

**Funding Opportunities Monthly Edition
Dec 2025 Due Dates**

Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in Dec 2025.

The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

The Development Office offers assistance with many not for profit opportunities. Please contact the Development Office's Corporate and Foundation Relations team at DevCorpFound@mountsinai.org / 212-659-8500 below for assistance or questions.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
128268	Emerging Global Leader Award (K43 Independent Clinical Trial Not Allowed)	Fogarty International Center/NIH/DHHS	PAR-24-296	03-Nov-2025 [Optional][LOI/Pre-App]	Not Specified
<div> <div>Contact Name</div>Christine Jessup, Ph.D <div>Contact Telephone</div>301-496-1653 <div>Contact Email</div>Christine.Jessup@nih.gov <div>Sponsor Website</div> <div>Program URL</div>Link to program URL <div>Deadline Dates (ALL)</div>03-Nov-2025 [Optional][LOI/Pre-App], 03-Dec-2025 , 03-Nov-2026 [Optional][LOI/Pre-App], 03-Dec-2026 <div>Synopsis</div> <p>The goal of the Fogarty Emerging Global Leader Award is to provide research support and protected time (three to five years) to a low- or middle-income country (LMIC) early career research scientist who holds a junior faculty position at an LMIC academic or research institution, as defined by the World Bank (http://data.worldbank.org/about/country-classifications/country-and-lending-groups, including “low-income,” “lower-middle-income,” and “upper-middle-income” countries, with exceptions below (see Section III. Eligibility Information)). This intensive, mentored research career development experience is expected to lead to an independently funded research career at the LMIC institution or in another LMIC. This Notice of Funding Opportunity (NOFO) invites applications from LMIC scientists from any health-related discipline who propose career development activities and a research project that is relevant to the health priorities of their country under the mentorship of LMIC and U.S. mentors. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Applicants to this NOFO are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. Applicants proposing a clinical trial or an ancillary clinical trial as lead investigator, should apply to the companion NOFO PAR-24-295.</p> </div>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>2027 , 23-Apr-2027 , 17-Jun-2027 , 23-Aug-2027 , 21-Oct-2027 , 23-Dec-2027</p> <p>This Funding Opportunity Announcement (FOA) solicits grant applications to further develop enabling technologies and transformative platforms to catalyze next-generation predictive, diagnostic and therapeutic products to address heart, lung, blood, and sleep (HLBS)-related disorders and diseases. This FOA solicits R33 applications where major feasibility gaps for the enabling technology or transformative platform have already been overcome, as demonstrated with supportive preliminary data, but still requires further development and rigorous validation to encourage downstream demonstration, utilization and adoption. Well-suited applications must offer the potential to accelerate and/or transform the areas of early detection and screening, model development, clinical diagnosis, treatment, control, prevention or epidemiology, while addressing issues associated with HLBS-related diseases and disorders. Projects proposing application of existing technologies where the novelty resides in the biological or clinical target/question being pursued are not appropriate for this solicitation. Applications considered nonresponsive to the FOA will not be reviewed. This FOA is part of a suite of Catalyze innovation grants to advance projects to the point where they can meet the entry criteria for the NHLBI Catalyze Product Definition or Preclinical FOAs.</p>			
114292	Ancillary Studies to Ongoing Clinical Projects (R21 Clinical Trial Not Allowed)	National Institute of Arthritis and Musculoskeletal and Skin Diseases/NIH/DHHS	PAR-25-230	05-Dec-2025	400,000 USD
	Contact Name	Heiyoung Park, Ph.D.

	Deadline Dates (ALL)	05-Dec-2025			
	Synopsis	<p>This Funding Opportunity Announcement (FOA) solicits applications that propose to conduct time-sensitive ancillary studies related to the NIAMS mission in conjunction with privately or publicly funded, active, ongoing clinical projects (parent projects). The parent project can be an interventional clinical trial, or a clinical study such as an observational study, or a disease-specific repository that will be actively collecting patient samples or clinical data. The parent project(s) should provide a cohort of well-characterized patients, infrastructure, data, and biological samples for the ancillary study. Applications submitted in response to this FOA will undergo an accelerated review and award process. The objective of this FOA is to provide a flexible mechanism to leverage currently funded resources and maximize the return on existing investments in parent projects. Successful ancillary studies will enhance the scientific content and value of the parent projects, improve the research community's understanding of a disease or organ system in the NIAMS portfolio, and thus</p>

The objectives are to establish these tools and technologies as robust, well-characterized solutions that fulfill an unmet need and are capable of enhancing our understanding of life science processes or the practice of medicine. Awards will focus on supporting multidisciplinary teams that apply an integrative, quantitative bioengineering approach to developing technologies. The goal of the program is to support technological innovations that deliver new capabilities which can realize meaningful solutions within 5 – 10 years.</p>				
127983	NICHD Resource Program Grants in Bioinformatics (P41 Clinical Trial Not Allowed)	National Institute of Child Health and Human Development/NIH/DHHS	PAR-24-301	26-Dec-2025 [Optional][LOI/Pre-App]	8,750,000 USD

These grants will support ongoing development and enhancement of the resources, user training and services, provision of community generated data storage and curation, wide dissemination of the tools and/or resources, and expansion of interoperability with other NIH bioinformatics resources.</p>				
125295	NIDCR Predoctoral to Postdoctoral Transition Award for a Diverse Dental, Oral and Craniofacial Research Workforce (F99/K00 Independent Clinical Trial Not Allowed)	National Institute of Dental and Craniofacial Research/NIH/DHHS	PAR-24-139	08-Dec-2025	Not Specified
	Contact Name Rachel Sare, Ph.D.				

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Contact Telephone 301-569-0273</p> <p>Contact Email Rachel.Sare@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 08-Dec-2025 , 07-Jan-2026 , 08-Apr-2026 , 07-May-2026 , 08-Aug-2026 , 07-Sep-2026 , 08-Dec-2026 , 07-Jan-2027 , 08-Apr-2027 , 07-May-2027</p> <p>Synopsis The purpose of the NIDCR Predoctoral to Postdoctoral Transition Award to Promote a Diverse Dental, Oral and Craniofacial (DOC) Research Workforce (F99/K00) is to support graduate students from diverse backgrounds, including those from groups underrepresented in biomedical and behavioral sciences, over the transition from predoctoral to postdoctoral research training. This phased award program will facilitate completion of graduate PhD or dual degree clinician scientist programs (F99) and smooth transition to mentored postdoctoral positions in DOC research (K00). This Notice of Funding Opportunity (NOFO) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>				
119809	RFA-ES-25-003 -- Time-Sensitive Research Opportunities in Environmental Health Sciences (R21 Clinical Trial Not Allowed)	National Institute of Environmental Health Sciences/NIH/DHHS	RFA-ES-25-003	01-Oct-2025	Not Specified
	<p>Contact Name Toccara Chamberlain, M.A.</p> <p>Contact Telephone 984-287-4482</p> <p>Contact Email toccara.chamberlain@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 01-Oct-2025 , 01-Dec-2025</p> <p>Synopsis This Notice of Funding Opportunity (NOFO) is intended to support novel environmental health research in which an unpredictable event or policy change provides a limited window of opportunity to collect human biological samples or environmental exposure data. The primary motivation of the NOFO is to understand the consequences of natural and human-made disasters, emerging environmental public health threats, and policy changes in the U.S. and abroad. A distinguishing feature of an appropriate study is the need for rapid review and funding, substantially shorter than the typical NIH grant review/award cycle, for the research question to be addressed and swiftly implemented. The shortened timeframe will be achieved by more frequent application due dates and expediting peer review, council concurrence and award issuance. The entire cycle, from submission to award, is expected to be within 4-6 months.</p>

	Deadline Dates (ALL)	13-Dec-2025 [Optional][LOI/Pre-App], 12-Jan-2026 , 04-Apr-2026 [Optional][LOI/Pre-App], 04-May-2026 , 10-Aug-2026 [Optional][LOI/Pre-App], 09-Sep-2026 , 12-Dec-2026 [Optional][LOI/Pre-App], 11-Jan-2027 , 03-Apr-2027 [Optional][LOI/Pre-App], 03-May-2027 , 10-Aug-2027 [Optional][LOI/Pre-App], 09-Sep-2027			
	Synopsis	<p>This notice of funding opportunity (NOFO) will support pilot, feasibility or exploratory research in priority areas in substance use epidemiology, prevention, and health services, including: 1) Research in response to sudden and severe emerging drug issues (e.g. the ability to look into a large and sudden spike in opioid or synthetic cannabinoid use/overdoses in a particular community); 2) Research in response to emerging trends and topics related to a change in federal, state, or local drug policy. The work proposed must be related to imminent policy change; 3) Research in response to unexpected and time-sensitive medical system issues (e.g. opportunities to understand addiction services in the evolving health care system); 4) Responses to unexpected and time-sensitive criminal or juvenile justice opportunities (e.g. new system and/or structural level changes) that relate to drug misuse and access and provision of health care service; 5) Research that examines the early implementation of new or newly changed federal, state, or local programs, policy, financing, or payment approaches related to substance use, substance use epidemiology, prevention, treatment, or recovery. Activities may include infrastructure-building partnerships among researchers and state or local organizations to address later implementation phases; 6) Research in response to natural disasters or newly emergent public health emergencies, to understand their impacts on drug markets, substance use epidemiology, prevention, treatment or recovery outcomes. For the purposes of this NOFO, “time-sensitive” is defined as in need of expedited review and funding in order to answer the scientific research question(s) posed (e.g. an imminent policy change will not allow for standard review and funding timeline). Applications whose aims can be accomplished with standard NIH submission, review, and award cycles will not be considered time-sensitive.</p>

	Synopsis	This Funding Opportunity Announcement (FOA) invites eligible United States small business concerns (SBCs) to submit Small Business Technology Transfer (STTR) grant applications that propose to develop a product, process or service for commercialization with the aim of improving minority health and/or reducing and ultimately eliminating health disparities in one or more NIH-defined populations that experience health disparities. Appropriate technologies should be effective, affordable, and culturally acceptable.

With up to \$150,000 in total prizes, the NIH is seeking ideas for new ways of studying diet and nutrition in autoimmune disease research, including the role diet plays in the autoimmune prodrome and autoimmune disease inception, how diet and nutrition contribute to autoimmune disease progression and flares, and the role that diet may play in symptom management.</p>

Synopsis	The Stephen I. Katz Early Stage Investigator Research Project Grant supports an innovative project that represents a change in research direction for an early stage investigator (ESI) and for which no preliminary data exist. Applications submitted to this notice of funding opportunity (NOFO) must not include preliminary data. Applications must include a separate attachment describing the change in research direction. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. This notice of funding opportunity does not accept applications proposing clinical trials.

	Synopsis	<p>The Stephen I. Katz Early Stage Investigator Research Project Grant supports an innovative project that represents a change in research direction for an early stage investigator (ESI) and for which no preliminary data exist. Applications submitted to this Notice of Funding Opportunity (NOFO) must not include preliminary data. Applications must include a separate attachment describing the change in research direction. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. This Parent Notice of Funding Opportunity is for basic science experimental studies involving humans, referred to in NIH Grants Policy Statement Section 4.1.3.1 as prospective basic science studies involving human participants. These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Studies conducted with specific applications toward processes or products in mind should submit under the appropriate Clinical Trials Required or Clinical Trial Optional NOFO.</p>

	Synopsis	Machine learning (ML) moves fast, but it needs power. More power than we have, and that's the problem. The Department of Defense faces additional constraints with ML deployments at the edge in resource-limited battlefield environments. The ML2P program is about prioritizing power efficiency consumption right from the start. ML2P will map ML efficiency directly to physics using precise Joule measurements, enabling accurate power and performance predictions across diverse hardware architectures. ML2P will develop multi-objective optimization functions that balance power consumption with performance metrics and discover how local optimizations interact through Energy Semantics of ML (ES-ML) to solve the energy-aware ML optimization problem.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 02-Dec-2025</p> <p>Synopsis The Resident Opportunity and Self Sufficiency Service Coordinator (ROSS-SC) program is designed to assist residents of Public and Indian Housing make progress towards economic and housing self-sufficiency by addressing the educational, professional and health barriers they face. Self-sufficiency is defined as an individual's ability to support their household by maintaining financial, housing, and personal/family stability. To achieve self-sufficiency, an individual moves along a continuum towards economic independence and stability; such movement is facilitated by the achievement of individual educational, professional, and health-related goals. To help residents make progress towards self-sufficiency, HUD provides ROSS-SC grant funding to eligible applicants to hire a Service Coordinator who assesses the needs of Public and Indian housing residents and links them to local training and supportive services that will enable participants to move along the self-sufficiency continuum. In the case of elderly/residents with disabilities, the Service Coordinator also links them to congregate and other supportive services which enable them to age/remain in place in addition to providing other desired training and supportive services which are made available to other residents. In addition, with the ROSS-SC grant, HUD provides funding for grantees to provide direct services to further support the work of the ROSS-SC and ultimately, the goals of the ROSS program.</p>

This funding opportunity also seeks to benefit the continued integration of technology into healthcare in Canada. This funding opportunity will support projects relevant to the following research areas: Indigenous Health Research: Indigenous Health Research is defined as any field or discipline related to health and/or wellness that is conducted by, grounded in, or engaged with, First Nations, Inuit or Métis communities, societies or individuals and their wisdom, cultures, experiences, or knowledge systems, as expressed in their dynamic forms, past and present which is aligned with the TCPS 2-Chapter 9: Research Involving the First Nations, Inuit, and Métis Peoples of Canada. Early and mid-career researchers: An early career researcher (ECR) is a researcher within five years of the date of their first independent research-related appointment. A mid-career researcher is a researcher who, at the time of application, has assumed his/her independent research position 5-15 years ago.</p>

	Deadline Dates (ALL)	18-Nov-2025 [LOI/Pre-App], 16-Dec-2025			
	Synopsis	<p>The goal of this funding opportunity is to build research capacity, generate new knowledge, and support knowledge mobilization in human development, child and youth health by funding operating grants to early career researchers. The program will fund research across the four CIHR pillars (biomedical; clinical; health services; and social, cultural, environmental, and population health) that has the potential to have a significant impact on human development, child and youth health. Ultimately, the program aims to strengthen Canada's capacity and knowledge to respond to challenges and needs by providing important early career development support to researchers in these fields.</p>

	Synopsis	<p>This MIRA mechanism is intended to support highly integrated programs of collaborative and cross-disciplinary research involving multiple Texas investigators focusing specifically on cancer in children and the adolescent and young adult (AYA) population. Applications responding to this RFA must emphasize improving cancer care delivery and survivorship services through research in the childhood and AYA cancer population. MIRAs are expected to promote a cooperative environment that fosters intensive interaction among members in all aspects of the research program. This approach is expected to transform the research process through the integration of basic, translational, and/or clinical disciplines leading to the aggressive translation of scientific discoveries into tools and applications that have the potential to make a significant impact on cancer prevention, detection, treatment, and/or survivorship in the childhood and AYA cancer population.</p>

Because HIHR Research Awards are designed to support new ideas, preliminary data are not required. Using this mechanism, CPRIT intends to support innovative, developmental projects that focus on exceptionally promising topics that are not yet sufficiently mature to compete successfully for more conventional funding. The HIHR Research Awards are expected to provide the foundation for individual or multiple investigator peer-reviewed awards upon completion. Applicants must explain why more conventional sources of support are not available for the proposed research and how short-term funding will lead to strong applications for additional support. Applicants may request a total of \$250,000 for a period of up to 24 months (2 years), inclusive of both direct and indirect costs.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 04-Dec-2025</p> <p>Synopsis The Biology to Prevention Awards aim to stimulate translational research that will build and use greater biological and mechanistic understanding of cancer aetiology, genesis and risk, in order to lead to precision prevention interventions. The sponsor expects applicants to clearly justify the line of sight from the proposed work to eventual impact on lowering cancer risk or incidence. It is important that this line of sight has been fully considered. These awards are for researchers at all career stages across any research area, including those from non-traditional cancer prevention fields (such as other non-communicable disease areas with potential common upstream causal risk factors, or those working in the context of therapeutic target identification and innovation) to engage with cancer prevention research. They support development of new collaborative partnerships, and truly interdisciplinary, innovative approaches. Collaborations between existing cancer prevention researchers (including population and behavioural scientists) and biologists, geneticists, immunologists, drug developers or other new entrants to cancer prevention research are strongly encouraged.</p>

Deadline Dates (ALL)	11-Dec-2025
Synopsis	Funding for this initiative supports the creation or extension of national research data infrastructure with a focus on data registries, biobanks and data linkage platforms to enable and enhance Australian medical research. This will include supporting infrastructure that makes evidence-based care easier for health professionals, drives efficient use of resources and advances healthcare. This grant opportunity was announced as part of the MRFF under the Research Data Infrastructure Initiative. Data is being collected and used at an exponential pace across a range of research sectors. Digital health uses data and information technology to support and enhance clinical safety, improve productivity and efficiency, and connect the health system. Data-intensive approaches are also vital to research that depends on data assets to access, generate, process, share and repurpose research data to address major health challenges, for example emerging fields such as 'big data' in healthcare, bioinformatics, computational biology, metagenomics, artificial intelligence, precision medicine and new diagnostics. Current efforts continue to improve healthcare delivery and further advances are needed to improve data utilisation for more integrated and effective health and healthcare systems. Support for informatics (e.g. data registries, biobanks, data linkage platforms and secure data storage), artificial intelligence, machine learning and predictive analytics research, advanced clinical decision-making tools, wearables, and other emerging innovative digital technologies is the key to realising the benefits of healthcare digitalisation. There is potential for improved prevention, patient care, behavioural change, and care compliance through better access of existing data. This can be achieved by supporting research that

The EME Programme funds ambitious studies evaluating interventions that have the potential to make a step-change in the promotion of health, treatment of disease and improvement of rehabilitation or long-term care. Applications are sought for research into the efficacy and/or mechanism of interventions that are based in or used by the NHS and its partners. This document provides the detailed call specification for applications to the EME researcher-led workstream, which includes: Efficacy studies - These aim to evaluate the efficacy of a wide range of interventions, where there is some human 'proof-of-concept', i.e. a signal that the technology may work. Mechanistic studies - These aim to test hypotheses around the mechanism of action of an intervention, making use of patients, data or samples from other studies. Combined Efficacy and Mechanistic studies, which both evaluate a intervention and test hypotheses around its mechanism of action within the same study.</p> </div> </div>

	Synopsis	The aim of Better Methods Better Research (BMBR) is to ensure optimal research methods are being used to advance biomedical, health and care focused research, policy and delivery across the UK. Better Methods, Better Research (BMBR) funds the development of generalisable methods that underpin research. This includes biomedical, health and social care research. These methods must be applicable beyond a single case study or research question. They need to be applicable as they are, without significant modification. Methodology research should also be developed with end-user engagement.

	Deadline Dates (ALL)	02-Dec-2025			
	Synopsis	The PSF supports investigators from the beginning of their careers, during residency and as they advance to becoming experienced and well-established plastic surgeons. The purpose of the Research Fellowship Grant is to encourage research and academic career development in plastic surgery. This grant is for salary support only for a Resident or Fellow to obtain training and experience in research, under the guidance of an experienced mentor. The application must describe a structured research training plan, in addition to a research project. Only already funded research projects will be considered. Evaluation of the application will place emphasis on the research training experience, research project, applicant potential and mentor qualifications and commitment to mentoring. Research Fellowship grants must be used for salary support only.
