

**Funding Opportunities Monthly Edition
Sept 2025 Due Dates**

Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in Sept 2025.

The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

The Development Office offers assistance with many not for profit opportunities. Please contact the Development Office's Corporate and Foundation Relations team at DevCorpFound@mountsinai.org / 212-659-8500 below for assistance or questions.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	This funding opportunity seeks to support the Comprehensive Partnerships to Advance Cancer Health Equity (CPACHE) Program. The CPACHE Program develops and maintains comprehensive, long-term, and mutually beneficial partnerships between institutions serving underserved health disparity populations and underrepresented students (ISUPs) and NCI-designated Cancer Centers (CCs). The program aims to achieve a stronger national cancer program and address challenges in cancer and cancer disparities research, education, and outreach, as well as cancer's impact on underserved populations. The institutions in each partnership are expected to work collaboratively to: 1) increase the cancer research and cancer research education capacity of the ISUPs; 2) promote the diversity of the cancer research workforce; 3) improve the effectiveness of CCs in developing and sustaining research programs focused on cancer health disparities and increase the number of investigators and students conducting cancer health disparities research; and 4) develop and implement cancer-related outreach and education initiatives that benefit the surrounding underserved communities.			
126935	RFA-CA-24-026--National Cancer Institute Youth Enjoy Science Research Education Program (R25 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	RFA-CA-24-026	26-Sep-2025	2,000,000 USD

	Deadline Dates (ALL)	26-Sep-2025 , 28-Sep-2026			
	Synopsis	The NCI's mission is to conduct and support research, training, health information dissemination, and other programs concerning cancer. This funding opportunity seeks to facilitate educational activities that encourage students from diverse backgrounds, including those from groups underrepresented in biomedical research, to become knowledgeable about cancer and available to focus on cancer later in their careers. To promote broad interest in pursuing a career in biomedical research via early intervention strategies, the NCI Youth Enjoy Science (YES) Program will support efforts to create and maintain an institutional program to engage grades 6-12 and/or undergraduate students in cutting edge cancer research experiences. The proposed institutional programs may also provide research experiences for the grade 6-12 teachers and undergraduate faculty members. The goals are to inspire interest in biomedical sciences, help envision research as a career path, and strengthen practical research and career skills. In alignment with these goals, institutions may develop unique programs that capitalize on their research strengths and are responsive to their target populations.			
129587	RFA-CA-25-007 -- Revision Applications for Incorporation of Novel NCI-	National Cancer Institute/NIH/DHHS	RFA-	03-Sep-2025	150,000

Synopsis		<p>This Notice of Funding Opportunity (NOFO) solicits grant applications proposing exploratory research projects focused on further development and validation of emerging technologies that improve the quality of the samples used for cancer research or clinical care. This includes new capabilities to address issues related to pre-analytical degradation of targeted analytes during the collection, processing, handling, and/or storage of cancer-relevant biospecimens. This NOFO solicits R33 applications where major feasibility gaps for the technology or methodology have been overcome, as demonstrated with supportive preliminary data, but still require further development and rigorous validation to encourage adoption by the research community. The overall goal is to support the development of highly innovative technologies capable of maximizing or otherwise interrogating the quality and utility of biological samples used for downstream analyses. This NOFO will support the development of tools, devices, instrumentation, and associated methods to preserve or protect sample integrity, or establish verification criteria for quality assessment/quality control and handling under diverse conditions. These technologies are expected to accelerate and/or enhance research in cancer biology, early detection and screening, clinical diagnosis, treatment, or epidemiology, or address issues associated with cancer health disparities, by reducing pre-analytical variations that affect biospecimen sample quality. Projects proposing to use existing technologies where the novelty resides in the application of the technology or the biological or clinical question being pursued, and not the technical capabilities being developed, are not appropriate for this NOFO and will not be reviewed. This funding opportunity is part of a broader NCI-sponsored Innovative Molecular Analysis Technologies (IMAT) Program.</p>			
129346	RFA-CA-25-001 -- Innovative Molecular and Cellular Analysis Technologies for Basic and Clinical Cancer Research (R61 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	RFA-CA-25-001	03-Sep-2025 [Optional][LOI/Pre-App]	450,000 USD

	<p>approaches; predictive and prognostic biomarkers for patient selection or stratification; clinically relevant in vivo or in vitro tumor models (including genetically engineered mouse models, patient-derived xenograft models, organoids, and cell lines); and strategies to address therapeutic outcome disparities among underserved populations. In addition to novel agents, new treatment strategies may involve repurposed agents or novel combinations of interventions (including radiation), based on established mechanisms of action. Comparative correlative studies in cancer patients with age, gender, racial/ethnic, or health disparities are encouraged to explore mechanisms underlying their differential responses (efficacy and toxicity) and resistance to therapeutic interventions. Comparative oncology studies in dogs investigating strategies for treatment and diagnosis of human disease are supported as well. This FOA does not support research that focuses on basic cancer biology (such as studies of cancer-related pathways, molecular mechanisms, or mechanisms of metastasis), late-stage clinical trials, risk assessment studies, epidemiological studies, or studies of behavioral interventions. These applications will be deemed not responsive to this FOA and will not be reviewed (see below for a more detailed description of studies that are not responsive for this FOA). The R21 mechanism is intended to encourage exploratory and developmental research projects by providing support for the early and conceptual stages of these projects. These studies may involve considerable risk but may lead to breakthroughs in particular areas, or to the development of novel techniques, agents, methodologies, models, or applications that could have a major impact on cancer research (preclinical or clinical).</p>

129319	Integrating Biospecimen Science Approaches into Clinical Assay Development (U01 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-25-325	10-Sep-2025	1,250,000 USD
	<p>Contact Name Abhi Rao, Ph.D.</p> <p>Contact Telephone 240-276-5715</p> <p>Contact Email abhi.rao@nih.gov</p> <p>Sponsor Website Link to sponsor website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 10-Sep-2025 , 04-Feb-2026 , 04-Jun-2026 , 10-Sep-2026 , 04-Feb-2027 , 04-Jun-2027 , 10-Sep-2027</p> <p>Synopsis Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) intends to support extramural research to investigate and mitigate challenges in clinical assay development and subsequent analytical validation due to preanalytical variability in tumor tissue biopsies, blood biospecimens utilized as "liquid biopsies", or other biospecimens as described in this NOFO. Extramural research funded under this NOFO may include investigations of preanalytical variability associated with the procurement and study of small biopsies (core biopsies, small excision samples), blood utilized for "liquid biopsies", tissue swabs, tissue secretions, pleural and esophageal aspirates, feces, or bodily fluids like sweat, urine, CSF, breast milk and saliva. Investigator-designed experiments will explore how different biospecimen preanalytical conditions affect emerging and clinically relevant biomarkers quantified by a variety of testing platforms. The results from this research program will improve the understanding of how analytical quantification of clinically relevant biomarkers is affected by variation in biospecimen collection, processing, and storage procedures. The overall goal is to expedite biomarker clinical assay development through evidence-based standardization of biopsy handling practices.</p>

	<p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 25-Sep-2025</p> <p>Synopsis This Funding Opportunity Announcement (FOA) invites applications for P30 Cancer Center Support Grants (CCSGs) to support NCI-designated Cancer Centers. CCSGs support three types of Cancer Centers: 1) Comprehensive Cancer Centers, which demonstrate reasonable depth and breadth of research activities in each of three major areas: basic laboratory; clinical; and prevention, control and population-based research, and which have substantial transdisciplinary research that bridges these scientific areas; and 2) Clinical Cancer Centers, which are primarily focused on basic laboratory; clinical; and prevention, cancer control, and population-based research; or some combination of these areas, and 3) Basic Cancer Centers, which focus on basic laboratory research. The purpose of all types of NCI-designated Cancer Centers is to capitalize on all institutional cancer research capabilities, integrating meritorious research into a single transdisciplinary research enterprise across all institutional boundaries. Cancer Centers supported through this FOA are expected to serve as major sources of discovery of the nature of cancer and of development of more effective approaches to prevention, diagnosis, and therapy; to contribute significantly to the development of Shared Resources that support research; to collaborate and coordinate their research efforts with other NCI-funded programs and investigators; and to disseminate research findings for the benefit of the community.</p>				
114681	National Cancer Institute Program Project Applications for the Years 2023, 2024, and 2025 (P01 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	PAR-23-059	07-Sep-2025	Not Specified

The proposed Program may address any of the broad areas of cancer research, including (but not limited to) cancer biology, cancer prevention, cancer diagnosis, cancer treatment, and cancer control. Basic, translational, clinical, and/or population-based studies in all of these research areas are appropriate. Each application submitted in response to this FOA must consist of at least three research projects and an Administrative Core. The projects must share a common central theme, focus, and/or overall objective.</p>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis</p> <p>Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) invites research grant applications (R01) for the development and application of current and emerging molecular imaging methods to gain fundamental insights into cancer inflammation in vivo. The motivation for this initiative is the recognition that much of the current imaging research on inflammation in cancer relies heavily on in vitro and ex vivo methods. These approaches have limited potential to provide significant insights into the dynamic interactions between cancer and inflammation. Utilizing molecular imaging probes in pre-clinical and clinical investigations allows for precise temporal resolution at molecular and cellular levels. This information is valuable for identifying and characterizing in vivo inflammatory cellular physiology in cancer and for detecting molecular changes in response to treatment. This NOFO encourages applications focused on developing integrated imaging approaches to investigate the role of inflammation in cancer through strong cross-discipline collaboration between cancer basic science researchers and imaging scientists. These collaborations are expected to advance the science and understanding of cancer inflammation interactions.</p>				
128621	Integration of Imaging and Fluid-Based Tumor Monitoring in Cancer Therapy (R01 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	PAR-25-175	05-Sep-2025 [Optional][LOI/Pre-App]	499,999 USD

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis</p> <p>The NEI Center Core Grant combines three or more Resource and/or Service Cores for a group of R01 investigators to enhance their research, consolidate resources, avoid duplication of efforts, and/or contribute to cost effectiveness by providing a service with lower costs or higher quality than could be attempted for independent projects by several individual Program Directors/Principal Investigators (PD(s)/PI(s)). Shared resources and facilities that are accessible to a group of independently funded investigators lead to greater productivity for the separate projects and can provide instrumentation and facilities that are too costly to be maintained by an individual investigator. The design and purpose of each Center Core may vary in how it serves its users. This program is designed to enhance an institution's environment and capability to conduct vision research and to facilitate collaborative studies of the visual system and its disorders and promote new research within the NEI mission and Strategic Plan.</p>

	Deadline Dates (ALL)	07-Sep-2025 , 16-Oct-2025 , 07-Jan-2026 , 16-Feb-2026 , 07-May-2026 , 16-Jun-2026 , 07-Sep-2026 , 16-Oct-2026 , 07-Jan-2027 , 16-Feb-2027 , 07-May-2027 , 16-Jun-2027 , 07-Sep-2027 , 16-Oct-2027 , 07-Jan-2028			
	Synopsis	<p>The purpose of this Notice of Funding Opportunity (NOFO) is to conduct secondary data analyses using existing data collected from humans participating in vision-related clinical trials, epidemiologic, and other clinical research studies or represented in clinical and health care database resources (e.g., electronic health records). This NOFO may be used to develop new statistical methodologies or test hypotheses using existing data, but this NOFO must not be used to support the collection of new data. This NOFO encourages applications from institutions/organizations that propose to conduct vision-related secondary analyses of data collected from humans. Applications may be related to, but must be distinct from, the specific aims of the original data collection. The NEI supports an extensive portfolio of clinical trials and large-scale epidemiologic research projects wherein numerous data collection activities are required to meet each project's specific aims. The resultant wealth of data generated by these studies often provides unique, cost-effective opportunities to investigate additional research questions or develop new analytical approaches secondary to a project's originally intended purpose. Data are not limited to those collected under NEI support, but such data are of the highest programmatic interest.</p>			
129739	NEI Clinical Research Study Planning Grant Program (R34 Clinical Trial Not Allowed)	National Eye Institute/NIH/DHHS	PAR-25-358	07-Sep-2025	300,000 USD

	<p>2027 , 16-Feb-2027 , 07-May-2027 , 16-Jun-2027 , 07-Sep-2027 , 16-Oct-2027 , 07-Jan-2028</p> <p>The NEI supports large-scale clinical vision research projects, including randomized clinical trials and epidemiologic studies on eye/vision conditions. At the time of submission, applications requesting support for these activities are expected to provide detailed information regarding the study rationale, design, analytic techniques, protocols and procedures, facilities and environment, organizational structure, and collaborative arrangements. This information is best conveyed in a Manual of Procedures (MOP), the development of which represents a costly and time-consuming activity. This clinical research planning grant funding opportunity supports applicants in their planning efforts to conduct collaborative clinical research. The grant may be used to support the development of a MOP, as well as to conduct preliminary studies to refine study procedures or document recruitment potential. The grant must not be used to generate data on the effects of a proposed intervention. This NEI FOA is applicable to both epidemiologic and clinical trial research studies.</p>

	<p>Synopsis</p> <p>This Notice of Special Interest (NOSI) calls for research to understand and promote cardiovascular and cardiometabolic health during transitional phases across the lifecourse, from pre-adolescence (6-10 years) through adolescence (11-18 years) to young adulthood (19-39 years). This initiative would support research to: 1) understand the mechanisms and the pathogenesis of cardiometabolic health and cardiovascular disease (CVD) risk in vulnerable groups throughout transitional phases from pre-adolescence into adolescence and adolescence into young adulthood, and 2) develop precision prevention interventions (at the individual and populations levels) to address cardiovascular and cardiometabolic risk across these transitional phases.</p>

	<p>and sleep researchers to provide a comprehensive understanding of the circadian biology in relation to HLBS conditions. The purpose is to facilitate translational research to identify potential applications of circadian science to the diagnosis, prevention and treatment of HLBS conditions. Mechanism-based studies investigating the circadian rhythm dysregulation, clinical markers, and/or therapeutic targets of HLBS conditions are encouraged. Behavioral, physiological, pharmacological, molecular, and genomic studies aimed at elucidating the relationship between circadian-dependent mechanisms and disease are appropriate. Studies to delineate circadian-based mechanisms, therapeutic targets, epidemiological risk and clinical trials to assess therapeutic safety, efficacy, effectiveness, or implementation may be proposed.</p>				
116586	Notice of Special Interest (NOSI): Integrative Omics Analysis of NHLBI TOPMed Data (Parent R01 Clinical Trial Not Allowed)	National Heart, Lung, and Blood Institute/NIH/DHHS	NOT-HL-23-067	07-Sep-2025	Not Specified
	<p>Contact Name James Luo, Ph.D.</p> <p>Contact Telephone 301-435-0533</p> <p>Contact Email luoja@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Sep-2025 , 05-Oct-2025 , 07-Jan-2026 , 05-Feb-2026 , 07-May-2026</p> <p>Synopsis The symptom-based diagnosis and treatment of heart, lung, blood, and sleep (HLBS) diseases has vastly improved in recent years, yet an understanding of the molecular mechanisms underlying many of these diseases has remained elusive. Furthermore, in most cases the impact of genetic variation on severity of disease and treatment outcomes remains unknown. Therefore, the NHLBI has created the Trans-omics for Precision Medicine (TOPMed) program, which aims to utilize genomics data to characterize a variety of HLBS diseases. TOPMed is well on its way to collecting whole genome sequence (WGS) from over 194,270 well-phenotyped individuals and is currently generating multi-omics data (e.g., over 31,852 RNA sequences, over 44,342 DNA methylation profiles, and 26,124 metabolomics profiles) from many of these individuals to complement whole genome sequence information. Having produced an unprecedented volume of high-throughput data, TOPMed now seeks to turn its attention to effectively leveraging this resource to uncover biological function and disease pathobiology through novel systems biology analyses and the power of artificial intelligence (AI) and Machine Learning (ML). Although lower costs and technological improvements in sequencing technology have vastly expanded our ability to generate large volumes of omics data, the ability to analyze such large datasets to extract biologically meaningful insights remains challenging. Systems level models incorporating trans-omics analyses will be an important step in uncovering the underlying biological networks and the gene-gene and gene-environment interactions influencing disease and treatment outcomes. Thus, advanced analyses that incorporate genotype and phenotype datasets from thousands to tens of thousands of</p>

	Synopsis	<p>This Funding Opportunity Announcement (FOA) supports applications to develop and implement investigator-initiated single site clinical trials including efficacy, comparative effectiveness, pragmatic and/or implementation research clinical trials. Trials using innovative designs such as platform trials, adaptive, and Bayesian designs are encouraged. These trials may include ones that test different therapeutic, behavioral, and/or prevention strategies. Trials for which this FOA applies must be relevant to the research mission of the NHLBI and meet the NIH definition of a clinical trial (see NOT-OD-15-015). For additional information about the mission, strategic vision, and research priorities of the NHLBI, applicants are encouraged to consult the NHLBI website. This FOA will utilize a bi-phasic, milestone-driven mechanism of award. The objective of the application is to present the scientific rationale for the clinical trial and a comprehensive scientific and operational plan that describes it. The application should address project management, subject recruitment and retention, performance milestones, scientific conduct of the trial, and dissemination of results. The multiple PD/PI model is strongly encouraged but not required. Applicants are encouraged to include a PD/PI with expertise in biostatistics, clinical trial design, and coordination. The application should also describe its approaches to increasing community engagement, reducing health inequities and disparities, and include a Plan for Increasing Diverse Perspectives (PDEP).</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>clinical trial and in so doing demonstrate that the proposed (R34) research is scientifically necessary to design or plan the subsequent trial. Furthermore, this NOFO will support research projects that are designed to provide results that will be sufficient to inform the future trial without further studies. The planned Phase II, III, or IV trial must be primarily intended to test the efficacy, safety, clinical management, or implementation of intervention(s) in the prevention and/or treatment of heart, lung, blood, or sleep disorders. In contrast to the study start up or preparation phase of NHLBI funding opportunities for clinical trials (as described at Clinical Trial Development Continuum NHLBI, NIH), the R34 mechanism is intended to provide new information that answers a scientific or operational question(s) which may be pragmatic in nature and, therefore, informs the final development of a Phase II-IV clinical trial. Regardless of the results of the R34, support of the proposed future clinical trial will require a new application. Plan for Enhancing Diverse Perspectives The NIH recognizes that diverse teams working together and capitalizing on innovative ideas and distinct perspectives outperform homogeneous teams. There are many benefits that flow from a diverse scientific workforce, including: fostering scientific innovation, enhancing global competitiveness, contributing to robust learning environments, improving the quality of the research, advancing the likelihood that underserved populations participate in, and benefit from research, and enhancing public trust. To support the best science, the NIH encourages inclusivity in research. Examples of structures that promote diverse perspectives include but are not limited to: -Transdisciplinary research projects and collaborations among neuroscientists and researchers from fields such as computational biology, physics, engineering, mathematics, computer and data sciences, as well as bioethics. - Engagement from different types of institutions and organizations (e.g., research-intensive, undergraduate-focused, minority-serving, community-based). - Individual applications and partnerships that enhance geographic and regional heterogeneity. - Investigators and teams composed of researchers at different career stages. - Participation of individuals from diverse backgrounds, including groups historically underrepresented in the biomedical, behavioral, and clinical research workforce (see NOT-OD-20-031), such as underrepresented racial and ethnic groups, those with disabilities, those from disadvantaged backgrounds, and women. - Opportunities to enhance the research environment to benefit early- and mid-career investigators. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

	Program URL	Link to program URL			
	Deadline Dates (ALL)	07-Sep-2025 , 15-Oct-2025 , 07-Jan-2026			
	Synopsis	<p>The purpose of this funding opportunity announcement (FOA) is to solicit current or recently completed NHLBI K01, K08, K23, and K25 recipients for small grant support to expand their current research objectives or to branch out to a new study that resulted from the research conducted under the K award. Active NHLBI K01, K08, K23, and K25 recipients may apply for R03 support after the notice of award (NoA) for their first type-5 K awards has been issued. Recently completed NHLBI K01, K08, K23, and K25 recipients are eligible to apply for the R03 if the earliest possible R03 start date falls within 2 years of their prior NHLBI K award Project Period end date. This FOA is intended to enhance the capability of NHLBI K01, K08, K23, and K25 recipients to conduct research as they complete their transition to fully independent investigator status. This R03 program is intended to support research projects that can be carried out and completed within a short period of time (no more than two years) with limited resources and that may generate preliminary data to support a subsequent R01-equivalent application. These studies include, but are not limited to, pilot or feasibility studies; proof of concept studies; secondary analysis of existing data; small, self-contained research projects; development of new research methodologies or technologies, or development of novel experimental models. A minimum of 40% protected overall research effort, not necessarily limited to the proposed R03 project, is required from applicants. For current and previous K23 recipients, research proposed in the R03 application may or may not include patient-oriented research.</p>

	Synopsis	The purpose of this notice of funding opportunity (NOFO) is to support research to elucidate how HIV-induced immunometabolic alterations, in a host suppressed on combination antiretroviral therapy (cART-suppressed), impact the immune response and increase risk for poor outcomes due to a second, potentially long-term, infection such as Mycobacterium tuberculosis (Mtb) or hepatitis B virus (HBV). This NOFO aims to support research to define how HIV-driven alterations to immunometabolism affect immune cell regulation, cell-cell interactions, response to treatment, and, ultimately, tuberculosis (TB) and HBV disease progression.

This program provides support for hypothesis-driven, milestone-driven clinical trials. Although clinical trials not considered high-risk may be proposed, this program encourages high-risk clinical studies. High-risk does not imply human subject or patient risk, but rather defines a study that contains one or more of the following unique features: involves non-routine interventions, administration of an unlicensed product, or administration of a licensed product for an unapproved indication. Mechanistic studies are also encouraged and may be proposed under this program.</p>

The proposed resource must provide a significant benefit to currently funded high priority projects in need of further coordination and support in the areas specified. Under rare circumstances, this mechanism may be used to support development of a new resource to the broader scientific community of the NIAID. It is anticipated that the request for resource support through the R24 activity code will occur on an infrequent basis and only in circumstances where other mechanisms of support from the NIAID are not appropriate. The proposed resources should be relevant to the scientific areas of the NIAID mission including the biology, pathogenesis, and host response to microbes, including HIV; the mechanisms of normal immune function and immune dysfunction resulting in autoimmunity, immunodeficiency, allergy, asthma, and transplant rejection; and translational research to develop vaccines, therapeutics, and diagnostics to prevent and treat infectious, immune-mediated, and allergic diseases.</p>

This program is designed to facilitate a timely transition of outstanding postdoctoral researchers with a clinical doctorate degree from mentored, postdoctoral research positions to independent, tenure-track or equivalent faculty positions. The program will provide independent NIAID research support during this transition to help awardees launch competitive, independent research careers in biomedical fields and thereby help to address the national physician-scientist workforce shortage. This Funding Opportunity Announcement (FOA) is designed specifically for candidates proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary clinical trial, as part of their research and career development. Those not planning an independent clinical trial, or proposing to gain research experience in a clinical trial led by another investigator, must apply to companion FOA (PAR-23-071)</p> </div> </div>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis This Funding Opportunity Announcement (FOA) solicits applications from research partnerships formed by academic and industrial investigators to accelerate the development and adoption of promising bioengineering tools and technologies that can address important biomedical problems. The objectives are to establish these tools and technologies as robust, well-characterized solutions that fulfill an unmet need and are capable of enhancing our understanding of life science processes or the practice of medicine. Awards will focus on supporting multidisciplinary teams that apply an integrative, quantitative bioengineering approach to developing technologies. The goal of the program is to support technological innovations that deliver new capabilities which can realize meaningful solutions within 5 – 10 years.</p>				
120314	National Centers for Biomedical Imaging and Bioengineering (NCBIB) (P41 Clinical Trials Optional)	National Institute of Biomedical Imaging and Bioengineering/NIH/DHHS	PAR-23-235	07-Sep-2025	Not Specified

	<p>[Optional][LOI/Pre-App], 25-May-2026 , 26-Aug-2026 [Optional][LOI/Pre-App], 25-Sep-2026 , 26-Dec-2026 [Optional][LOI/Pre-App], 25-Jan-2027 , 25-Apr-2027 [Optional][LOI/Pre-App], 25-May-2027 , 26-Aug-2027 [Optional][LOI/Pre-App], 25-Sep-2027</p> <p>Synopsis The purpose of this Notice of Funding Opportunity (NOFO) is to support the continued operation, maintenance, and dissemination of unique knowledge, data, and/or bioinformatics resources that are of major importance to the research community using animal models of embryonic developmental processes. These grants will support ongoing development and enhancement of the resources, user training and services, provision of community generated data storage and curation, wide dissemination of the tools and/or resources, and expansion of interoperability with other NIH bioinformatics resources.</p>				
115197	In-Depth Phenotyping and Research Using IMPC-Generated Knockout Mouse Strains Exhibiting Embryonic or Perinatal Lethality or Subviability (R01 Clinical Trial Not Allowed)	National Institute of Child Health and Human Development/NIH/DHHS	PAR-25-140	05-Sep-2025 [Optional][LOI/Pre-App]	2,499,995 USD
	<p>Contact Name Mahua Mukhopadhyay, PhD</p> <p>Contact Telephone 301-435-6886</p> <p>Contact Email mukhopam@mail.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 05-Sep-2025 [Optional][LOI/Pre-App], 05-Oct-2025</p> <p>Synopsis The purpose of this Funding Opportunity Announcement (FOA) is to encourage applications to phenotype and/or perform research on embryonic lethal knockout (KO) mouse strains being generated through the International Mouse Phenotyping Consortium (IMPC) of which the NIH Knockout Mouse Phenotyping Program (KOMP2) is a member. The mission of IMPC is to generate a comprehensive catalogue of mammalian gene function that will provide the foundation for functional analyses of human genetic variation. The current (July 19, 2022) IMPC data release includes phenotypic data for 8260 knockout genes. Overall, the IMPC hopes to generate a null mutant and undertake broad-based phenotyping for every gene in the mouse genome. About 30% of these strains are expected to be either embryonic or perinatal lethal, or subviable. However, a large portion of homozygous lethal mutations are expected to have viable heterozygous phenotypes. The scientific community has the unique opportunity to leverage these mouse strains while they are being created and bred as part of the IMPC adult mouse phenotyping effort to perform additional in-depth phenotyping and research.</p>

Large quantities of genomic data collected from pediatric congenital anomalies cohorts are available to the research community through several databases such as the Database of Genotypes and Phenotypes (dbGaP), the Gabriella Miller Kids First Data Resource Portal, the European Genome-Phenome Archive and Clinical Genome Resource (ClinGen). The purpose of this initiative is to promote the screening, functional validation and characterization of congenital anomaly-associated genetic variants identified through public facing databases and individual efforts using in-silico tools, appropriate animal models, in vitro systems or multi-pronged approaches. This initiative addresses a challenging gap between identifying sequence variations of potential interest and recognizing which of those variations have functional effects on the phenotype of interest</p>				
128792	NICHD Small Research Grant Program (R03 Basic Experimental Studies with Humans Required)	National Institute of Child Health and Human Development/NIH/DHHS	PA-25-126	07-Sep-2025	100,000 USD

		<div><div>Contact Name</div><div>Contact Telephone</div><div>Contact Email</div><div>Sponsor Website</div><div>Program URL</div><div>Deadline Dates (ALL)</div><div>Synopsis</div></div> <div><div>Dena Fischer, DDS, MSD, MS</div><div>301-594-4876</div><div>dena.fischer@nih.gov</div><div></div><div>Link to program URL</div><div>04-Sep-2025 , 07-Sep-2025 [Optional][LOI/Pre-App], 07-Oct-2025 , 06-Jan-2026 , 10-Jan-2026 [Optional][LOI/Pre-App], 09-Feb-2026 , 08-May-2026 , 09-May-2026 [Optional][LOI/Pre-App], 08-Jun-2026 , 08-Sep-2026 [Optional][LOI/Pre-App], 09-Sep-2026 , 08-Oct-2026 , 08-Jan-2027 , 09-Jan-2027 [Optional][LOI/Pre-App], 08-Feb-2027 , 06-May-2027 , 08-May-2027 [Optional][LOI/Pre-App], 07-Jun-2027 , 07-Sep-2027 [Optional][LOI/Pre-App], 08-Sep-2027 , 07-Oct-2027 , 06-Jan-2028</div><div>This Notice of Funding Opportunity (NOFO) will support UG3/UH3 phased, cooperative agreement research applications to plan and implement clinical trials within the mission of the National Institute of Dental and Craniofacial Research (NIDCR). Studies appropriate for this NOFO are those testing a drug, biologic, device, or procedure to improve dental, oral, or craniofacial diseases or conditions, including trials for any phase of testing for a Food and Drug Administration (FDA)-regulated product. Awards made under this NOFO will initially support a one-year milestone-driven planning phase (UG3), with possible transition to a clinical trial implementation phase (UH3) of up to five years. Progression to the UH3 phase is based on an administrative review and is dependent on success in meeting UG3 milestones, NIDCR program priorities, and availability of funds. The UG3/UH3 application must be submitted as a single application with the final design of the UH3 clinical trial including detail about the study population, intervention(s), and outcome(s) described in the application, following the instructions described in this NOFO. The UG3 planning phase permits both scientific and operational planning activities, though the planning phase cannot be used to test for intervention safety or efficacy or assess the study’s primary outcome. The UH3 phase of the award will support the conduct of one investigator-initiated clinical trial. Applications designed to test behavior change interventions or those used as tools to understand mechanisms of behavior change will not be supported by this NOFO.</div></div>			
117230	NIDCR Research Grants for Analyses of Existing Genomics Data (R01) (Clinical Trial Not Allowed)	National Institute of Dental and Craniofacial Research/NIH/DHHS	PAR-25-164	07-Sep-2025	Not Specified

	Synopsis	NIDCR announces its interest in encouraging state-of-the-art, systematic research approaches to determine mechanisms underlying the ability or inability of the immune system to dynamically maintain its functional role against internal and external perturbations, and to examine immune mechanisms of protection against recurrence of chronic inflammation in response to infectious and autoimmune diseases of dental, oral, and craniofacial (DOC) tissues. The expectation is that new knowledge derived from this research will facilitate development of novel, personalized immunomodulatory-based therapies that shift the balance between degenerative and regenerative processes toward protection against episodic recurrence and preventative disease management in a patient-specific manner across the lifespan.

Synopsis		The purpose of this notice of funding opportunity is to invite Institutional Network Awards (U2C-TL1) to cultivate a highly integrated cohort of trainees and early career investigators and to develop career development resources to accelerate kidney, urologic, and hematologic research. To maximize integration and promote a true trainee community, Institutions are invited to submit a single, unified U2C-TL1 application to engage, recruit, prepare, and sustain the next generation of scientists able to contribute to advancing research in kidney, urology, and hematology. Applications representing multiple institutions within a single metropolitan area are strongly encouraged (see Section III.3). Successful awardees are expected to relinquish all active T32s supported by the NIDDK, Division of Kidney, Urologic, and Hematologic Diseases (KUH) at the time of the U2C-TL1 award.

These priorities were most recently outlined by the NIH Office of AIDS Research (OAR) in NOT-OD-20-018, UPDATE: NIH HIV/AIDS Research Priorities and Guidelines for Determining HIV/AIDS Funding. Potential topics could address multiple overarching priorities. These include elucidation of unique pathophysiological mechanisms contributing to HIV comorbidities, coinfections, and complications (CCCs) affecting organs, tissues, and processes within the mission of the NIDDK. Likewise, interrogations into biological mechanisms underlying HIV reservoirs in NIDDK-relevant tissues are important for developing strategies for sustained viral suppression or elimination of HIV from the body. Finally, health-impeding social determinants of health may affect CCCs or viral reservoirs within NIDDK's mission through multiple pathways.</div>

Deadline Dates (ALL) 07-Sep-2025 , 05-Oct-2025 , 07-Jan-2026 , 05-Feb-2026 , 07-May-2026

Synopsis This Funding Opportunity Announcement encourages the submission of pilot and feasibility clinical trials conducted in humans that will lay the foundation for larger clinical trials related to the prevention and/or treatment of diseases and conditions within the mission of NIDDK. The program will support small, short-term proof-of-concept clinical trials in humans to acquire preliminary data regarding the effects of the intervention, as well as feasibility data related to recruitment and retention, and study conduct. Applications for clinical trials submitted under this FOA should have clearly described aims and objectives, and have a high likelihood that the trial findings will lead to more definitive, hypothesis-driven trials to improve understanding, diagnosis, prevention or treatment of the diseases studied and have the potential to impact clinical practice and/or public health. Preliminary data regarding intervention efficacy are not required.

Synopsis	The purpose of this Funding Opportunity Announcement (FOA) is to provide support for new investigators from diverse backgrounds, including from groups nationally underrepresented in biomedical, clinical, behavioral and social sciences research, to conduct small research projects in the scientific mission areas of the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK), the National Human Genome Research Institute (NHGRI) or the National Institute of Biomedical Imaging and Bioengineering (NIBIB). New investigators at the time of award under this FOA will have had less than \$125,000 direct costs of combined research funding (excluding NIH training and NIH career awards). This R21 will support small research projects that can be carried out in a short period of time with limited resources and seeks to facilitate transition to research independence. The R21 grant mechanism supports different types of projects including pilot and feasibility studies;

	Synopsis	The National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK) announces a program that provides NIDDK-supported K01, K08, K23, and K25 recipients the opportunity to apply for Small Grant (R03) support during the latter years of the award period of their K award. Through the use of this mechanism, the NIDDK is seeking to enhance the capability of its K01, K08, K23, and K25 award recipients to conduct research as they complete their transition to fully independent investigator status. The R03 grant mechanism supports different types of projects, including pilot and feasibility studies; secondary analysis of existing data; small, self-contained research projects; development of research methodology; and development of new research technology. The R03 is, therefore, intended to support research projects that can be carried out in a short period of time with limited resources and that may provide preliminary data to support a subsequent R01, or equivalent, application. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

	Synopsis	<p>The goal of the Bridges to the Doctorate Research Training Program is to promote broad participation in the biomedical research workforce by strengthening research training environments and expanding the pool of well-trained master's students who transition to and complete biomedical Ph.Ds. Specifically, this funding announcement provides support to eligible, domestic organizations to develop and implement effective, evidence-informed approaches to biomedical graduate training and mentoring to support the development of a biomedical research workforce that will benefit from the full range of perspectives, experiences and backgrounds needed to advance discovery. NIGMS expects organizations to engage in outreach and recruitment activities to encourage individuals from underrepresented groups to participate in the program. The proposed research training programs will incorporate didactic, research, and career development elements to prepare trainees for careers that will have a significant impact on the health-related research needs of the nation. This program requires strong partnerships between at least two postsecondary educational organizations: one that supports training at the master's degree level (Master's-Training Organization), and a separate organization that supports biomedical Ph.D. training (Ph.D.-Training Organization). Eligible organizations for these partnerships include: Master's Training Organization: An organization where the highest biomedically-related research degree offered is a master's degree, OR An organization that is a Historically Black Colleges and University (HBCU) or a Tribally Controlled Colleges and University (TCCU), including those that offer biomedical Ph.Ds. Ph.D.-Training Organization: An organization that grants its own biomedical Ph.Ds. This Notice of Funding Opportunity (NOFO) does not allow appointed Trainees to lead an independent clinical trial, but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor.</p>

	Synopsis	The goal of the Medical Scientist Training Program (MSTP) is to develop a diverse pool of well-trained clinician-scientist leaders available to address the nation’s biomedical research needs. Specifically, this funding announcement provides support to eligible, domestic organizations to develop and implement effective, evidence-informed approaches to dual-degree training and mentoring that will keep pace with the rapid evolution of the biomedical research enterprise and lead to the completion of both a clinical degree (for example, M.D., D.O., D.V.M., D.D.S., Pharm.D., etc.) and a research doctorate degree (Ph.D.). With the dual qualifications of a rigorous scientist and clinician, graduates will be equipped with the skills to develop research programs that accelerate the translation of research advances to the understanding, detection, treatment, and prevention of human disease, and to lead the advancement of biomedical research. Areas of particular importance to NIGMS are optimizing training efficiency, fostering the persistence of alumni in research careers, and enhancing the diversity of the clinician-scientist workforce. NIGMS expects that the proposed research training program will incorporate didactic, research, mentoring and career development elements to prepare trainees for careers that will have a significant impact on the health-related research needs of the nation. This Funding Opportunity Announcement (FOA) does not allow appointed Trainees to lead an independent clinical trial but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor.

	Deadline Dates (ALL)	07-Sep-2025 , 05-Oct-2025 , 07-Jan-2026 , 05-Feb-2026 , 07-May-2026 , 05-Jun-2026 , 07-Sep-2026 , 05-Oct-2026 , 07-Jan-2027 , 05-Feb-2027 , 07-May-2027 , 05-Jun-2027 , 07-Sep-2027 , 05-Oct-2027 , 07-Jan-2028			
	Synopsis	<p>This Funding Opportunity Announcement (FOA) supports projects relevant to the NIGMS mission or those of other NIH institutes or Centers (ICs) participating in the FOA that focus solely on the development of technologies with the potential to enable acquisition of biomedical knowledge. Projects should be justified in terms of technical innovation and utility of such technical innovation for impacting future biomedical research. Outcomes or products of the proposed project should significantly advance the current state of the art and be sufficiently characterized for application in addressing a broad range of biomedical research questions. These outcomes may include, but are not limited to: laboratory instruments and other devices, algorithms and software, chemical reagents and processes, biological molecules or systems that have been modified by human intervention to become research tools. The goal of this FOA is to support the development of technologies with demonstrated proof-of-concept that have remaining significant technical challenges to full implementation and broad utility. As such, applications should not propose to test specific biological questions. Applications proposing to test specific biological questions are not responsive to this FOA and will be administratively withdrawn without review. Applications with a focus on optimization, hardening, or obvious extrapolations of established technology will be a lower priority for funding.</p>			
125765	Academic Research Enhancement Award for Undergraduate-Focused Institutions (R15 Clinical Trial Not Allowed)	National Institute of General Medical Sciences/NIH/DHHS	PAR-25-134	07-Sep-2025	375,000 USD

	Synopsis	<p>The purpose of the Maximizing Opportunities for Scientific and Academic Independent Careers (MOSAIC) program is to support a cohort of early career, independent investigators from diverse backgrounds (for example, individuals from underrepresented groups) conducting research in NIH mission areas. The program has two components: an individual career transition award for postdoctoral scholars (K99/R00) and a research education cooperative agreement (UE5) awarded to organizations to provide these scholars with additional mentoring, networking and professional development activities to support their transition to and success in independent, tenure-track or equivalent research-intensive faculty careers. The MOSAIC program supports NIH's efforts to develop a biomedical research workforce that will benefit from the full range of perspectives, experiences and backgrounds needed to advance discovery. The goal of the MOSAIC Postdoctoral Career Transition Award to Promote Diversity (K99/R00) program is to facilitate a timely transition of promising postdoctoral researchers from diverse backgrounds from their mentored postdoctoral research positions to independent, tenure-track or equivalent research-intensive faculty positions. The program is designed to support postdoctoral researchers who have demonstrated meaningful contributions and proposed compelling future plans to promote broad participation in the biomedical research workforce, such as activities that promote inclusive, supportive, and accessible biomedical research environments that support the success of trainees and scientists from all backgrounds, including individuals from underrepresented groups. This Notice of Funding Opportunity (NOFO) is designed specifically to support candidates proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Candidates seeking support through this NOFO are permitted to propose a research experience in a clinical trial led by a mentor or co-mentor. Candidates proposing a clinical trial or an ancillary clinical trial as lead investigator, should</p>

	Deadline Dates (ALL)	07-Sep-2025 , 10-Oct-2025 , 07-Jan-2026 , 13-Feb-2026 , 07-May-2026 , 15-Jun-2026 , 07-Sep-2026 , 14-Oct-2026 , 07-Jan-2027 , 11-Feb-2027 , 07-May-2027 , 11-Jun-2027 , 07-Sep-2027 , 08-Oct-2027 , 07-Jan-2028			
	Synopsis	<p>The purpose of the Advancing Research Careers (ARC) program is to support cohorts of promising, late-stage graduate students from diverse backgrounds pursuing research training in NIH mission areas. The program has two components: an individual predoctoral-to-postdoctoral transition award (F99/K00) and a research education cooperative agreement (UE5) awarded to organizations to provide F99/K00 fellows with additional mentoring, networking and professional development activities to support their transition to and success in mentored postdoctoral research positions. The ARC program supports NIH's efforts to develop a biomedical research workforce that will benefit from the full range of perspectives, experiences and backgrounds needed to advance discovery. The ARC Predoctoral to Postdoctoral Transition Award to Promote Diversity (F99/K00) is a two-phase award that will provide support for promising late-stage graduate students from diverse backgrounds pursuing research related to the mission areas of participating NIH Institutes, Centers and Offices (ICOs), to complete their doctoral research training (F99 phase) and transition into and succeed in postdoctoral biomedical research and career development opportunities (K00 phase). The program also is designed to support predoctoral researchers who have, appropriate to their career stage, demonstrated contributions and propose meaningful plans to promote broad participation in the biomedical research workforce. It is anticipated that completion of this phased award program will position ARC scholars to advance in impactful careers in the biomedical research workforce that typically require postdoctoral training (for example, academic research and teaching at a range of organization types, industry, or government research). This Notice of Funding Opportunity (NOFO) does not allow candidates to propose to lead an independent clinical trial, but does allow candidates to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>

	Synopsis	The overarching goal of this Notice of Funding Opportunity (NOFO) is to support the development and validation of screening assays for the discovery of validated hits that can be used in future drug discovery/development efforts for identifying potential drug candidates for the treatment of mental illness. For purposes of this initiative, a “hit” is defined as a compound that has the desired activity in a compound screen and whose activity is confirmed upon retesting in orthogonal assays. Stages of discovery research covered by this NOFO include 1) assay development; 2) primary screen implementation to identify initial screening hits (high throughput target-focused screens, or moderate throughput screens); and 3) hit validation using a series of assays and initial medicinal chemistry inspection to prioritize the hit set.

	Synopsis	<p>The goal of this Funding Opportunity Announcement (FOA) is to identify, in animals, in vivo neurophysiological and behavioral measures for use as assays in the early screening phase of treatment development. This FOA will support efforts to optimize and evaluate measures of neurophysiological and behavioral processes that may serve as pharmacokinetic/pharmacodynamic (PK/PD) markers of neural processes of clinical interest based on available knowledge of the neurobiology of mental illnesses. The screening assays developed from this FOA are expected to build upon systems neurobiology and clinical neuroscience to enhance the scientific value of preclinical animal data contributing to a therapeutic development pipeline in which treatment candidates and therapeutic targets can be evaluated for their ability to impact neurobiological mechanisms of potential clinical relevance to mental illnesses. The objectives of this FOA will be accomplished by supporting basic neuroscience aimed at improving the efficiency and scientific value of the therapeutic development pipeline by advancing the discovery of in vivo physiological and behavioral measures reflecting circuit engagement as tools for early phase target validation and therapeutic screening for mental illness treatment development. The efforts supported by this initiative focus on measures in animals as a first step in generating translational assay measures that are adaptable across early therapeutic screens in animals to evaluation in humans. The FOA may be considered a prequel to build a suite of assays that are evaluated in future projects for coherence of assay performance between the preclinical species and healthy humans. In summary, this FOA will support efforts to improve the tool kit of assays available for early phase testing of novel therapeutic agents by incorporating measures proximal to neural systems that impact mental health.</p>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	NIMH seeks applications for pilot projects to evaluate the preliminary effectiveness of therapeutic and service delivery interventions for the post-acute management of mental health conditions that are matched to the stage of illness in terms of both their focus (e.g., consolidating and maintaining gains from initial treatment, managing residual symptoms/impairment, preventing relapse, promoting adherence and appropriate service use) and intensity/burden. In this pilot phase of effectiveness research, the trial should be designed to evaluate the feasibility, tolerability, acceptability, safety, and potential effectiveness of the approach; to address whether the intervention engages the target(s)/mechanisms(s) presumed to underlie the intervention effects; and to obtain preliminary data needed as a pre-requisite to a larger-scale effectiveness trial (e.g., comparative effectiveness study, practical trial) designed to definitely test the effectiveness of interventions to improve post-acute outcomes. This notice of funding opportunity (NOFO) supports pilot research to evaluate the feasibility, tolerability, acceptability, safety, and preliminary indications of effectiveness of post-acute phase intervention approaches, to generate the preliminary data needed as a prerequisite to well powered effectiveness trials, and to inform the design of definitive effectiveness trials. Support for fully-powered, definitive effectiveness studies focused on post-acute phase interventions is provided via the R01 NOFO, PAR-25-207.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	This notice of funding opportunity (NOFO) is a call to action in response to the youth mental health crisis in the United States. NIMH seeks applications that will study methods to increase access to, and quality of, empirically-supported practices for youth mental health. Applications may address research related to: optimizing assessment, intervention and service strategies; overcoming challenges related to workforce shortages and waitlists for treatment; integration of treatment and preventive interventions into settings where youth are most likely to be identified as needing care (e.g., schools, pediatric medicine, community organizations, social services, and juvenile justice), and service interventions that address systemic barriers to access and quality of mental health care (e.g., structural, policy, organizational, value in terms of cost/financing, management).			
128944	Navigator Emergency Department Diversion Models for Non-Urgent Mental Health Concerns (R01 Clinical Trial Required)	National Institute of Mental Health/NIH/DHHS	PAR-25-289	05-Sep-2025 [Optional][LOI/Pre-App]	Not Specified

	Deadline Dates (ALL)	05-Sep-2025 [Optional][LOI/Pre-App], 05-Oct-2025 , 06-Jan-2026 [Optional][LOI/Pre-App], 05-Feb-2026 , 06-May-2026 [Optional][LOI/Pre-App], 05-Jun-2026 , 05-Sep-2026 [Optional][LOI/Pre-App], 05-Oct-2026 , 06-Jan-2027 [Optional][LOI/Pre-App], 05-Feb-2027 , 06-May-2027 [Optional][LOI/Pre-App], 05-Jun-2027 , 05-Sep-2027 [Optional][LOI/Pre-App], 05-Oct-2027			
	Synopsis	The purpose of this notice of funding opportunity (NOFO) is to encourage research applications that test the effectiveness, implementation, and optimization of patient navigation Emergency Department (ED) diversion models for non-urgent youth mental health problems. A non-urgent ED visit is that in which a delay of several hours would not increase the potential for an adverse outcome to occur. For the purposes of this NOFO, NIMH defines a patient navigation model as an evidence-based intervention that is delivered by a mental health provider, an allied provider such as a nurse, or a lay provider (e.g., peer, community health worker) whose role is to (a) utilize triage tools to identify mental health acuity, (b) provide emotional support and build mental health knowledge among caregivers, (c) facilitate linkages to mental health services and additional resources as needed to support the family, and (d) address barriers to help-seeking. This NOFO is for projects for which there are preliminary data. Support for pilot studies is provided through a companion NOFO that utilizes the R34 mechanism: PAR-25-288 Planning Grant (R34 Clinical Trial Required).

Invasive neural recordings provide an unparalleled window into the human brain to explore the neural circuitry and neural dynamics underlying complex moods, emotions, cognitive functions, and behaviors with high spatial and temporal resolution. Additionally, the ability to stimulate, via the same electrodes, allows for direct causal tests by modulating network dynamics. This FOA aims to target a gap in the scientific knowledge of neural circuit function related to mental health disorders. Researchers should target specific questions suited to invasive recording modalities that have high translational potential. Development of new therapies is outside the scope of this FOA, though development of novel tools/methods to enable relevant mental health studies is encouraged. This NOFO uses the R01 grant mechanism, encouraging longer-term projects, whereas its companion R21 NOFO, PAR-25-291, seeks grant applications encouraging shorter, higher-risk studies with little (or no) preliminary data.</div>

	<p>Synopsis</p> <p>This Notice of Funding Announcement (NOFO) solicits exploratory/developmental research applications within the learning health care framework to support adoption, implementation, sustainability, and continuous improvement of evidence-based practices in outpatient mental health and substance use treatment systems. These settings could include, but are not limited to, Certified Community Behavioral Health Clinics (CCBHCs) funded through the Substance Abuse and Mental Health Services Administration (SAMHSA) expansion grant program and CCBHCs participating in their states' Section 223 CCBHC Medicaid demonstration program, or as a part of independent state programs where the CCBHCs are meeting the federal CCBHC certification criteria. This NOFO requires active collaboration between behavioral health researchers and community behavioral health partners across all phases of the research process. Studies that are co-designed between community clinic staff/service users and health services researchers may focus on (1) identifying subgroups within the population of individuals served by CCBHCs with unique needs, including health disparities experienced by people from racial and ethnic minority groups or underserved communities; (2) workforce development strategies, including new approaches to train providers who vary in terms of prior experience, expertise and skills; (3) developing and testing tools to promote measurement-based treatment; (4) hybrid effectiveness-implementation trials aimed at implementing and improving evidence-based prevention, treatment, or services delivery approaches in real-world settings; and (5) research to establish and/or expand 988 crisis response services within CCBHC settings.</p>

	<p>mechanisms of action or neuromodulatory device-based interventions for the treatment of symptoms or domains of altered functions in individuals with mental illness (e.g., schizophrenia, depression, autism, obsessive compulsive disorder, anxiety, bipolar disorder). Early intervention studies are also encouraged where symptoms of a disorder have been identified in subjects (a prodromal phase) prior to full diagnostic criteria being met. Ultimately, this NOFO is intended to support evaluation of pharmacologic or neuromodulatory device-based interventions using a protocol design where the presumed mechanism of action of the intervention is adequately tested, to provide meaningful information where target modulation yields a well-controlled, dose-dependent neurophysiological/clinical/behavioral effect. Pediatric, adult, and geriatric-focused interventions are appropriate for this NOFO. The R61/R33 NOFOs are intended to support biphasic high-risk applications. Support for a single phased award that does not need the developmental (R61) phase is available in the companion R33, PAR-25-183. Applicants pursuing other stages of the clinical trial pipeline should consider one of the companion NOFOs listed above.</p>

	Synopsis	<p>NIMH solicits clinical trial applications through a series of notice of funding opportunities (NOFOs) that cover the intervention development pipeline, from first-in-human, early testing of new interventions, confirmatory efficacy trials, through to effectiveness trials. The purpose of this NOFO is to encourage pilot research developing and testing innovative psychosocial intervention approaches in which the target and/or intervention strategy is novel. Consistent with NIMH's experimental therapeutics approach, this NOFO is intended to speed the translation of emergent research on mechanisms and processes underlying mental disorders into promising novel psychosocial preventative or therapeutic interventions. Targets may include, but are not limited to, potentially modifiable behavioral, cognitive, affective, and/or interpersonal factors or processes, neural circuits or neural activity subserving specific behaviors or cognitive processes, and/or other neurobiological mechanisms. Novel psychosocial interventions may be standalone interventions or novel augmentations to efficacious</p>

	<p>interventions for which there is an empirical rationale by which the augmentation (and corresponding target) is expected to substantially enhance outcomes. Support will be provided for up to two years (R61 phase) for preliminary milestone-driven testing of a novel intervention's impact on a target process or mechanism associated with mental disorder risk, causation, or maintenance (target engagement). Up to 3 years of additional support (R33 phase) will be provided for studies with findings that meet the "go/no-go" milestones embedded in the R61 phase. The R33 phase is intended to support the replication of target engagement and to test whether engaging the intervention target/mechanism mediates changes in clinical outcomes. Ultimately, trials must be designed so that results, whether positive or negative, will provide information of high scientific utility and will support "go/no-go" decisions about further development and/or testing of the intervention. Applicants pursuing other stages of the clinical trial pipeline should consider one of the companion NOFOs listed above.</p>

This NOFO complements NIMH's suite of clinical trial funding opportunities by supporting milestone-driven feasibility and infrastructure development (R61) research followed by well-powered clinical trials (R33) to test the effectiveness of system interventions or strategies that improve the organization, delivery, coordination, and outcomes of mental health care for priority populations. System interventions - which may span, for example, structural, policy, and organizational domains - attend to issues about the access, equity, engagement/utilization, value (cost/financing), management, or quality and safety of mental health services, with the goal of improved care processes and clinical, functional, or population level outcomes. Accordingly, the focus of system interventions may include multiple factors/levels related to care delivered within or across a variety of care settings, such as health systems and organizations, mental health and community clinics, schools, and social welfare or justice systems. Projects may test the impact of policies and practices, interventions to facilitate care transitions and continuity across settings, and interventions to improve linkages/coordination across systems. Researchers will have up to two years in the R61 phase to demonstrate feasibility and adequate infrastructure to justify conducting the main trial (R33). Applicants pursuing other stages of intervention development and testing should refer to companion NOFOs listed at Support for Clinical Trials at NIMH.</p>

	<p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 15-Sep-2025 [Optional][LOI/Pre-App], 15-Oct-2025 , 14-Jan-2026 [Optional][LOI/Pre-App], 13-Feb-2026 , 16-May-2026 [Optional][LOI/Pre-App], 15-Jun-2026 , 15-Sep-2026 [Optional][LOI/Pre-App], 15-Oct-2026 , 18-Jan-2027 [Optional][LOI/Pre-App], 17-Feb-2027 , 16-May-2027 [Optional][LOI/Pre-App], 15-Jun-2027 , 15-Sep-2027 [Optional][LOI/Pre-App], 15-Oct-2027</p> <p>Synopsis NIMH solicits clinical trial applications through a series of notice of funding opportunities (NOFOs) that cover the intervention development pipeline, from first-in-human, early testing of new interventions, confirmatory efficacy trials, through to effectiveness trials. The purpose of this NOFO is to encourage cooperative agreement applications to support early stage clinical trials of novel mechanism of action investigational drugs or novel neuromodulatory devices for the treatment of psychiatric disorders in areas of unmet medical need. The NOFO will support milestone-driven early stage trials, including First-in-human (FIH), Phase Ib, Phase II/PoC and early feasibility studies (EFS), in pediatric and adult populations. These studies are designed to objectively and dose dependently assess target engagement in the central nervous system (CNS), along with safety and tolerability. Phase II/PoC studies additionally must evaluate the drug's/device's impact on clinically relevant physiological systems (functional measures) and clinical indicators of effect. The overall objective of this NOFO is to facilitate rapid collection of data to "de-risk" novel mechanism of action investigational drugs, novel drugs for use in pediatric populations with psychiatric disorders, and devices or combination treatments in order to attract private or other public funding (when appropriate) for further clinical development as Food and Drug Administration (FDA)-approved treatments. A key aspect of this NOFO is the formation of collaborative partnerships between the biomedical researchers and biotechnology or industry researchers to facilitate psychiatric drug or device development. This NOFO is designed for applicants seeking funding for cooperative agreements supporting early stage clinical trials as outlined above. Applicants pursuing other stages of the clinical trial pipeline or funding for clinical research not involving cooperative agreements should consider one of the companion NOFOs listed above.</p>

	<p>App], 17-Feb-2027 , 16-May-2027 [Optional][LOI/Pre-App], 15-Jun-2027 , 15-Sep-2027 [Optional][LOI/Pre-App], 15-Oct-2027</p> <p>NIMH solicits clinical trial applications through a series of notices of funding opportunities (NOFOs) that cover the intervention development pipeline, from first-in-human, early testing of new interventions, confirmatory efficacy trials, through to effectiveness trials. The purpose of this NOFO is to support confirmatory efficacy testing of non-pharmacological preventive and therapeutic interventions, and under certain conditions, selected pharmacological interventions for mental disorders in adults and children through an experimental therapeutics approach. Under this NOFO, trials must be designed so that results, whether positive or negative, will provide information of high scientific utility and will support "go/no-go" decisions about further development, effectiveness testing, or dissemination of the intervention. Interventions to be studied include, but are not limited to, behavioral, cognitive, interpersonal, and device-based (both invasive/surgically implanted as well as noninvasive/transcranial) approaches, or a combination thereof. Pharmacological interventions to be studied under this grant mechanism are expected to primarily focus on drugs approved for marketing by the FDA (for any indication). These will include medications off-patent which are undergoing development for a new mental health indication. Confirmatory efficacy trials studying monotherapy, combination treatments, and stepped approaches, including multiple treatment modalities, may be supported. Interventions appropriate for efficacy testing must be based on a compelling scientific rationale, previous demonstration that the intervention engages and alters the hypothesized mechanism of action (target), a preliminary efficacy signal, and must address an unmet therapeutic need. Support will be provided for a trial of the intervention's efficacy that includes measurement of the hypothesized mechanism of action and the relationship between change in the target mechanism and change in functional or clinical effects. Ultimately, this NOFO is intended to support a sufficiently-powered efficacy trial to determine the intervention's potential for significant clinical benefit. Applicants pursuing other stages of the clinical trial pipeline should consider one of the companion NOFOs listed above.</p>

	<p>Synopsis NIMH solicits clinical trial applications through a series of notice of funding opportunities (NOFOs) that cover the intervention development pipeline, from first-in-human, early testing of interventions, confirmatory efficacy trials, through to effectiveness trials. This NOFO seeks pilot hybrid effectiveness implementation research consistent with NIMH's priorities for: 1) refining and optimizing preventive and therapeutic interventions with previously demonstrated efficacy for use with broader target populations or for delivery routine care, school, community, or online settings, and 2) research on implementation strategies that support the delivery and sustainability of evidence supported interventions in accessible settings. This NOFO supports pilot research designed to generate the preliminary data needed as a prerequisite to a well powered clinical trial. This includes research designed to assess the feasibility, acceptability, safety, and fit of approach, and explore the impact of the approach on both the outcomes of interest and at least one hypothesized mechanism of action. Support for well powered hybrid effectiveness implementation studies is provided through separate NOFOs that are described on the NIMH Support for Clinical Trials web page.</p>

	Synopsis	<p>The purpose of this notice of funding opportunity (NOFO) is to encourage research applications that pilot test patient navigation Emergency Department (ED) diversion models for non-urgent mental health problems. A non-urgent ED visit is that for which a delay of several hours would not increase the potential for an adverse outcome to occur. For the purposes of this NOFO, NIMH defines a patient navigation model as an evidence-based intervention that is delivered by a mental health provider, an allied provider such as a nurse, or a lay provider (e.g., peer, community health worker) whose role is to (a) utilize triage tools to identify mental health acuity, (b) provide emotional support and build mental health knowledge amongst caregivers, c) facilitate linkages to mental health services and additional resources as needed to support the family, and (d) address barriers to help-seeking. This NOFO is for 1) established navigator models that have limited evidence and need pilot testing to detect a signal, and (2) development and pilot testing of components of navigator models. Support for larger-scale or fully powered studies is provided through a companion NOFO that utilizes the R01 mechanism: PAR-25-289 (R01 Clinical Trial Required).</p>

	<p>Contact Name Emily Caporello, Ph.D.</p> <p>Contact Telephone 301-496-1778</p> <p>Contact Email Emily.caporello@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 06-Aug-2025 [Optional][LOI/Pre-App], 05-Sep-2025 , 06-Dec-2025 [Optional][LOI/Pre-App], 05-Jan-2026 , 06-Mar-2026 [Optional][LOI/Pre-App], 05-Apr-2026 , 06-Aug-2026 [Optional][LOI/Pre-App], 05-Sep-2026 , 06-Dec-2026 [Optional][LOI/Pre-App], 05-Jan-2027 , 06-Mar-2027 [Optional][LOI/Pre-App], 05-Apr-2027</p> <p>Synopsis Some projects initiated with SBIR or STTR funding require considerable financing beyond the SBIR/STTR Phase II award to achieve commercialization. The development of medical biotechnology products is often impeded by a significant funding gap (known as the “Valley of Death”) between the end of the SBIR/STTR Phase II award and the commercialization stage. The goal of this NOFO is to assist applicants in pursuing the next appropriate milestone(s) necessary to advance a product/technology that requires Federal regulatory approval or to bring a complex research tool to market. This opportunity aims to facilitate the transition of previously funded SBIR and STTR Phase II projects to the commercialization stage by promoting partnerships between NINDS SBIR or STTR recipients and third-party investors and/or strategic partners in the Phase IIB competing renewal. Applicants are strongly encouraged to secure independent third-party funding throughout the Phase IIB project period. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).</p>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>The purpose of this notice of funding opportunity (NOFO) is to provide a vehicle for Small Business Concerns (SBCs) submitting Small Business Innovation Research (SBIR) grant applications for investigator-initiated exploratory clinical trials to the National Institute of Neurological Disorders and Stroke (NINDS). The projects must focus on products related to the mission and goals of the NINDS and may evaluate drugs, biologics, devices, or diagnostics, as well as surgical, behavioral or rehabilitation therapies. Plan for Enhancing Diverse Perspectives The NIH recognizes that diverse teams working together and capitalizing on innovative ideas and distinct perspectives outperform homogeneous teams. There are many benefits that flow from a diverse scientific workforce, including: fostering scientific innovation, enhancing global competitiveness, contributing to robust learning environments, improving the quality of the research, advancing the likelihood that underserved populations participate in, and benefit from research, and enhancing public trust. To support the best science, the NIH encourages inclusivity in research. Examples of structures that promote diverse perspectives include but are not limited to: Transdisciplinary research projects and collaborations among neuroscientists and researchers from fields such as computational biology, physics, engineering, mathematics, computer and data sciences, as well as bioethics. Engagement from different types of institutions and organizations (e.g., research-intensive, undergraduate-focused, minority-serving, community-based). Individual applications and partnerships that enhance geographic and regional heterogeneity. Investigators and teams composed of researchers at different career stages. Participation of individuals from diverse backgrounds, including groups traditionally underrepresented in the biomedical, behavioral, and clinical research workforce (see NOT-OD-20-031), such as underrepresented racial and ethnic groups, those with disabilities, those from disadvantaged backgrounds, and women. Opportunities to enhance the research environment to benefit early- and mid-career investigators. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

The program provides funding to develop and validate assays to support a distinct testing funnel and conduct screening efforts to identify and characterize potential therapeutic agents including small molecules, biologics, and natural products. Preliminary in vivo pharmacokinetic, pharmacodynamic, and efficacy studies may also be supported. The goal of this NOFO is to advance projects to the point where they meet the entry criteria for the Pain Therapeutics Development Program or other later-stage translational programs. This NOFO is part of the NIH Helping to End Addiction Long Term (HEAL) initiative to accelerate the discovery and preclinical development of safe and effective therapeutics to treat pain with little or no addiction liability.</p>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>The purpose of this award is to support outstanding scientific training of highly promising postdoctoral candidates with outstanding mentors. Candidates are eligible to apply for support from this program from ~12 months prior to the start of the proposed postdoctoral position to within 12 months (or 18 months for resubmissions) after starting in the proposed postdoctoral position. This NINDS F32 seeks to foster early, goal-directed planning and to encourage applications for bold and/or innovative projects by the candidate that have the potential for significant impact. Inclusion of preliminary data is strongly discouraged; rather, this F32 seeks innovative research ideas and thoughtful plans for training and mentorship that will facilitate the development of the postdoctoral fellow into an outstanding scientist. Applications are expected to incorporate strong training in quantitative reasoning and the quantitative principles of experimental design and analysis. Support by this program is limited to the first 4 years of a candidate's activity in a specific laboratory or research environment, so as to further encourage early, thoughtful planning and timely completion of "mentored training" within a particular lab or environment. This Notice of Funding Opportunity (NOFO) does not allow candidates to propose to lead an independent clinical trial, but does allow candidates to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>			
115920	NIH SIREN Neurologic Clinical Trials (UG3/UH3 - Clinical Trial Required)	National Institute of Neurological Disorders and Stroke/NIH/DHHS	PAR-25-049	07-Sep-2025 [Optional][LOI/Pre-App]	Not Specified

	Deadline Dates (ALL)	07-Sep-2025 [Optional][LOI/Pre-App], 07-Oct-2025 , 07-Jan-2026 [Optional][LOI/Pre-App], 06-Feb-2026			
	Synopsis	<p>This Notice of Funding Opportunity (NOFO) encourages applications for multi-center clinical trials focused on neurological emergencies. Successful applicants will collaborate and conduct the trial within the NIH SIREN Network. The NIH SIREN Clinical Coordinating Center (CCC) will work with the successful applicants to implement the proposed trial efficiently and the SIREN Data Coordinating Center (DCC) will provide statistical and data management support. The NIH SIREN hubs and their affiliated clinical sites will provide on-site implementation of the clinical protocols. Applicants do not need to be part of the existing SIREN infrastructure to apply under this NOFO. The NIH SIREN Network will also be uniquely poised to collaborate with other U.S. and international consortia necessary to conduct larger, definitive trials of promising interventions for neurological emergencies. Multi-center clinical trials in stroke treatment, recovery, or prevention supported by NINDS will be conducted in the NIH StrokeNet, and not within SIREN.</p>

	Synopsis	<p>The Joint NINDS/NIMH Exploratory Neuroscience Research Grant program supports exploratory and innovative research projects, which fall within the missions of the NINDS and NIMH. Awards will provide support for the early and conceptual stages of projects. These studies often assess the feasibility of a novel avenue of investigation and involve considerable risk, but have the potential to bring about breakthroughs in the understanding of important areas of neuroscience, or to the development of novel techniques, agents, methodologies, or models, of high value to the neuroscience community. While this funding opportunity also accepts clinical trials, only applications proposing “mechanistic clinical trials or studies” (studying pathophysiology or mechanism of action of an intervention, but not safety or efficacy) or basic experimental studies with humans (BESH) will be supported. For information on NIH clinical trial definitions and the types of clinical trials that are within scope of this funding opportunity announcement refer to the NIH Definition of a Clinical Trial page and the Funding Opportunity Description, below, respectively.</p>

Deadline Dates (ALL)	07-Sep-2025 , 12-Oct-2025 , 07-Jan-2026 , 12-Feb-2026 , 07-May-2026 , 12-Jun-2026 , 07-Sep-2026 , 12-Oct-2026 , 07-Jan-2027 , 12-Feb-2027 , 07-May-2027 , 12-Jun-2027 , 07-Sep-2027
Synopsis	<p>The purpose of the Maximizing Opportunities for Scientific and Academic Independent Careers (MOSAIC) program is to support a cohort of early career, independent investigators from diverse backgrounds (for example, individuals from underrepresented groups) conducting research in NIH mission areas. The program has two components: an individual career transition award for postdoctoral scholars (K99/R00) and a research education cooperative agreement (UE5) awarded to organizations to provide these scholars with additional mentoring, networking and professional development activities to support their transition to and success in independent, tenure-track or equivalent research-intensive faculty careers. The MOSAIC program supports NIH's efforts to develop a biomedical research workforce that will benefit from the full range of perspectives, experiences and backgrounds needed to advance discovery. The goal of the MOSAIC Postdoctoral Career Transition Award to Promote Diversity (K99/R00) program is to facilitate a timely transition of promising postdoctoral researchers from diverse backgrounds from their mentored postdoctoral research positions to independent, tenure-track or equivalent research-intensive faculty positions. The program is designed to support postdoctoral researchers who have demonstrated meaningful contributions and proposed compelling future plans to promote broad participation in the biomedical research workforce, such as activities that promote inclusive, supportive, and accessible biomedical research environments that support the success of trainees and scientists from all backgrounds, including individuals from underrepresented groups. This Notice of Funding Opportunity is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical</p>

Synopsis		The purpose of this Notice of Funding Opportunity (NOFO) is to promote the development of fit-for-purpose candidate biomarkers and composite biomarker that enable more efficient clinical trials advance therapeutic development or clinical practice help guide clinical care decisions. Specifically, the goal of this phased funding mechanism is to first identify or confirm candidate biomarker(s) or biomarker signatures using human samples and/or data, followed by an independent retrospective or prospective clinical study to conduct initial clinical validation of the biomarker/signature's clinical utility for one or two defined Context(s) of Use. In the first phase, applicants are expected to demonstrate that the biomarker acceptably identifies or predicts the concept of interest and may include optimization of the detection method using carefully standardized human samples or datasets. The overarching purpose of this initiative is to deliver candidate biomarkers or biomarker signatures that are ready for definitive analytical and clinical validation studies. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

117688	Synopsis	The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that encourage individuals from diverse backgrounds, including those from groups underrepresented in the biomedical and behavioral sciences, to pursue further studies or careers in research. To accomplish the stated over-arching goal, this NOFO will support educational activities with a primary focus on: Research Experiences Mentoring Activities

	Synopsis	This program offers institutions an opportunity to apply for additional trainee research slots to support eligible candidates under an existing T32 or T35 award when all regularly-awarded positions have been filled. The NIDCD administratively funds a supplemental slot designated specifically for a selected trainee - either predoctoral or postdoctoral - to an existing T32 or T35 award. That position remains a part of the T32 or T35 for as long as the named individual is a member of the training program. When the individual no longer receives support from the T32 or T35, the funds for the position are removed from the grant. To ensure an appropriate training experience, only predoctoral slots are considered for programs that exclusively support predoctoral training; the same applies to postdoctoral slots. Programs supporting both predoctoral and postdoctoral training may apply for either. NIDCD encourages institutions to recruit prospective predoctoral and postdoctoral students from diverse backgrounds to consider participating in this program, including but not limited to individuals from underrepresented groups, such as those from underrepresented racial and ethnic groups, individuals with disabilities and individuals from disadvantaged backgrounds. For more information, see NOT-OD-20-031 "Notice of NIH's Interest in Diversity".

	Synopsis	The purpose of the NIDCD Research Career Enhancement Award for Established Investigators (K18) program is to enable established, proven investigators to augment or redirect their research programs through the acquisition of new research skills to answer questions relevant to the hearing, balance, smell, taste, voice, speech and language sciences. This Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion NOFO. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a

	Synopsis	The National Institute on Deafness and Other Communication Disorders (NIDCD) is issuing this Notice of Special Interest (NOSI) to stimulate research in areas regarding the health of women within the scope of NIDCD's mission. NIDCD's mission is to conduct and support research and research training in the normal and disordered processes of hearing, balance, taste, smell, voice, speech, and language. As noted in the recently issued 2023–2027 NIDCD Strategic Plan (2023-2027 NIDCD Strategic Plan NIDCD), research projects to improve the health of women covering the lifespan are encouraged across all the NIDCD mission areas. These projects may include biological studies which may incorporate anatomical, structural, hormonal, or genetic aspects, behavioral traits, societal aspects, or healthcare related activities that may benefit a women's quality of life.

Deadline Dates (ALL)	07-Sep-2025 , 07-Jan-2026 , 07-May-2026 , 07-Sep-2026 , 07-Jan-2027 , 07-May-2027				
Synopsis	This notice of funding opportunity (NOFO) encourages formative research, intervention development, and pilot-testing of interventions for people who use drugs. Primary outcomes of interest include the feasibility, acceptability and safety of novel or adapted interventions that target HIV prevention, treatment or services research. Interventions here may include behavioral, social, or structural approaches, as well as combination biomedical and behavioral approaches that prevent the acquisition or transmission of HIV infection, or improve clinical outcomes for persons living with HIV. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

Synopsis	This notice of funding opportunity (NOFO) will support pilot, feasibility or exploratory research in priority areas in substance use epidemiology, prevention, and health services, including: 1) Research in response to sudden and severe emerging drug issues (e.g. the ability to look into a large and sudden spike in opioid or synthetic cannabinoid use/overdoses in a particular community); 2) Research in response to emerging trends and topics related to a change in federal, state, or local drug policy. The work proposed must be related to imminent policy change; 3) Research in response to unexpected and time-sensitive				

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

medical system issues (e.g. opportunities to understand addiction services in the evolving health care system); 4) Responses to unexpected and time-sensitive criminal or juvenile justice opportunities (e.g. new system and/or structural level changes) that relate to drug misuse and access and provision of health care service; 5) Research that examines the early implementation of new or newly changed federal, state, or local programs, policy, financing, or payment approaches related to substance use, substance use epidemiology, prevention, treatment, or recovery. Activities may include infrastructure-building partnerships among researchers and state or local organizations to address later implementation phases; 6) Research in response to natural disasters or newly emergent public health emergencies, to understand their impacts on drug markets, substance use epidemiology, prevention, treatment or recovery outcomes. For the purposes of this NOFO, "time-sensitive" is defined as in need of expedited review and funding in order to answer the scientific research question(s) posed (e.g. an imminent policy change will not allow for standard review and funding timeline). Applications whose aims can be accomplished with standard NIH submission, review, and award cycles will not be considered time-sensitive.

Deadline Dates (ALL)	07-Sep-2025 , 12-Oct-2025 , 07-Jan-2026 , 12-Feb-2026 , 07-May-2026 , 12-Jun-2026 , 07-Sep-2026 , 12-Oct-2026 , 07-Jan-2027 , 12-Feb-2027 , 07-May-2027
Synopsis	The purpose of the Mentored Quantitative Research Career Development Award (K25) is to attract to NIH-relevant research those investigators whose quantitative science and engineering research has thus far not been focused primarily on questions of health and disease. The K25 award will provide support and "protected time" for a period of supervised study and research for productive professionals with quantitative (e.g., mathematics, statistics, economics, computer science, imaging science, informatics, physics, chemistry) and engineering backgrounds to integrate their expertise with NIH-relevant research. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Under this NOFO

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
<p>applicants are permitted to propose a research experience in a clinical trial led by a mentor or co-mentor. Those proposing a clinical trial or an ancillary clinical trial as lead investigator, should apply to the companion NOFO (PA-24-192).</p>					
125230	Mentored Patient-Oriented Research Career Development Award (Parent K23 Independent Basic Experimental Studies with Humans Required)	National Institutes of Health/DHHS	PA-24-186	07-Sep-2025	Not Specified

This Parent Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion NOFO. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions.</p>

	<p>Deadline Dates (ALL) 17-Sep-2025 [Optional][LOI/Pre-App], 17-Oct-2025 , 15-Apr-2026 [Optional][LOI/Pre-App], 15-May-2026 , 18-Jan-2027 [Optional][LOI/Pre-App], 17-Feb-2027 , 18-Jan-2028 [Optional][LOI/Pre-App], 17-Feb-2028</p> <p>Synopsis The purpose of this Notice of Funding Opportunity (NOFO) is to solicit applications for exploratory and early-stage projects that focus on undruggable target classes (targets that cannot be engaged with high affinity through conventional means) within intractable human disease. Applicants will identify a human disease relevant undruggable target class and develop a method or agent that is selective for one or more targets within that target class. This NOFO is intended to jumpstart research that demonstrates innovative strategies to modulate targets that cannot be addressed by established therapeutic types, furthering the development of methods and/or agents selective for undruggable target classes.</p>				
131697	RFA-RM-25-001 -- NIH Director's Pioneer Award Program (DP1 Clinical Trial Optional)	National Institutes of Health/DHHS	RFA-RM-25-001	09-Sep-2025	3,500,000 USD
	<p>Contact Name Patricia Labosky, Ph.D.</p> <p>Contact Telephone</p> <p>Contact Email PioneerAwards@mail.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 09-Sep-2025</p> <p>Synopsis The NIH Director's Pioneer Award supports individual scientists of exceptional creativity who propose bold and highly innovative research projects with the potential to produce a major impact on broad, important areas relevant to the mission of NIH. To be considered pioneering, the proposed research must reflect substantially different scientific directions from those already being pursued in the investigator's research program or elsewhere. Applications in all topics relevant to the broad mission of NIH are welcome, including, but not limited to, topics in the behavioral, social, biomedical, applied, and formal sciences and topics that may involve basic, translational, or clinical research. The NIH Director's Pioneer Award is a component of the High-Risk, High-Reward Research (HRHR) Program of the NIH Common Fund.</p>				
131700	Support for Research Excellence (SuRE) Award (R16 Clinical Trial Not Allowed)	National Institutes of Health/DHHS	PAR-25-414	29-Sep-2025	400,000 USD

	Synopsis	The purpose of this Notice of Special Interest (NOSI) is to announce that the National Institute of Allergy and Infectious Diseases (NIAID), the National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS), the National Institute of Mental Health (NIMH), and the National Institute of Neurological Disorders and Stroke (NINDS), encourage applications to advance research activities relevant to the five strategic priorities identified in the recently released NIH Strategic Plan for Tickborne Disease Research: Improve fundamental knowledge of Tickborne Diseases (TBDs) to understand the host, vector, and pathogen factors that drive TBD pathogenesis and transmission. Elucidate the host immune mechanisms in response to and exploited by TBD pathogens. Advance research to improve the diagnosis of TBDs using both host- and pathogen-targeted approaches, including research for rapid diagnostics and multiplex platform approaches that detect multiple tickborne pathogens. Accelerate research to improve TBD prevention by supporting science to design, develop, and evaluate vaccines, vector control strategies, and other prevention approaches. Promote research to improve treatment for all forms of TBDs,			

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	including studies to develop effective therapies to treat symptoms that persist after TBD treatment, therapies for non-infectious TBDs, and new antimicrobials. Support tools and resources to advance research in understanding, preventing, diagnosing, and treating TBDs, including repositories, genomic resources, animal models, and preclinical services to aid the development and assessment of diagnostic, vaccine, and therapeutic candidates.

	Synopsis	This Funding Opportunity Announcement (FOA) encourages pilot and preliminary research in preparation for larger-scale services research effectiveness trials. Relevant trials may test a wide range of approaches, including interventions, practices, and policies designed to optimize access to, and the quality, effectiveness, affordability and utilization of drug, tobacco, or alcohol use disorder treatments and related services, as well as services for comorbid medical and mental disorder conditions. Relevant approaches may include both those that are novel, and those that are commonly used in practice but lack an evidence base. This FOA provides resources for assessing the feasibility, acceptability, and utility of these approaches, in addition to usual trial preparation activities. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

	<p>are in the early stages of establishing independent careers in tobacco regulatory research. The R03 grant mechanism supports different types of projects, including pilot and feasibility studies, secondary analysis of existing data, small, self-contained research projects, development of research methodology, and development of new research technology. Applicants are encouraged to conduct projects that ultimately have the potential to inform regulations on tobacco product manufacturing, distribution, and marketing. Research projects must address one or more High-Priority Research Topic(s) related to the regulatory authority of the Food and Drug Administration (FDA) Center for Tobacco Products (CTP) as mandated by the Family Smoking Prevention and Tobacco Control Act (FSPTCA), Public Law 111-31. The awards under this NOFO will be administered by NIH using funds made available through FDA CTP and the FSPTCA. Research results from this NOFO are expected to generate findings and data directly relevant to informing the FDA's regulation of the manufacture, distribution, and marketing of tobacco products to protect public health.</p>				
114675	Notice of Special Interest (NOSI): Optimization of Data Storage and Utilization for the Sequence Read Archive (SRA)	National Institutes of Health/DHHS	NOT-GM-23-015	08-Aug-2025	Not Specified

	<p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Sep-2025 , 25-Oct-2025 , 07-Jan-2026 , 25-Feb-2026 , 07-May-2026 , 25-Jun-2026 , 07-Sep-2026 , 25-Oct-2026 , 07-Jan-2027 , 25-Feb-2027 , 07-May-2027 , 25-Jun-2027 , 07-Sep-2027 , 25-Oct-2027 , 07-Jan-2028</p> <p>Synopsis The purpose of the Research Enhancement Award Program (REAP) for Health Professional Schools and Graduate Schools is to support small scale research grants at institutions that do not receive substantial funding from the NIH, with an emphasis on providing biomedical research experiences primarily for health professional, undergraduate and graduate students and enhancing the research environment at applicant institutions. Eligible institutions must award baccalaureate or advanced science degrees and have received no more than \$6 million dollars per year of NIH support (in both direct and F&A/indirect costs) in 4 of the last 7 fiscal years. For institutions composed of multiple schools and colleges, the \$6 million funding limit is based on the amount of NIH funding received by all the schools and colleges within the institution as a whole. Help determining the Organization Funding Level can be found here or https://grants.nih.gov/grants/funding/r15.htm.</p>				
115095	Mentored Career Development Program for Early Stage Investigators Using Nonhuman Primate Research Models (K01 Independent Clinical Trial Not Allowed)	National Institutes of Health/DHHS	PAR-23-073	07-Sep-2025	Not Specified
	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email AITraininghelpdesk@niaid.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Sep-2025 , 12-Oct-2025 , 07-Jan-2026</p> <p>Synopsis The purpose of this Funding Opportunity Announcement (FOA) is to provide early-stage investigators with support and “protected time” (up to five years) for intensive, research-focused career development program activities under the guidance of an experienced mentorship team with expertise in both the preclinical application of nonhuman primate (NHP) models and in translation of the results from such studies to clinical application. The focus of this program is to increase the number of highly skilled scientists using NHP models to address complex translational biomedical research designed to foster translation of outcomes into the clinic. The expectation is that through this sustained period of research career development and training, awardees will launch independent research careers and become competitive for new research project grant (e.g., R01) funding. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary study to a clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor.</p>

Applications in all topics relevant to the broad mission of NIH are encouraged, including, but not limited to, behavioral, social, biomedical, applied, and formal sciences and topics that may involve basic, translational, or clinical research. No preliminary data are required. Projects must clearly demonstrate, based on the strength of the logic, a compelling potential to produce a major impact in a broad area of relevance to the NIH. The NIH Director's Transformative Research Award is a component of the High-Risk, High-Reward Research (HRHR) Program of the NIH Common Fund.</p> </div> </div>				
112267	Notice of Special Interest (NOSI): Advancing Research on Early Pregnancy Loss	National Institutes of Health/DHHS	NOT-HD-22-026	07-Sep-2025	Not Specified
	<div> <div>Contact Name</div> <div>Contact Telephone</div> <div>Contact Email</div> <div>Sponsor Website</div> <div>Program URL</div> <div>Deadline Dates (ALL)</div> <div>Synopsis</div> </div> <div> <div>Clara Cheng, PhD</div> <div>301-435-6992</div> <div>clara.cheng@nih.gov</div> <div></div> <div>Link to program URL</div> <div>07-Sep-2025</div> <div> <p>Early Pregnancy loss (EPL), defined as a pregnancy loss occurring up to 20 weeks gestation, is a very common pregnancy complication, occurring in 12-15% of clinically recognized pregnancies, with increased prevalence associated with increasing maternal age. The use of highly sensitive hCG assays allows the detection of pregnancy earlier in gestation than the time of clinical recognition, and gives an even higher estimated loss of 50-70% of conceptions prior to the second trimester. To achieve a successful pregnancy, a series of strict embryonic and maternal conditions must be met, that include high quality</p> </div> </div>				

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>embryos, favorable conditions for embryo implantation, receptive maternal endometrium and optimal uterine environment to sustain the conceptus to term. In addition, maternal immune tolerance and hormonal factors play a critical role. While approximately half of all cases of EPL appear to be due to embryonic aneuploidy, very little is known about the physiologic and pathophysiologic processes that underlie non-aneuploid EPL. As a result, there is also a lack of understanding for the underlying causes of recurrent pregnancy loss (RPL). This NOSI seeks to address these critical knowledge gaps by encouraging basic, translational and clinical studies on biological processes that may uncover potential etiologies of EPL and RPL. This includes research to understand implantation mechanistically and identify a range of key factors, involved in implantation and placentation that are important for early pregnancy establishment, including abnormalities that contribute to sporadic EPL and recurrent pregnancy loss.</p>				
127139	Maximizing Opportunities for Scientific and Academic Independent Careers (MOSAIC) Postdoctoral Career Transition Award to Promote Diversity (K99/R00 - Independent Clinical Trial Required)	National Institutes of Health/DHHS	PAR-24-226	07-Sep-2025	Not Specified
	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email</p> <p>Sponsor Website</p> <p>Program URL</p> <p>Deadline Dates (ALL)</p> <p>Synopsis</p>	<p>Lanay M. The program has two components: an individual career transition award for postdoctoral scholars (K99/R00) and a research education cooperative agreement (UE5) awarded to organizations to provide these scholars with additional mentoring, networking and professional development activities to support their transition to and success in independent, tenure-track or equivalent research-intensive faculty careers. The MOSAIC program supports NIH's efforts to develop a biomedical research workforce that will benefit from the full range of perspectives, experiences and backgrounds needed to advance discovery. The goal of the MOSAIC Postdoctoral Career Transition Award to Promote Diversity (K99/R00) program is to facilitate a timely transition of promising postdoctoral researchers from diverse backgrounds from their mentored postdoctoral research positions to independent, tenure-track or equivalent research-intensive faculty positions. The program is designed to support postdoctoral researchers who have demonstrated meaningful contributions and proposed compelling future plans to promote broad participation in the</p>

	Synopsis	The National Library of Medicine (NLM) supports innovative research and development in biomedical informatics and data science. This funding opportunity focuses on biomedical discovery and data-powered health, integrating streams of complex and interconnected research outputs that can be translated into scientific insights, clinical care, public health practices, and personal wellness. The scope of NLM's interest in these research domains is broad, with emphasis on new and innovative methods and approaches to foster data driven discovery in the biomedical and clinical health sciences as well as domain-independent, scalable, and reusable/reproducible approaches to discovery, curation, analysis, organization, and management of health-related digital objects.			
124639	Utilizing Equipment to Study Environmental Extrinsic Factors and Enhance Rigor and Reproducibility of Animal Research (R24 Clinical Trials Not Allowed)	Office of Research Infrastructure Programs/NIH/DHHS	PAR-24-167	25-Sep-2025	1,600,000 USD

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	This Notice of Funding Opportunity (NOFO) invites eligible academic or research institutions to apply for funding support to purchase latest scientific equipment that will enhance and modernize research-supporting operations of existing shared biomedical research facilities. Targeted are laboratory research core facilities, animal research facilities, and other similar shared-use research spaces. The goal of this NOFO is to strengthen research-auxiliary activities of biomedical research facilities and to enhance the efficiency of their operations. The NOFO does not support the purchase of scientific research instruments or their components, nor components of building-level infrastructure equipment that indirectly support research activities.			
123616	Limited Competition: Specific Pathogen Free Macaque Colonies to Support HIV/AIDS Research (U42 Clinical Trial Not Allowed)	Office of Research Infrastructure Programs/NIH/DHHS	PAR-24-129	07-Sep-2025	Not Specified

	Program URL	Link to program URL			
	Deadline Dates (ALL)	07-Sep-2025 , 07-Jan-2026 , 07-May-2026 , 07-Sep-2026 , 07-Jan-2027			
	Synopsis	The purpose of this Notice of Funding Opportunity (NOFO) is to provide continuing support for specific pathogen-free (SPF) macaque colonies previously funded under the auspices of PAR-21-089 and PAR-18-669 that support Human Immunodeficiency Virus (HIV)/Acquired Immunodeficiency Syndrome (AIDS) research. Breeding colonies are essential to sustain appropriate SPF macaques for research related to HIV/AIDS. Pedigree SPF macaques are free of certain viruses, which may confound the results of HIV/AIDS-related investigations or present a risk to the personnel who care for the animals. The SPF macaques are genetically characterized for major histocompatibility complex (MHC) class I types, because MHC class I genotypes have large effects on macaque immune responses to Simian Immunodeficiency Virus (SIV) that can induce AIDS in nonhuman primates (NHPs) and on human immune responses to HIV.			
119606	Early Stage Investigator HIV/AIDS Research Using Nonhuman Primate (NHP) Models (R21 Clinical Trial Not Allowed)	Office of Research Infrastructure Programs/NIH/DHHS	PAR-25-165	07-Sep-2025	400,000 USD

Synopsis		This funding opportunity announcement (FOA) encourages grant applications that support the activities of the National Primate Research Centers (NPRCs). Nonhuman primates (NHPs) are most closely related to humans, both physiologically and genetically. Therefore, NHPs are critical animal models for basic and translational research aimed at understanding human biology, both in normal and diseased states. Proper husbandry and management of NHPs require specialized physical and intellectual resources, which are most effectively and economically provided in centralized primate centers, the resources of which are made available to investigators on a national basis. The NPRCs provide these resources to investigators/grantees who utilize NHPs in biomedical research and thereby complement and help enable the missions of the NIH Institutes and Centers.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>internationally competent US-based workforce trained in conducting and leading multi-team international collaboration. Any area funded by the National Science Foundation is eligible, particularly those addressing grand research challenges identified within research communities and/or by NSF. Successful proposals will demonstrate that the proposed activities will: 1) accelerate scientific research at a rate that would not be possible without concerted international cooperation in research planning; 2) make NoN members more competitive for research awards following the period of award; 3) recruit and foster a US-based diverse and internationally competent workforce trained in conducting and leading multi-team international collaboration. Proposals must include detailed plans for collaborative networking activities that will result in a synergy of effort across the entire NoN. The AccelNet Program has two tracks. The Design Track allows PIs to build on prior NSF research awards by providing time and resources for building capacity across teams to launch a synergistic international NoN. The Implementation Track allows PIs to build on prior research or networking awards, such as AccelNet Design or Research Coordination Networks (RCN) by providing time and resources to implement an international NoN. There are two phases to the Implementation Track. Phase 1 funding is for activities related exclusively to NoN activities and is open to all PIs, including but not limited to prior successful Design Track PIs. Phase 2 funding is for early concept research arising from Phase 1 activities and is only open to Phase 1 PIs who have identified a critical research gap during synergistic networking activities in the first 18-24 months of Phase 1 awards.</p>

	Synopsis	<p>Quantum Leap Challenge Institutes are large-scale interdisciplinary research projects motivated by major challenges at the frontiers of quantum information science and technology (QIST). Institutes are expected to catalyze breakthroughs on important problems underpinning QIST, for example in the focus areas of quantum computation, quantum communication, quantum simulation and/or quantum sensing. Successful institutes will coordinate a variety of approaches to specific scientific, technological, and educational goals in these fields, including multiple institutions and building upon multiple disciplines, as motivated by the science and engineering challenges. In so doing, Institutes will nurture a culture of discovery, provide education, training, and workforce development opportunities in the context of cutting-edge research, and demonstrate value-added from synergistic coordination within the institute and with the broader community. Partnerships, infrastructure, industry engagement, outreach, international collaboration, and new applications for QIST should be fostered by Institutes in support of their research, education, and coordination goals. The QLCI program can support awards to continue existing Quantum Leap Challenge Institutes or to establish and operate new Quantum Leap Challenge Institutes. In either case, proposers should follow the same guidance for Challenge Institute proposal preparation described in this solicitation. While this is a crosscutting program, proposals responding to this solicitation must be submitted to the Office of Strategic Initiatives (OSI) in the Directorate of Mathematical and Physical Sciences (MPS). They will subsequently be managed</p>

Deadline Dates (ALL)	08-Sep-2025 , 10-Nov-2025 , 12-Jan-2026 , 09-Mar-2026
Synopsis	The purpose of the NSF Smart and Connected Communities (S&CC) program solicitation is to accelerate the creation of novel intelligent technologies and concepts through high-risk/high-reward research that addresses major challenges and issues faced by communities across the US. A “smart and connected community” is defined as a community that synergistically integrates intelligent technologies with the natural and built environments and with the functions of civic institutions and organizations. Proposals submitted to the program should be designed to advance one or more of the following community priorities: economic opportunity and growth; safety and security; human and environmental health and wellness; accessibility of critical services and resources; and the overall quality of life for those who live, work, learn, or travel within the community. To meet the goals of the program, researchers should work with community stakeholders to identify and define challenges the community faces, using that interaction and input to generate high-impact, use-inspired, basic research that advances science and engineering.

advanced intelligent network systems that span the user-edge-core-cloud continuum. The program seeks to go beyond the current research portfolios within individual participating NSF directorates and partner organizations by simultaneously emphasizing gains in performance and capabilities without compromising resilience and interoperability across all layers of the networking protocol and computation stacks. Innovations are sought across the various aspects of next generation communications, networking, and computing systems. This program is a multisector effort led by the National Science Foundation (NSF), in partnership with several industry and international agency partners, and in cooperation with other U.S. Federal agencies. It recognizes the importance of advanced telecommunications as a key technology area. The program seeks to enhance U.S. competitiveness in advanced telecommunications technologies to establish itself as a global leader in both NextG wireless telecommunications and emerging potential NextG vertical industries, as well as address the need for skilled workforce and expertise in these technology areas. VINES expects to increase investments in foundational technology innovations and their translation while leveraging international eco-system partners to drive the principles of open and trustworthy networks. It seeks to fund collaborative research that transcends the traditional boundaries of individual disciplines or geographic boundaries to achieve the program goals.

	Synopsis	The Defense Advanced Research Projects Agency (DARPA) is soliciting innovative proposals that leverage a novel understanding of the enteric nervous system as well as emerging neuromodulation technologies to selectively target neurons in the small intestine and alter the body's stress response. The CoasterChase program aims to develop a multimodal, ingestible, sensing and stimulation platform for use in monitoring and modulating biomarkers of acute stress from within the small intestine. Proposed research should investigate innovative approaches that enable revolutionary advances in enteric neuromodulation and sensing, ingestible electronics, and modulation of the stress response. Specifically excluded is research that primarily results in evolutionary improvements to the existing state of practice. All responsible sources capable of satisfying the Government's needs may submit a proposal that shall be considered by DARPA. DARPA anticipates multiple awards with a total program funding up to \$25 Million, subject to the availability of funds. Proposed efforts should be appropriately scaled.

		<p>development, that is new as of the date of proposal submission; or any new application of an existing technology, process or method as of the proposal date. The Government may issue Amendments to this CSO during the Open Period to change or correct content, as needed. The Government may also issue Calls during the Open Period requesting targeted White Papers for a specific Objective, Focus Area, and/or capability. OCEA seeks innovative commercial solutions or new capabilities that fulfill OCEA requirements, close existing capability gaps, and/or offer technological advancements in meeting the Objectives and Focus Areas detailed in the CSO attachment. Eligibility. This CSO is a full and open acquisition. White Papers will be considered from all interested vendors, including small businesses and non-traditional contractors. Foreign participation is allowed as specified in the attachment. CSO STRUCTURE/EXPECTATIONS. All White Papers/Proposals shall be submitted in accordance with this CSO. White Papers and Proposals must be submitted to Contracting POCs only, as specified in the CSO attachment and within each Amendment or Call. Contractors are advised that the submittal of a White Paper or Proposal is not a promise or guarantee of award. The Government intends to review all White Papers/Proposals and reserves the right to award some, all, part, or none of a Contractor's proposal content. The Contracting POC for this CSO is: Kevin Adams Procuring Contracting Officer kevin.t.adams9.civ@mail.mil (301) 203-3553 STEPS. This CSO will follow a Two-Step process prior to any award. First Step - White Paper Submission. Contractors may submit White Papers, which will include a Cover Page, Technical/Management section and Rough Order of Magnitude, at any time throughout the Open Period upon initiation of this CSO. Multiple White Papers may be submitted, and all White Papers will be reviewed. While the Government does not intend to pay for White Papers submitted under Step 1, select Calls may provide for funding on a case-by-case basis. White Papers submitted in response to a Call will be accepted and evaluated as detailed within the individual Call. The Government will review submitted White Papers and each White Paper will be rated as "Highly Recommended," "Selectable" or "Not Selectable" based on Technical/Management and Price/Affordability. Second Step - Invitation to Propose. White Papers may result in an invitation to submit full Technical/Management and Price proposals via an Invitation to Propose (ItP). The ItP will detail all the terms and conditions for the</p>

		<p>"Innovative", as defined in DFARS 212.70, means any technology, process, application, or method, including research and development, which is new as of the date of proposal submission. This CSO seeks the best commercial approaches to meet various technology objectives of ACC. All items, technologies, and services acquired using this CSO will be treated as commercial items. The Government encourages white-paper proposals that span a wide spectrum of possible technical and business solutions in response to the specific technology topics listed in attachment 7 (of the included attachment). The Government reserves the right to award to any combination of proposals which offer the best overall value to the Government, and to oversee all processes and approaches once initiated. Awards of efforts as a result of this announcement will be in the form of FAR Part 12 contracts or other transactions (OT) as codified in 10 U.S.C. § 4022. Funding is not currently available for the topics provided in Attachment 7 (of the included attachment). Industry responses will be carefully reviewed and prioritized, with funding sought by ACC HQ to pursue innovative and optimal solutions. The price and affordability of proposed technologies will contribute to ACC's interest in pursuing proposed solutions. Any awards resulting from this CSO will be made based on the evaluation results outlined in the attached document. The Government reserves the right to fund all, some, one, or none of the proposals submitted; may elect to fund only part of a submitted proposal; and may incrementally fund any or all awards under this CSO. All awards are subject to the availability of funds. Questions regarding the administrative or technical content of this CSO and any white paper submissions (must be forwarded via email to ACCAMIC.MFT.CSO@us.af.mil.</p>

		(MOTIE) of the Republic of Korea (ROK). The BARI program addresses high risk basic research as an international collaboration. This research should attempt to provide the scientific foundation towards the design and development of future and ubiquitous information networks that rely on extreme-scale devices, distributed intelligence, and network complexity, and include cognitive and social concepts to inform the technological choices. The goal of this program is to produce significant scientific breakthroughs and knowledge that will be critical steps in enabling revolutions in communication and information technology on a large scale.			
131161	Rare Cancers Research Program--Concept Award	Department of the Army/Department of Defense	HT942525RCRPCA	22-Jul-2025 [LOI/Pre-App]	140,000 USD

	Deadline Dates (ALL)	22-Jul-2025 [LOI/Pre-App], 26-Aug-2025			
	Synopsis	<p>The fiscal year 2025 (FY25) Rare Cancers Research Program (RCRP) Concept Award (CA) supports highly innovative, untested, potentially groundbreaking novel concepts in rare cancers. This award mechanism supports high-risk studies that have the potential to reveal entirely new avenues for investigation in rare cancers. Applications must describe how the new idea will be innovative and present as a novel course of investigation in the field of rare cancers. Distinctive Features: Preliminary data are not required. Due to the blinded nature of the review process, identifying or making references to the Principal Investigator (PI), collaborator(s), or their organization(s) in the proposal (Project Narrative, Supporting Documentations, Impact Statement, Justification Statement, and Statement of Work [SOW]) is prohibited and will result in administrative rejection of the application. (New for FY25) Funding limits are now listed as total cost limits, which is the combination of both direct and indirect costs. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$2.38M to fund approximately 17 Concept Award applications with total cost caps of \$0.14M. The maximum period of performance is 2 years. It is anticipated that awards made from this FY25 funding opportunity will be funded with FY25 funds, which will expire for use on September 30, 2031. Awards supported with FY25 funds will be made no later than September 30, 2026. The proposed research must be relevant to active-duty Service Members, Veterans, military beneficiaries, and the American public.</p>

This award supports conceptually innovative, high-risk/high-reward research that could lead to critical discoveries or major advancements that will accelerate progress in improving outcomes for individuals with Duchenne muscular dystrophy (DMD). Applications should include a well formulated, testable hypothesis based on strong scientific rationale. The FY25 DMDRP IDA mechanism has a New Investigator category for applicants early in their careers (i.e., within 10 years of their first faculty appointment or equivalent) or for established investigators new to DMD research. The New Investigator - Early Stage category is designed to allow applicants early in their faculty appointments to compete for funding separately from established investigators. The New Investigator - Transitioning category is designed for investigators in an area other than muscular dystrophy, at or above the level of Assistant Professor, seeking to transition to a career in DMD, thereby bringing their expertise to the field. Preliminary data relevant to DMD that supports the feasibility of the research hypotheses and research approaches are required. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$2.5 million (M) to fund approximately 5 Idea Development Award applications with total cost caps of \$500,000. The maximum period of performance is 2 years. It is anticipated that awards made from this FY25 funding opportunity will be funded with FY25 funds, which will expire for use on September 30, 2031. Awards supported with FY25 funds will be made no later than September 30, 2026.</p> </div> </div>

	Program URL	Link to program URL			
	Deadline Dates (ALL)	25-Jul-2025 [LOI/Pre-App], 08-Aug-2025			
	Synopsis	<p>The fiscal year 2025 (FY25) Duchenne Muscular Dystrophy Research Program (DMDRP) Clinical/Translational Research Award (CTRA) mechanism supports advanced translational research that will accelerate the movement of promising ideas in Duchenne muscular dystrophy (DMD) research into clinical applications. Research must address at least one of the FY25 CTRA focus areas. Research projects investigating therapies that will be efficacious across the life span, including infants, toddlers, and nonambulatory individuals, are strongly encouraged. Distinctive Features: Applications must include preliminary and/or published data relevant to DMD to support the proposed research project. Pilot, proof-of-principle clinical trials, and correlative studies to better inform development of drugs, devices, and other interventions are allowed. The CTRA offers two funding levels: Funding Level 1 to support smaller, less complex preclinical and/or clinical research; and Funding Level 2 to support larger, more complex preclinical and/or clinical research. Early-Career Partnering PI Option (PPIO): The Partnering PI must be an independent, early career investigator within 10 years of their first faculty appointment (or equivalent) by the time of application submission. Lapses in research time or appointments as denoted in the biographical sketch should be explained in the application. It is encouraged, but not required, that the partnering PI is an M.D. or M.D./Ph.D. to increase collaboration between clinical and nonclinical aspects of DMD research. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$8.46 million (M) to fund approximately 6 CTRA applications with total cost caps of \$0.91M for Funding Level 1; \$1.0M for Funding Level 1 with a PPIO; \$1.75M for Funding Level 2; and \$1.90M for Funding Level 2 with a PPIO. The maximum period of performance is 3 years for Funding Level 1. The maximum period of performance for Funding Level 2 is 4 years. It is anticipated that awards made from this FY25 funding opportunity will be funded with FY25 funds, which will expire for use on September 30, 2031. Awards supported with FY25 funds will be made no later than September 30, 2026.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>The fiscal year 2025 (FY25) Amyotrophic Lateral Sclerosis Research Program (ALSRP) Clinical Outcomes and Biomarkers Award (COBA) supports the development and/or validation of clinical outcomes and biomarkers to enrich clinical trials in Amyotrophic Lateral Sclerosis (ALS). Projects can be relevant to a specific therapy, a class of therapeutics, or to a specific ALS subtype (such as a particular genetic mutation) and do not have to broadly apply to all patients. To meet the intent of the funding opportunity, applications must address ONE or BOTH of the following focus areas: Clinical Biomarkers: Identification, development, and/or validation of promising biomarkers for ALS. Biomarkers may include, but are not limited to susceptibility/risk, diagnostic, monitoring/disease progression, prognostic, predictive, response, or safety biomarkers. Clinical Outcomes: Identification, development, and/or validation of clinician-, observer-, or patient-reported, and/or performance outcome measures for ALS. Projects may include optimization of current outcome measures already in use. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$6.3 million (M) to fund approximately six Clinical Outcomes and Biomarkers Award applications with total cost caps of \$1.0M. The maximum period of performance is three years. It is anticipated that awards made from this FY25 funding opportunity will be funded with FY25 funds, which will expire for use on September 30, 2031. Awards supported with FY25 funds will be made no later than September 30, 2026.</p>			
130975	Amyotrophic Lateral Sclerosis Research Program- -Therapeutic Development Award	Department of the Army/Department of Defense	HT942525ALSRPTDA	27-Aug-2025	Not Specified

	Synopsis	<p>The fiscal year 2025 (FY25) Amyotrophic Lateral Sclerosis Research Program (ALSRP) Therapeutic Development Award (TDA) supports research ranging from preclinical validation of therapeutic leads through Food and Drug Administration (FDA) Investigational New Drug (IND)-enabling studies. The proposed studies are expected to be empirical in nature and product driven. Applicants with limited Amyotrophic Lateral Sclerosis (ALS) experience are strongly encouraged to include collaborators with substantial experience in the relevant ALS model systems, endpoints, and pathophysiology. Applications supported by this award must begin with lead compounds in hand and must already demonstrate proof-of-concept efficacy data in at least one appropriate preclinical model system of ALS, including whole animal and cellular model systems. Mechanism-specific, predictive/cohort-selective, target engagement, and pharmacodynamic biomarker development, in parallel to the main therapeutic effort, is a critical component of the FY25 ALSRP Therapeutic Development Award. If</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
		<p>appropriate mechanism-specific biomarkers are already available or currently in development, how the existing biomarkers will improve trial design, patient selection, and efficiency or interpretation of the proposed ALS therapeutic approach must be apparent in the application. Development of biomarkers for the purposes of diagnosis, prognosis, or measurement of general disease progression without consideration of the therapeutic development process will not be supported. Therapeutic candidates which have already been granted an IND are not appropriate for this mechanism. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$10.5 million (M) to fund approximately five Therapeutic Development Award applications with total cost caps of \$2.0M. The maximum period of performance is three years. It is anticipated that awards made from this FY25 funding opportunity will be funded with FY25 funds, which will expire for use on September 30, 2031. Awards supported with FY25 funds will be made no later than September 30, 2026.</p>

	Deadline Dates (ALL)	27-Aug-2025			
	Synopsis	<p>The fiscal year 2025 (FY25) Amyotrophic Lateral Sclerosis Research Program (ALSRP) Pilot Clinical Trial Award supports the rapid implementation of clinical trials with the potential to have a significant impact on the treatment or management of Amyotrophic Lateral Sclerosis (ALS). Projects may range from phase 1 to small-scale phase 2 trials. Applications must address one of the following focus areas: Biomarker-Driven Interventions: Disease-modifying interventions, with mechanism-specific biomarkers to predict which clinical trial participants are likely to respond, demonstrate target engagement, and effects on the intended biological pathway. Clinical Care: Improving aspects of clinical care and symptom management for ALS. Funding from this award mechanism must support a clinical trial. Projects proposing a therapeutic intervention (drug, biologic, and/or device) must incorporate biomarkers specific to the intervention into the trial design. All applications are required to incorporate a Community Collaboration Plan to optimize research impact. The clinical trial should begin no later than 12 months after the award date or 18 months for FDA-regulated studies. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$5.6 million (M) to fund approximately two Pilot Clinical Trial Award applications with total cost caps of \$2.8M. The maximum period of performance is three years. It is anticipated that awards made from this FY25 funding opportunity will be funded with FY25 funds, which will expire for use on September 30, 2031. Awards supported with FY25 funds will be made no later than September 30, 2026.</p>

The intent of this award mechanism is to increase the clinically relevant impact of breast cancer patient participation in clinical research by addressing the knowledge lost due to early trial termination, limited patient follow-up, or suboptimal sample and/or data collection and analysis. Applications must address at least one of the FY25 BCRP overarching challenges, unless adequate justification for exception is provided. The research team must include two or more breast cancer consumer advocates. This funding mechanism allows for a single Principal Investigator (PI), or two partnering PIs referred to as the Initiating PI and the Partnering PI. For the Partnering PI Option (PPIO), only the Initiating PI will submit a pre-application, but both PIs will need to submit at the full application stage. Be advised, applications may be withdrawn if both the initiating and partnering applications are not submitted by the full application deadline or if the initiating or partnering application is administratively withdrawn. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$8.4 million (M) to fund approximately one Clinical Research Extension Award application with total cost caps of \$7M for applications with a single PI or \$8.4M if applying under the PPIO. The maximum period of performance is four years. It is anticipated that awards made from this FY25 funding opportunity will be funded with FY25 funds, which will expire for use on September 30, 2031. Awards supported with FY25 funds will be made no later than September 30, 2026.</p>

	Deadline Dates (ALL)	27-Aug-2025 [LOI/Pre-App], 10-Sep-2025			
	Synopsis	<p>The fiscal year 2025 (FY25) Breast Cancer Research Program (BCRP) supports promising research that has high potential to lead to or make breakthroughs in breast cancer. All applications must address at least one of the fiscal year 2025 (FY25) Breast Cancer Research Program (BCRP) overarching challenges, unless adequate justification for exception is provided. Applications must address the challenge in a way that can lead to or make a breakthrough and have major impact. The FY25 Breakthrough Award mechanism contains three different funding levels designed to support major (but not all) stages of research that will lead to clinical application. Each level has a defined research scope. The current program announcement discusses the Breakthrough Award Levels 1 and 2. Distinctive Features: This funding mechanism allows for applications submitted under Funding Level 1 or Funding Level 2. Funding Level 2 also includes a Population Science and Prevention Studies option. With compelling justification, population science and prevention studies may request higher levels of funding and an additional year in the period of performance. This funding mechanism allows for a single Principal Investigator (PI), or two partnering PIs referred to as the Initiating PI and the Partnering PI. For the Partnering PI Option (PPIO), only the Initiating PI will submit a pre-application, but both PIs will need to submit at the full application stage. Be advised, applications may be withdrawn if both the initiating and partnering applications are not submitted by the full application deadline or if the initiating or partnering application is administratively withdrawn. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$15.65 million (M) to fund approximately nine Breakthrough Award Levels 1 and 2 applications with total cost caps of \$0.75M (single PI) or \$1.25M (PPIO) for Funding Level 1, \$1.65M (single PI) or \$2.5M (PPIO) for Funding Level 2, or \$2.5M (single PI) or \$3.35M (PPIO) for Funding Level 2 - Population Science and Prevention Studies. The maximum period of performance is three years for Breakthrough Award Funding Levels 1 and 2 and four years for Breakthrough Award Level 2 - Population Science and Prevention Studies. It is anticipated that awards made from this FY25 funding opportunity will be funded with FY25 funds, which will expire for use on September 30, 2031. Awards supported with FY25 funds will be made no later than September 30, 2026.</p>

This is a proposed four-year program and is primarily focused on three topic areas in the field of quantum computing (QC). The topic areas are as follows: (1) Characterization: Primary Research Goal: Advance the state-of-the-art to quantitatively assess the performance of qubit operations in multi-qubit circuits and to extract error-models. (2) Calibration: Primary Research Goal: Advance state-of-the-art for bring up of multi-qubit circuits for high-performance operations near or better than fault-tolerance thresholds. (3) Control: Primary Research Goal: Advance state-of-the-art control techniques to operate multi-qubit circuits operating near or better than fault-tolerant thresholds, accounting for the specifics of error-models for the circuit. For this BAA, by error-models is meant the quantitative (Topic 1) description of the total, the types, and distribution of errors encountered by qubit operations in multi-qubit circuits. Research proposals to these topics are sought that address the circuit gate-based model of quantum computation overhead and inefficiencies, as well as improve the accuracy and stability of characterization, calibration, and control schemes, in a manner relevant for qubit arrays in the 10s1100s of qubits scale for early fault-tolerant quantum computing (FTQC) applications</div>

	Synopsis	<p>The sponsor awards funding to support non-incremental research designed to reduce risk of or prevent the development of Alzheimer's disease and/or Alzheimer's disease related dementias (AD/ADRD). Allowable research includes projects utilizing animal models as well as clinical research projects. This funding opportunity allows for multiple principal investigators (PIs) under the Career Initiation or Transition (CIT) Partnership Option. If utilizing this option, only the initiating PI will submit a pre-application, but each PI will need to submit a full application. Be advised, all associated applications for a research project may be withdrawn if the initiating or partnering application is rejected or administratively withdrawn. Community collaboration is required for projects proposing clinical research. Leveraging existing resources and cohorts, particularly those that address critical health challenges and facilitate applicability to military health, is strongly encouraged. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$4 million (M) to fund approximately 4 Transforming Research Award applications with total cost caps of \$1M for the single PI option, and \$1M for the CIT Partnership Option. The maximum period of performance is 3 years. It is anticipated that awards made from this fiscal year 2025 (FY25) funding opportunity will be funded with FY25 funds, which will expire for use on September 30, 2031. Awards supported with FY25 funds will be made no later than September 30, 2026.</p>

	Synopsis	<p>The sponsor awards funding to support clinical research or clinical trials that provides interventions, innovations, and solutions in critical areas for dementia care for individuals with Alzheimer's disease and Alzheimer's disease related dementias (AD/ADRD) and their care partner(s). This funding opportunity allows for multiple principal investigators (PIs) under the Career Initiation or Transition (CIT) Partnership Option. If utilizing this option, only the initiating PI will submit a pre-application, but each PI will need to submit a full application. Be advised, all associated applications for a research project may be withdrawn if the initiating or partnering application is rejected or administratively withdrawn. Community collaboration is required. Research should prioritize both the individual living with an AD/ADRD diagnosis and their care partner(s). The Congressionally Directed Medical Research Programs (CDMRP) expects to allot approximately \$5.2 million (M) to fund approximately 3 Transforming Care Award applications with total cost caps of \$1.6M for the single PI option, and \$1.9M for the CIT Partnership Option. The maximum period of performance is 4 years. It is anticipated that awards made</p>

131758	Young Investigator Program	Office of Naval Research/Department of Defense	N0001425SF004	01-Aug-2025	Not Specified
	<p>Deadline Dates (ALL) 29-Aug-2025</p> <p>Synopsis The Naval STEM Coordination Office (NSCO) is inviting a wide range of applications aimed at enhancing existing solutions or developing innovative approaches to maintain and cultivate a world-class Science, Technology, Engineering, and Mathematics (STEM) workforce. This workforce is essential for preserving the technological superiority of the U.S. Navy and Marine Corps. The proposed projects should focus on creating, enhancing, or sustaining educational pathways and workforce opportunities in STEM fields for U.S. citizens, particularly in areas relevant to Department of the Navy (DON) science and technology. The Notice of Funding Opportunity (NOFO) encourages initiatives that strengthen the capacity of educational systems and local communities to provide impactful STEM learning experiences for students of all ages, as well as for the naval-related workforce. This NOFO is for STEM education programs and activities vital to the Department of the Navy, which is formal or informal education that is primarily focused on physical and natural sciences, technology, engineering, social sciences, and mathematics disciplines.</p> <p>Contact Name Veronica Lacey</p> <p>Contact Telephone 703-696-2593</p> <p>Contact Email veronica.y.lacey.civ@us.navy.mil</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 01-Aug-2025</p> <p>Synopsis The Office of Naval Research (ONR) is interested in receiving proposals for its Young Investigator Program (YIP). ONR's Young Investigator Program seeks to identify and support academic scientists and engineers who are in their first or second full-time tenure-track or tenure-track-equivalent academic appointment, who have received their PhD or equivalent degree on or after 01 January 2018, and who show exceptional promise for doing creative research. The objectives of this program are to attract outstanding faculty members of U.S. Institutions of Higher Education to the Department of the Navy's Science and Technology (S&T) research program, to support their research, and to encourage their teaching and research careers. Individuals who are holding U.S. non-profit equivalent positions are also encouraged to apply.</p>

080401	Travel Grants	Alpha-1 Foundation		26-Sep-2025 [LOI/Pre-App]	1,000 USD
	<p>Deadline Dates (ALL) 08-Sep-2025</p> <p>Synopsis The CRN 2025 Technical Track supports the development of novel tools that can be reliably produced and shared with the research community to accelerate validation and therapeutic R&D for emerging targets pursued or identified through ASAP discoveries. The sponsor seeks to generate, validate, and distribute preclinical reagents and/or models tailored to support critical research needs for at least 5 targets from a list of eligible targets. Funding will support tool-specific (not target-specific) projects that generate high-quality resources distributed via commercial mechanisms. Teams must focus on a tool type (e.g., antibodies, viral vectors, mouse models) to ensure depth of expertise and quality of tools created for the panel of targets selected. Note that hypothesis-driven research is out of scope for this proposal. Once the tools have been developed and validated, there may be opportunities for additional funding support at that time to test target biology, but this is not the scope of the current call.</p>

	Synopsis	The American Academy of Child and Adolescent Psychiatry (AACAP) is requesting applications for the AACAP Physician Scientist Program in Substance Use K12 Career Development Award, funded by the National Institute on Drug Abuse (NIDA). The grant provides up to five years of salary support, research support, and mentored substance use research training for qualified child and adolescent psychiatrists who intend to establish careers as independent investigators in mental health and substance use research. AACAP's K12 Career Development Program will support the research career development of early career faculty who complete child and adolescent psychiatry fellowship training on or before June 30, 2026, and who have mentorship and a solid career development plan for research training in substance use.

	Synopsis	This purpose of this funding opportunity is to build on existing capacity for Indigenous research established through the 2018 funding opportunity by offering directed funding to the Feast Centre for Indigenous STBBI Research and the Waniska Indigenous Centre on HIV/HCV/STBBI Inequities (referred to hereafter as the Centres). The funding opportunity acknowledges the challenges faced by the Centres in establishing relationships with Indigenous communities during COVID-19 and provides support for the ongoing work of reciprocal relationship building with Indigenous communities. The Centres are expected to continue efforts aimed at improving health and access to effective programs and services for Indigenous Peoples living with and at risk of HIV, hepatitis C and other STBBI, and advancing the evidence base for improving programs and services.			
131676	Operating Grant: Indigenous Gender and Wellness - Knowledge Sharing	Canadian Institutes of Health Research		03-Sep-2025 [LOI/Pre-App]	146,000 USD

Non Federal Funding Opportunities

	Deadline Dates (ALL)	03-Sep-2025 [LOI/Pre-App], 01-Oct-2025			
	Synopsis	<p>The current funding opportunity focuses on Knowledge Sharing, and is the fourth phase of the IGW Initiative. By focusing on Knowledge Sharing, this funding opportunity will deliver on a vision to share knowledge and learnings about Indigenous Gender and Wellness from health research, with Indigenous individuals and communities, clinicians, decision-makers, the research community, research funders, trainees, the public, and beyond. This funding opportunity focuses on Knowledge Sharing about the outcomes and knowledge of Indigenous Gender and Wellness research using strengths- and distinctions-based, community-engaged approaches. This focus aims to ensure that research learnings about First Nations, Inuit and Métis Gender and Wellness effectively reach those who need to hear them - including First Nations, Inuit and Métis individuals, communities and community partners, clinicians, decision-makers, the research community, research funders, trainees, and the general public, among others. This funding opportunity encourages the use of culturally relevant and/or arts-based methods to acknowledge and uphold Indigenous approaches to Knowledge Sharing in Gender and Wellness, and support work that is meaningful and culturally safe for First Nations, Inuit and/or Métis communities. In this context, wellness should be broadly defined to encompass an Indigenous, holistic view of health. Possible topics or project themes might include, but are not limited to: Gender and wellness across the lifespan, including in children, youth, adults and Elders Gender, wellness, and aging Gender, storytelling and intergenerational learning Two-Spirit and/or Indigenous LGBTQI+ wellness Gender expansive identities, roles and wellness HIV and/or other STBBI Men, boys, masculinities and wellness Women, girls, femininities and wellness Matriarchs and wellness Perinatal and child health and wellness Gender, family relations</p>

	Synopsis	The scholar will engage in a flexible combination of teaching, advising students, and collaborative research that entails teaching two courses (classes meet once a week for 90 minutes). The format, content, and level of the individual courses (advanced undergraduate and graduate) and research foci are negotiated on a consensual basis with the host institution, contingent upon the grantee's interests and expertise. Furthermore, NAWI Graz highly appreciates if candidates conduct at least one extracurricular activity aiming to foster the students' networking skills (organizational support will be provided).

	Synopsis	The Council for International Exchange of Scholars will award up to two Teaching or Teaching/Research awards in multiple disciplines at any institution in Uzbekistan. The award lengths may be four to ten months. An award can commence in September 2026 or February 2027. A Ph.D. (or other terminal degree) is not required. The ability to teach in Russian or Uzbek is useful but not required. Due to a governmental and country-wide focus on improving skills in the English language, native English-speaking teachers are in high demand. More universities are beginning to offer courses in various disciplines taught in English. Interpreters are available at some institutions, but the quality and availability of the interpreting staff may vary. All major universities have an English language faculty as well as some administrators who are proficient in English. For teaching/research projects, language proficiency sufficient to complete the research is required. For applicants without local language proficiency, the feasibility of conducting the research must be demonstrated in the project statement. An invitation letter is optional.

	<p>Contact Email research@cysticfibrosis.ca</p> <p>Sponsor Website Link to sponsor website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 03-Sep-2025</p> <p>Synopsis Seed grants are valued at up to \$50,000 for up to 1 year and focused on a new idea without other funding and without preliminary data. Seed grants are not to fund the "next logical step" or incremental research but rather novel avenues of exploration. While they can be in the basic science or clinical research area, it is anticipated that most will be basic science in nature given the duration of the award and available budget. Seed grants will support innovative research projects in the CF field, and it is anticipated that most will align to the current list of community health priorities. However, with sufficient justification, seed grants may focus on an emerging area relevant to CF outside of community health priorities. It is anticipated that seed grants will help researchers generate preliminary data on promising new research areas that they can use to apply to other funders for follow-on funding, or to quickly reach a no-go decision.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Deadline Dates (ALL)	30-Sep-2025 , 31-Dec-2025			
	Synopsis	The Research Service Voucher provides rapid funding of up to EUR 5,000 in expenses for purchasing core services, technology/equipment, and core resources in support of RMD research projects. The goal is to give investigators with limited research funds the support they need to nurture a small idea with big potential. Researchers can either: Add new data collection to an existing ("parent") RMD project to develop new research that is distinct from the aims of the parent project. Collect information de novo, outside the context of an existing project, to support the development of new RMD research.

	<p>following expected outcomes: Healthcare practitioners and providers in low- and middle-income countries (LMICs) and/or those in high-income countries (HICs) serving disadvantaged populations have access to information allowing to strengthen health systems for equitable high-quality care and health outcomes in the context of non-communicable diseases (NCDs). Public health managers and authorities have access to improved insights and evidence on how to decrease the fragmentation of care for patients living with NCDs and ensure continuity of care across all stages of disease progression, including prevention, risk reduction, and timely diagnosis of NCDs. They use this knowledge to design policies to reduce health inequities and to promote equitable health outcomes. Researchers, clinicians and authorities have an improved understanding how the proposed interventions for strengthening health systems for equitable high-quality care and health outcomes in the context of NCDs could be adopted in LMICs and/or disadvantaged populations of HICs setting, taking into account specific social, political, economic and cultural contexts. Communities, local stakeholders and authorities are fully engaged in implementing and taking up interventions that strengthen health systems for equitable high-quality care and health outcomes in the context of NCDs and thus contribute to deliver better health, improve quality of life across the life course and extend healthy life expectancy.</p>

	<p>Partnership') in the areas of satellite communication (SatCom), Earth Observation (EO) and New Commercial Space Transportation Solutions and is part of cohesive activities in the domain of digital developments under the grand heading of "digitalisation for commercial space solutions". Under the area of Using Space on Earth related to SatCom and EO, below this topic focus on the fast increment of the Low to Mid TRL level building blocks for key technologies required to strengthen competitiveness in these domains. Digitalisation is a major enabler for enhancing the value of an End-to-End EO and SatCom system. For example, processing applied to multi-sensor data can significantly enhance the resolution of the final data set, and digital optimisation of the data flow directly improves the End-to-End timeliness of an EO system (from request to delivery). Lastly, the enhancement of End-to-End data resilience and integrity calls for digital technologies on-board and, on the ground. Project results are expected to contribute to one or several of the following expected outcomes: Enable the European Space Industry to maintain a significant share of the global connectivity market by increasing the performance of space satellite networks, new type of control, space and ground segments being fully integrated into the terrestrial networks; New commercial services and applications enabled by increased digitalisation of space solutions; Advanced Earth observation payloads, technologies and processing means (on ground and/or in space), for all types of observation missions. This will contribute to developing, deploying global, more flexible and reactive space-based services applications, to contribute to fostering the EU's space sector competitiveness, as stated in the expected impact of this destination.</p>

---------	---------------	--------------	----------------	---------------	----------------

Synopsis	<p>Proposals are invited against the following topic: HORIZON-CL4-2025-02-SPACE-24: ISOS Pilot Mission Detailed Design - satAPPs component. The strategic objective of this topic is to develop capabilities to 'Act in Space' through demonstrating in space a pilot mission by 2030 related to ISOS. The envisaged ISOS pilot mission shall provide the necessary seed components for a future service infrastructure, available to the European in-space ecosystem (including the EU assets), driving the generation of a new in-space economy, providing enhanced in-orbit technology demonstration and maximising EU technology non-dependence. This pilot mission will largely contribute to ensure EU's freedom of action in space, increase the resilience and protection of EU assets in space and foster the development of the new in-space economy. A pioneering and a novel mission concept, which is unique compared to other initiatives among all space-faring nations is envisaged. The mission will build on previous R&I with an operational mission concept, focusing on application and service demonstration, with a concrete view to commercial and governmental usage. The detailed mission concept will be derived in close coordination with EU Member States and EEA countries through a dedicated ISOS Pilot Mission Advisory Group (PMAG). This topic addresses the detailed design of the satAPPs component of the ISOS pilot mission, that allows the creation of composable and exchangeable functional modules for satellite upgrade and the development of a European catalogue of satAPPs, following the AppStore approach and fostering system modularisation and flexibility. Project results are expected to contribute to the following expected outcomes: A sustainable, highly automated, flexible and economically viable space infrastructure, building on technologies and concepts for a circular economy in space, e.g. plug-and-play spacecraft functionality introducing recycling/re-use of spacecraft modules/functionalities; ISOS Pilot mission preparation up to detailed mission and system design for the satAPPs component, and maturation of enabling technologies and innovative system and operational concepts; Elaboration of interfaces between the different components of the mission, together with the other mission components (i.e. servicing, HOST and logistics) and the ISOS Pilot Mission Coordination and Support Action (CSA); Enhancing opportunities for IOD/V through satAPPs by actively promoting experiment plug and play on the HOST and prepared assets; Contribution to the ISOS Pilot Mission Objectives provided in the technical annex; Elaboration of clear use cases and relevant business models focussing on governmental and/or commercial needs; Contributing to a European catalogue of satAPPs, following the AppStore</p>

	Synopsis	Proposals are invited against the following topic: HORIZON-CL4-2025-02-SPACE-23: ISOS Pilot Mission Detailed Design - Logistics component The strategic objective of this topic is to develop capabilities to 'Act in Space' through demonstrating in space a pilot mission by 2030 related to ISOS. The envisaged ISOS pilot mission shall provide the necessary seed components for a future service infrastructure, available to the European in-space ecosystem (including the EU assets), driving the generation of a new in-space economy, providing enhanced in-orbit technology demonstration and maximising EU technology non-dependence. This pilot mission will largely contribute to ensure EU's freedom of action in space, increase the resilience and protection of EU assets in space and foster the development of the new in-space economy. A pioneering and a novel mission concept, which is unique compared to other initiatives among all space-faring nations is envisaged. The mission will build on previous R&I with an operational mission concept, focusing on application and service demonstration, with a concrete view to commercial

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 25-Sep-2025</p> <p>Synopsis</p> <p>Proposals are invited against the following topic: HORIZON-CL4-2025-02-SPACE-32: Preparing demonstration missions for collaborative Earth Observation and Satellite telecommunication for Space solutions The topic encompasses actions within the scope of the co-programmed European Partnership on Globally Competitive Space Systems ('Space Partnership') in the areas of satellite communication (SatCom), Earth Observation (EO) and New Commercial Space Transportation Solutions and is part of cohesive activities in the domain of digital developments under the grand heading of "digitalisation for commercial space solutions". Under the area of Using Space on Earth related to SatCom and EO, below this topic focusses on the Mid to High TRL level developments of key technologies required to strengthen competitiveness in these domains. Digitalisation is a major enabler for enhancing the value of an End-to-End EO and SatCom system. For example, processing applied to multi-sensor data can significantly enhance the resolution of the final data set, and digital optimisation of the data flow directly improves the End-to-End timeliness of an EO system (from request to delivery). Lastly, the enhancement of End-to-End data resilience and integrity calls for digital technologies on-board and, on the ground. Project results are expected to contribute to one or several of the following expected outcomes: Enable the European Space Industry to maintain a significant share of the global connectivity market by increasing the performance of space satellite networks, new type of control, space and ground segments being fully integrated into the terrestrial networks; New commercial services and applications enabled by an increased digitalisation of space solutions; Advanced Earth observation payloads, technologies and processing means, for multiple spectrum and frequency bands capabilities (on ground and in space), as well as optimisation of data downlink for all types of observation missions. This will contribute to developing, deploying global, more flexible and reactive space-based services applications, to contribute to fostering the EU's space sector competitiveness, as stated in the expected impact of this destination.</p>

To that end, proposals under this topic should aim to deliver results that are directed, tailored towards and contributing to some of the following expected outcomes: International research funders are supported by a dynamic and efficient secretariat in their coordination efforts for a rapid research response when a pandemic or a severe epidemic strikes. International research funders can rely on a tested framework underpinning a rapid and effective research response, and as such ensure stronger research preparedness and response for public health emergencies, including in cross-cutting areas such as data sharing, social science, clinical trial networks and others. Research funders, policymakers and the research community are well informed of the activities of the members of the Global Research Collaboration for Infectious Disease Preparedness (GloPID-R), both as a group and individually. </div>

	Synopsis	Proposals are invited against the following topic: HORIZON-HLTH-2025-03-STAYHLTH-01-two-stage: Improving the quality of life of persons with intellectual disabilities and their families This topic aims at supporting activities that are enabling or contributing to one or several expected impacts of destination "Staying healthy in a rapidly changing society". To that end, proposals under this topic should aim to deliver results that are directed at, tailored towards and contributing to several of the following expected outcomes: Persons with intellectual disabilities and their families enjoy an improved quality of life, are empowered and have more independence through the support of innovative research. The scientific community develops innovative solutions - medical, technological, digital or others - to reverse and/or reduce the severity level of the intellectual disability as soon as possible, especially in children, improving the health and autonomy of persons with intellectual disabilities and relieving their carers. Policymakers, health and care services, patient organisations, funders, the scientific community, and other relevant bodies are informed of the research advances and best practices addressing the health and needs of persons with intellectual disabilities and help reduce the impact of those disabilities on individuals, their families and society.

	Synopsis	Proposals are invited against the following topic: HORIZON-CL2-2025-01-DEMOCRACY-02: Fostering the consolidation of European science diplomacy Building on the recommendations of the EU Science Diplomacy Working Groups, the project should contribute to all of the following expected outcomes: EU and national policymakers as well as researchers obtain a taxonomy of European science diplomacy which maps the relevant players, including from academia, policymaking, diplomacy, civil society, and business, and have an overview of the science diplomacy ecosystems in the EU and the existing capacities, infrastructures, networks (including diaspora and alumni networks), training activities, strategies, and publications at EU and national level. This should also include a mapping of science diplomacy strategies of third countries to inform EU responses. Design and launch a European Science Diplomacy Platform as a community of research and practice providing an impartial space for interaction and resources for institutional capacity building, knowledge sharing and scaling up of best practices, involving the key players in European science diplomacy, from both the EU and national levels, liaising also with European scientists in the diaspora and alumni of European mobility schemes, and creating links with existing platforms. Building on the activities of existing mechanisms such as the Marie Skłodowska-Curie Actions (MSCA), ERC, COST, EURAXESS, the European Universities initiative, the European Diplomatic Academy, and relevant programmes at national level, schemes, competence frameworks and curricula for training, capacity-building, and mutual learning in European science diplomacy, are developed, paying particular attention to the needs of science counsellors and other diplomats dealing with matters that rely heavily on scientific expertise.

	Synopsis	Proposals are invited against the following topic: HORIZON-CL4-INDUSTRY-2025-01-TWIN-TRANSITION-01: Integrated approaches for remanufacturing (Made in Europe Partnership) (IA) The manufacturing industry should benefit from the following outcomes: Enable an industrial ecosystem to double the volume of remanufactured components in the Union, compared to 2021, for the sectors and products considered; Stimulate new synergies for circularity in manufacturing industries; Increase significantly the capability in Europe to implement remanufacturing technologies for retaining, reusing, upgrading or adapting the function of products and components; Support skills and education capabilities for remanufacturing; and Support the development or revision of standards to better support remanufacturing. These outcomes are also expected to benefit downstream applications in the net-zero industries.

	Synopsis	<p>Proposals are invited against the following topic: HORIZON-CL2-2025-01-HERITAGE-03: A European Collaborative Cloud for Cultural Heritage - Innovative use cases Projects should contribute to all of the following expected outcomes: Findings from thorough end-to-end testing based on real use cases contribute to a seamlessly working, user-friendly, inclusive and powerful European Collaborative Cloud for Cultural Heritage (ECCCH). By documenting and communicating the use cases deployed, a wide collection of innovative uses of the ECCCH is elaborated, which contributes to exemplify and illustrate its benefits and attract new users and user groups. By identifying and implementing improvements and engaging with users, significant contributions are made for the ECCCH to be widely used by European cultural heritage professionals and researchers, enabling new ways to interact, cooperate and co-create, thus supporting the generation of new knowledge and opening of new research paradigms.</p>

	<p>Proposals are invited against the following topic: HORIZON-CL2-2025-01-DEMOCRACY-06: Towards a European research hub on contemporary antisemitism and Jewish life and culture Projects should contribute to all of the following expected outcomes: A network of practitioners, including researchers in the field of contemporary antisemitism and research on Jewish life, is established and developed, providing a dynamic space for academic conversations, as well as training and career opportunities. Research gaps and relevant research centres to further develop research on contemporary antisemitism and Jewish life in Europe are identified, with a particular focus on regions previously underrepresented in the study of contemporary antisemitism and Jewish life Discussion and formulation of methodological standards in the field are facilitated, fostering high quality empirical work. Strategic planning for the field on a Europe-wide level, including a concrete and credible action plan to grow this network into a sustainable research institution, is provided. Links between research and policymaking within and for Jewish communities as part of the wider process of nurturing Jewish life in Europe are deepened.</p>

	Synopsis	<p>Proposals are invited against the following topic: HORIZON-CL2-2025-01-DEMOCRACY-09: Fighting against disinformation while ensuring the right to freedom of expression Projects should contribute to all of the following expected outcomes: EU institutions, national decision-makers, practitioners in relevant sectors, civil society organisations and other societal actors are better equipped to confront and prevent different forms of mis- and disinformation and information manipulation, while protecting and respecting the freedom of expression and academic freedom. EU institutions and national decision-makers have a better understanding of the categories of stakeholders opposing policies and initiatives aimed at combating disinformation and information manipulation, including understanding the drivers behind their narratives, and are better equipped to engage with them. EU institutions and national decision-makers understand how digital media shapes public opinion and regulate it without compromising citizens' rights to information, media freedom, privacy and data protection, and protection from harm. In addition, projects should contribute to at least one of the following expected outcomes: Media, education and security practitioners are increasingly knowledgeable about tools and legal remedies to counteract the narratives of those opposing policies and initiatives designed to combat disinformation, and to recognise and counter their drivers. EU institutions and national decision-makers have a better understanding of the role of independent media and the role and importance of "media dissemination hubs" and professional "mediators" who facilitate citizens' access to professionally produced content and analyse the crucial aspect of access to information (such as availability, accessibility, affordability, comprehensibility, transparency, inclusivity, privacy and data protection, and security). EU institutions, national decision-makers, and practitioners in the media sector have a better understanding of astroturfing, its use in spreading mis- and disinformation and information manipulation, and are equipped with tools and policy recommendations to recognize and counter this phenomenon. EU institutions, national decision-makers, practitioners in the media sector, and other relevant societal actors have adequate educational materials to understand how to design and implement initiatives to combat mis- and disinformation and information manipulation without harming freedom of expression.</p>

Heritage, hereafter referred to as partnership), including challenges, expected impacts, outcomes, objectives, governance, and opportunities for cooperation contributing to the achievement of the relevant UN Sustainable Development Goals (SDGs)[4] and the targets of the Paris Agreement[5]; Investments in research and innovation at the intersection of cultural heritage and climate change sciences are increased and better co-ordinated between the two fields of research through the sharing of findings, data, tools and methodologies across sectors for the benefit of the society as a whole. To this end, research-based policy recommendations will be proposed to policy- and decision-makers in different sectors of governance at national and regional levels, with a view to overcoming existing fragmentation in the European Research Area (ERA); Research funders, businesses, policymakers, cultural heritage professionals and research communities from various scientific disciplines covered by STEAM (natural and formal sciences, technology, engineering, arts and mathematics) and SSH (social sciences and humanities), as well as actors from different economic sectors will work towards common objectives and measures. The long-term Strategic Research and Innovation Agenda (SRIA) for the partnership will aim to demonstrate the role and potential of tangible and intangible cultural heritage in advancing Europe's climate neutrality and green transition by providing innovative and traditional knowledge-based solutions; A significantly strengthened scientific knowledge base at the intersection of heritage- and climate sciences contributes to more effective climate change adaptation and mitigation measures. Policy-makers and various stakeholders, including local communities, should be enabled to learn and draw lessons from the past, design and tailor risk management to specific threats and the resulting challenges for the traditions and living areas of different populations, cultural landscapes and sites, monuments, intangible cultural heritage and other assets, such as museums, libraries and archives collections under their responsibility; European cultural heritage professionals and stakeholders will engage with a wide range of partners from the EU, Associated Countries and worldwide, in the research and innovation actions under the partnership to address the global challenges of climate change, deploy good practices and enhance cultural heritage transnational research, its societal impact and Europe's leading position in the field of cultural heritage and climate neutrality.

	Synopsis	Proposals are invited against the following topic: HORIZON-CL4-INDUSTRY-2025-01-TWIN-TRANSITION-37: Solving issues in carbon-neutral iron and steel making processes with diverse input materials of varying quality (Clean Steel Partnership) (RIA) The topic enables a fast and reliable transition to innovative technology pathways for carbon-neutral iron and steel making by tackling fundamental problems and boundary conditions with a system-level approach. This approach will target input materials, processes, and iron /steel output quality, considering the needs to reduce production costs, find alternative materials and solutions, improve process/energy efficiency and achieve at least the traditional product quality. Iron and steel making plants constitute complex systems where the product quality is bound to a large set of variables. Variations in feedstock composition, along with reductant choice and mix, introduce noticeable variations in process metallurgy, its kinetics and thermodynamics, with influence on the morphology of the intermediates and consequent impact on the next phases of production, and lifetime, quality, safety and reliability of the finished product. The strong dependence of the final steel quality on the variable quality

---------	---------------	--------------	----------------	---------------	----------------

of the raw materials and the balance of the production process, has to be taken into account under the consideration of costs, energy availability, sustainability, overall and specific energy efficiency, CO2 emissions and strategic resources (in particular strategic raw materials[1]). Projects are expected to contribute to at least three of the following outcomes: Validate innovative carbon-neutral iron and steel making solutions within a system-level approach and in consideration of diverse materials with varying quality (raw input materials and reductants mix) and energy needs. Address high-risk factors at macroscopic and microscopic level through detailed characterisation of the physical and chemical interactions that could compromise the optimal functioning of the processes; Solve system-level issues within at least two low-CO2 production routes; Define solutions and provide concepts to address possible modifications or material substitutions in innovative installations for low CO2 iron and steel production; Improve low-CO2 steel production reliability to target high-quality products: i) clarify the effect of material and process variables, and overall system aspects; ii) clarify the influence of changing crude steel quality on the properties of the produced steel, with the purpose to achieve quality and extended lifespan of products; iii) clarify the impact of diverse input materials with varying quality on the residue characteristics and on its potential valorisation and use; Provide an impact analysis covering the materials and energy balance of identified solutions, viability and byproducts.

	Deadline Dates (ALL)	16-Sep-2025			
	Synopsis	<p>Proposals are invited against the following topic: HORIZON-CL2-2025-01-DEMOCRACY-05: Countering and preventing radicalisation, extremism, hate speech and polarisation Projects should contribute to all of the following expected outcomes: EU and national decision makers, researchers (including from SSH disciplines), practitioners, educators, and media organisations are equipped to deliver effective prevention and counter measures on radicalisation, extremism, hate speech, and polarisation, by gaining a comprehensive understanding of the linkages between social and economic inequality, polarisation, radicalisation, and hatred, and by implementing effective recommendations, tools, narratives, methodologies, and other innovative solutions. EU institutions and national policymakers gain insights into radicalisation, extremism, and hate speech, including their impact on young people and how youth perceive and engage with information on these phenomena, whether online or offline. EU institutions, national decision-makers, and civil society organisations acquire a thorough understanding of the mechanisms driving successful extremist, radical, and hate campaigns, as well as the diverse political environments and their modes of interaction and communication, extending beyond social media and online platforms. In addition, projects should contribute to at least one of the following expected outcomes: Improved understanding of methodologies to effectively map hate ecosystems online through qualitative and quantitative tools, also with a view to supporting the enforcement of existing laws prohibiting racist, xenophobic and misogynistic hate speech, and to protect potential victims. Increased understanding of the link between disinformation (including foreign information manipulation and interference FIMI) and hate speech, and radicalisation and extremism, in particular how disinformation and hate campaigns deepen social divisions and create the conditions for radicalisation and extremism. Increased understanding of patterns of media consumption by individuals and their use of traditional media vs social media to form their own opinion, the effects of a polarised public sphere on the media landscape, including the role of journalists; and the possible developments in the area of citizens'-led media content. Increased understanding of the role of traditional media, online media, social media, and artificial intelligence in countering mis- and disinformation</p>

		and information manipulation, hatred, and the spread of narratives that drive radicalisation, polarisation, and extremism in societies. Improved tools and methods to assess the reliability of sources and related meta-tagging systems to map different points of view, as well as other actionable journalistic practices (e.g. forums, citizens' engagement and outreach, communication channels with editorial teams) which have proven effective in improving the quality of debate in the media. Increased availability of training tools, materials, and methods for educators and educational organisations to engage with students, enhancing their capacity to provide opportunities to raise awareness and counter hate, extremism and polarisation.

	Deadline Dates (ALL)	24-Sep-2025			
	Synopsis	<p>Proposals are invited against the following topic: HORIZON-CL5-2025-06-D1-07: Implementing the climate action pillar of the EU African Union Partnership on Climate Change and Sustainable Energy The action is intended to set the foundation for future collaborative activities between the African Union (AU) and the European Union (EU) on climate change research in the context of the implementation of the Partnership on Climate Change and Sustainable Energy (CCSE) under the AU-EU High Level Policy Dialogue (HLPD) on Science, Technology, and Innovation and its Innovation Agenda. Project results are expected to contribute to all of the following expected outcomes: Stakeholders, including funding entities, contribute more effectively to the implementation of the climate action pillar of the AU-EU CCSE Research and Innovation Partnership through an agreed strategy and reinforced R&I coordination; The R&I agendas and initiatives on climate issues relevant for Africa are better aligned and defragmented between the EU, national and multilateral levels. The impact of funding is enhanced; The climate-related data gap on Africa is reduced and AU countries are better able to access, utilise, and deploy state-of-art climate knowledge and services to inform decision-making and to accelerate a science-based implementation of the Paris Agreement and the Agenda 2030 on Sustainable Development; Impacts and risks of climate change are more accurately assessed, adaptation strategies are developed, and early warning systems are deployed. This strengthens climate and disaster resilience in the AU member states, contributing to the international dimension of the EU Adaptation Strategy, the EU Disaster Resilience Goals, the Sendai Framework for Disaster Risk Reduction, the Nairobi Declaration and the Early Warnings for All initiative; The climate research community in the AU is strengthened, with researchers and scientific institutes enabled to engage more effectively in international fora and multilateral collaboration networks, with positive effects on diversity and quality of climate science and benefiting key international assessments and processes (e.g., IPCC, IPBES).</p>

	Synopsis	The Foundation for Food and Agriculture Research (FFAR) seeks projects that foster innovation with the potential for transformative impact to crop and animal systems. Much of the research on the crops and animals that make up our food supply tends to focus on each system independently. However, crop and animal systems are deeply interconnected, whether located on the same land or not, through a range of factors, including feed and nutrient management, among others. The Crop-Animal Systems Research Request for Applications (RFA) supports innovative and transformative research that explores these interconnections to advance both crop and animal systems. Individual awards must range from U.S. \$300,000 to \$1,000,000 of FFAR funds plus matching funds.

Those newly diagnosed with a blood borne virus, need timely linkage to care to benefit from early access to baseline assessment, disease area education, peer support, harm minimisation measures to prevent onward transmission, and appropriate clinical management. The Gilead Fellowship and Medical Grants Programme supports the UK & Ireland's ambition of achieving the WHO 2030 BBV Elimination goals, recognising that there is a limited window of opportunity, and novel approaches will be required. Gilead will support this through the OPTIMISE-BBV Grants Programme, a competitive grants-funding programme, which aims to maximise the opportunities with Opt-Out BBV testing and linkage to care.</p>

	Synopsis	The global Office of Astronomy for Development (OAD) is a joint partnership between the International Astronomical Union (IAU) and the South African National Research Foundation (NRF) with the support of the Department of Science and Technology (DST). The mission of the OAD is to further the use of astronomy, in all its aspects, as a tool for development. One of the primary ways the OAD implements its mission is through the Annual Call for Proposals. Every year, the OAD invites proposals for projects that use astronomy as a tool to address one or more challenges related to sustainable development. The call for proposals is open to anyone from anywhere in the world.

	<p>The NIHR Programme Grants for Applied Research (PGfAR) programme and the Royal College of Paediatrics and Child Health (RCPCH) are delighted to be partnering to offer significant funding to address some of the most challenging issues in children's health and care. The scope of the call includes but is not limited to safeguarding, disability/neuro-disability, community child health and care, mental health in children and young people, health inequalities, social care and public health issues, and obesity. In recognition that significant development work will be required to formulate a competitive programme of applied research, development awards will first be made available via the NIHR Programme Development Grants programme (Stream A only) to enable national multi sector and multi-professional research teams to be formed and/or existing teams to be consolidated and strengthened, and to undertake preparatory research work. Applications to the PDG RCPCH Stream A highlight notice can be for up to £250,000 and over a period of 12 to 18 months. The submission deadline for applications is 13:00 on 17 January 2024. Highlight notice: PDG/Royal College of Paediatrics and Child Health (RCPCH) Themed call: Compound Pressures Programme Development Grants is also currently participating in the following themed call: Themed call: Compound pressures For further details, please visit the themed calls page. PDG applications to the Compound Pressures Themed call can be for up to £150,000, over a period of 12 to 24 months.</p>

	Synopsis	NIHR invites applications for research that addresses the challenges of climate change by building resilience into the delivery of health and social care services during severe weather events. Smaller development awards will be offered initially. Their purpose is to enable research teams to come together to develop ideas with potential to help UK health and social care services to operate efficiently during extreme weather events. After the development phase, holders of development awards will be invited to submit large scale and ambitious collaborative projects. This funding opportunity aims to: bring diverse research teams together to develop plans for ambitious research and to catalyse future research capacity; enable researchers to apply for larger Research Collaboration awards within this initiative support teams who are seeking support from other programmes within the NIHR.

	Synopsis	The National Scleroderma Foundation seeks applications from promising new investigators who hold faculty or equivalent positions and who wish to pursue a career in research related to scleroderma. This grant supports promising research that is likely to lead to individual research project grants. Applications may be submitted by domestic non-profit organizations, public and private such as universities, colleges, hospitals, and laboratories. Foreign organizations and institutions are not eligible. These new investigator grants may not be used to support thesis or dissertation research or fellowship training. Applicants must have a doctoral degree in Medicine, Osteopathy, Veterinary Medicine or one of the sciences; and must have completed a postdoctoral fellowship by the grant award date. Applicants who have been a principal investigator on grants from the National Scleroderma Foundation or other national, private or government agencies other than fellowship grants are not eligible for this award. The New Investigator Award is a three-year award in the amount of \$200,000 total. Applicants may request up to \$66,667 per year (this amount is to include budgeted indirect costs) for up to three years, with the total award not to exceed \$200,000. A maximum of 8% of the proposed yearly budget may be allocated to indirect costs.

	Synopsis	NSW's Cardiovascular Research Capacity Program funds high quality cardiovascular research in NSW in order to drive scientific discoveries, support the development of novel and innovative therapies, and improve health outcomes for patients with cardiovascular disease. NSW Health invites eligible individuals to apply for the NSW Cardiovascular Research Capacity Program Senior and Early-Mid Career (EMC) Researcher Grants. Funding will support researchers working in cardiovascular research across basic science, biomedical, clinical medicine and health services research, data science, and population health research. Grants also support research towards the development of novel therapeutics. Approximately 60% of total funding will be allocated to basic science research and 40% to clinical medicine and science research, health services research, data science, and population health research.

	Synopsis	The NSW Biosciences Fund offers grants of between \$200,000 to \$2,000,000 to support research and development activities. In addition to financial support, successful applicants will gain access to a network of experienced mentors and industry experts, as well as opportunities to connect with potential investors, partners, and collaborators. The program also provides commercialisation support to help bring innovative bioscience solutions to market. The biosciences industry faces significant challenges in translating innovative research into market-ready products. Early-

	Synopsis	This PCORI Funding Announcement (PFA) seeks to fund studies that build an evidence base on engagement in research, including: Measures to capture structure/context, process, and outcomes of engagement in research. Techniques that lead to effective engagement in research. How effective engagement techniques should be modified and resourced for different contexts, settings, and communities to ensure equity in engagement and research. PCORI's Science of Engagement in Research PFA will solicit applications that focus on: Development and validation of measures to capture structure/context, process, and outcomes of engagement in research. Development and/or testing of engagement methods to generate evidence on the most effective approaches for engagement in research, particularly for underrepresented populations, and how effectiveness varies by context.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	The SIR Foundation's Dr. Ernest J. Ring Academic Development Grant program supports interventional radiology faculty members early in their academic careers (less than or equal to 7 years) to allow time to conduct research. The goal of this grant is to have the recipient subsequently obtain additional funding from other peer-reviewed sources, (e.g., National Institutes of Health grants). This grant provides up to \$75,000 a year (\$150,000 total) for two years.

	Deadline Dates (ALL)	20-Sep-2025 [LOI/Pre-App], 15-Jan-2026			
	Synopsis	The mission of this grant mechanism is to fund research that will lead to the ongoing collaboration between basic or translational science laboratories and interventional radiology by funding graduate level trainees. Specifically, SIR Foundation seeks to promote highly innovative, groundbreaking research; high-impact research with near term clinical relevance; multidisciplinary, synergistic research; translational studies to support the fluid transfer of knowledge from bench to bedside; and the next generation of interventional radiology investigators through mentored research. The Allied Scientist Training Grant is designed to provide support to trainees enrolled in graduate-level training programs that are outside the clinical realm of interventional radiology, but are still considered crucial to the future of IR. The goal is to create a collaborative research training environment that benefits from the unique perspectives of established scientists and interventional radiologists. The budget is up to \$40,000 for a length of two years.
