from outstanding faculty sponsors while conducting well-defined research projects in scientific health-related fields relevant to the missions of the participating NIH Institutes and Centers. The proposed mentored research training is expected to clearly enhance the individual's potential to develop into a productive, independent research scientist. This Notice of Funding Opportunity (NOFO) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p> </div>

	Synopsis	Through this Notice of Funding Opportunity (NOFO), the National Institutes of Health (NIH) and Centers for Disease Control and Prevention (CDC) aim to foster the advancement and accelerate the growth of early-career scientists transitioning to entrepreneurship by simultaneously supporting their entrepreneurial development and the conduct of research and development under their direction. This NOFO supports small business concerns (SBCs) in employing and developing researchers as entrepreneurial Program Directors/Principal Investigators (PDs/PIs). In addition to supporting research and development efforts at the SBC, a major component of this NOFO is entrepreneurial training, mentoring, and career development of the PD/PI. Optimal PDs/PIs for this award are scientists and professionals with research, technology development, and/or healthcare delivery skills and experience, but limited entrepreneurial and independent (non-mentored) research leadership experience. PDs/PIs are expected to grow their entrepreneurial skillset while working in a small business to develop promising technologies and products that align with NIH's or CDC's missions to improve health and save lives.

<div> <div>Contact Name</div> <div>Contact Telephone</div> <div>Contact Email</div> <div>Sponsor Website</div> <div>Program URL</div> <div>Deadline Dates (ALL)</div> <div>Synopsis</div> </div> <div> <div>Charles Cywin, PhD</div> <div>301-496-1779</div> <div>charles.cywin@nih.gov</div> <div></div> <div>Link to program URL</div> <div>15-Jul-2025 , 18-Aug-2025 , 15-Jan-2026 , 17-Apr-2026 , 15-Jul-2026 , 18-Aug-2026</div> <div> <p>The Blueprint Neurotherapeutics Network (BPN) invites applications from neuroscience investigators seeking support to advance their small molecule drug discovery and development projects into the clinic. Participants in the BPN are responsible for conducting all studies that involve disease- or target-specific assays, models, and other research tools and receive funding for all activities to be conducted in their own laboratories. In addition, applicants will collaborate with NIH-funded consultants and can augment their project with NIH contract research organizations (CROs) that specialize in medicinal chemistry, pharmacokinetics, toxicology, formulations development, chemical synthesis including under Good Manufacturing Practices (GMP), and Phase I clinical testing. Projects can enter either at the Discovery or the Development stage. In the Discovery phase the goal is to characterize and optimize promising hit compounds using medicinal chemistry to establish structure activity relationships (SAR) and structure property relationships (SPR) including in vitro and in vivo properties such as metabolism, selectivity, toxicity, etc. As projects enter or advance to the Development stage the goal is to advance a single development candidate through Investigational New Drug (IND)-enabling toxicology studies and phase I clinical testing. Projects can enter the program at the Development stage and progress in a shorter period to IND enabling toxicology studies and phase I clinical testing. BPN recipient Institutions retain their assignment of intellectual property (IP) rights and gain assignment of IP rights from the BPN contractors and consultants (and thereby control the patent prosecution and licensing negotiations) for drug candidates developed in this program.</p> </div> </div>

Synopsis	NLM wishes to accelerate access to, and availability of, secure, complete datasets and computational models that can serve as the basis for transformative biomedical discoveries. Innovative at-scale computational approaches that increase the speed and scope of curation processes are needed for data mining and knowledge discovery from growing quantities of biomedical data being produced from ongoing data science advances.

Abouzeid 703-292-7855 aabouzei@nsf.gov Link to sponsor website Link to program URL 25-Aug-2025 [LOI/Pre-App], 25-Sep-2025 The VINES program seeks to support both fundamental research and verticals-driven technology development, demonstration, and translation activities that will lead to leaps in performance and capabilities of next generation (NextG) advanced intelligent network systems that span the user-edge-core-cloud continuum. The program seeks to go beyond the current research portfolios within individual participating NSF directorates and partner organizations by simultaneously emphasizing gains in performance and capabilities without compromising resilience and interoperability across all layers of the networking protocol and computation stacks. Innovations are sought across the various aspects of next generation communications, networking, and computing systems. This program is a multisector effort led by the National Science Foundation (NSF), in partnership with several industry and international agency partners, and in cooperation with other U.S. Federal agencies. It recognizes the importance of advanced telecommunications as a key technology area. The program seeks </div>

	Synopsis	<p>The CPS program aims to develop the core research needed to engineer these complex CPS, some of which may also require dependable, high-confidence, or provable behaviors. Core research areas of the program include control, data analytics, and machine learning including real-time learning for control, autonomy, design, Internet of Things (IoT), mixed initiatives including human-in- or human-on-the-loop, networking, privacy, real-time systems, safety, security, and verification. By abstracting from the particulars of specific systems and application domains, the CPS program seeks to reveal cross-cutting, fundamental scientific and engineering principles that underpin the integration of cyber and physical elements across all application domains. The program additionally supports the development of methods, tools, and hardware and software components based upon these cross-cutting principles, along with validation of the principles via prototypes and testbeds. This program also fosters a research community that is committed to advancing education and outreach in CPS and accelerating the transition of CPS research into the real world.</p>

Disruption Opportunity (DO) topics are issued to rapidly investigate new and nascent technologies with targeted and limited scope investments. DOs enable DARPA to initiate a new investment in less than 120 calendar days from idea inception. To enable this approach, DSO will issue Disruption Opportunities via Presolicitation Notices. These Presolicitation Notices will target specific technical domains important to DSO's mission to pursue innovative research that leads to a prototype demonstration. More information about DSO's technical domains and research topics of interest may be found at http://www.darpa.mil/about-us/offices/dso</p>				
130550	Bilateral Academic Research Initiative (BARI) Program - Ministry of Trade, Industry and Energy (MOTIE)	Department of Defense	HQ003425NFOEASD05	29-Aug-2025	Not Specified

The BARI program addresses high risk basic research as an international collaboration. This research should attempt to provide the scientific foundation towards the design and development of future and ubiquitous information networks that rely on extreme-scale devices, distributed intelligence, and network complexity, and include cognitive and social concepts to inform the technological choices. The goal of this program is to produce significant scientific breakthroughs and knowledge that will be critical steps in enabling revolutions in communication and information technology on a large scale.</p>

		Defense		[LOI/Pre-App]	USD
Contact Name Contact Telephone 301-682-5507 Contact Email help@eBRAP.org Sponsor Website Link to sponsor website Program URL Link to program URL Deadline Dates (ALL) 22-Jul-2025 [LOI/Pre-App], 26-Aug-2025 Synopsis The fiscal year 2025 (FY25) Rare Cancers Research Program (RCRP) Concept Award (CA) supports highly innovative, untested, potentially groundbreaking novel concepts in rare cancers. This award mechanism supports high-risk studies that have the potential to reveal entirely new avenues for investigation in rare cancers. Applications must describe how the new idea will be innovative and present as a novel course of investigation in the field of rare cancers. Distinctive Features: Preliminary data are not required. Due to the blinded nature of the review process, identifying or making references to the Principal Investigator (PI), collaborator(s), or their organization(s) in the proposal (Project Narrative, Supporting Documentations, Impact Statement, Justification Statement, and Statement of Work [SOW]) is prohibited and will result in administrative rejection of the application. (New for FY25) Funding limits are now listed as total cost limits, which is the combination of both direct and indirect costs. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$2.38M to fund approximately 17 Concept Award applications with total cost caps of \$0.14M. The maximum period of performance is 2 years. It is anticipated that awards made from this FY25 funding opportunity will be funded with FY25 funds, which will expire for use on September 30, 2031. Awards supported with FY25 funds will be made no later than September 30, 2026. The proposed research must be relevant to active-duty Service Members, Veterans, military beneficiaries, and the American public.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>The sponsor awards funding to support non-incremental research designed to reduce risk of or prevent the development of Alzheimer's disease and/or Alzheimer's disease related dementias (AD/ADRD). Allowable research includes projects utilizing animal models as well as clinical research projects. This funding opportunity allows for multiple principal investigators (PIs) under the Career Initiation or Transition (CIT) Partnership Option. If utilizing this option, only the initiating PI will submit a pre-application, but each PI will need to submit a full application. Be advised, all associated applications for a research project may be withdrawn if the initiating or partnering application is rejected or administratively withdrawn. Community collaboration is required for projects proposing clinical research. Leveraging existing resources and cohorts, particularly those that address critical health challenges and facilitate applicability to military health, is strongly encouraged. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$4 million (M) to fund approximately 4 Transforming Research Award applications with total cost caps of \$1M for the single PI option, and \$1M for the CIT Partnership Option. The maximum period of performance is 3 years. It is anticipated that awards made from this fiscal year 2025 (FY25) funding opportunity will be funded with FY25 funds, which will expire for use on September 30, 2031. Awards supported with FY25 funds will be made no later than September 30, 2026.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 25-Jul-2025 [LOI/Pre-App], 08-Aug-2025</p> <p>Synopsis The fiscal year 2025 (FY25) Duchenne Muscular Dystrophy Research Program (DMDRP) Idea Development Award (IDA) promotes new ideas that are still in the early stages of development and have the potential to yield impactful data and new avenues of investigation. This award supports conceptually innovative, high-risk/high-reward research that could lead to critical discoveries or major advancements that will accelerate progress in improving outcomes for individuals with Duchenne muscular dystrophy (DMD). Applications should include a well formulated, testable hypothesis based on strong scientific rationale. The FY25 DMDRP IDA mechanism has a New Investigator category for applicants early in their careers (i.e., within 10 years of their first faculty appointment or equivalent) or for established investigators new to DMD research. The New Investigator - Early Stage category is designed to allow applicants early in their faculty appointments to compete for funding separately from established investigators. The New Investigator - Transitioning category is designed for investigators in an area other than muscular dystrophy, at or above the level of Assistant Professor, seeking to transition to a career in DMD, thereby bringing their expertise to the field. Preliminary data relevant to DMD that supports the feasibility of the research hypotheses and research approaches are required. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$2.5 million (M) to fund approximately 5 Idea Development Award applications with total cost caps of \$500,000. The maximum period of performance is 2 years. It is anticipated that awards made from this FY25 funding opportunity will be funded with FY25 funds, which will expire for use on September 30, 2031. Awards supported with FY25 funds will be made no later than September 30, 2026.</p>				
131186	Duchenne Muscular Dystrophy Research Program--Clinical/Translational Research Award	Department of the Army/Department of Defense	HT942525DMDRPCTRA	25-Jul-2025 [LOI/Pre-App]	Not Specified

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
		<p>published data relevant to DMD to support the proposed research project. Pilot, proof-of-principle clinical trials, and correlative studies to better inform development of drugs, devices, and other interventions are allowed. The CTSA offers two funding levels: Funding Level 1 to support smaller, less complex preclinical and/or clinical research; and Funding Level 2 to support larger, more complex preclinical and/or clinical research. Early-Career Partnering PI Option (PPIO): The Partnering PI must be an independent, early career investigator within 10 years of their first faculty appointment (or equivalent) by the time of application submission. Lapses in research time or appointments as denoted in the biographical sketch should be explained in the application. It is encouraged, but not required, that the partnering PI is an M.D. or M.D./Ph.D. to increase collaboration between clinical and nonclinical aspects of DMD research. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$8.46 million (M) to fund approximately 6 CTSA applications with total cost caps of \$0.91M for Funding Level 1; \$1.0M for Funding Level 1 with a PPIO; \$1.75M for Funding Level 2; and \$1.90M for Funding Level 2 with a PPIO. The maximum period of performance is 3 years for Funding Level 1. The maximum period of performance for Funding Level 2 is 4 years. It is anticipated that awards made from this FY25 funding opportunity will be funded with FY25 funds, which will expire for use on September 30, 2031. Awards supported with FY25 funds will be made no later than September 30, 2026.</p>			
130975	Amyotrophic Lateral Sclerosis Research Program--Therapeutic Development Award	Department of the Army/Department of Defense	HT942525ALSRTDA	06-Jun-2025 [LOI/Pre-App]	Not Specified

	Deadline Dates (ALL)	06-Jun-2025 [LOI/Pre-App], 27-Aug-2025			
	Synopsis	<p>The fiscal year 2025 (FY25) Amyotrophic Lateral Sclerosis Research Program (ALSRP) Therapeutic Development Award (TDA) supports research ranging from preclinical validation of therapeutic leads through Food and Drug Administration (FDA) Investigational New Drug (IND)-enabling studies. The proposed studies are expected to be empirical in nature and product driven. Applicants with limited Amyotrophic Lateral Sclerosis (ALS) experience are strongly encouraged to include collaborators with substantial experience in the relevant ALS model systems, endpoints, and pathophysiology. Applications supported by this award must begin with lead compounds in hand and must already demonstrate proof-of-concept efficacy data in at least one appropriate preclinical model system of ALS, including whole animal and cellular model systems. Mechanism-specific, predictive/cohort-selective, target engagement, and pharmacodynamic biomarker development, in parallel to the main therapeutic effort, is a critical component of the FY25 ALSRP Therapeutic Development Award. If</p>

	Synopsis	<p>The fiscal year 2025 (FY25) Amyotrophic Lateral Sclerosis Research Program (ALSRP) Pilot Clinical Trial Award supports the rapid implementation of clinical trials with the potential to have a significant impact on the treatment or management of Amyotrophic Lateral Sclerosis (ALS). Projects may range from phase 1 to small-scale phase 2 trials. Applications must address one of the following focus areas: Biomarker-Driven Interventions: Disease-modifying interventions, with mechanism-specific biomarkers to predict which clinical trial participants are likely to respond, demonstrate target engagement, and effects on the intended biological pathway. Clinical Care: Improving aspects of clinical care and symptom management for ALS. Funding from this award mechanism must support a clinical trial. Projects proposing a therapeutic intervention (drug, biologic, and/or device) must incorporate biomarkers specific to the intervention into the trial design. All applications are required to incorporate a Community Collaboration Plan to optimize research impact. The clinical trial should begin no later than 12 months after the award date or 18 months for FDA-regulated studies. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$5.6 million (M) to fund approximately two Pilot Clinical Trial Award applications with total cost caps of \$2.8M. The maximum period of performance is three years. It is anticipated that awards made from this FY25 funding opportunity will be funded with FY25 funds, which will expire for use on September 30, 2031. Awards supported with FY25 funds will be made no later than September 30, 2026.</p>

	Synopsis	<p>The fiscal year 2025 (FY25) Prostate Cancer Research Program (PCRP) Idea Development Award (IDA) supports new ideas that represent innovative approaches to prostate cancer research and have the potential to make an important contribution to the PCRP mission. All applications are required to address one or more of the FY25 PCRP Overarching Challenges. Distinctive Features: New Investigator Category: In addition to Established Investigators, the FY25 PCRP Idea Development Award encourages research ideas from investigators in the early stages of their careers (i.e., within 10 years after completion of their terminal degree). Qualified New Investigators must identify a collaborator(s) experienced in prostate cancer research. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$22.1 million (M) to fund approximately 13 Idea Development Award - Established Investigator applications with total cost caps of \$1.7M. The maximum period of performance is 3 years. The CDMRP expects to allot approximately \$8.4M to fund approximately 4 Idea Development Award - New Investigator applications with total cost caps of \$2.1M. The maximum period of performance is 4 years. It is anticipated that awards made from this FY25 funding opportunity will be funded with FY25 funds, which will expire for use on September 30, 2031. 	Synopsis	<p>The fiscal year 2025 (FY25) Prostate Cancer Research Program (PCRP) Clinical Consortium Award (CCA) provides support to develop, maintain, and enhance the necessary collaborations and resources to rapidly execute phase 2 and/or phase 2-linked phase 1 (phase1/2) prostate cancer clinical trials. The primary intent of the PCRP Clinical Consortium Award is to combine the efforts of leading investigators across multiple institutions to expedite the clinical advancement of novel therapeutic interventions in prostate cancer to decrease the impact of the disease. Distinctive Features: This award mechanism does not support the development of clinical protocols. Coordinating Center: This award mechanism supports one coordinating center, which will be responsible for development and maintenance of the consortium organizational structure, and also function as a Clinical Research Site. Clinical Research Sites: This award mechanism supports multiple clinical research sites, which will be responsible for clinical trial introduction and selection, patient accrual for consortium studies, data collection and timely submissions, meeting attendance, and adherence to the consortium's operating procedures. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$10.5 million (M) to fund approximately 1 Clinical Consortium Award - Coordinating Center application with a total cost cap of \$10.5M. The maximum period of performance is 4 years. The CDMRP expects to allot approximately \$22.0M to fund approximately 11 Clinical Consortium - Clinical Research Site applications with total cost caps of \$2.0M. SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<div>Program URL Link to program URL</div> <div>Deadline Dates (ALL) 07-Aug-2025</div> <div>Synopsis <p>DEVCOM Army Research Laboratory-Army Research Office (ARL-ARO) in partnership with the Laboratory for Physical Sciences (LPS) is soliciting proposals for research in Quantum Characterization, Calibration, and Control (QC3). This is a proposed four-year program and is primarily focused on three topic areas in the field of quantum computing (QC). The topic areas are as follows: (1) Characterization: Primary Research Goal: Advance the state-of-the-art to quantitatively assess the performance of qubit operations in multi-qubit circuits and to extract error-models. (2) Calibration: Primary Research Goal: Advance state-of-the-art for bring up of multi-qubit circuits for high-performance operations near or better than fault-tolerance thresholds. (3) Control: Primary Research Goal: Advance state-of-the-art control techniques to operate multi-qubit circuits operating near or better than fault-tolerant thresholds, accounting for the specifics of error-models for the circuit. For this BAA, by error-models is meant the quantitative (Topic 1) description of the total, the types, and distribution of errors encountered by qubit operations in multi-qubit circuits. Research proposals to these topics are sought that address the circuit gate-based model of quantum computation overhead and inefficiencies, as well as improve the accuracy and stability of characterization, calibration, and control schemes, in a manner relevant for qubit arrays in the 10s100s of qubits scale for early fault-tolerant quantum computing (FTQC) applications</p> </div>

	Synopsis	<p>The Aligning Science Across Parkinson's (ASAP) Initiative invites applications from collaborative teams to join the ASAP Collaborative Research Network (CRN), an international, multidisciplinary, multi-institutional network of research teams working to address high-priority research questions in an effort to advance our understanding of Parkinson's disease (PD) and drive new ideas into the R&D pipeline. For this cycle, applications within the Scientific Track that focus on dissecting the mechanisms that contribute to PD heterogeneity will be considered. All applications must fall into one of the following six focus areas: 1. Aging: Examining PD in the Context of Aging 2. Co-pathologies: Understanding How Co-Pathologies Can Influence PD Pathogenesis and Progression 3. Environmental Risk: Role of Environmental Risk Factors in Contributing to Disease Pathogenesis 4. Circuit Biology: Understanding the Circuit Biology Driving Clinical Symptom Presentation (With an Emphasis on Non-motor Symptoms) 5. Clearance: Role of Clearance Mechanisms in PD 6. Seeding: Identification of Factors Influencing Seeding in the Alpha-Synuclein Seed Amplification Assay Proposals that do not fit these six focus areas will not be considered. All proposals across the six subthemes within the scientific track must have a tie to human biology, meaning that the project must demonstrate the relevance of biological discoveries to human Parkinson's disease, which can be demonstrated through: Generation of disease biology hypotheses using human data (e.g., genetic, clinical, biomarkers) Validation assessment</p>

	Synopsis	amfAR's research initiatives are aimed at finding a cure for HIV that will be useful to the 40M people living with HIV (PLWH). The urgency of the sponsor's goal demands that they direct funding to studies that uncover vital knowledge directly applicable to clinical or pre-clinical cure efforts. Persistent reservoirs of virus not cleared by antiretroviral therapy represent the main barrier to a cure. amfAR's Target Grants should focus on pushing the boundaries of biomedical research to achieve sustained HIV remission or complete viral eradication. Priority will be given to clinical or pre-clinical applications studying pragmatic and scalable interventions that can be implemented globally, including in the communities most affected by the epidemic. Each grant provides up to \$480,000 total costs, including up to 20% indirect costs.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Deadline Dates (ALL)	04-Aug-2025			
	Synopsis	This Request for Proposals invites applications that seek to better understand and predict the development, progression, and treatment response of RA. This includes applications focused on investigating the conversion of pre-RA to clinical RA, disease progression, and treatment response and safety. Competitive projects should aim to define risk factors/biomarkers of conversion of pre-RA to clinical RA, disease progression, treatment response, pathogenic mechanisms, and/or therapeutic approach personalization. The pilot research award can be up to \$150,000 inclusive of 8% indirect costs for up to 2 years. Large research awards can be up to \$450,000 inclusive of 8% indirect costs and up to 3 years.

	Synopsis	The Conservation, Food and Health Foundation seeks to protect the environment, improve food production, and promote public health in Africa, Asia, the Caribbean, Latin America, and the Middle East. The Foundation supports projects and applied research that generate local or regional solutions to problems affecting the quality of the environment and human life; advance local leadership and promote professional development in the conservation, agricultural, and health sciences; develop the capacity of local organizations and coalitions; and address challenges in the field. The Foundation prefers to support projects that address under-funded issues and geographic areas. The Foundation funds applied research, pilot projects, new initiatives, training, and technical assistance, rather than ongoing support for programs that are already well underway. An important goal for the Foundation is to provide seed money to help promising projects, organizations, and individuals develop the track record they need to attract major foundation funding in the future.

	Synopsis	Clinician-Researcher Awards support hypothesis-driven clinical research projects that have significant potential to advance our understanding of Dravet syndrome; slow or halt the progression of the disease, characteristics, or comorbidities of the disease; and/or reduce mortality. The projects must be patient-oriented, with the investigator directly interacting with human subjects/patients. This includes studies such as therapeutic interventions or support/extension of existing clinical trials. The clinician-researcher award is meant to aid early-career clinicians in gaining experience in clinical research studies of Dravet syndrome (established clinicians without research experience are also eligible). Applicants are required to identify a clinical research mentor to assist in guiding the studies for the duration of the award.

	Synopsis	<p>The Lupus Innovation Award (\$300,000 over 2 years) provides support for pioneering, high-risk, high-reward approaches to major challenges in lupus research. Special emphasis is placed on lupus studies exploring fundamental mechanisms, novel targets and pathways, novel technologies, and interdisciplinary approaches. Both early career and established investigators new to lupus with highly innovative ideas are encouraged to apply. The LIA supports pioneering, high-risk, high-reward approaches to major challenges in lupus research. The overarching goals of the LIA are to: (1) promote investigation of underexplored pathways and fundamental mechanisms of lupus and its complications and (2) initiate transformative discoveries in lupus that can drive the development of safer and more effective treatments or novel biomarkers. All studies should have a clear and direct relevance to people with lupus and should offer the potential to improve the standard of care for the disease or usher in a cure.</p>

	Synopsis	The PhRMA Foundation's Predoctoral Fellowship in Translational Medicine supports promising students (U.S. and non-U.S. citizens) in advanced stages of training and thesis research in translational medicine. Translational medicine is a scientific discipline focused on turning observations in the laboratory, clinic, and community into medicines, diagnostics, or other interventions that improve human health. Translational medicine fosters a patient-focused research cycle that stretches from the lab bench to the patient bedside and back to the lab again. This includes adapting hypothesis-driven basic research discoveries in cells, tissues, and animals for application in humans and then taking the knowledge of what did and didn't work in the clinic back to the bench.

	Synopsis	The SAEMF/Simulation Academy Novice Research Grant provides \$5,000 for a one-year period starting July 1 to promote junior and new investigators in simulation-based research and scholarship. With this goal in mind, SAEMF welcomes a broad range of projects that increase the body of knowledge in simulation-based endeavors, educational innovations, and applications within different facets of emergency medicine care, training, and systems research, such as medical education, clinical operations, and patient safety. The objective is to provide seed funding to support experiential training and career development for investigators in emergency medicine who have shown promise in simulation-based scholarship.

	Synopsis	The Sociological Initiatives Foundation supports social change by linking research to social action. It funds research projects that investigate laws, policies, institutions, regulations, and normative practices that may limit equality in the U.S. It prioritizes projects that address racism, xenophobia, classism, gender bias, exploitation, or the violation of human rights and freedoms. It also supports research that furthers language learning and behavior and its intersection with social and policy questions.

	Synopsis	STScI invites scientists to participate in Cycle 33 of the Hubble Space Telescope (HST). The telescope and its instruments were built under the auspices of the National Aeronautics and Space Administration (NASA) and the European Space Agency (ESA). Management of HST's scientific program is carried out by the Space Telescope Science Institute (STScI). We anticipate allocating up to 2600 orbits in this cycle, including approximately 1300 orbits for Very Small and Small Programs, 650 orbits for Medium Programs, and 650 for Large and Treasury Programs. An additional 1000 Snapshot observations and 500 Pure-Parallel observations may be allocated.
