

**Funding Opportunities Monthly Edition
Nov 2025 Due Dates**

Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in Nov 2025.

The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

The Development Office offers assistance with many not for profit opportunities. Please contact the Development Office's Corporate and Foundation Relations team at DevCorpFound@mountsinai.org / 212-659-8500 below for assistance or questions.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
128268	Emerging Global Leader Award (K43 Independent Clinical Trial Not Allowed)	Fogarty International Center/NIH/DHHS	PAR-24-296	03-Nov-2025 [Optional][LOI/Pre-App]	Not Specified
<div> <div>Contact Name</div> <div>Contact Telephone</div> <div>Contact Email</div> <div>Sponsor Website</div> <div>Program URL</div> <div>Deadline Dates (ALL)</div> <div>Synopsis</div> </div> <div> <div>Christine Jessup, Ph.D</div> <div>301-496-1653</div> <div>Christine.Jessup@nih.gov</div> <div></div> <div>Link to program URL</div> <div>03-Nov-2025 [Optional][LOI/Pre-App], 03-Dec-2025 , 03-Nov-2026 [Optional][LOI/Pre-App], 03-Dec-2026</div> <div> <p>The goal of the Fogarty Emerging Global Leader Award is to provide research support and protected time (three to five years) to a low- or middle-income country (LMIC) early career research scientist who holds a junior faculty position at an LMIC academic or research institution, as defined by the World Bank (http://data.worldbank.org/about/country-classifications/country-and-lending-groups, including “low-income,” “lower-middle-income,” and “upper-middle-income” countries, with exceptions below (see Section III. Eligibility Information)). This intensive, mentored research career development experience is expected to lead to an independently funded research career at the LMIC institution or in another LMIC. This Notice of Funding Opportunity (NOFO) invites applications from LMIC scientists from any health-related discipline who propose career development activities and a research project that is relevant to the health priorities of their country under the mentorship of LMIC and U.S. mentors. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Applicants to this NOFO are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. Applicants proposing a clinical trial or an ancillary clinical trial as lead investigator, should apply to the companion NOFO PAR-24-295.</p> </div> </div>					
128420	Implementation Research for Multi-morbidity Management in the Context of Non-communicable Diseases in Low- and Middle-Income Countries and US Tribal Populations (R01 Clinical Trial Optional)	Fogarty International Center/NIH/DHHS	PAR-25-213	06-Oct-2025 [Optional][LOI/Pre-App]	Not Specified

	Deadline Dates (ALL)	06-Oct-2025 [Optional][LOI/Pre-App], 05-Nov-2025 , 07-Jan-2026			
	Synopsis	The National Institutes of Health (NIH) participating Institutes, Centers, and Offices (ICOs), in collaboration with the Global Alliance for Chronic Diseases (GACD), invite applications for implementation research that aims to improve the availability of effective, equitable, efficient, integrated, patient-centered, safe, and timely care for people living with multiple long-term conditions (non-communicable disease (NCD) multimorbidity) in low- and middle-income countries (LMICs) and/or within American Indian/Alaska Native (AI/AN) populations in the United States. This Notice of Funding Opportunity (NOFO) supports innovative approaches to identifying, understanding, developing, and implementing strategies for overcoming barriers to the adoption, adaptation, integration, scale-up, and sustainability of evidence-based interventions, tools, policies, and guidelines. In addition, studies to advance dissemination and implementation research methods and measures into application are encouraged. All applications must be within the scope of the mission of one of the Institutes/Centers listed above (see "Components of Participating Organizations," excluding the Fogarty International Center which manages this program but does not support awards). Applications will be accepted from US and World Bank-defined LMIC institutions only.			
128421	Implementation Research for Multi-morbidity Management in the Context of Non-communicable Diseases in Low- and Middle-Income Countries and US Tribal Populations (R61/R33 Clinical Trial Required)	Fogarty International Center/NIH/DHHS	PAR-25-223	06-Oct-2025 [Optional][LOI/Pre-App]	Not Specified

	In addition, studies to advance dissemination and implementation research methods and measures into application are encouraged. This NOFO uses the bi-phasic, milestone driven R61/R33 grant mechanism. Awards made under this NOFO will initially support a one-year milestone-driven initiation (R61) phase, with possible transition to an implementation (R33) phase of up to four additional years. Only projects that meet the scientific milestones and award requirements of the R61 phase may transition to the R33 phase. Applications submitted in response to this NOFO must address both the R61 and R33 phases. All applications must be within the scope of the mission of one of the Institutes/Centers listed above (see "Components of Participating Organizations," excluding the Fogarty International Center which manages this program but does not support awards). Applications will be accepted from US and World Bank-defined LMIC institutions only.				
120754	NCI Research Specialist (Core-based Scientist) Award (R50 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-23-243	03-Nov-2025	Not Specified

	Deadline Dates (ALL)	03-Nov-2025			
	Synopsis	This notice of funding opportunity (NOFO) invites grant applications for the Research Specialist Award (R50) in any area of NCI-funded cancer research. This NOFO is specifically targeted toward core/shared resource/central scientific support scientists. The Research Specialist Award is designed to encourage the development of stable research career opportunities for exceptional scientists who want to continue to pursue research within the context of an existing NCI-funded basic, translational, clinical, or population science cancer research program, but not serve as independent investigators. These scientists, such as researchers within a core/shared resource/central scientific support, are vital to sustaining the biomedical research enterprise. The Research Specialist Award is intended to provide salary support and sufficient autonomy so that individuals are not solely dependent on NCI grants held by others for career continuity.

	Deadline Dates (ALL)	03-Nov-2025			
	Synopsis	This notice of funding opportunity (NOFO) invites grant applications for the Research Specialist Award (R50) in any area of NCI-funded cancer research. This NOFO is specifically targeted toward laboratory-based scientists. The Research Specialist Award is designed to encourage the development of stable research career opportunities for exceptional scientists who want to continue to pursue research within the context of an existing NCI-funded basic, translational, clinical, or population science cancer research program, but not serve as independent investigators. These non-tenure track scientists, such as researchers within a research program, are vital to sustaining the biomedical research enterprise. It is anticipated that only exceptional scientists who want to pursue research within the context of an existing NCI-funded cancer research program, but not serve as independent investigators, will be competitive for this award.			
127557	NCI Research Specialist (Clinician Scientist) Award (R50 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-24-274	04-Nov-2025	Not Specified

	Deadline Dates (ALL)	04-Nov-2025			
	Synopsis	Through this Funding Opportunity Announcement (FOA), the National Cancer Institute (NCI) invites applications for the Research Specialist Award (R50) specifically for clinician scientists supporting NCI-funded clinical trials research. The Research Specialist Award is designed to encourage the development of stable research career opportunities for exceptional clinician scientists who want to continue to participate in the NCI clinical trials networks through leadership in the 1) development of national clinical trials, 2) implementation of NCI clinical trials in their institutions, and 3) national service to the NCI clinical trials networks through participation in the scientific review committees, monitoring committees and other activities, but not serve as principal investigators of research project grants. These clinician scientists are vital to sustaining the NCI-funded clinical trials enterprise. The Research Specialist Award is intended to provide salary support and sufficient autonomy so that individuals are not solely dependent on NCI grants held by others or other sources of support for cancer research career continuity.			
120148	Innovative Research in Cancer Nanotechnology (IRCn; R01 Clinical	National Cancer Institute/NIH/DHHS	PAR-25-	03-Nov-2025	2,375,000

Proposed projects should address overcoming major barriers in cancer biology and/or oncology using nanotechnology and should focus on mechanistic studies to expand the fundamental understanding of nanomaterial and/or nano-device interactions with biological systems. These studies are expected to be relevant to the delivery of nanoparticles and/or nano-devices to desired and intended cancer targets in vivo and/or characterization of detection and diagnostic devices and sensors in vitro. IRC� awards are expected to produce fundamental knowledge to aid future and more informed development of nanotechnology-based cancer interventions. The clinical translation of these interventions is outside of scope of this NOFO.</p>				
129351	Toward Translation of Nanotechnology Cancer Interventions (TTNCI) (R01 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-25-336	17-Nov-2025	1,900,000 USD
	<p>Contact Name Piotr Grodzinski, Ph.D.</p> <p>Contact Telephone 240-781-3305</p> <p>Contact Email grodzinp@mail.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 17-Nov-2025 , 18-May-2026 , 16-Nov-2026 , 17-May-2027 , 15-Nov-2027</p> <p>Synopsis This Funding Opportunity Announcement (FOA), entitled "Toward Translation of Cancer Nanotechnology Interventions (TTNCI)" is designed to enable the translation of nanotechnology-based cancer interventions relying on nanoparticle formulations and/or nano-devices. The TTNCI initiative encourages applications for advanced pre-clinical research, supporting translation of nanotechnology-based cancer diagnostics and therapeutics. TTNCI awards are expected to mature experimental nanomedicines designed for highly relevant cancer clinical objectives with a strong potential to improve cancer</p>				

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	treatment effectiveness. It is expected that improvement of treatment effectiveness will occur due to the combination of nanoparticle/nano-device structural design and/or therapeutic/diagnostic cargo which is delivered. TTNCI awards are expected to enable further development of proposed nanotechnology-based interventions to the stage in which they could continue on a developmental path towards the NCI Experimental Therapeutics (NExT) and other NCI translational programs.				
122289	Exploratory Grant Award to Promote Workforce Diversity in Basic Cancer Research (R21 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-24-039	18-Nov-2025	275,000 USD

	Deadline Dates (ALL)	18-Nov-2025 , 15-Jun-2026 , 17-Nov-2026			
	Synopsis	This notice of funding opportunity (NOFO) is a continuation of an NCI program to enhance the diversity of the pool of the cancer research workforce by recruiting and supporting eligible New Investigators and Early Stage Investigators from diverse backgrounds, including from groups that have been shown to be nationally underrepresented in the biomedical, behavioral, clinical and social sciences. This NOFO will fund investigators to develop a larger research project grant application.			
127720	RFA-AT-25-003--HEAL Initiative: Pain Research Enhancement Program (PREP) (R15 Clinical Trial Optional)	National Center for Complementary and Integrative Health/NIH/DHHS	RFA-AT-25-003	28-Sep-2025 [Optional][LOI/Pre-App]	Not Specified

	Synopsis	The purpose of this HEAL Initiative program is to: (1) support basic and mechanistic pain research from R15-eligible undergraduate-focused serving institutions, health professional schools or graduate schools; (2) promote integrated, interdisciplinary research partnerships between Principal Investigators (PIs) from R15-eligible institutions and investigators			

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>from U.S. domestic institutions; and (3) enhance the pain research environment at the R15-eligible institution for health professional students, undergraduate and/or graduate students through active engagement in pain research. Applications in response to this notice of funding opportunity (NOFO) should include plans to accomplish these goals. Specifically, applications should include a rigorous plan for conducting basic and mechanistic pain research in the Research Strategy section of the application. In addition, a research partnership between the PI's institution and at least one investigator from a separate U.S. domestic institution that provides resources and/or expertise that will enhance the proposed pain research program must be included in a separate Team Management Plan. The proposed partnership will be a sub-award agreement(s) with at least one partnering institution, which does not need to be R15-eligible. The budget of all sub-awards must not exceed one third of the total budget. Furthermore, applications must include a Facilities & Other Resources document that demonstrates active involvement of health professional students, undergraduate and/or graduate students from the R15-eligible institution(s) in the proposed pain research projects. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).</p>

	<p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 20-Oct-2025 , 18-Nov-2025 , 20-Feb-2026 , 17-Mar-2026 , 22-Jun-2026 , 14-Jul-2026 , 20-Oct-2026 , 17-Nov-2026</p> <p>Synopsis This notice of funding opportunity (NOFO) invites applications for investigator-initiated clinical trials of complementary and integrative health approaches with physical and/or psychological therapeutic inputs (often called mind and body interventions) in NCCIH-designated areas of high research priority. Applications submitted under this NOFO are expected to propose a multisite feasibility clinical trial that will provide new information that is scientifically necessary for the planning and conduct of a subsequent clinical efficacy or effectiveness study, pragmatic trial, or dissemination and implementation trial within NCCIH's mission. NCCIH expects that applications to this NOFO will describe the planned future clinical trial and in so doing demonstrate that the proposed (R01) research is scientifically necessary to design or plan the subsequent fully powered, full-scale clinical trial. Under this R01, the data collected should be used to fill gaps in scientific knowledge, including, but not limited to the following: assessing whether the intervention can be delivered with fidelity across sites; demonstrating feasibility of recruitment, accrual, and randomization of participants across sites; demonstrating participant adherence to the intervention, as well as retention of participants throughout the study across sites; refining and assessing the feasibility of protocolized multimodal interventions, and/or demonstrating feasibility of data collection across sites in preparation for a future fully powered, multisite efficacy or effectiveness trial. The need for multisite feasibility trials is expected to be justified by sufficient preliminary data from previous single site feasibility or acceptability trial(s) or the published literature. The data collected should be used to fill gaps in scientific knowledge and be necessary to develop a competitive fully powered multisite clinical trial that has the potential to make a significant impact on public health. Prior to submitting to this NOFO, applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact person for the science area of the planned application. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>				
123152	Feasibility Clinical Trials of Mind and Body Interventions for NCCIH High Priority Research Topics (R34 Clinical Trial Required)	National Center for Complementary and Integrative Health/NIH/DHHS	PAR-25-274	20-Oct-2025	450,000 USD

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis</p> <p>The goal of this notice of funding opportunity (NOFO) is to support feasibility trials of complementary and integrative health approaches with physical and/or psychological therapeutic inputs (often called mind and body interventions) for conditions that have been identified by NCCIH as high-priority research topics. This funding opportunity is intended to support feasibility clinical trials that provide new information that are scientifically necessary for the planning and conduct of a subsequent clinical efficacy or effectiveness study, pragmatic trial, or dissemination and implementation trial within NCCIH's mission. NCCIH expects that applications to this NOFO will describe the planned future clinical trial and in so doing demonstrate that the proposed (R34) research is scientifically necessary to design or plan the subsequent competitive full-scale clinical trial. Under this R34, the data collected should be used to fill gaps in scientific knowledge necessary to develop a competitive full-scale clinical trial, including, but not limited to the following: examining feasibility and acceptability of interventions lacking published data; tailoring or adapting the content or structure of an intervention to a specific population, modality, or setting; refining the intervention to determine the most appropriate frequency or duration; determining feasibility of recruitment, retention, and data collection procedures; refining and assessing the feasibility of protocolized multi-component interventions; or examining acceptability and adherence of control conditions. The subsequent full-scale clinical trial should have the potential to make a significant impact on public health. Prior to submitting to this NOFO, applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact person for the science area of the planned application. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

	<p>Contact Email NIAMScclinicaltrials@mail.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 04-Nov-2025 , 04-Mar-2026 , 02-Jul-2026 , 02-Nov-2026 , 04-Mar-2027</p> <p>Synopsis This Notice of Funding Opportunity Announcement (NOFO) solicits cooperative agreement (UG3/UH3) applications for implementation of investigator-initiated, single or multi-site, interventional clinical trials (all phases). Investigators who have completed all necessary preparation (e.g., the trial design, protocol synopsis, data analysis plan, etc.) through other means may apply for a NIAMS UG3/UH3. The UG3 phase is designed to allow the investigators to prepare the final aspects needed to start the trial, (e.g., establishing the single IRB (sIRB), contracts and reliance agreements with sites, hiring of staff, etc.). Transition to the UH3 phase to begin the trial is dependent upon completion of the UG3 milestones proposed by the investigator and approved by NIAMS. UG3 projects that meet their milestones will be administratively considered by NIAMS and prioritized for transition to the UH3 phase. NIAMS expects trials to be hypothesis-driven and have the potential for high clinical impact within the research mission of NIAMS.</p>				
122359	Exploratory Clinical Trial Grants in Arthritis and Musculoskeletal and Skin Diseases (R61 Clinical Trial Required)	National Institute of Arthritis and Musculoskeletal and Skin Diseases/NIH/DHHS	PAR-24-279	04-Nov-2025	600,000 USD
	<p>Contact Name Yan Wang, M.D., Ph.D.</p> <p>Contact Telephone 301-594-5032</p> <p>Contact Email wangy1@mail.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 04-Nov-2025 , 04-Mar-2026 , 02-Jul-2026 , 02-Nov-2026</p> <p>Synopsis This Notice of Funding Opportunity (NOFO) is designed to facilitate clinical trials that can be completed within a limited time frame. A broad range of types of exploratory studies may be submitted to this NOFO. The trials must address research questions related to the mission and goals of the NIAMS and may evaluate interventions with drugs, biologics, devices, or surgical, dietary, behavioral or rehabilitation therapies.</p>				
122361	Clinical Observational (CO) Studies in Musculoskeletal, Rheumatic, and Skin Diseases (R01 Clinical Trial Not Allowed)	National Institute of Arthritis and Musculoskeletal and Skin Diseases/NIH/DHHS	PAR-24-280	04-Nov-2025	475,000 USD

	Deadline Dates (ALL)	04-Nov-2025 , 04-Mar-2026 , 02-Jul-2026 , 02-Nov-2026			
	Synopsis	<p>The purpose of this Notice of Funding Opportunity (NOFO) is to encourage Research Project Grant (R01) applications to pursue clinical observational (CO) studies to obtain data necessary for designing clinical studies for musculoskeletal, rheumatic, or skin diseases or conditions. Research data from observational studies supported by this NOFO can enhance clinical study design by providing essential information about disease symptoms, stages, and timing of disease progression; comorbid conditions; availability of potential research participants; and outcomes that are important to patients. They also can facilitate efforts to develop and/or validate objective biomarkers or subjective outcome measures for use in a future clinical study. A future clinical study may include a clinical trial or an observational study. Applicants to this NOFO are encouraged to propose studies that address significant obstacles or questions in the design of a clinical project, such as determining the appropriate primary or secondary outcome measures or identifying the stages of disease during which patients are most likely to respond to an intervention. Only observational studies will be supported through this NOFO.</p>			
128811	RFA-HD-26-004 -- Contraceptive Development Research Center (P50 Clinical Trial Optional)	National Institute of Child Health and Human Development/NIH/DHHS	RFA-HD-26-004	13-Oct-2025 [Optional][LOI/Pre-App]	5,200,000 USD

	Deadline Dates (ALL)	13-Oct-2025 [Optional][LOI/Pre-App], 12-Nov-2025			
	Synopsis	<p>The purpose of this Notice of Funding Opportunity (NOFO) is to support and facilitate multidisciplinary approaches towards the development of new and/or improved contraceptive methods for both men and women through the formation of a Contraceptive Development Research Center. This NOFO also allows the inclusion of translational studies to facilitate the pre-clinical to clinical transition and increase the likelihood of clinical success. The Center will serve as a national resource for development of early-stage investigators electing to pursue careers in contraceptive research.</p>

	Synopsis	<p>This Notice of Funding Opportunity (NOFO) will accept applications for competing renewal or competitive revision of ongoing clinical trials supported by the National Institute of Dental and Craniofacial Research (NIDCR). Extension of an ongoing clinical trial through a competing renewal application will be supported when there is need for additional time to complete the trial or when an extended period of follow-up is well justified to assess longer term outcomes. Competitive revisions will be supported when there is compelling justification for modifying the scope of the ongoing clinical trial. NIDCR strongly encourages applicants to contact the Scientific/Research contact assigned to the ongoing clinical trial for which they are planning a competing renewal or competitive revision prior to submitting an application to this NOFO.</p>

	<p>2028</p> <p>Synopsis The NIH has a strong interest in the diversity of the NIH-funded research enterprise (see NIH notice NOT-OD-20-031). Research shows that diverse teams working together and capitalizing on innovative ideas and distinct perspectives outperform homogenous teams. Scientists and trainees from diverse backgrounds and life experiences bring different perspectives, creativity, and individual enterprise to address complex scientific problems. There are many benefits that flow from a diverse NIH-supported scientific workforce, including: fostering scientific innovation, enhancing global competitiveness, contributing to robust learning environments, improving the quality of the research, advancing the likelihood that underserved or health disparity populations participate in, and benefit from health research, and enhancing public trust. NIH encourages institutions to use legally available means to create a diverse and inclusive scientific workforce. Participating institutes continue to support these efforts through ongoing programs and supplement funding opportunities. This specific notice reiterates this interest and encourages eligible grant and cooperative agreement awardees in the HEAL Initiative community to apply for administrative supplements in response to PA-23-189 (or any subsequent reissuances), Research Supplements to Promote Diversity in Health-Related Research (Admin Supp - Clinical Trial Not Allowed).</p>				
116940	<p>RFA-NS-25-017 -- BRAIN Initiative: Optimization of Instrumentation and Device Technologies for Recording and Modulation in the Nervous System (U01 Clinical Trials Not Allowed)</p>	National Institute of Neurological Disorders and Stroke/NIH/DHHS	RFA-NS-25-017	21-Nov-2025 [Optional][LOI/Pre-App]	Not Specified
	<p>Contact Name Grace M. Hwang, PhD</p> <p>Contact Telephone</p> <p>Contact Email BRAIN-FOAs@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 21-Nov-2025 [Optional][LOI/Pre-App], 20-Jan-2026</p> <p>Synopsis This Notice of Funding Opportunity (NOFO) seeks applications to optimize instrumentation and device technologies for recording and modulation of neural cells and circuits, to address major challenges and to enable transformative understanding of dynamic signaling in the central nervous system. It is expected that the proposed technologies and approaches have previously demonstrated their transformative potential through initial proof-of-concept testing, and are ready for accelerated refinement through iterative engineering and end-user feedback, appropriate for a path towards sustainable dissemination and user-friendly incorporation into routine neuroscience research. Applications may propose development of instrumentation hardware and/or devices and associated software. Approaches may utilize any modality such as optical, electrical, magnetic, or acoustic recording/manipulation, to target neuronal electrical signals or other forms of neural activity, including intracellular signaling and engagement of non-neuronal cells in circuit function. This NOFO is a re-</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>issue of RFA-NS-21-027, but unlike the previous NOFO the focus is narrowed to technologies associated with recording/manipulation instrumentation and devices, and excludes projects primarily focused on development of molecular reagents. Potential applicants primarily optimizing molecular constructs should consider RFA-MH-22-245 (or its reissue), BRAIN Initiative: Engineering and optimization of molecular technologies for functional dissection of neural circuits (UM1 Clinical Trial Not Allowed). For projects at an earlier stage of development of molecular reagents, potential applicants should consider the companion FOA (RFA-NS-25-018) or alternative BRAIN Initiative announcements including RFA-MH-21-175 and RFA-EY-21-001 (or their reissues). For this and the companion NOFO, the aim of the proposed technologies should be to reduce major barriers to conducting neurobiological experiments, including considerations of cost and ease of access, and to enable new discoveries for understanding neural circuit function. Technologies should address major challenges associated with recording and modulating CNS activity, at cellular or circuit resolution, and should contribute to an overall ecosystem of technologies spanning multiple spatial and temporal scales in any region throughout the CNS. The approaches should be compatible with experiments in behaving animals, with an expectation that they will be validated with in vivo experiments during the course of the project. Proposed validation experiments must focus on demonstrating the capabilities and potential impact of the technology, rather than advancing the state of biological knowledge as the primary project goal. Applications are encouraged to integrate multiple approaches, and where appropriate, to leverage diverse domains of expertise from biological, chemical, and physical sciences, engineering, computational modeling, and statistical analysis. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).</p>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 25-Sep-2025 , 17-Nov-2025</p> <p>Synopsis NIDA Core Center of Excellence Grants (P30) are intended to bring together investigators currently funded by NIH or other Federal or non-Federal sources, to enhance and extend existing research relevant to substance use/misuse and addiction and HIV. Centers are expected to transform the scientific field of study by facilitating research, providing administrative support and a rigorous research climate that promotes new and creative directions. Incremental work should not be the focus of Center activities. Applications responding to this Funding Opportunity Announcement (FOA) are strongly encouraged to integrate and promote research in the funded projects and support interdisciplinary collaborations. Centers also must focus on providing research opportunities and experiences to new and early career investigators from diverse backgrounds, including those from underrepresented populations or institutions, facilitating collaborations, and linking and sharing data, research findings and resources to achieve the goals of the program.</p>				
129136	RFA-DA-26-056 -- Accelerating the Pace of Substance Use Research Using Existing Data (R21 Clinical Trial Not Allowed)	National Institute on Drug Abuse/NIH/DHHS	RFA-DA-26-056	03-Nov-2025 [Optional][LOI/Pre-App]	400,000 USD
	<p>Contact Name Marsha F. SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>programs that propose to support intensive, supervised research and career development experiences leading to research independence for clinician scientists (Scholars) conducting substance use and substance use disorder (SUD) research. For this NOFO, clinician scientists may include (but are not limited to) physicians, clinical psychologists, social workers, and pharmacists. Scholars are expected to be supported for 3-4 years on consecutive 12-month appointments. Candidates selected for support as scholars must hold a doctorate and commit a minimum of 9 person months (equivalent to 75% of full-time professional effort) to conducting clinical research and career development activities associated with the proposed K12 program. Scholars appointed through the proposed program may serve as the lead for a NIH-defined clinical trial that fulfills the NIH requirement for a minimal risk trial. A minimal risk trial is one in which the probability and magnitude of harm or discomfort anticipated in the research are not greater in and of themselves than those ordinarily encountered in daily life or during the performance of routine physical or psychological examinations or tests. This Notice of Funding Opportunity (NOFO) allows appointment of Scholars (K12) proposing to serve as the lead investigator of an independent clinical trial; or proposing a separate ancillary clinical trial; or proposing to gain research experience in a clinical trial led by another investigator, as part of their research and career development. Applicants may review the information found on the NIH Office of Extramural Research "Clinical Trial Requirements for Grants and Contracts": https://grants.nih.gov/policy/clinical-trials.htm for more details about how NIH is enhancing accountability and transparency of clinical research.</p>

	Synopsis	<p>The purpose of this notice of funding opportunity (NOFO) is to accelerate the development of devices to treat Substance Use Disorders (SUDs). The continuing advances in technologies offer unprecedented opportunities to develop neuromodulatory or neurophysiological devices that are safe and effective SUD treatments. The objective is to move devices to their next step in the FDA approval process, with the ultimate goal of generating new, FDA approved device-based treatments for SUDs. Applications may focus on the pre-clinical and/or clinical development and testing of new devices or existing devices approved for other indications. Applications may evaluate the mechanism of action of a device. The UG3/UH3 Cooperative Agreement involves two phases. The UG3 phase, for up to two years, is designed to support a project with specific milestones to be accomplished by the end of the period. The UH3 phase is to provide funding for up to three additional years following successful completion of the UG3. UG3 projects that meet their milestones will be administratively considered by the National Institute on Drug Abuse and prioritized for transition to the UH3 phase. Investigators submitting to this NOFO must address both UG3 and UH3 phases.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>This Notice of Funding Opportunity (NOFO) aims to support new biomedical, behavioral, and social science investigators who are in the early stages of establishing independent careers in tobacco regulatory research. The R03 grant mechanism supports different types of projects, including pilot and feasibility studies, secondary analysis of existing data, small, self-contained research projects, development of research methodology, and development of new research technology. Applicants are encouraged to conduct projects that ultimately have the potential to inform regulations on tobacco product manufacturing, distribution, and marketing. Research projects must address one or more High-Priority Research Topic(s) related to the regulatory authority of the Food and Drug Administration (FDA) Center for Tobacco Products (CTP) as mandated by the Family Smoking Prevention and Tobacco Control Act (FSPTCA), Public Law 111-31. The awards under this NOFO will be administered by NIH using funds made available through FDA CTP and the FSPTCA. Research results from this NOFO are expected to generate findings and data directly relevant to informing the FDA's regulation of the manufacture, distribution, and marketing of tobacco products to protect public health.</p>				
129338	Leveraging Network Infrastructure to Conduct Innovative Research for Women, Children, Pregnant and Lactating Individuals, and Persons with Disabilities (UG3/UH3 - Clinical Trial Optional)	National Institutes of Health/DHHS	PAR-25-311	14-Nov-2025	6,250,000 USD

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>research support during the early-career phase to help awardees establish independent research programs in areas supported by the NIH HEAL Initiative's Clinical Research in Pain Management program. This Parent Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion NOFO. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary study to an existing trial, as part of their research and career development. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial basic experimental study with humans led by another investigator, must apply to the Independent Clinical Trial Not Allowed companion NOFO.</p>

A Trailblazer project may be exploratory, developmental, proof of concept, or high risk-high impact, and may be technology design-directed, discovery-driven, or hypothesis-driven. Importantly, applicants must propose research approaches for which there are minimal or no preliminary data. A distinct feature for this FOA is that no preliminary data are required, expected, or encouraged. However, if available, minimal preliminary data are allowed. Preliminary data are defined as material which the applicant has independently produced and not yet published in a peer-reviewed journal.All preliminary data should be clearly marked and limited to one-half page, which may include one figure. Applications including data more than one-half page or more than one figure will be considered noncompliant with the FOA instructions and will not go forward to review.</div>

	Synopsis	<p>The purpose of this Program Announcement with Special Receipt, Referral, and/or Review Considerations (PAR) is to solicit applications to access limited identifiable data or biospecimens from the ECHO Cohort to study high-priority areas of maternal and child health. Obtaining an award from this opportunity is necessary to participate in the ECHO Cohort ancillary studies process. The ECHO Program defines an ECHO Cohort Ancillary Study as a study that derives funding from a non-ECHO source and uses the ECHO Cohort's non-publicly available data or biospecimens. ECHO Cohort Ancillary Studies are open to the broad scientific community and require investigators who are not a part of the ECHO Cohort Consortium to apply for and receive an X01 award under this announcement. Investigators who are currently part of the ECHO Cohort Consortium who are requesting access to biospecimens as part of an ancillary study must also apply for and receive an X01 award under this announcement. While no funds are associated with awards from this announcement, these X01s allow the NIH ECHO Program Office to oversee awardees' adherence to NIH and ECHO-specific policies and procedures during performance of ECHO Cohort Ancillary Studies.</p>

	Synopsis	<p>Autonomous experimentation is poised to accelerate research and unlock critical scientific advances that bolster U.S. competitiveness and address pressing societal needs. Programmable Cloud Laboratories are able to execute automated workstreams, including self-driving lab workflows, to efficiently move research goals through artificial intelligence (AI) enabled experiment design, laboratory preparations, data collection, data analysis and interpretation. While limited-scale efforts have shown promise, versatile programmable and self-driving labs capable of addressing complex research questions with trustworthy results will require coordinated technological advances and an engaged research community. Additional challenges include the availability of automated laboratory infrastructure, standardized approaches to data collection for interoperability, advances in AI for data interpretation and experimental design, and more. This solicitation aims to address such gaps and realize the potential of autonomous experimentation. The Test Bed: Toward a Network of Programmable Cloud Laboratories (PCL Test Bed) program seeks to establish and facilitate the operation of distributed autonomous laboratory facilities. These laboratories will combine technological and human capacity to enable integration, testing, evaluation, validation, and translation of cutting-edge technology solutions in automated science and engineering. The PCL Test Bed will consist of a set of Programmable Cloud Laboratory Nodes (PCL Nodes) that can be remotely accessed to run custom workflows specified and programmed by users, that are linked together via computational networking, shared science questions, and data and artificial intelligence (AI) standards. The PCL Test Bed will facilitate access to advanced scientific equipment, accelerate translation and scaling of basic research into industry applications, enhance reproducibility and the exchange of experimental data, and assist in training the next generation of scientists and engineers in state-of-the-art methodologies. It will help develop community norms, best practices, and formal standards for automated laboratory procedures, workflows, and instrument testing and validation. It will also advance consistent practices for the collection, sharing, and use of metadata and training data and the use and exploitation of AI methods. This program will also support the development of automated laboratory methods, including self-driving autonomous experiment workflows.</p>

RITEL supports future-oriented exploratory and synergistic research in emerging technologies (including, but not limited to, artificial intelligence (AI), robotics, and immersive or augmenting technologies) for teaching and learning. The program accepts proposals that focus on learning, teaching, or a combination of both. The scope of the program is broad and includes teaching and learning in science, technology, engineering, and mathematics (STEM) and in foundational areas that enable STEM (e.g., self-regulation, literacy, communication, collaboration, creativity, and socio-emotional skills). RITEL supports research in all learning contexts (e.g., formal, informal, workplace) and for all learner populations. RITEL has a special interest in diverse learner/educator populations and in developing new educational</p>

	Deadline Dates (ALL)	14-Nov-2025 , 16-Nov-2026			
	Synopsis	<p>The Major Research Instrumentation (MRI) Program serves to increase access to multi-user scientific and engineering instrumentation for research and research training in our Nation's institutions of higher education and not-for-profit scientific/engineering research organizations. An MRI award supports the acquisition or development of a multi-user research instrument that is, in general, too costly and/or not appropriate for support through other NSF programs. MRI provides support to acquire critical research instrumentation without which advances in fundamental science and engineering research may not otherwise occur. MRI also provides support to develop next-generation research instruments that open new opportunities to advance the frontiers in science and engineering research. Additionally, an MRI award is expected to enhance research training of students who will become the next generation of instrument users, designers and builders. An MRI proposal may request up to \$4 million for either acquisition or development of a research instrument.</p>

	Synopsis	<p>This BAA is issued under the provisions of Parts 35.016 and 6.102(d) (2) (i) and (ii) of the Federal Acquisition Regulation (FAR), which provides for the competitive selection of proposals submitted in response to this announcement. Accordingly, proposals selected for award are considered to be the result of full and open competition and fully compliant with Public Law 98-369, entitled "The Competition in Contracting Act of 1984." This BAA is an expression of interest only and does not commit the Government to make an award or pay proposal preparation costs generated in response to this announcement. The cost of proposal preparation for response to a BAA is not considered an allowable direct charge to any resultant contract or any other contract. No contract award will be made unless funds are available. If the Government issues a contract award, the Government will issue a contract on a Firm Fixed Price, Cost Reimbursement, or hybrid (a combination of firm fixed price and cost reimbursement line items) basis. Prospective Offerors are reminded that only a duly warranted Contracting Officer may obligate the Government to an agreement involving expenditure of Government funds. Only the information provided in this notice is available. No formal solicitation will be issued. No award is expected to have a period of performance greater than a twelve-month base period and two one-year options periods for a total of three years, with a not to exceed value of \$250,000 per contract.</p>

	Deadline Dates (ALL)	04-Sep-2025 [LOI/Pre-App], 10-Nov-2025			
	Synopsis	The Alzheimer's Association recognizes the need to support the training of clinician scientists in Alzheimer's and all other dementias. For the purpose of this program, a clinician scientist is defined as an individual already trained, licensed and practicing in a clinical field that includes patient contact (e.g., neurology, psychiatry, geriatrics, psychology) or patient-related diagnostic studies (e.g., neuropathology and radiology). Applicants who are within 15 years of receiving their M.D., D.O. or Ph.D. (or equivalent) and have licensure for clinical practice, including postdoctoral fellows through Assistant Professors, are eligible. Positions higher than Assistant Professor will not be considered.

	Synopsis	The Scholar award supports rising stars in the blood cancer research field. The scholar must be a highly qualified investigator who has shown a capacity for independent, sustained, and original investigation in the field of hematologic malignancies and/or relevant pre-malignant conditions. The scholar should hold an independent, tenure-track faculty-level position, below the level of full professor, and must have substantial research support awarded from a national agency. Scholar applicants are primarily basic and translational researchers; those who are primarily clinical researchers should consider the Scholar in Clinical Research subcategory. The Scholar application and review

Funded by Official Development Assistance (ODA) from the UK Department of Health and Social Care (DHSC), the UK-PHRST works to address the threat posed by infectious disease outbreaks in low- and middle-income countries (LMICs) through an integrated triple remit incorporating: Outbreak response: deploying specialist public health experts to rapidly investigate and respond to disease outbreaks at source in LMICs, to stop a public health threat from becoming a broader health emergency. Research: delivering rigorous, collaborative research to improve the evidence base for best practice in outbreak response in LMICs. Capacity strengthening: strengthening leadership, systems and capacity for improved outbreak response in LMICs.</p>

	Synopsis	The Discovery Grants Program supports ongoing programs of research with long-term goals rather than a single short-term project or collection of projects. These grants recognize the creativity and innovation that are at the heart of all research advances. Discovery Grants are considered “grants in aid” of research, as they provide long term operating funds and can facilitate access to funding from other programs, but are not meant to support the full costs of a research program.
