

**Funding Opportunities Monthly Edition
Feb 2026 Due Dates**

Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in Feb 2026.

The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

The Development Office offers assistance with many not for profit opportunities. Please contact the Development Office's Corporate and Foundation Relations team at DevCorpFound@mountsinai.org / 212-659-8500 below for assistance or questions.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
125423	Paul Calabresi Career Development Award for Clinical Oncology (K12 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	PAR-24-153	18-Feb-2026	Not Specified

Special emphasis is placed on training clinical scientists whose career goal is to improve the care and outcomes of minority health populations and populations with health disparities that are underrepresented in clinical research by increasing their access to and representation as human subjects in cancer clinical trials using an equity lens. This Notice of Funding Opportunity (NOFO) allows the appointment of Scholars proposing to serve as the lead investigator of an independent community-based clinical trial; proposing to increase the integration of cancer health disparities research questions into clinical trials; or proposing a separate ancillary study to an existing prevention, screening, intervention, control or treatment trial; or proposing to gain research experience in a community-based clinical trial led by another investigator; or proposing to serve as leader of innovative clinical trial approaches that expand engagement of minority health populations and populations with health disparities that are underrepresented as human subjects in cancer clinical trials, as part of their research and career development.</p></div>				
129319	Integrating Biospecimen Science Approaches into Clinical Assay Development (U01 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-25-325	04-Feb-2026	1,250,000 USD
	<div>Contact NameAbhi Rao, Ph.D.</div> <div>Contact Telephone240-276-5715</div> <div>Contact Emailabhi.rao@nih.gov</div> <div>Sponsor WebsiteLink to sponsor website</div> <div>Program URLLink to program URL</div> <div>Deadline Dates (ALL)04-Feb-2026 , 04-Jun-2026 , 10-Sep-2026 , 04-Feb-2027 , 04-Jun-2027 , 10-Sep-2027</div> <div>Synopsis<p>Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) intends to support extramural</p></div>				

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>research to investigate and mitigate challenges in clinical assay development and subsequent analytical validation due to preanalytical variability in tumor tissue biopsies, blood biospecimens utilized as "liquid biopsies", or other biospecimens as described in this NOFO. Extramural research funded under this NOFO may include investigations of preanalytical variability associated with the procurement and study of small biopsies (core biopsies, small excision samples), blood utilized for "liquid biopsies", tissue swabs, tissue secretions, pleural and esophageal aspirates, feces, or bodily fluids like sweat, urine, CSF, breast milk and saliva. Investigator-designed experiments will explore how different biospecimen preanalytical conditions affect emerging and clinically relevant biomarkers quantified by a variety of testing platforms. The results from this research program will improve the understanding of how analytical quantification of clinically relevant biomarkers is affected by variation in biospecimen collection, processing, and storage procedures. The overall goal is to expedite biomarker clinical assay development through evidence-based standardization of biopsy handling practices.</p>				
120755	Assay Development and Screening for Discovery of Chemical Probes, Drugs or Immunomodulators (R01 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-25-153	05-Feb-2026	Not Specified

	Program URL	Link to program URL			
	Deadline Dates (ALL)	05-Feb-2026 , 05-Jun-2026			
	Synopsis	<p>Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) intends to stimulate research in discovery and development of novel, small molecules for cancer. Molecules discovered through this NOFO may be used to probe cancer biology, to validate cancer targets, or as the basis for optimized drugs. Stages of discovery research covered by this NOFO include: 1) development of the primary screen assay(s) and testing in an initial pilot screen; 2) primary screen implementation to identify initial screening hits (high throughput target-focused screens, or moderate throughput screens); 3) hit validation using a series of assays and initial medicinal chemistry inspection to prioritize the hit set.</p>			
120726	Academic-Industrial Partnerships (AIP) to Translate and Validate In Vivo Imaging Systems (R01 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	PAR-25-079	05-Feb-2026	2,499,995 USD

	Contact Telephone	240-276-5894			
	Contact Email	Darrell.Tata@nih.gov			

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 05-Feb-2026 , 05-Oct-2026</p> <p>Synopsis Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) intends to stimulate translation of scientific discoveries and engineering developments in imaging, data science and/or spectroscopic technologies into methods or tools that address contemporary problems in understanding the fundamental biology, potential risk of development, diagnosis, or treatment of cancer. A distinguishing feature of each application to this NOFO will be formation of an academic-industrial partnership: a strategic alliance of academic and industrial investigators who work together as partners to identify and translate a technological solution for mitigation of a cancer (or other disease-related) problem. In this sense, the NOFO acts more as a funding mechanism for driving translational research in imaging than for a specific scientific or clinical research area. These partnerships are expected to solidify pre-existing collaborations or establish new ones that would drive the field of imaging, as a whole, further than if they had not been formed. This NOFO defines innovation as the likelihood to deliver a new capability to end users. This funding announcement will support clinical trials that test functionality or validate performance in the chosen setting. However, this NOFO is not intended to support commercial production, basic research projects, or clinical trials that lack translation as the primary motivation.</p>				
120756	Understanding Expectancies in Cancer Symptom Management (R01 Clinical Trial Required)	National Cancer Institute/NIH/DHHS	PAR-25-254	05-Feb-2026	Not Specified
	<p>Contact Name Rebecca Ferrer</p> <p>Contact Telephone 240-276-6914</p> <p>Contact Email ferrerra@mail.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 05-Feb-2026</p> <p>Synopsis This Notice of Funding Opportunity (NOFO) will solicit mechanistic research that aims to understand how and why expectancy effects occur in a cancer context, elucidate their role in cancer symptom management, and identify patients, symptoms, cancer sites, and contexts in which expectancy effects can be leveraged to improve cancer outcomes. Expectancies are defined in this context as beliefs about future outcomes, including one's response to cancer or cancer treatment. Expectancies can be evoked by social, psychological, environmental, and systemic factors. Expectancy effects are the cognitive, behavioral, and biological outcomes caused by expectancies. Expectancy effects can be generated by expectancies held by patients, clinicians, family members, caregivers, and/or dyadic/social networks. Program is particularly interested in</p>				

NIH Funding Opportunities

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>prevention and control. This NOFO will support investigator-initiated research for both analytical, and clinical validation of assays to be used in cancer treatment, control, or prevention trials supported by the NCI. This NOFO will also support the validation of pharmacodynamic markers and markers of toxicity. Applicants should have assays that work on human samples and whose importance is well justified for development into clinical assays. As chemotherapies and/or radiation therapies are increasingly combined with immunotherapies to enhance durability of anti-cancer responses, assays for measuring multiple markers, including immune markers, can be developed and validated simultaneously. The UH2 phase of this NOFO supports analytical validation of assays for these molecular/cellular/imaging markers, which must be achieved within 2 years before assays may undergo clinical validation. The UH3 phase of this NOFO supports clinical validation of analytically validated assays for up to 3 years using well-annotated biospecimens from retrospective or prospective clinical trials or studies. This NOFO may be used to validate existing assays for use in other cancer clinical trials, observational studies, or population studies. Efforts to harmonize clinical laboratory tests, including investigation into the performance and reproducibility of assays across multiple clinical laboratories, are also appropriate for this funding opportunity. Projects proposed for this NOFO will require multi-disciplinary interaction and collaboration among scientific investigators, oncologists, statisticians, and clinical laboratory scientists. This NOFO is not intended to support early-stage development of technology or the conduct of clinical trials but is intended for validation of assays to the point where they could be integrated into clinical trials/studies as investigational assays. Investigators responding to this NOFO must address both UH2 and UH3 phases. Milestones to be accomplished in the UH2 phase for transition to the UH3 phase must be proposed by the investigators.</p>				
121826	Revision Applications for Validation of Biomarker Assays Developed Through NIH-Supported Research Grants (R01 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-24-304	13-Feb-2026	450,000 USD
	Contact Name	Sumana Dey, Ph.D.

	Deadline Dates (ALL)	13-Feb-2026 , 10-Jul-2026 , 14-Oct-2026			
	Synopsis	<p>Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) encourages revision applications (formerly called "competing revisions") from currently funded NCI R01 research projects. The applicants should propose projects that are expected to accelerate the pace of translation of NCI-supported methods/assays/technologies (referred to as "assays") to the clinic. Specifically, the focus of applications submitted in response to this NOFO should be on the adaption and clinical validation of molecular/cellular/imaging markers (referred to as "markers" or "biomarkers") for cancer detection, diagnosis, prognosis, monitoring, and prediction of response in treatment, as well as markers for cancer prevention and</p>

	<p>control. Applications may support the acquisition of well-annotated specimens from NCI-supported or other clinical trials or observational cohorts/consortia for the purpose of clinical validation of the assay. Research projects proposed in response to this NOFO encourage multidisciplinary interaction among scientific investigators, assay developers, clinicians, statisticians, and clinical laboratory staff. Clinical laboratory scientist(s) and statistical experts are highly encouraged to comprise integral parts of the application. This NOFO is not intended to support early-stage development of technology or the conduct of clinical trials, but rather the adaption and validation of assays to the point where they could be integrated into clinical trials as investigational assays/tools/devices.</p>				
129809	NCI Pathway to Independence Award (K99/R00 – Clinical Trial Required)	National Cancer Institute/NIH/DHHS	PAR-25-313	17-Feb-2026	Not Specified

	Synopsis	The purpose of this notice of funding opportunity (NOFO) is to support policy research projects that examine new or adapted policies pertaining to tobacco, alcohol, and/or cannabis in the U.S., with a particular focus on how the policy or policies influence tobacco, alcohol, and cannabis use or secondhand exposure among populations experiencing disparities. Funded projects will involve authentic engagement with one or more community organizations with the aim of promoting equity in cancer prevention by addressing tobacco, alcohol, and cannabis use and exposure. The long-term goal is to support tobacco, alcohol, and cannabis policy research studies that will improve health equity and promote cancer prevention. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).			
128810	Basic Research in Cancer Health Disparities (R21 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-25-244	16-Feb-2026	400,000 USD

	<p>into the biological/genetic causes of cancer health disparities. These research project grants (R01) will support innovative studies designed to investigate biological/genetic bases of cancer disparities, such as (1) mechanistic studies of biological factors associated with cancer disparities, including those related to basic research in cancer biology or cancer prevention strategies, (2) the development and testing of new methodologies and models, and (3) secondary data analyses. This FOA is also designed to aid and facilitate the growth of a nationwide cohort of scientists with a high level of basic research expertise in cancer health disparities research who can expand available resources and tools, such as biospecimens, patient derived models, and methods that are necessary to conduct basic research in cancer health disparities.</p>				
128883	Utilizing the PLCO Biospecimens Resource to Bridge Gaps in Cancer Etiology and Early Detection Research (U01 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-25-248	10-Feb-2026	Not Specified
	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email</p> <p>Sponsor Website</p> <p>Program URL</p> <p>Deadline Dates (ALL)</p> <p>Synopsis</p>	<p>Claire Zhu, Ph.D.</p> <p>240-276-7013</p> <p>zhucla@mail.nih.gov</p> <p></p> <p>Link to program URL</p> <p>10-Feb-2026 , 10-Jun-2026 , 09-Oct-2026 , 10-Feb-2027 , 10-Jun-2027 , 08-Oct-2027</p> <p>Through this Funding Opportunity Announcement (FOA), the National Cancer Institute (NCI) encourages the submission of applications that propose to advance research in cancer etiology and early detection biomarkers, utilizing the advantages of the unique biorepository resources of the NCI-sponsored Prostate, Lung, Colorectal, and Ovarian Cancer (PLCO) Screening Trial. The PLCO Biorepository offers high-quality, prospectively collected, serial pre-diagnostic blood samples from the PLCO screened arm participants, and a onetime collection of buccal cells from both the screened and the control arm participants. Available data associated with the biospecimens includes demographic, diet, lifestyle, smoking, screening results, and other clinical data. This FOA supports a wide range of cancer research including, but not limited to, biochemical and genetic analyses of cancer risk, as well as discovery and validation of early detection biomarkers. The proposed research project must involve use of PLCO biospecimens and may include other resources; additionally, it should also take advantage of the unique characteristics of the PLCO biospecimens. Research on non-cancer outcomes, especially those related to aging (e.g., Alzheimer's, depression, hip fracture, osteoporosis and rheumatoid arthritis) may also be supported. Research projects that do not involve the use of PLCO biospecimens will not be supported under this FOA.</p>

 Deadline Dates (ALL) 17-Feb-2026 , 15-Jun-2026 , 14-Oct-2026

Synopsis The purpose of the NCI Pathway to Independence Award for Early-Stage Postdoctoral Researchers (K99/R00) program is to increase and maintain a strong cohort of new and talented, NCI-supported, independent investigators. This program is designed for postdoctoral fellows with research and/or clinical doctoral degrees who do not require an extended period of mentored research training beyond their doctoral degrees. The objective of this award is to facilitate a timely transition of these fellows from their mentored, postdoctoral research positions to independent tenure-track (or equivalent) faculty positions. The program will provide independent NCI research support during this transition to help awardees launch competitive, independent research careers. Researchers in the scientific areas of cancer control, cancer prevention and cancer data sciences are especially encouraged to work with their institutions to apply. This Notice of Funding Opportunity (NOFO) is designed specifically for candidates proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary clinical trial, as part of their research and career development. Those not planning an independent clinical trial, or proposing to gain research experience in a clinical trial led by another investigator, must apply to companion NOFO (PAR-23-286). This Notice of Funding Opportunity is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or

	Deadline Dates (ALL)	13-Feb-2026 , 10-Jun-2026 , 14-Oct-2026			
	Synopsis	<p>Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) intends to accelerate the adoption and validation of molecular/cellular/imaging markers (referred to as "markers" or "biomarkers") and assays for cancer detection, diagnosis, prognosis, monitoring, and prediction of response or resistance to treatment, as well as markers for cancer prevention and control. This NOFO will also support the validation of pharmacodynamic markers and markers of toxicity. Applicants to this NOFO must have an assay(s) whose performance has been analytically validated in specimens similar to those for the intended clinical use of the marker(s) and assay(s). As chemotherapies and/or radiation therapies are increasingly combined with immunotherapies to enhance the durability of anti-cancer responses, assays for measuring</p>

	<p>multiple markers, including immune markers, can be developed and validated simultaneously. The UH3 mechanism will support the clinical validation of established assays for up to 3 years using specimens from retrospective or prospective clinical trials or studies. This NOFO may be used to validate existing assays for use in other trials, observational studies, or population studies. Efforts to harmonize clinical laboratory tests, including investigation into the performance and reproducibility of assays across multiple clinical laboratories, are also appropriate for this funding opportunity. Projects proposed for this NOFO will require multidisciplinary interaction and collaboration among scientific investigators, oncologists, statisticians, and clinical laboratory scientists. This NOFO is not intended to support early-stage development of technology or the conduct of clinical trials but is intended for validation of assays to the point where they could be integrated into clinical trials/studies as investigational assays.</p>

	<p>Contact Name David Dean Jr., Ph.D., M.S.</p> <p>Contact Telephone 240-276-8703</p> <p>Contact Email chipper.dean@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 05-Feb-2026 , 05-Jun-2026 , 05-Oct-2026</p> <p>Synopsis Through this notice of funding opportunity (NOFO), the National Cancer Institute (NCI) intends to support the rigorous assessment of barriers to quality cancer treatment and follow-up care for sexual and gender minority (SGM) cancer survivors. This funding opportunity is intended to address a critical need for improved care delivery and outcomes for SGM cancer survivors. The goal is to address the disease burden in an underserved and understudied population that is at higher risk of poorer health outcomes. The NCI solicits proposals for observational and/or interventional studies of SGM survivors designed to understand barriers and/or improve care and outcomes for SGM people with cancer, using interoperable sexual orientation and gender identity (SOGI) data collection in cancer care settings, where appropriate.</p>				
120973	Mechanisms that Impact Cancer Risk with Use of Incretin Mimetics (R01 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	PAR-25-069	05-Feb-2026	Not Specified

	Program URL	Link to program URL			
	Deadline Dates (ALL)	05-Feb-2026 , 05-Jun-2026 , 05-Oct-2026			
	Synopsis	Through this notice of funding opportunity (NOFO), the National Cancer Institute (NCI) invites applications for investigator-initiated studies addressing mechanisms by which incretin mimetics, specifically glucagon-like peptide (GLP)-1 or dual GLP-1/glucose?dependent insulinotropic polypeptide (GIP)-1 receptor agonists (RAs), impact cancer risk. The focus on these agents is due to their reported effects on thyroid, prostate and other cancer risks, and the generally more favorable efficacy and side effect profile compared to other classes of incretin mimetics. In addition, this NOFO seeks to draw in talented scientists to the cancer biology field who may study incretin mimetic effects on diseases other than cancer. Investigators wishing to study incretin mimetics other than GLP-1 RAs or GLP-1/GIP-1 RAs, such as dipeptidyl peptidase (DPP)-4 inhibitors, must justify why the agent(s) they propose to study are more effective and/or have a more favorable side effect profile than GLP-1 or GLP-1/GIP-1 RAs. Route of agent administration (oral vs. other) is, by itself, not an adequate justification.			
120897	Research Projects to Enhance Applicability of Mammalian Models for Translational Research (R01 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-24-306	05-Feb-2026	2,495,000 USD
	Contact Name	Joanna Watson, Ph.D.

	Deadline Dates (ALL)	05-Feb-2026 , 05-Jun-2026			
	Synopsis	Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) invites applications for projects to expand, improve, or transform the utility of mammalian cancer and tumor models for translational research. The NCI, through this NOFO, encourages submission of projects devoted to demonstrating that mammalian models, including organoids, tumoroids and cell models, used for translational research are robust representations of human biology, are appropriate to test questions of clinical importance, and provide reliable information for patient benefit. These practical goals contrast with the goals of many mechanistic, NCI-supported R01 projects that use mammals, or develop and use mammalian cancer models, transplantation tumor models, or models derived from mammalian or human tissues or cells for hypothesis-testing, non-clinical research. Among many other possible endeavors, applicants in response to this NOFO could propose demonstrations of how to overcome translational deficiencies of mammalian oncology models, define new uses of mammalian models or their genetics for unexplored translational challenges, advance standard practices for use of

	<p>[Optional][LOI/Pre-App], 05-Oct-2026 , 06-Jan-2027 [Optional][LOI/Pre-App], 05-Feb-2027 , 06-May-2027 [Optional][LOI/Pre-App], 05-Jun-2027 , 05-Sep-2027 [Optional][LOI/Pre-App], 05-Oct-2027</p> <p>Synopsis Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) invites research grant applications (R01) for the development and application of current and emerging molecular imaging methods to gain fundamental insights into cancer inflammation in vivo. The motivation for this initiative is the recognition that much of the current imaging research on inflammation in cancer relies heavily on in vitro and ex vivo methods. These approaches have limited potential to provide significant insights into the dynamic interactions between cancer and inflammation. Utilizing molecular imaging probes in pre-clinical and clinical investigations allows for precise temporal resolution at molecular and cellular levels. This information is valuable for identifying and characterizing in vivo inflammatory cellular physiology in cancer and for detecting molecular changes in response to treatment. This NOFO encourages applications focused on developing integrated imaging approaches to investigate the role of inflammation in cancer through strong cross-discipline collaboration between cancer basic science researchers and imaging scientists. These collaborations are expected to advance the science and understanding of cancer inflammation interactions.</p>				
128621	Integration of Imaging and Fluid-Based Tumor Monitoring in Cancer Therapy (R01 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	PAR-25-175	06-Jan-2026 [Optional][LOI/Pre-App]	499,999 USD

	Deadline Dates (ALL)	05-Feb-2026 , 05-Jun-2026 , 05-Oct-2026 , 05-Feb-2027 , 05-Jun-2027 , 05-Oct-2027			
	Synopsis	The purpose of this Funding Opportunity Announcement (FOA) is to stimulate efforts to translate scientific discoveries and engineering developments into methods or tools that address problems in basic research to understand disease, or in applied research to assess risk, detect, prevent, diagnose, treat, and/or manage disease. The rationale is to deliver new capabilities to meet evolving requirements for technologies and methods relevant to the advance of research and delivery of care in pre-clinical, clinical and non-clinical settings, domestic or foreign, for conditions and diseases within the missions of participating institutes. This FOA specifies a partnership structure that is expected to help bridge gaps in knowledge and experience by engaging the strengths of academic, industrial, and other investigators. The partners on each application should establish an inter-disciplinary, multi-institutional research team to work in strategic alliance to implement a coherent strategy to develop and translate a solution to their chosen problem. They are expected to plan, design, and validate that the solution will be suitable for end users. Each partnership should include at least one academic and one industrial organization. Each partnership should plan to transition a technology, method, assay, device, and/or system from a demonstration of possibility to a status useful in the chosen setting. Funding may be requested to enhance, adapt, optimize, validate, and otherwise translate technologies that address problems in biology, pathology, risk assessment, diagnosis, treatment, and/or monitoring of disease status. This FOA defines "innovation" as likelihood to deliver a new capability to end users. This FOA will support clinical trials that test functionality or validate performance in the chosen setting. This FOA is not intended to support straight clinical trials that lack translation as the primary motivation. Applications that propose phase III clinical trials in any area of cancer research are not sought by and will not be supported through this FOA. This FOA does not propose to support commercial production or basic research projects.

	Deadline Dates (ALL)	02-Feb-2026 , 01-Oct-2026 , 02-Jun-2027			
	Synopsis	<p>The purpose of this notice of funding opportunity (NOFO) is to support highly innovative mechanistic research to accelerate the development of effective precision probiotic interventions using a milestone-driven, biphasic award mechanism. It aims to identify, understand, and develop strategies to address barriers in precision probiotic interventions to account for the heterogeneity in humans that often causes inconsistent probiotic therapeutic responses. Specifically, this NOFO solicits applications that will characterize person-specific features affecting probiotic responses to identify subgroups of probiotic responders, which may then help enhance probiotic clinical outcomes. The first phase, funded by the R61 mechanism, will provide 1 or 2 years of support to identify host biological patterns (e.g., native microbiome, immune system, sex and/or gender, diet, age, genetic background, lifestyle, or health history) that are correlated with differences in probiotic clinical effects using observational or secondary data analysis studies. The second phase, funded under the R33 mechanism, will support studies to assess the causality of the factors identified in the R61 phase that impact probiotic responsiveness through rigorous mechanistic study designs in animal models or human subjects. This NOFO will not support efficacy or effectiveness clinical trials. The combined R61/R33 should not exceed 5 years. Transition to the R33 phase requires administrative review by NIH staff and is not guaranteed. Approval of the transition to the R33 phase will be based on the original R61/R33 peer review recommendations, successful completion of transition milestones, any proposed changes to the R33 research based on R61 findings, program priorities, and availability of funds. It is not expected that all applications will continue to the R33 phase. Support for a single phased award that does not need the R61 Exploratory phase is available in the companion (R33) NOFO, PAR-25-210. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).</p>			
126576	Enhancing Mechanistic Research on Precision Probiotic Therapies (R33 Clinical Trial Optional)	National Center for Complementary and Integrative Health/NIH/DHHS	PAR-25-210	02-Feb-2026	1,400,000 USD

	Deadline Dates (ALL)	23-Feb-2026 , 17-Mar-2026 , 20-Oct-2026 , 13-Nov-2026			
	Synopsis	<p>This Funding Opportunity Announcement (FOA) invites cooperative agreement applications for investigator-initiated mid-phase clinical trials of natural products. All applications submitted under this FOA must be supported by sufficient preliminary data of bioavailability and documentation that the natural product produces a replicable and measurable impact on a biological signature (i.e., measure of the mechanism of action). Only in cases when it is not possible/practical to measure a biological signature in the patient population of interest or when there is a fundamental understanding of the product's mechanism of action will this preliminary data requirement be waived. Applications submitted to this FOA should propose a mid-phase clinical trial to do the following: determine the optimal dose or formulation of a given natural product for use in a future multi-site clinical trial; or determine which patient phenotypes will be responders versus non-responders to the natural product to inform inclusion/exclusion criteria of a future efficacy study. Clinical trials submitted under this FOA are expected to be hypothesis based, milestone-driven, and directly related to the research priorities and mission of NCCIH. This FOA will not support single-site or multi-site efficacy or effectiveness trials, nor will it support trials to test natural products for the treatment or prevention of cancer. Applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact for the area of science for which they are planning to develop an application prior to submitting to this FOA.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 21-Jan-2026 [Optional][LOI/Pre-App], 20-Feb-2026 , 17-Mar-2026 , 23-May-2026 [Optional][LOI/Pre-App], 22-Jun-2026 , 14-Jul-2026</p> <p>Synopsis This notice of funding opportunity (NOFO) encourages applications for investigator-initiated multisite clinical trials (e.g., efficacy, effectiveness, or pragmatic trials) to study the effects of complementary and integrative health approaches with physical and/or psychological therapeutic inputs (often called mind and body interventions), and/or multicomponent interventions that include physical, psychological, and/or nutritional approaches in NCCIH-designated areas of high research priority. Clinical coordinating centers (CCC) should develop and implement the proposed fully powered multisite clinical trial (Phase III and beyond). The objective of a CCC application is to present the scientific rationale and a comprehensive scientific and operational plan for the clinical trial. CCC applications are expected to describe plans for project management, participant recruitment and retention strategies, performance milestones, scientific conduct, and dissemination of results. CCC applications submitted under this NOFO will utilize a two-phase, milestone-driven cooperative agreement (UG3/UH3) funding mechanism. In addition, an accompanying data coordinating center (DCC) application (U24), submitted under PAR-24-087 and proposing a data analysis and data management plan for the clinical project, is required. Both a CCC application and a corresponding DCC application need to be submitted simultaneously for consideration by NCCIH. For additional information about the mission, strategic vision, and research priorities of NCCIH, applicants are encouraged to consult the NCCIH website (https://nccih.nih.gov/about/plans). Applicants are encouraged to contact the appropriate Scientific/Research Contact for the area of science for which they are planning to develop an application prior to submitting to this NOFO. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).</p>				
123147	NCCIH Multi-Site Feasibility Clinical Trials of Mind and Body Interventions (R01 Clinical Trial Required)	National Center for Complementary and Integrative Health/NIH/DHHS	PAR-25-267	20-Feb-2026	Not Specified

	<p>trial within NCCIH's mission. NCCIH expects that applications to this NOFO will describe the planned future clinical trial and in so doing demonstrate that the proposed (R01) research is scientifically necessary to design or plan the subsequent fully powered, full-scale clinical trial. Under this R01, the data collected should be used to fill gaps in scientific knowledge, including, but not limited to the following: assessing whether the intervention can be delivered with fidelity across sites; demonstrating feasibility of recruitment, accrual, and randomization of participants across sites; demonstrating participant adherence to the intervention, as well as retention of participants throughout the study across sites; refining and assessing the feasibility of protocolized multimodal interventions, and/or demonstrating feasibility of data collection across sites in preparation for a future fully powered, multisite efficacy or effectiveness trial. The need for multisite feasibility trials is expected to be justified by sufficient preliminary data from previous single site feasibility or acceptability trial(s) or the published literature. The data collected should be used to fill gaps in scientific knowledge and be necessary to develop a competitive fully powered multisite clinical trial that has the potential to make a significant impact on public health. Prior to submitting to this NOFO, applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact person for the science area of the planned application. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

	Deadline Dates (ALL)	20-Feb-2026 , 17-Mar-2026 , 22-Jun-2026 , 13-Jul-2026 , 20-Oct-2026 , 17-Nov-2026			
	Synopsis	<p>The goal of this notice of funding opportunity (NOFO) is to support feasibility trials of complementary and integrative health approaches with physical and/or psychological therapeutic inputs (often called mind and body interventions) for conditions that have been identified by NCCIH as high-priority research topics. This funding opportunity is intended to support feasibility clinical trials that provide new information that are scientifically necessary for the planning and conduct of a subsequent clinical efficacy or effectiveness study, pragmatic trial, or dissemination and implementation trial within NCCIH's mission. NCCIH expects that applications to this NOFO will describe the planned future clinical trial and in so doing demonstrate that the proposed (R34) research is scientifically necessary to design or plan the subsequent competitive full-scale clinical trial. Under this R34, the data collected should be used to fill gaps in scientific knowledge necessary to develop a competitive full-scale clinical trial, including, but not limited to the following: examining feasibility and acceptability of interventions lacking published data; tailoring or adapting the content or structure of an intervention to a specific population, modality, or setting; refining the intervention to determine the most appropriate frequency or duration; determining feasibility of recruitment, retention, and data collection procedures; refining and assessing the feasibility of protocolized multi-component interventions; or examining acceptability and adherence of control conditions. The subsequent full-scale clinical trial should have the potential to make a significant impact on public health. Prior to submitting to this NOFO, applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact person for the science area of the planned application. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will</p>

	<p>environment, organizational structure, and collaborative arrangements. This information is best conveyed in a Manual of Procedures (MOP), the development of which represents a costly and time-consuming activity. This clinical research planning grant funding opportunity supports applicants in their planning efforts to conduct collaborative clinical research. The grant may be used to support the development of a MOP, as well as to conduct preliminary studies to refine study procedures or document recruitment potential. The grant must not be used to generate data on the effects of a proposed intervention. This NEI FOA is applicable to both epidemiologic and clinical trial research studies.</p>				
129611	NEI Research Grant for Vision-Related Secondary Data Analysis (R21 Clinical Trial Not Allowed)	National Eye Institute/NIH/DHHS	PAR-25-357	07-Jan-2026	275,000 USD
	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email</p> <p>Sponsor Website</p> <p>Program URL</p> <p>Deadline Dates (ALL)</p> <p>Synopsis</p>	<p>Donald Everett, M.A.</p> <p>301-435-8181</p> <p>everettd@mail.nih.gov</p> <p></p> <p>Link to program URL</p> <p>07-Jan-2026 , 16-Feb-2026 , 07-May-2026 , 16-Jun-2026 , 07-Sep-2026 , 16-Oct-2026 , 07-Jan-2027 , 16-Feb-2027 , 07-May-2027 , 16-Jun-2027 , 07-Sep-2027 , 16-Oct-2027 , 07-Jan-2028</p> <p>The purpose of this Notice of Funding Opportunity (NOFO) is to conduct secondary data analyses using existing data collected from humans participating in vision-related clinical trials, epidemiologic, and other clinical research studies or represented in clinical and health care database resources (e.g., electronic health records). This NOFO may be used to develop new statistical methodologies or test hypotheses using existing data, but this NOFO must not be used to support the collection of new data. This NOFO encourages applications from institutions/organizations that propose to conduct vision-related secondary analyses of data collected from humans. Applications may be related to, but must be distinct from, the specific aims of the original data collection. The NEI supports an extensive portfolio of clinical trials and large-scale epidemiologic research projects wherein numerous data collection activities are required to meet each project's specific aims. The resultant wealth of data generated by these studies often provides unique, cost-effective opportunities to investigate additional research questions or develop new analytical approaches secondary to a project's originally intended purpose. Data are not limited to those collected under NEI support, but such data are of the highest programmatic interest.</p>			
125579	RFA-HL-26-002 -- NHLBI Outstanding Investigator Award (OIA) (R35 Clinical Trial Optional)	National Heart, Lung, and Blood Institute/NIH/DHHS	RFA-HL-26-002	20-Jan-2026 [Optional][LOI/Pre-App]	4,900,000 USD

	<p>with the potential to develop meritorious training programs in cardiovascular, pulmonary, and hematologic diseases, and sleep disorders. These institutions are uniquely positioned to educate and train students from diverse backgrounds, including those from underrepresented groups, in research, translation, and implementation of research advances that impact health outcomes, as well as provide health care for populations experiencing health disparities. Please note that institution eligibility is outlined in Section III, and funding decisions are based on the outcome of the peer review process and scientific priorities of the NHLBI. This Notice of Funding Opportunity (NOFO) does not allow appointed Trainees to lead an independent clinical trial, but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor.</p>				
116586	Notice of Special Interest (NOSI): Integrative Omics Analysis of NHLBI TOPMed Data (Parent R01 Clinical Trial Not Allowed)	National Heart, Lung, and Blood Institute/NIH/DHHS	NOT-HL-23-067	07-Jan-2026	Not Specified
	<p>Contact Name James Luo, Ph.D.</p> <p>Contact Telephone 301-435-0533</p> <p>Contact Email luoja@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2026 , 05-Feb-2026 , 07-May-2026</p> <p>Synopsis The symptom-based diagnosis and treatment of heart, lung, blood, and sleep (HLBS) diseases has vastly improved in recent years, yet an understanding of the molecular mechanisms underlying many of these diseases has remained elusive. Furthermore, in most cases the impact of genetic variation on severity of disease and treatment outcomes remains unknown. Therefore, the NHLBI has created the Trans-omics for Precision Medicine (TOPMed) program, which aims to utilize genomics data to characterize a variety of HLBS diseases. TOPMed is well on its way to collecting whole genome sequence (WGS) from over 194,270 well-phenotyped individuals and is currently generating multi-omics data (e.g., over 31,852 RNA sequences, over 44,342 DNA methylation profiles, and 26,124 metabolomics profiles) from many of these individuals to complement whole genome sequence information. Having produced an unprecedented volume of high-throughput data, TOPMed now seeks to turn its attention to effectively leveraging this resource to uncover biological function and disease pathobiology through novel systems biology analyses and the power of artificial intelligence (AI) and Machine Learning (ML). Although lower costs and technological improvements in sequencing technology have vastly expanded our ability to generate large volumes of omics data, the ability to analyze such large datasets to extract biologically meaningful insights remains challenging. Systems level models incorporating trans-omics analyses will be an important step in uncovering the underlying biological networks and the gene-gene and gene-environment interactions influencing disease and treatment outcomes. Thus, advanced analyses that incorporate genotype and phenotype datasets from thousands to tens of thousands of</p>

	Deadline Dates (ALL)	12-Feb-2026 , 12-Jun-2026 , 12-Oct-2026 , 12-Feb-2027 , 12-Jun-2027			
	Synopsis	<p>The purpose of the NHLBI Career Transition Award (K22) program is to provide highly qualified postdoctoral fellows and other doctoral-level researchers currently in training in the NHLBI Division of Intramural Research with the opportunity to transition their research programs to extramural institutions as junior investigators. To achieve these objectives, the NHLBI Career Transition Award will support two phases of research: a mentored intramural phase (up to two years) and an extramural phase (three years), for a total of five years of combined support. Transition from the intramural phase of support to the extramural phase is not automatic. Approval of the transition will be based on the success of the awardee's research program during the mentored phase as determined by an NHLBI progress review, which will include an evaluation of a research plan to be carried out at the extramural institution. This Funding Opportunity Announcement (FOA) is designed specifically for candidates proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary study to a clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. Those proposing a clinical trial or an ancillary clinical trial as lead investigator, should apply to the companion FOA, PAR-24-211 "NHLBI Career Transition Award for Intramural Postdoctoral Fellows and Research Trainees (K22- Clinical Trial Required)".</p>

<div> <div>Synopsis</div> <div> <p>This Notice of Funding Opportunity (NOFO) supports studies that are both necessary and sufficient to inform the planning of a Phase II-IV clinical trial within NHLBI's mission. The NHLBI expects that applications to this NOFO will describe the planned clinical trial and in so doing demonstrate that the proposed (R34) research is scientifically necessary to design or plan the subsequent trial. Furthermore, this NOFO will support research projects that are designed to provide results that will be sufficient to inform the future trial without further studies. The planned Phase II, III, or IV trial must be primarily intended to test the efficacy, safety, clinical management, or implementation of intervention(s) in the prevention and/or treatment of heart, lung, blood, or sleep disorders. In contrast to the study start up or preparation phase of NHLBI funding opportunities for clinical trials (as described at Clinical Trial Development Continuum NHLBI, NIH), the R34 mechanism is intended to provide new information that answers a scientific or operational question(s) which may be pragmatic in nature and, therefore, informs the final development of a Phase II-IV clinical trial. Regardless of the results of the R34, support of the proposed future clinical trial will require a new application. Plan for Enhancing Diverse Perspectives The NIH recognizes that</p> </div> </div>					

NIH Funding Opportunities

	<p>diverse teams working together and capitalizing on innovative ideas and distinct perspectives outperform homogeneous teams. There are many benefits that flow from a diverse scientific workforce, including: fostering scientific innovation, enhancing global competitiveness, contributing to robust learning environments, improving the quality of the research, advancing the likelihood that underserved populations participate in, and benefit from research, and enhancing public trust. To support the best science, the NIH encourages inclusivity in research. Examples of structures that promote diverse perspectives include but are not limited to: -Transdisciplinary research projects and collaborations among neuroscientists and researchers from fields such as computational biology, physics, engineering, mathematics, computer and data sciences, as well as bioethics. - Engagement from different types of institutions and organizations (e.g., research-intensive, undergraduate-focused, minority-serving, community-based). - Individual applications and partnerships that enhance geographic and regional heterogeneity. - Investigators and teams composed of researchers at different career stages. - Participation of individuals from diverse backgrounds, including groups historically underrepresented in the biomedical, behavioral, and clinical research workforce (see NOT-OD-20-031), such as underrepresented racial and ethnic groups, those with disabilities, those from disadvantaged backgrounds, and women. - Opportunities to enhance the research environment to benefit early- and mid-career investigators. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

	grounded in the advanced methods and experimental approaches needed to solve problems related to cardiovascular, pulmonary, and hematologic diseases and sleep disorders in the general and health disparities populations. This NOFO is designed to support candidates proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary clinical trial, as part of their research and career development. Those not planning an independent clinical trial, or proposing to gain research experience in a clinical trial led by another investigator, must work with their institutes to apply to companion NOFO (RFA-HL-25-009).

Basic, translational, and clinical research applications to elucidate circadian-dependent mechanisms contributing to the pathophysiology of HLBS disorders are invited. This NOSI encourages multidisciplinary and multiple investigator teams of experts in heart, lung, and blood research fields to synergistically work with circadian biologists and sleep researchers to provide a comprehensive understanding of the circadian biology in relation to HLBS conditions. The purpose is to facilitate translational research to identify potential applications of circadian science to the diagnosis, prevention and treatment of HLBS conditions. Mechanism-based studies investigating the circadian rhythm dysregulation, clinical markers, and/or therapeutic targets of HLBS conditions are encouraged. Behavioral, physiological, pharmacological, molecular, and genomic studies aimed at elucidating the relationship between circadian-dependent mechanisms and disease are appropriate. Studies to delineate circadian-based mechanisms, therapeutic targets, epidemiological risk and clinical trials to assess therapeutic safety, efficacy, effectiveness, or implementation may be proposed.</p>

	Synopsis	The objective of this Notice of Funding Opportunity (NOFO) is to support investigator-initiated, Phase 1 clinical trials for diagnostic and therapeutic interventions for heart, lung, blood, and sleep (HLBS) disorders in adults and children. The proposed trial can be single or multi-site. Applicants applying for funding under this NOFO should be ready to initiate the clinical trial within the first quarter of the project period. Discussion, submission, and attainment of applicable regulatory (FDA, DSMB, IRB) approvals, and establishment of drug (and placebo, if applicable) supplies, and any necessary third-party agreements should be established by the time of award. If time and support for these and other pre-clinical and/or trial readiness activities are desired, applicants should consider the companion NOFO PAR-25-026, which utilizes an R61/R33 phased approach.

Awards will provide support for innovative projects that introduce novel scientific ideas, model systems, tools, agents, targets, and technologies that have the potential for significant impact, and to substantially advance research within the NIAMS mission. These studies often assess the feasibility of a novel avenue of investigation and involve considerable risk, but have the potential to bring about breakthroughs of high value to the NIAMS research community.</div>

Synopsis	The NICHD Small Research Grant Program (Clinical Trial Required) supports clinical trials that fall within the NICHD mission. This funding opportunity announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Studies conducted with specific applications toward processes or products in mind should submit under the appropriate ‘Clinical Trials Required’ FOA.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	The NICHD Small Research Grant Program (R03 Clinical Trial Required) supports clinical trials that fall within the NICHD mission. The R03 activity code supports small research projects that can be carried out in a short period of time with limited resources. The R03 program may be used for different types of projects including pilot and feasibility studies; secondary analysis of existing data; small, self-contained research projects; development of research methodology; and development of new research technology.

Large quantities of genomic data collected from pediatric congenital anomalies cohorts are available to the research community through several databases such as the Database of Genotypes and Phenotypes (dbGaP), the Gabriella Miller Kids First Data Resource Portal, the European Genome-Phenome Archive and Clinical Genome Resource (ClinGen). The purpose of this initiative is to promote the screening, functional validation and characterization of congenital anomaly-associated genetic variants identified through public facing databases and individual efforts using in-silico tools, appropriate animal models, in vitro systems or multi-pronged approaches. This initiative addresses a challenging gap between identifying sequence variations of potential interest and recognizing which of those variations have functional effects on the phenotype of interest</p>

	Deadline Dates (ALL)	07-Jan-2026 , 05-Feb-2026 , 07-May-2026			
	Synopsis	<p>The purpose of this NOFO is to announce support for meritorious research projects that address research questions relevant to human dental, oral, or craniofacial (DOC) biology, and diseases and conditions, through analysis of existing and publicly available genomic data, with or without other types of complementary data, using statistical and computational approaches. Data analysis for each project can be performed using existing and/or novel methods to be developed in the proposed project(s), including methods for data and metadata mining, data integration, and Artificial Intelligence (AI)/Machine Learning (ML)/Deep Learning (DL) methods. In addition to analysis of existing data, experimental or in silico work is required to validate the results of the proposed analysis, or to validate a newly developed analytic method. Projects aimed at understanding oral health disparities to inform strategies for improving health for all individuals are a priority. Projects focused on investigating and/or characterizing human biological pathways to inform identification of intervention targets or defining the pathogenicity of known genetic variants are encouraged.</p>

Studies appropriate for this NOFO are those testing a drug, biologic, device, or procedure to improve dental, oral, or craniofacial diseases or conditions, including trials for any phase of testing for a Food and Drug Administration (FDA)-regulated product. Awards made under this NOFO will initially support a one-year milestone-driven planning phase (UG3), with possible transition to a clinical trial implementation phase (UH3) of up to five years. Progression to the UH3 phase is based on an administrative review and is dependent on success in meeting UG3 milestones, NIDCR program priorities, and availability of funds. The UG3/UH3 application must be submitted as a single application with the final design of the UH3 clinical trial including detail about the study population, intervention(s), and outcome(s) described in the application, following the instructions described in this NOFO. The UG3 planning phase permits both scientific and operational planning activities, though the planning phase cannot be used to test for intervention safety or efficacy or assess the study's primary outcome. The UH3 phase of the award will support the conduct of one investigator-initiated clinical trial. Applications designed to test behavior change interventions or those used as tools to understand mechanisms of behavior change will not be supported by this NOFO.</p>

Deadline Dates (ALL)	06-Jan-2026 , 09-Feb-2026 , 08-May-2026 , 08-Jun-2026 , 09-Sep-2026 , 08-Oct-2026 , 08-Jan-2027 , 08-Feb-2027 , 06-May-2027 , 08-Jun-2027 , 08-Sep-2027 , 08-Oct-2027 , 08-Jan-2028
Synopsis	The purpose of this Notice of Funding Opportunity (NOFO) is to provide support for the planning and implementation of well-designed, rigorously conducted, behavioral/biopsychosocial intervention studies relevant to dental, oral, and craniofacial health as well as associated medical and mental health status or comorbidities. A broad range of intervention research projects that meet the NIH Definition of a Clinical Trial are appropriate for this opportunity. Awards made under this NOFO will initially support a milestone-driven planning phase (UG3) for 1 year, with possible transition to a clinical trial implementation phase (UH3) of up to five years. The UG3/UH3 application must be submitted as a single application. Applications that employ traditional methods as well as novel/advanced features (e.g., mobile health, artificial intelligence, telehealth, responsive health system records, multiple assignment randomized trial designs (SMART) or sequential randomization designs), etc., are encouraged. This NOFO will not support the testing of drugs, devices, or biologics regulated by the FDA; the corresponding NOFO for clinical trials in these areas is PAR-25-057.

In addition to providing support for preliminary research, the Gateway program provides an opportunity for new Program Directors/Principal Investigators (PD/PIs) to pursue their studies within the intellectual environment of a select number of large, ongoing collaborative research programs. Embedding awardees within an established scientific framework in each of these consortia will provide unique opportunities for New and Early Stage Investigators to increase their understanding of key questions in the field, to network, and to establish unique and potentially long-lasting collaborations that will propel their careers forward. Bringing New and Early Stage Investigators into existing collaborative research networks will also benefit the networks by providing new ideas and perspectives. This NOFO is associated with the Special Diabetes Program (https://www.niddk.nih.gov/about-niddk/research-areas/diabetes/type-1-diabetes-special-statutory-funding-program/about-special-diabetes-program) which funds research on the prevention, treatment, and cure of type 1 diabetes and its complications, including unique, innovative, and collaborative research consortia and clinical trials networks.</p>				
123308	NIDDK High Risk Multi-Center Clinical Study Implementation Planning Cooperative Agreements (U34 Clinical Trial Optional)	National Institute of Diabetes and Digestive and Kidney Diseases/NIH/DHHS	PAR-25-090	11-Feb-2026	450,000 USD

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>operations; and 4) Support the development of other essential elements required for the conduct of the clinical study. The proposed clinical study should be hypothesis-driven and focus on a disease in the mission of NIDDK. Consultation with NIDDK scientific staff is strongly encouraged prior to the submission of the U34 application. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the FOA instructions carefully and view the available PEDP guidance material.</p>				
116589	Small R01s for Clinical Trials Targeting Diseases within the Mission of NIDDK (R01 Clinical Trial Required)	National Institute of Diabetes and Digestive and Kidney Diseases/NIH/DHHS	PAS-25-102	07-Jan-2026	600,000 USD

	Synopsis	The Stimulating Hematology Investigation: New Endeavors (SHINE) program is intended to promote innovative, high-quality nonmalignant hematology research relevant to the missions of the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK), National Institute of Aging (NIA), and the National Heart, Lung, and Blood Institute (NHLBI). Investigator-initiated research project grant applications (R01s) in specific areas of basic and early translational hematology research are invited to this program that supports growth in the nonmalignant hematology research domain. Specific emerging topics that are at the leading edge of the field will change over time and will be updated regularly through the NIH Guide to Grants and Contracts and hyperlinked to this FOA. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

117879	Maximizing Investigators' Research Award (MIRA) for Early Stage Investigators (R35 - Clinical Trial Optional)	National Institute of General Medical Sciences/NIH/DHHS	PAR-23-145	03-Feb-2026	1,375,000 USD
	<p>Contact Name Sailaja Koduri, Ph.D.</p> <p>Contact Telephone</p> <p>Contact Email sailaja.koduri@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 03-Feb-2026</p> <p>Synopsis The Maximizing Investigators' Research Award (MIRA) under this FOA is a grant to provide support for a program of research in an early stage investigator's laboratory that falls within the mission of NIGMS. For the purpose of this FOA, a program of research is a collection of projects in the investigator's lab that are relevant to the mission of NIGMS. The goal of MIRA is to increase the efficiency and efficacy of NIGMS funding. It is anticipated that this FOA will: Enable investigators to apply earlier in their independent research careers, allowing them to secure grant funding that will launch and sustain successful research careers. Enhance investigators' ability to move into research areas that are distinct from those of their postdoctoral mentors, which could lead to new scientific discoveries. Increase the stability of funding for NIGMS-supported investigators, which could enhance their ability to take on ambitious scientific projects and approach problems more creatively. Increase flexibility for investigators to follow important new research directions as opportunities arise, rather than being bound to specific aims proposed in advance of the studies. More widely distribute funding among the nation's highly talented and promising investigators to increase overall scientific productivity and the chances for important breakthroughs. Reduce the time spent by researchers writing and reviewing grant applications, allowing them to spend more time conducting research. Enable investigators to devote more time and energy to mentoring trainees in a more stable research environment.</p>

Projects should entail a high degree of risk and/or novelty, which will be offset by a high future potential impact in biomedical research. Outcomes or products of the proposed project, which should significantly advance the current state of the art, may include, but are not limited to: laboratory instruments and other devices, algorithms and software, chemical reagents and processes, biological molecules or systems that have been modified by human intervention to become research tools. This NOFO does not support technology development that is narrowly focused on addressing specific biological questions or that re-purposes existing technologies for new uses. Rather, applications should propose development of new tools that can potentially benefit a broad spectrum of biomedical research. Moreover, feasibility of the proposed technology must not have already been established in the literature or with preliminary data. Applications that are focused on technology development to address specific biological questions and/or include unpublished or published data that provide proof of concept are not responsive to this NOFO and will be administratively withdrawn without review.</p></div>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>The purpose of the Advancing Research Careers (ARC) program is to support cohorts of promising, late-stage graduate students from diverse backgrounds pursuing research training in NIH mission areas. The program has two components: an individual predoctoral-to-postdoctoral transition award (F99/K00) and a research education cooperative agreement (UE5) awarded to organizations to provide F99/K00 fellows with additional mentoring, networking and professional development activities to support their transition to and success in mentored postdoctoral research positions. The ARC program supports NIH's efforts to develop a biomedical research workforce that will benefit from the full range of perspectives, experiences and backgrounds needed to advance discovery. The ARC Predoctoral to Postdoctoral Transition Award to Promote Diversity (F99/K00) is a two-phase award that will provide support for promising late-stage graduate students from diverse backgrounds pursuing research related to the mission areas of participating NIH Institutes, Centers and Offices (ICOs), to complete their doctoral research training (F99 phase) and transition into and succeed in postdoctoral biomedical research and career development opportunities (K00 phase). The program also is designed to support predoctoral researchers who have, appropriate to their career stage, demonstrated contributions and propose meaningful plans to promote broad participation in the biomedical research workforce. It is anticipated that completion of this phased award program will position ARC scholars to advance in impactful careers in the biomedical research workforce that typically require postdoctoral training (for example, academic research and teaching at a range of organization types, industry, or government research). This Notice of Funding Opportunity (NOFO) does not allow candidates to propose to lead an independent clinical trial, but does allow candidates to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>

to organizations to provide these scholars with additional mentoring, networking and professional development activities to support their transition to and success in independent, tenure-track or equivalent research-intensive faculty careers. The MOSAIC program supports NIH's efforts to develop a biomedical research workforce that will benefit from the full range of perspectives, experiences and backgrounds needed to advance discovery. The goal of the MOSAIC Postdoctoral Career Transition Award to Promote Diversity (K99/R00) program is to facilitate a timely transition of promising postdoctoral researchers from diverse backgrounds from their mentored postdoctoral research positions to independent, tenure-track or equivalent research-intensive faculty positions. The program is designed to support postdoctoral researchers who have demonstrated meaningful contributions and proposed compelling future plans to promote broad participation in the biomedical research workforce, such as activities that promote inclusive, supportive, and accessible biomedical research environments that support the success of trainees and scientists from all backgrounds, including individuals from underrepresented groups. This Notice of Funding Opportunity (NOFO) is designed specifically to support candidates proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Candidates seeking support through this NOFO are permitted to propose a research experience in a clinical trial led by a mentor or co-mentor. Candidates proposing a clinical trial or an ancillary clinical trial as lead investigator, should work with their institutions to apply to the companion NOFO PAR-24-226.

Deadline Dates (ALL)	07-Jan-2026 , 05-Feb-2026 , 07-May-2026 , 05-Jun-2026 , 07-Sep-2026 , 05-Oct-2026 , 07-Jan-2027 , 05-Feb-2027 , 07-May-2027 , 05-Jun-2027 , 07-Sep-2027 , 05-Oct-2027 , 07-Jan-2028
Synopsis	This Funding Opportunity Announcement (FOA) supports projects relevant to the NIGMS mission or those of other NIH institutes or Centers (ICs) participating in the FOA that focus solely on the development of technologies with the potential to enable acquisition of biomedical knowledge. Projects should be justified in terms of technical innovation and utility of such technical innovation for impacting future biomedical research. Outcomes or products of the proposed project should significantly advance the current state of the art and be sufficiently characterized for application in addressing a broad range of biomedical research questions. These outcomes may include, but are not limited to: laboratory instruments and other devices, algorithms and software, chemical reagents and processes, biological molecules or systems that have been modified

	<p>by human intervention to become research tools. The goal of this FOA is to support the development of technologies with demonstrated proof-of-concept that have remaining significant technical challenges to full implementation and broad utility. As such, applications should not propose to test specific biological questions. Applications proposing to test specific biological questions are not responsive to this FOA and will be administratively withdrawn without review. Applications with a focus on optimization, hardening, or obvious extrapolations of established technology will be a lower priority for funding.</p>				
128628	Research With Activities Related to Diversity (ReWARD) (R01 Clinical Trial Optional)	National Institute of General Medical Sciences/NIH/DHHS	PAR-25-117	07-Jan-2026	Not Specified

128025	RFA-MH-26-120 --BRAIN Initiative: Reagent Resources for Brain Cell Type-Specific Access and Manipulation to Broaden Distribution of Enabling Technologies for Neuroscience (U24 Clinical Trial Not Allowed)	National Institute of Mental Health/NIH/DHHS	RFA-MH-26-120	03-Jan-2026 [Optional][LOI/Pre-App]	Not Specified
Contact Name Douglas S. Kim, Ph.D. Contact Telephone 301-827-6463 Contact Email douglas.kim@nih.gov Sponsor Website Link to sponsor website Program URL Link to program URL Deadline Dates (ALL) 03-Jan-2026 [Optional][LOI/Pre-App], 02-Feb-2026 , 16-May-2027 [Optional][LOI/Pre-App], 15-Jun-2027		Synopsis This Notice of Funding Opportunity (NOFO) from the NIH Brain Research through Advancing Innovative Neurotechnologies (BRAIN) Initiative is intended to support facilities at Resource-Limited Institutions (RLIs) and Institutional Development Award (IDeA)-eligible institutions for scaled production and distribution of brain cell type-specific access reagents. The reagents to be distributed will first be developed in separately supported reagent design and development projects for brain cell type-specific access across vertebrate species in the BRAIN Initiative Armamentarium project. Recipients of awards under this NOFO will then work with these Armamentarium projects to manufacture and distribute the reagents for use throughout the neuroscience community. It is envisioned that the recipients will work both with Armamentarium researchers as well as with the neuroscience research community to optimize the new reagents. The types of reagents to be produced and distributed could include but are not limited to viral vectors, nucleic acid constructs, and nanoparticles designed for selective access to brain cell types. Such reagents will enable neuroscientists to probe circuit function with high precision in experimental animals and ex vivo human tissue and cells. Facilities are needed to contribute to the production and distribution of BRAIN Initiative Armamentarium project reagents broadly to neuroscience users. This NOFO is part of the BRAIN Initiative Armamentarium project, whose overall goal is to generate tools to specifically access, manipulate, and monitor brain cell types across multiple vertebrate species. This NOFO will foster close interaction between technologists, disseminators, and neurobiologists in a research consortium including investigators funded by other Armamentarium NOFOs. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Contact Email marcy.burstein@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 06-Jan-2026 [Optional][LOI/Pre-App], 05-Feb-2026 , 06-May-2026 [Optional][LOI/Pre-App], 05-Jun-2026 , 05-Sep-2026 [Optional][LOI/Pre-App], 05-Oct-2026</p> <p>Synopsis This notice of funding opportunity (NOFO) is a call to action in response to the youth mental health crisis in the United States. NIMH seeks applications that will study methods to increase access to, and quality of, empirically-supported practices for youth mental health. Applications may address research related to: optimizing assessment, intervention and service strategies; overcoming challenges related to workforce shortages and waitlists for treatment; integration of treatment and preventive interventions into settings where youth are most likely to be identified as needing care (e.g., schools, pediatric medicine, community organizations, social services, and juvenile justice), and service interventions that address systemic barriers to access and quality of mental health care (e.g., structural, policy, organizational, value in terms of cost/financing, management).</p>				
128886	Neuromodulation/Neurostimulation Device Development for Mental Health Applications (R01 Clinical Trial Not Allowed)	National Institute of Mental Health/NIH/DHHS	PAR-25-287	05-Feb-2026	Not Specified

Applications are encouraged that will either 1) develop novel brain stimulation devices or 2) significantly enhance, by means of hardware/software improvements, the effectiveness of brain stimulation devices that are currently U.S. Food and Drug Administration (FDA)-approved or cleared. Novel devices should move beyond existing electrical/magnetic stimulation and develop new stimulation techniques capable of increased spatiotemporal precision as well as multi-focal, closed-loop approaches. Applications seeking to develop new capabilities should focus on significant enhancement of the spatial resolution, depth of delivery, and/or precision of the device. Incremental changes to existing devices (e.g., software updates) are not within the scope of this announcement. Applications should be submitted by multi-disciplinary teams with diverse expertise including systems neuroscience,</p>				

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>engineering, clinical, and regulatory affairs. Applications submitting in response to this FOA should promote the development or significant enhancement of novel tools (hardware/software) for brain stimulation in humans. Although the application should focus on the engineering development and bench top testing of the tool, animal and limited human testing necessary to demonstrate initial proof of concept is allowable. Applications to this FOA are not expected to be hypothesis-driven, but should propose design-directed, developmental, or discovery-driven technology research using integrative approaches.</p>				
128944	Navigator Emergency Department Diversion Models for Non-Urgent Mental Health Concerns (R01 Clinical Trial Required)	National Institute of Mental Health/NIH/DHHS	PAR-25-289	06-Jan-2026 [Optional][LOI/Pre-App]	Not Specified
	<p>Contact Name Mary Aciri, Ph.D.</p> <p>Contact Telephone 301-910-8230</p> <p>Contact Email mary.aciri@mail.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 06-Jan-2026 [Optional][LOI/Pre-App], 05-Feb-2026 , 06-May-2026 [Optional][LOI/Pre-App], 05-Jun-2026 , 05-Sep-2026 [Optional][LOI/Pre-App], 05-Oct-2026 , 06-Jan-2027 [Optional][LOI/Pre-App], 05-Feb-2027 , 06-May-2027 [Optional][LOI/Pre-App], 05-Jun-2027 , 05-Sep-2027 [Optional][LOI/Pre-App], 05-Oct-2027</p> <p>Synopsis The purpose of this notice of funding opportunity (NOFO) is to encourage research applications that test the effectiveness, implementation, and optimization of patient navigation Emergency Department (ED) diversion models for non-urgent youth mental health problems. A non-urgent ED visit is that in which a delay of several hours would not increase the potential for an adverse outcome to occur. For the purposes of this NOFO, NIMH defines a patient navigation model as an evidence-based intervention that is delivered by a mental health provider, an allied provider such as a nurse, or a lay provider (e.g., peer, community health worker) whose role is to (a) utilize triage tools to identify mental health acuity, (b) provide emotional support and build mental health knowledge among caregivers, (c) facilitate linkages to mental health services and additional resources as needed to support the family, and (d) address barriers to help-seeking. This NOFO is for projects for which there are preliminary data. Support for pilot studies is provided through a companion NOFO that utilizes the R34 mechanism: PAR-25-288 Planning Grant (R34 Clinical Trial Required).</p>				
128912	Mood and Psychosis Symptoms During the Menopause Transition (R01 Clinical Trial Optional)	National Institute of Mental Health/NIH/DHHS	PAR-25-281	05-Feb-2026	Not Specified
	<p>Contact Name Laura M. Rowland, Ph.D.</p> <p>Contact Telephone 301-480-8335</p>

	<p>Contact Email laura.rowland@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 05-Feb-2026 , 05-Jun-2026 , 05-Oct-2026 , 05-Feb-2027 , 05-Jun-2027 , 05-Oct-2027</p> <p>Synopsis The purpose of this Funding Opportunity Announcement (FOA) is to encourage applications that will advance mechanistic and translational research on the onset and worsening of mood and psychotic disorders during the menopausal transition (or perimenopause). In particular, NIMH seeks research that will advance understanding of the underlying neurobiological and behavioral mechanisms of mood disruption and psychosis during the menopausal transition and that will identify novel targets for future mental health interventions or prevention efforts This NOFO uses the R01 grant mechanism, while the companion NOFO PAR-25-282 uses the R21 mechanism. Investigators proposing high risk/high reward projects, projects that lack preliminary data, or studies that utilize existing data may wish to apply using the R21 mechanism, while applicants with preliminary data who seek longer-term funding may wish to apply using the R01 mechanism.</p>				
128915	<p>Utilizing Invasive Recording and Stimulating Opportunities in Humans to Advance Neural Circuitry Understanding of Mental Health Disorders (R01 Clinical Trial Optional)</p>	National Institute of Mental Health/NIH/DHHS	PAR-25-290	06-Jan-2026 [Optional][LOI/Pre-App]	Not Specified
	<p>Contact Name Jessica Tilghman, Ph.D.</p> <p>Contact Telephone 301-827-0439</p> <p>Contact Email jessica.tilghman@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 06-Jan-2026 [Optional][LOI/Pre-App], 05-Feb-2026 , 06-May-2026 [Optional][LOI/Pre-App], 05-Jun-2026 , 05-Sep-2026 [Optional][LOI/Pre-App], 05-Oct-2026 , 06-Jan-2027 [Optional][LOI/Pre-App], 05-Feb-2027 , 06-May-2027 [Optional][LOI/Pre-App], 05-Jun-2027 , 05-Sep-2027 [Optional][LOI/Pre-App], 05-Oct-2027</p> <p>Synopsis The purpose of this Funding Opportunity Announcement (FOA) is to encourage applications to pursue invasive neural recording studies focused on mental health-relevant questions. Invasive neural recordings provide an unparalleled window into the human brain to explore the neural circuitry and neural dynamics underlying complex moods, emotions, cognitive functions, and behaviors with high spatial and temporal resolution. Additionally, the ability to stimulate, via the same electrodes, allows for direct causal tests by modulating network dynamics. This FOA aims to target a gap in the scientific knowledge of neural circuit function related to mental health disorders. Researchers should target specific questions suited to invasive recording modalities that have high translational potential. Development of new therapies is outside the scope of</p>

	this FOA, though development of novel tools/methods to enable relevant mental health studies is encouraged. This NOFO uses the R01 grant mechanism, encouraging longer-term projects, whereas its companion R21 NOFO, PAR-25-291, seeks grant applications encouraging shorter, higher-risk studies with little (or no) preliminary data.				
128987	Early Stage Testing of Pharmacologic or Neuromodulatory Device-based Interventions for the Treatment of Mental Disorders (R61/R33 Clinical Trial Required)	National Institute of Mental Health/NIH/DHHS	PAR-25-184	14-Jan-2026 [Optional][LOI/Pre-App]	Not Specified
	<div>Contact Name</div> <div>Contact Telephone</div> <div>Contact Email</div> <div>Sponsor Website</div> <div>Program URL</div> <div>Deadline Dates (ALL)</div> <div>Synopsis</div>	<div>Margaret Grabb, Ph.D.</div> <div>301-443-3563</div> <div>mgrabb@mail.nih.gov</div> <div></div> <div>Link to program URL</div> <div>14-Jan-2026 [Optional][LOI/Pre-App], 13-Feb-2026 , 16-May-2026 [Optional][LOI/Pre-App], 15-Jun-2026 , 15-Sep-2026 [Optional][LOI/Pre-App], 15-Oct-2026 , 18-Jan-2027 [Optional][LOI/Pre-App], 17-Feb-2027 , 16-May-2027 [Optional][LOI/Pre-App], 15-Jun-2027 , 15-Sep-2027 [Optional][LOI/Pre-App], 15-Oct-2027</div> <div>NIMH solicits clinical trial applications through a series of notice of funding opportunities (NOFOs) that cover the intervention development pipeline, from first-in-human, early testing of new interventions, confirmatory efficacy trials, through to effectiveness trials. The purpose of this NOFO is to support the early stage testing of pharmacologic interventions with novel mechanisms of action or neuromodulatory device-based interventions for the treatment of symptoms or domains of altered functions in individuals with mental illness (e.g., schizophrenia, depression, autism, obsessive compulsive disorder, anxiety, bipolar disorder). Early intervention studies are also encouraged where symptoms of a disorder have been identified in subjects (a prodromal phase) prior to full diagnostic criteria being met. Ultimately, this NOFO is intended to support evaluation of pharmacologic or neuromodulatory device-based interventions using a protocol design where the presumed mechanism of action of the intervention is adequately tested, to provide meaningful information where target modulation yields a well-controlled, dose-dependent neurophysiological/clinical/behavioral effect. Pediatric, adult, and geriatric-focused interventions are appropriate for this NOFO.The R61/R33 NOFOs are intended to support biphasic high-risk applications. Support for a single phased award that does not need the developmental (R61) phase is available in the companion R33, PAR-25-183. Applicants pursuing other stages of the clinical trial pipeline should consider one of the companion NOFOs listed above.</div>			
128988	Effectiveness Trials to Test Mental Health System Interventions (R61/R33 Clinical Trial Required)	National Institute of Mental Health/NIH/DHHS	PAR-25-285	14-Jan-2026 [Optional][LOI/Pre-	Not Specified

This NOFO complements NIMH's suite of clinical trial funding opportunities by supporting milestone-driven feasibility and infrastructure development (R61) research followed by well-powered clinical trials (R33) to test the effectiveness of system interventions or strategies that improve the organization, delivery, coordination, and outcomes of mental health care for priority populations. System interventions - which may span, for example, structural, policy, and organizational domains - attend to issues about the access, equity, engagement/utilization, value (cost/financing), management, or quality and safety of mental health services, with the goal of improved care processes and clinical, functional, or population level outcomes. Accordingly, the focus of system interventions may include multiple factors/levels related to care delivered within or across a variety of care settings, such as health systems and organizations, mental health and community clinics, schools, and social welfare or justice systems. Projects may test the impact of policies and practices, interventions to facilitate care transitions and continuity across settings, and interventions to improve linkages/coordination across systems. Researchers will have up to two years in the R61 phase to demonstrate feasibility and adequate infrastructure to justify conducting the main trial (R33). Applicants pursuing other stages of intervention development and testing should refer to companion NOFOs listed at Support for Clinical Trials at NIMH.</p>				
119255	Novel Mechanism Research on Neuropsychiatric Symptoms (NPS) in Alzheimer's Dementia (R21 Clinical Trial Optional)	National Institute of Mental Health/NIH/DHHS	PAR-25-064	16-Feb-2026	275,000 USD

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	The purpose of this Funding Opportunity Announcement (FOA) is to encourage applications that will advance mechanistic and translational research on the onset and worsening of mood and psychotic disorders during the menopausal transition (or perimenopause). In particular, NIMH seeks research that will advance understanding of the underlying neurobiological and behavioral mechanisms of mood disruption and psychosis during the menopausal transition and that will identify novel targets for future mental health interventions or prevention efforts. This NOFO uses the R21 mechanism, while the companion NOFO PAR-25-281 uses the R01 grant mechanism. Investigators proposing high risk/high reward projects, projects that lack preliminary data, or studies that utilize existing data may wish to apply using the R21 mechanism, while applicants with preliminary data who seek longer-term funding may wish to apply using the R01 mechanism.			
128914	Utilizing Invasive Recording and Stimulating Opportunities in Humans to Advance Neural Circuitry Understanding of Mental Health Disorders (R21 Clinical Trial Optional)	National Institute of Mental Health/NIH/DHHS	PAR-25-291	16-Feb-2026	275,000 USD

	Deadline Dates (ALL)	16-Feb-2026 , 16-Jun-2026 , 16-Oct-2026 , 16-Feb-2027 , 16-Jun-2027 , 16-Oct-2027			
	Synopsis	The purpose of this notice of funding opportunity (NOFO) is to encourage applications to pursue invasive neural recording studies focused on mental health-relevant questions. Invasive neural recordings provide an unparalleled window into the human brain to explore the neural circuitry and neural dynamics underlying complex moods, emotions, cognitive functions, and behaviors with high spatial and temporal resolution. Additionally, the ability to stimulate, via the same electrodes, allows for direct causal tests by modulating network dynamics. This NOFO aims to target a gap in the scientific knowledge of neural circuit function related to mental health disorders. Researchers should target specific questions suited to invasive recording modalities that have high translational potential. Intervention-development clinical trials of therapeutic devices are outside the scope of this NOFO, though development of novel tools/methods to enable relevant mental health studies is encouraged. This NOFO uses the R21 grant mechanism, encouraging shorter, higher-risk applications, whereas its companion funding opportunity, PAR-25-290, seeks R01 grant applications.			
128986	Early Stage Testing of Pharmacologic or Neuromodulatory Device-based Interventions for the Treatment of Mental Disorders (R33 - Clinical Trial Required)	National Institute of Mental Health/NIH/DHHS	PAR-25-183	14-Jan-2026 [Optional][LOI/Pre-App]	Not Specified

The purpose of this NOFO is to support the early-stage testing of pharmacologic interventions with novel mechanisms of action or neuromodulatory device-based interventions for the treatment of symptoms or domains of altered functions in individuals with mental illness. Early intervention studies are also encouraged where symptoms of a disorder have been identified in subjects (a prodromal phase), prior to full diagnostic criteria being met. Ultimately, this NOFO is intended to support early-stage testing of pharmacologic or neuromodulatory device-based interventions using a protocol design where the presumed mechanism of action of the intervention is adequately tested to provide meaningful information where target modulation yields a well-controlled, dose-dependent neurophysiological/clinical/behavioral effect. Pediatric, adult, and geriatric-focused interventions are appropriate for this NOFO. This R33 NOFO supports single-phased clinical trial awards. Applicants proposing high-risk projects are encouraged to apply to one of the companion NOFOs, PAR-25-184 or PAR-25-180.</p>				
128982	First in Human and Early Stage Clinical Trials of Novel Investigational Drugs or Neuromodulatory Device-based Interventions for Psychiatric Disorders (U01 Clinical Trial Required)	National Institute of Mental Health/NIH/DHHS	PAR-25-180	14-Jan-2026 [Optional][LOI/Pre-App]	Not Specified

	<p>App], 15-Jun-2027 , 15-Sep-2027 [Optional][LOI/Pre-App], 15-Oct-2027</p> <p>Synopsis NIMH solicits clinical trial applications through a series of notice of funding opportunities (NOFOs) that cover the intervention development pipeline, from first-in-human, early testing of new interventions, confirmatory efficacy trials, through to effectiveness trials. The purpose of this NOFO is to encourage cooperative agreement applications to support early stage clinical trials of novel mechanism of action investigational drugs or novel neuromodulatory devices for the treatment of psychiatric disorders in areas of unmet medical need. The NOFO will support milestone-driven early stage trials, including First-in-human (FIH), Phase Ib, Phase II/PoC and early feasibility studies (EFS), in pediatric and adult populations. These studies are designed to objectively and dose dependently assess target engagement in the central nervous system (CNS), along with safety and tolerability. Phase II/PoC studies additionally must evaluate the drug's/device's impact on clinically relevant physiological systems (functional measures) and clinical indicators of effect. The overall objective of this NOFO is to facilitate rapid collection of data to "de-risk" novel mechanism of action investigational drugs, novel drugs for use in pediatric populations with psychiatric disorders, and devices or combination treatments in order to attract private or other public funding (when appropriate) for further clinical development as Food and Drug Administration (FDA)-approved treatments. A key aspect of this NOFO is the formation of collaborative partnerships between the biomedical researchers and biotechnology or industry researchers to facilitate psychiatric drug or device development. This NOFO is designed for applicants seeking funding for cooperative agreements supporting early stage clinical trials as outlined above. Applicants pursuing other stages of the clinical trial pipeline or funding for clinical research not involving cooperative agreements should consider one of the companion NOFOs listed above.</p>				
128979	<p>Confirmatory Efficacy Clinical Trials of Non-Pharmacological and Pharmacological Interventions for Mental Disorders (R01 Clinical Trial Required)</p>	National Institute of Mental Health/NIH/DHHS	PAR-25-179	14-Jan-2026 [Optional][LOI/Pre-App]	Not Specified

	<p>through to effectiveness trials. The purpose of this NOFO is to support confirmatory efficacy testing of non-pharmacological preventive and therapeutic interventions, and under certain conditions, selected pharmacological interventions for mental disorders in adults and children through an experimental therapeutics approach. Under this NOFO, trials must be designed so that results, whether positive or negative, will provide information of high scientific utility and will support "go/no-go" decisions about further development, effectiveness testing, or dissemination of the intervention. Interventions to be studied include, but are not limited to, behavioral, cognitive, interpersonal, and device-based (both invasive/surgically implanted as well as noninvasive/transcranial) approaches, or a combination thereof. Pharmacological interventions to be studied under this grant mechanism are expected to primarily focus on drugs approved for marketing by the FDA (for any indication). These will include medications off-patent which are undergoing development for a new mental health indication. Confirmatory efficacy trials studying monotherapy, combination treatments, and stepped approaches, including multiple treatment modalities, may be supported. Interventions appropriate for efficacy testing must be based on a compelling scientific rationale, previous demonstration that the intervention engages and alters the hypothesized mechanism of action (target), a preliminary efficacy signal, and must address an unmet therapeutic need. Support will be provided for a trial of the intervention's efficacy that includes measurement of the hypothesized mechanism of action and the relationship between change in the target mechanism and change in functional or clinical effects. Ultimately, this NOFO is intended to support a sufficiently-powered efficacy trial to determine the intervention's potential for significant clinical benefit. Applicants pursuing other stages of the clinical trial pipeline should consider one of the companion NOFOs listed above.</p>

	<p>for: 1) refining and optimizing preventive and therapeutic interventions with previously demonstrated efficacy for use with broader target populations or for delivery routine care, school, community, or online settings, and 2) research on implementation strategies that support the delivery and sustainability of evidence supported interventions in accessible settings. This NOFO supports pilot research designed to generate the preliminary data needed as a prerequisite to a well powered clinical trial. This includes research designed to assess the feasibility, acceptability, safety, and fit of approach, and explore the impact of the approach on both the outcomes of interest and at least one hypothesized mechanism of action. Support for well powered hybrid effectiveness implementation studies is provided through separate NOFOs that are described on the NIMH Support for Clinical Trials web page.</p>				
128977	Full-Scale Hybrid Effectiveness-Implementation Trials for Mental Health Interventions (R01 - Clinical Trial Required)	National Institute of Mental Health/NIH/DHHS	PAR-25-177	14-Jan-2026 [Optional][LOI/Pre-App]	Not Specified

	Synopsis	<p>The Mentored Career Transition Award for NIMH Intramural Fellows (K22) is a two-phase, mentored career development award program that is intended to facilitate a timely transition of qualified postdoctoral fellows in the NIMH Division of Intramural Programs (DIRP) from intramural postdoctoral research positions to extramural, academic tenure-track or equivalent faculty positions at eligible U.S. institutions. Both the intramural and extramural phases will be mentored, and the award will provide research support during the extramural phase to help awardees launch competitive, independent research programs. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary clinical trial, as part of their research and career development. Applicants not planning an independent clinical trial, or proposing to gain research experience in a clinical trial led by another investigator, must apply to companion FOA, PAR-23-149.</p>

	Deadline Dates (ALL)	16-Feb-2026 , 16-Jun-2026			
	Synopsis	This Notice of Funding Opportunity (NOFO) encourages research on the biology of high confidence risk factors associated with complex brain disorders, with a focus on the intracellular, transcellular and circuit substrates of neural function. For the purposes of this NOFO , the term “complex” can refer to a multifactorial contribution to risk (e.g., polygenic and/or environmental) and/or highly distributed functional features of the brain disorder. Studies may be either hypothesis-generating (unbiased discovery) or hypothesis-testing in design and may utilize in vivo, in situ, or in vitro experimental paradigms, e.g., model organisms or human cell-based assays. While behavioral paradigms and outcome measures can be incorporated into the research design to facilitate the characterization of intracellular, transcellular and circuit mechanisms, these are neither required nor expected. Studies should not attempt to “model” disorders but instead should aim to elucidate the neurobiological impact of individual or combined risk factor(s), such as the affected molecular and cellular components and their relationships within defined biological process(es). This can include the fundamental biology of these factors, components and processes. The resulting paradigms, component pathways and biological processes should be disseminated with sufficient detail to enrich common and/or federated data resources (e.g., those contributing to the Gene Ontology, Synaptic Gene Ontology, FAIR Data Informatics) in order to bridge the gap between disease risk factors, biological mechanism and therapeutic target identification. The present NOFO (R21 activity code) can be used for applications to develop early stage, high-risk, exploratory approaches or establish proof-of-concept where there is little or no preliminary data. Applicants proposing to develop lines of inquiry where feasibility or proof of concept has been established should apply to the companion R01 NOFO PAR-25-038.

The present NOFO (R01 activity code) can be used for applications to further develop lines of inquiry where feasibility or proof-of-concept has been established. Applicants proposing exploratory research at the early and conceptual stages of project development should apply to the companion R21 NOFO PAR-25-037.</p>				
118003	Notice of Special Interest (NOSI): NIMH Planning Grants for Natural History Studies of Rare Genetic Neurodevelopmental Disorders	National Institute of Mental Health/NIH/DHHS	NOT-MH-23-235	07-Jan-2026	Not Specified
	<div>Contact Name</div> <div>Contact Telephone</div> <div>Contact Email</div> <div>Sponsor Website</div> <div>Program URL</div> <div>Deadline Dates (ALL)</div> <div>Synopsis</div>	<p>Margaret Grabb, Ph.D. 301-443-3563 mgrabb@mail.nih.gov Link to program URL 07-Jan-2026 , 05-Feb-2026 , 07-May-2026 , 05-Jun-2026 , 07-Sep-2026 The National Institute of Mental Health (NIMH) is issuing this Notice to highlight its interest in supporting planning grants to conduct retrospective natural history studies that explore the prevalence of disabling psychiatric symptoms and disruptions in function in patients (birth to 25 years of age) with rare genetic neurodevelopmental disorders (NDD). The principal goal of these studies is to assess the time of onset and severity of these symptoms, identify appropriate outcome measures, and establish potential timepoints for intervention. Additionally, the planning grants should focus on identifying potential quantitative clinical functional measures or biomarkers that could be used as prognostics and/or measures of change in future clinical trials. These retrospective natural history studies are expected to enable future prospective longitudinal studies (see Food and Drug Administration’s (FDA’s) guidance on natural history studies for rare disorders).</p>

Synopsis		<p>NIMH seeks applications for pilot projects to evaluate the preliminary effectiveness of therapeutic and service delivery interventions for the post-acute management of mental health conditions that are matched to the stage of illness in terms of both their focus (e.g., consolidating and maintaining gains from initial treatment, managing residual symptoms/impairment, preventing relapse, promoting adherence and appropriate service use) and intensity/burden. In this pilot phase of effectiveness research, the trial should be designed to evaluate the feasibility, tolerability, acceptability, safety, and potential effectiveness of the approach; to address whether the intervention engages the target(s)/mechanisms(s) presumed to underlie the intervention effects; and to obtain preliminary data needed as a pre-requisite to a larger-scale effectiveness trial (e.g., comparative effectiveness study, practical trial) designed to definitely test the effectiveness of interventions to improve post-acute outcomes. This notice of funding opportunity (NOFO) supports pilot research to evaluate the feasibility, tolerability, acceptability, safety, and preliminary indications of effectiveness of post-acute phase intervention approaches, to generate the preliminary data needed as a prerequisite to well powered effectiveness trials, and to inform the design of definitive effectiveness trials. Support for fully-powered, definitive effectiveness studies focused on post-acute phase interventions is provided via the R01 NOFO, PAR-25-207.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Contact Email alexander.talkovsky@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 20-Jan-2026 [Optional][LOI/Pre-App], 19-Feb-2026 , 16-May-2026 [Optional][LOI/Pre-App], 15-Jun-2026 , 15-Sep-2026 [Optional][LOI/Pre-App], 15-Oct-2026 , 18-Jan-2027 [Optional][LOI/Pre-App], 17-Feb-2027 , 16-May-2027 [Optional][LOI/Pre-App], 15-Jun-2027 , 15-Sep-2027 [Optional][LOI/Pre-App], 15-Oct-2027</p> <p>Synopsis NIMH solicits clinical trial applications through a series of notice of funding opportunities (NOFOs) that cover the intervention development pipeline, from first-inhuman, early testing of new interventions, confirmatory efficacy trials, through to effectiveness trials The purpose of this NOFO is to encourage pilot research developing and testing innovative psychosocial intervention approaches in which the target and/or intervention strategy is novel. Consistent with NIMH's experimental therapeutics approach, this NOFO is intended to speed the translation of emergent research on mechanisms and processes underlying mental disorders into promising novel psychosocial preventative or therapeutic interventions. Targets may include, but are not limited to, potentially modifiable behavioral, cognitive, affective, and/or interpersonal factors or processes, neural circuits or neural activity subserving specific behaviors or cognitive processes, and/or other neurobiological mechanisms. Novel psychosocial interventions may be standalone interventions or novel augmentations to efficacious interventions for which there is an empirical rationale by which the augmentation (and corresponding target) is expected to substantially enhance outcomes. Support will be provided for up to two years (R61 phase) for preliminary milestone-driven testing of a novel intervention's impact on a target process or mechanism associated with mental disorder risk, causation, or maintenance (target engagement). Up to 3 years of additional support (R33 phase) will be provided for studies with findings that meet the "go/no-go" milestones embedded in the R61 phase. The R33 phase is intended to support the replication of target engagement and to test whether engaging the intervention target/mechanism mediates changes in clinical outcomes. Ultimately, trials must be designed so that results, whether positive or negative, will provide information of high scientific utility and will support "go/no-go" decisions about further development and/or testing of the intervention. Applicants pursuing other stages of the clinical trial pipeline should consider one of the companion NOFOs listed above.</p>

	<p>neurostimulation) in support of experimental therapeutic studies of innovative candidates for mental disorders; and support early-stage human studies to rapidly assess the safety, tolerability, and pharmacodynamics of promising drug candidates/devices and new indications for novel Investigational New Drug (IND)-ready agents or Investigational Device Exemption (IDE)-ready devices for the treatment of mental disorders. This NOFO encourages applications to advance the discovery, preclinical development, and proof of concept (PoC) testing of new, rationally based candidate agents and neurostimulation approaches to treat mental disorders, and to develop novel ligands and circuit-engagement devices as tools to further characterize existing or to validate new drug/device targets. Partnerships between academia and industry are strongly encouraged. This NOFO will also support applications proposing preclinical discovery of biotechnology products and biologics with potential as candidate therapeutics including, but not limited to, large biologic macromolecules, (e.g., proteins, antibodies, and peptides), gene-based therapies (i.e., oligonucleotide- and viral vector-based), cell therapies, and novel emerging therapies (e.g., microbial and microbiome therapies). This NOFO supports a discrete, specified, circumscribed project to be performed by the named investigator(s) in an area representing his or her specific interest and competencies. Projects seeking support for a research program of multiple projects directed toward a specific major objective, basic theme, or program goal, requiring a broadly based, multidisciplinary, and often long-term approach should consider the companion NOFO PAR-25-353.</p>

	Deadline Dates (ALL)	21-Jan-2026 [Optional][LOI/Pre-App], 20-Feb-2026 , 23-May-2026 [Optional][LOI/Pre-App], 22-Jun-2026			
	Synopsis	<p>The purpose of this notice of funding opportunity (NOFO) is to support rigorous analytical validation of method(s) used for measuring biomarkers for neurological and neuromuscular disorders for use in clinical trials or clinical practice. Applicants must justify the unmet need for the biomarker(s) and measurement methods and specify one or two context(s) of use for the biomarker(s). Activities supported include optimizing and evaluating the accuracy, precision, reportable range, and analytical sensitivity and specificity of the detection method across multiple sites and operators and establishing reference intervals and quality control procedures. Multi-site applications are expected but not required. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material. The NIH recognizes that diverse teams working together and capitalizing on innovative ideas and distinct perspectives outperform homogeneous teams. There are many benefits that flow from a diverse scientific workforce, including: fostering scientific innovation, enhancing global competitiveness, contributing to robust learning environments, improving the quality of the research, advancing the likelihood that underserved populations participate in, and benefit from research, and enhancing public trust. To support the best science, the NIH encourages inclusivity in research. Examples of structures that promote diverse perspectives include but are not limited to: Transdisciplinary research projects and collaborations among neuroscientists and researchers from fields such as computational biology, physics, engineering, mathematics, computer and data sciences, as well as bioethics. Engagement from different types of institutions and organizations (e.g., research-intensive, undergraduate-focused, minority-serving, community-based). Individual applications and partnerships that enhance geographic and regional heterogeneity. Investigators and teams composed of researchers at different career stages. Participation of individuals from diverse backgrounds, including groups traditionally underrepresented in the biomedical, behavioral, and clinical research workforce (see NOT-OD-20-031), such as underrepresented racial and ethnic groups, those with disabilities, those from disadvantaged backgrounds, and women. Opportunities to enhance the research environment to benefit early- and mid-</p>

	Synopsis	The purpose of this notice of funding opportunity (NOFO) is to enable clinical validation of strong candidate biomarkers for neurological and neuromuscular disorders and conditions. Specifically, the goal of this PAR is to enable the rigorous clinical validation of biomarker measurements within the clinical population of interest to establish the clinical sensitivity and specificity of the biomarker consistent with FDA guidelines. This PAR assumes that 1) a candidate biomarker has already been identified, 2) detection method technology has already been developed and analytically validated, and 3) the research and/or clinical need and potential context of use has been identified. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>clinical endpoint for interventional clinical trials. To increase standardization and improve clinical adoption, applicants must propose to develop and evaluate the DHT enabled biomarkers or COAs in three or more diseases or conditions. Applicants must also propose to conduct development studies that are informed by people with lived experience (PWLE) and patient advocacy organizations. The first phase of this funding mechanism is to evaluate the technical performance of the proposed DHTs with PWLE input; the second phase is to support a prospective longitudinal clinical study in representative populations to validate the DHT. Research outcomes should include demonstrating how a meaningful change in the biomarkers or COAs derived from the DHT(s) can be statistically measured and quantified at the individual participant level.</p>				
126698	NINDS Alzheimer's Disease and Alzheimer's Disease-Related Dementias (AD/ADRD) Advanced Postdoctoral Career Transition Award to Promote Diversity (K99/R00 Independent Clinical Trial Not Allowed)	National Institute of Neurological Disorders and Stroke/NIH/DHHS	PAR-24-212	12-Feb-2026	Not Specified

The program has two components: an individual career transition award for postdoctoral scholars (K99/R00) and a research education cooperative agreement (UE5) awarded to organizations to provide these scholars with additional mentoring, networking and professional development activities to support their transition to and success in independent, tenure-track or equivalent research-intensive faculty careers. The MOSAIC program supports NIH’s efforts to develop a biomedical research workforce that will benefit from the full range of perspectives, experiences and backgrounds needed to advance discovery. The goal of the MOSAIC Postdoctoral Career Transition Award to Promote Diversity (K99/R00) program is to facilitate a timely transition of promising postdoctoral researchers from diverse backgrounds from their mentored postdoctoral research positions to independent, tenure-track or equivalent research-intensive faculty positions. The program is designed to support postdoctoral researchers who have demonstrated meaningful contributions and proposed compelling future plans to promote broad participation in the biomedical research workforce, such as activities that promote inclusive, supportive, and accessible biomedical research environments that support the success of trainees and scientists from all backgrounds, including individuals from underrepresented groups. This Notice of Funding Opportunity is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the</p></div></div>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 07-Jan-2026 , 09-Feb-2026 , 07-May-2026 , 09-Jun-2026 , 07-Sep-2026 , 09-Oct-2026 , 07-Jan-2027 , 09-Feb-2027 , 07-May-2027 , 09-Jun-2027 , 07-Sep-2027 , 08-Oct-2027 , 07-Jan-2028</p> <p>Synopsis The purpose of this award is to support outstanding scientific training of highly promising postdoctoral candidates with outstanding mentors. Candidates are eligible to apply for support from this program from ~12 months prior to the start of the proposed postdoctoral position to within 12 months (or 18 months for resubmissions) after starting in the proposed postdoctoral position. This NINDS F32 seeks to foster early, goal-directed planning and to encourage applications for bold and/or innovative projects by the candidate that have the potential for significant impact. Inclusion of preliminary data is strongly discouraged; rather, this F32 seeks innovative research ideas and thoughtful plans for training and mentorship that will facilitate the development of the postdoctoral fellow into an outstanding scientist. Applications are expected to incorporate strong training in quantitative reasoning and the quantitative principles of experimental design and analysis. Support by this program is limited to the first 4 years of a candidate's activity in a specific laboratory or research environment, so as to further encourage early, thoughtful planning and timely completion of "mentored training" within a particular lab or environment. This Notice of Funding Opportunity (NOFO) does not allow candidates to propose to lead an independent clinical trial, but does allow candidates to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>				
123196	NIH StrokeNet Clinical Trials and Biomarker Studies for Stroke Treatment, Recovery, and Prevention (UG3/UH3 Clinical Trial Optional)	National Institute of Neurological Disorders and Stroke/NIH/DHHS	PAR-25-052	19-Feb-2026	Not Specified
	<p>Contact Name Scott Janis, Ph.D.</p> <p>Contact Telephone 301-496-9135</p> <p>Contact Email moyc@ninds.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 19-Feb-2026 , 18-Jun-2026 , 19-Oct-2026</p> <p>Synopsis This NOFO encourages applications for multi-site exploratory and confirmatory clinical trials focused on promising interventions; biomarker or outcome measure validation studies that are immediately preparatory to trials in stroke prevention, treatment, and recovery; and ancillary studies designed to add scientific aims to active studies being conducted within StrokeNet. Successful applicants will collaborate and conduct the study within the NIH StrokeNet. Following peer review, NINDS will prioritize studies among the highest scoring to be conducted in the NIH StrokeNet infrastructure. The NIH StrokeNet National Coordinating Center (NCC) will work with the successful applicant to implement the proposed study efficiently and the National Data Management Center (NDMC) will provide statistical and data management support. The NIH StrokeNet Regional Coordinating Centers (RCCs) and their affiliated clinical sites will provide recruitment/retention support as</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>well as on-site implementation of the clinical protocol. The NIH StrokeNet network will also be uniquely poised to collaborate with other US and international consortia necessary to conduct larger, definitive trials of promising interventions for stroke treatment, prevention, and recovery. It is NINDS's intent that all NINDS-supported multi-center clinical trials in stroke treatment, recovery, or prevention will be conducted within the NIH StrokeNet. Only in exceptional circumstances will NINDS consider funding multi-site stroke clinical trials outside of this network. This NOFO uses the bi-phasic, milestone driven UG3/UH3 cooperative agreement activity code. Awards made under this NOFO will initially support a one-year milestone-driven planning and start-up phase, with possible transition to an implementation (UH3) phase of up to 6 additional years. Only UG3 projects that meet the scientific milestones and award requirements of the UG3 phase may transition to the UH3 phase. Applications submitted in response to this FOA must address both the UG3 and UH3 phases and are expected to include plans for project management and performance milestones for each phase. Applicants do not need to be part of the existing NIH StrokeNet infrastructure to apply under this NOFO.</p>

	Synopsis	<p>The purpose of this Notice of Funding Opportunity (NOFO) is to promote the development of fit-for-purpose candidate biomarkers and composite biomarker that enable more efficient clinical trials advance therapeutic development or clinical practice help guide clinical care decisions. Specifically, the goal of this phased funding mechanism is to first identify or confirm candidate biomarker(s) or biomarker signatures using human samples and/or data, followed by an independent retrospective or prospective clinical study to conduct initial clinical validation of the biomarker/signature's clinical utility for one or two defined Context(s) of Use. In the first phase, applicants are expected to demonstrate that the biomarker acceptably identifies or predicts the concept of interest and may include optimization of the detection method using carefully standardized human samples or datasets. The overarching purpose of this initiative is to deliver candidate biomarkers or biomarker signatures that are ready for definitive analytical and clinical validation studies. 	Synopsis	The Joint NINDS/NIMH Exploratory Neuroscience Research Grant program supports exploratory and innovative research projects, which fall within the missions of the NINDS and NIMH. Awards will provide support for the early and conceptual stages of projects. These studies often assess the feasibility of a novel avenue of investigation and involve considerable risk, but have the potential to bring about breakthroughs in the understanding of important areas of neuroscience, or to the development of novel techniques, agents, methodologies, or models, of high value to the neuroscience community. While this funding opportunity also accepts clinical trials, only applications proposing “mechanistic clinical trials or studies” (studying pathophysiology or mechanism of action of an intervention, but not safety or efficacy) or basic experimental studies with humans (BESH) will be supported. For information on NIH clinical trial definitions and the types of clinical trials that are within scope of this funding opportunity announcement refer to the NIH Definition of a Clinical Trial page and the Funding Opportunity Description, below, respectively.

Research shows that diverse teams working together and capitalizing on innovative ideas and distinct perspectives outperform homogenous teams. Scientists and trainees from diverse backgrounds and life experiences bring different perspectives, creativity, and individual enterprise to address complex scientific problems. There are many benefits that flow from a diverse NIH-supported scientific workforce, including: fostering scientific innovation, enhancing global competitiveness, contributing to robust learning environments, improving the quality of the research, advancing the likelihood that underserved or health disparity populations participate in, and benefit from health research, and enhancing public trust. NIH encourages institutions to use legally available means to create a diverse and inclusive scientific workforce. Participating institutes continue to support these efforts through ongoing programs and supplement funding opportunities. This specific notice reiterates this interest and encourages eligible grant and cooperative agreement awardees in the HEAL Initiative community to apply for administrative supplements in response to PA-23-189 (or any subsequent reissuances), Research Supplements to Promote Diversity in Health-Related Research (Admin Supp - Clinical Trial Not Allowed).</p>

	Deadline Dates (ALL)	12-Feb-2026 , 12-Mar-2026 , 12-Jun-2026 , 12-Jul-2026 , 12-Oct-2026 , 12-Nov-2026 , 12-Feb-2027 , 12-Mar-2027 , 12-Jun-2027 , 12-Jul-2027			
	Synopsis	<p>The purpose of this NIH HEAL Initiative PainCare Clinician Training Program (PCTP): Mentored Clinical Scientist Development Awards (K08 - Clinical Trials Not Allowed) is to support the career development of individuals with clinical doctoral degrees to create a group of new and well-trained, independent investigators. This supervised career development program will provide independent NIH research support during the early-career phase to help recipients establish independent research programs in areas supported by the NIH HEAL Initiative's Clinical Research in Pain Management program. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Under this NOFO applicants are permitted to propose a research experience in a clinical trial led by a mentor or co-mentor. Those proposing a clinical trial or an ancillary clinical trial as lead investigator should apply to the companion NOFO. This Parent Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion NOFO. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
<div> <div>Deadline Dates (ALL)</div> <div>05-Feb-2026 , 05-Jun-2026 , 05-Oct-2026 , 05-Feb-2027</div> </div>					
<div> <div>Synopsis</div> <div> <p>The purpose of this funding opportunity is to encourage multidisciplinary investigators to develop new approaches or apply existing approaches in novel ways to measure brain activity, connectivity, genomics, or other aspects across the age spectrum of neurodevelopment. The overarching goal is to extend our understanding of brain development and aging, including studies of the neurodevelopmental origins of later health and disease. Research can include healthy human participants of any age; specific clinical groups such as those with cognitive, motor, or affective regulation challenges; and/or animal research on these domains of function. The studies can focus on longitudinal neuroanatomical or functional changes at any level, including genetics/genomics, single cells, connectomics, neural population activity patterns, and others. This funding opportunity is intended to encourage technological and conceptual innovation to improve repeated measures across longer epochs of the lifespan, to better predict outcomes at later ages. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p> </div> </div>					
117878	Small Research Grant Program for the Next Generation of Researchers in AD/ADRD Research (R03 Clinical Trial Optional)	National Institute on Aging/NIH/DHHS	PA-25-246	16-Feb-2026	200,000 USD

<div> <div>Deadline Dates (ALL)</div> <div>16-Feb-2026</div> </div>					
<div> <div>Synopsis</div> <div> <p>This Small Research Grant Program (R03) will support meritorious projects to provide needed scientific insight to improve the prevention, diagnosis, treatment, and/or care for individuals with Alzheimer's disease and Alzheimer's disease-related dementias (AD/ADRD). Specifically, this NOFO will support projects covering a wide range of topics related to AD/ADRD. The overall goal of this NOFO is (i) to encourage the next generation of researchers to pursue research and academic careers in AD/ADRD research; and (ii) to stimulate established researchers who have not had a major award in AD/ADRD research to perform pilot studies to develop new, innovative AD/ADRD research programs that leverage and build upon their existing expertise. Individuals from diverse backgrounds, including those from underrepresented groups are always encouraged to apply for NIH support. Investigators who have not successfully competed for an award under this or prior versions of this announcement are specifically encouraged to apply.</p> </div> </div>

This pathway to independence award will support early career investigators from diverse backgrounds, including those from groups underrepresented in the biomedical sciences, to gain critical translational research skills that they can apply to various aspects of AD/ADRD research (from populations studies to research that can lead to new treatments and diagnostics, including all aspects of behavioral and social research). This program will support highly trained translational researchers as they transition to research independence in the field of AD/ADRD. The long-term goal of this program is to expand the pool of translational researchers who can effectively participate in and/or lead a team-science, interdisciplinary approach to studies of AD/ADRD treatment, prevention, early detection, and disease management and care. This NOFO is designed for candidates proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Under this NOFO, candidates are permitted to propose a research experience in a clinical trial led by a mentor or co-mentor.</div>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	The National Institute on Alcohol Abuse and Alcoholism solicits applications for an R34 Clinical Trial Required mechanism focusing on alcohol treatment and recovery research. This NOFO will focus broadly on topics relevant for treatment of and recovery from alcohol use disorder (AUD), including: medications development, precision medicine, behavioral therapies and mechanisms of behavioral change (MOBC), recovery, translational research, and innovative methods and technologies for AUD treatment and recovery.			
120721	Alcohol Health Services Research (R01 Clinical Trial Optional)	National Institute on Alcohol Abuse and Alcoholism/NIH/DHHS	PAR-25-192	16-Feb-2026	450,000 USD

	Deadline Dates (ALL)	16-Feb-2026 , 16-Jun-2026			
	Synopsis	The National Institute on Alcohol Abuse and Alcoholism solicits applications for an R34 Clinical Trial Optional mechanism focusing on alcohol health services. This NOFO will broadly focus on closing the treatment gap for individuals with alcohol use disorder (AUD); within this focus, there are five major areas of emphasis: (1) increasing access to treatment for AUD, (2) making treatment for AUD more appealing, (3) examining cost structures and insurance systems, (4) conducting studies on dissemination and implementation of existing evidence-based approaches to treating AUD, and (5) reducing health disparities as a means of addressing the treatment gap in AUD for health disparity populations.			
122636	Prevention and Intervention Approaches for Fetal Alcohol Spectrum Disorders (R61/R33 Clinical Trial Optional)	National Institute on Alcohol Abuse and Alcoholism/NIH/DHHS	PAR-25-158	18-Feb-2026	Not Specified

	<p>disorders (FASD) throughout the lifespan. The intent of this NOFO is to support research that advances (1) prevention approaches to reduce prenatal alcohol exposure and the incidence of FASD and (2) interventions for FASD. These objectives will be accomplished with the Exploratory/Developmental Phased Award (R61/R33) mechanism, clinical trial optional. The R61 phase will support pilot studies or secondary data analysis for hypothesis development and feasibility, and research testing the hypotheses can be expanded in the R33 phase. The transition to the R33 phase will be determined by NIAAA program staff after evaluation of the achievement of specific milestones set for the R61 phase. Highest priority will be given to applications with clinical trials. Applicants interested in planning clinical trials or adding to current projects may also consider NOFO (PAR-25-159, the R34 option).</p>

	Synopsis	This Notice of Funding Opportunity (NOFO) solicits R01 grant applications that propose independent research projects that are within the scientific mission areas of the National Institute on Deafness and Other Communication Disorders (NIDCD). This program is intended to support Early Stage and New Investigators from diverse backgrounds, including individuals from groups underrepresented in the health-related sciences. Preliminary data are not required for this NOFO, however, the project should be supported by sufficient information to give confidence to the reviewers that the proposed work is feasible.			
123925	NIDCD Research Career Enhancement Award for Established Investigators (K18 Independent Basic Experimental Studies with Humans Required)	National Institute on Deafness and Other Communication Disorders/NIH/DHHS	PAR-24-142	07-Jan-2026	Not Specified

---------	---------------	--------------	----------------	---------------	----------------

within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion NOFO. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary study to an existing trial, as part of their research and career development. Applicants not planning an independent clinical trial, or proposing to gain research experience in a clinical trial led by another investigator, must apply to companion NOFOs PAR-24-140 and PAR-24-143

	Synopsis	The National Institute on Deafness and Other Communication Disorders (NIDCD) is issuing this Notice of Special Interest (NOSI) to stimulate research in areas regarding the health of women within the scope of NIDCD’s mission. NIDCD's mission is to conduct and support research and research training in the normal and disordered processes of hearing, balance, taste, smell, voice, speech, and language. As noted in the recently issued 2023–2027 NIDCD Strategic Plan (2023-2027 NIDCD Strategic Plan NIDCD), research projects to improve the health of women covering the lifespan are encouraged across all the NIDCD mission areas. These projects may include biological studies which may incorporate anatomical, structural, hormonal, or genetic aspects, behavioral traits, societal aspects, or healthcare related activities that may benefit a women's quality of life.

	Synopsis	<p>The purpose of this notice of funding opportunity (NOFO) is to support high priority research at the intersection of HIV and substance use. This NOFO invites research projects with the potential to open new areas of basic and clinical HIV/AIDS research and/or lead to new avenues for prevention, treatment and cure of HIV among people who use addictive substances. This initiative is open only to research teams of three to six PD/PIs proposing to pursue challenging research questions at the intersection of HIV and substance use. Teams are encouraged to consider far-reaching objectives that will produce major advances in high priority HIV research areas for the institute and the NIH (NOT-OD-20-018: UPDATE: NIH HIV/AIDS Research Priorities and Guidelines for Determining HIV/AIDS Funding). This NOFO addresses basic science, epidemiologic, clinical, intervention, and implementation research related to HIV in people with substance use and substance use disorders (SUDs). This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be</p>

Synopsis	The purpose of this notice of funding opportunity (NOFO) is to support high priority research at the intersection of HIV and substance use. This NOFO invites research projects with the potential to open new areas of HIV/AIDS research and/or lead to new avenues for prevention, treatment and cure of HIV among people who use addictive substances. Applications submitted under this NOFO are required to have a detailed research plan, preliminary data, and a clear description of the nexus with substance use. This initiative is open to both individual researchers and research teams. It addresses basic science, epidemiologic, clinical, intervention, and implementation research related to HIV in people with substance use and substance use disorders (SUDs). The proposed research areas must align with the NIH's HIV/AIDS Research Priorities: NOT-OD-20-018: UPDATE: NIH HIV/AIDS Research Priorities and Guidelines for Determining HIV/AIDS Funding. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

Research projects should align with the NIDA Strategic Plan (2022-2026 NIDA Strategic Plan Director's Message National Institute on Drug Abuse (NIDA) (nih.gov). This award will facilitate the entry of promising new investigators into the field of substance use/substance use disorder (SU(D) research, enhancing the pool of highly talented SU(D) researchers. Applications are particularly encouraged from individuals from diverse backgrounds, including those from underrepresented groups as described in the Notice of NIH's Interest in Diversity (NOT-OD-20-031). This NOFO is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Applicants to this NOFO are permitted to propose research experience in a clinical trial led by a mentor or co-mentor.</p>

	Deadline Dates (ALL)	20-Feb-2026 [Optional][LOI/Pre-App], 20-Mar-2026			
	Synopsis	<p>The purpose of this Funding Opportunity Announcement (FOA) is to encourage exploratory/developmental research applications that propose to study the development, validation, feasibility, and effectiveness of innovative mobile health (mHealth) interventions or tools specifically suited for low- and middle-income countries (LMICs) that utilize new or emerging technology, platforms, systems, or analytics. The overall goal of the program is to catalyze innovation through multidisciplinary research that addresses global health problems, develop an evidence base for the use of mHealth technology to improve clinical and public health outcomes, and strengthen mHealth research capacity in LMICs. This FOA provides support for up to two years (R21 phase) for technology development and feasibility studies, followed by a possible transition to expanded research support (R33 phase) for validation, larger-scale feasibility, and effectiveness studies. Transition to the R33 depends on the completion of applicant-defined milestones, as well as program priorities and the availability of funds. All applicants must address both the R21 and R33 phases.</p>

	Program URL				
	Deadline Dates (ALL)	23-Feb-2026 , 17-Mar-2026 , 20-Oct-2026 , 13-Nov-2026			
	Synopsis	<p>This Funding Opportunity Announcement (FOA) encourages applications for investigator-initiated, early phase, clinical trials of natural products (i.e., botanicals, dietary supplements, and probiotics), which have a strong scientific premise to justify further clinical testing. Under this FOA, trials must be designed so that results, whether positive or negative, will provide information of high scientific utility and will support decisions about further development or testing of the natural product. This FOA will provide up to 3 years support for studies to replicate the impact of the natural product on the biological signature(s) when used by humans and assess whether there is an association between the degree of the impact on the biological signature and functional or clinical outcomes in a patient population. Applications are encouraged to design studies to determine how to optimize the impact of the natural product on the biological signature by optimizing the delivery of the natural product by examining different doses or formulations. In addition, applications can be designed to combine the natural product with another treatment approach that is known to impact the same biological signature; or study the impact of the natural product in a target population that is more responsive. Clinical trials submitted under this FOA are expected to be hypothesis based, milestone-driven, and directly related to the research priorities and mission of NCCIH. This R33 funding mechanism is intended to accelerate the translation of emerging basic science findings about natural products into early stage clinical testing to determine whether continued clinical research is warranted. This FOA will not support efficacy or effectiveness trials, nor will it support trials to test natural products for the treatment or prevention of cancer.</p>

Synopsis		This Notice of Funding Opportunity (NOFO) invites researchers to submit applications for support of clinical projects that address critical needs for clinical trial readiness in rare diseases. The initiative seeks applications that are intended to facilitate rare diseases research by enabling efficient and effective movement of candidate therapeutics or diagnostics toward clinical trials and to increase their likelihood of success. This could be through the development and testing of rigorous biomarkers and clinical outcome assessment measures or by defining the presentation and course of a rare disease to enable the design of upcoming clinical trials.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	National Institute on Drug Abuse (NIDA), one of the components of the National Institutes of Health (NIH), announces the \$100,000 for Start a SUD Startup Challenge. The Challenge goal is to support research ideas in the areas of drug use, misuse, and substance use disorder (SUD) that are intended to be the foundation for developing successful new startups. NIDA expects that the Challenge will enable the winning Teams to test the premise that their research idea can be fostered into a biotech startup, and that eventually the newly created startups will contribute to the pool of innovative small business companies that can successfully compete for NIDA's Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) funding.

	Synopsis	The purpose of this notice of funding opportunity (NOFO) is to support translational and clinical research to (1) advance precision medicine in pregnant persons, lactating persons, and children through the development of novel tools, models, and other technologies that could have a direct clinical or health impact; (2) enhance the understanding of the underlying mechanisms of drug action, including the role of pediatric ontogeny and the dynamic physiological changes that occur during pregnancy and lactation; and (3) discover and develop novel therapeutics or enhance the usage of existing drugs or drug repurposing for safer and more effective medications in pregnant and lactating persons, neonates, and children. The overall goal is to improve safe and effective precision therapeutics for pregnant and lactating persons, fetuses, neonates, and children, including those with disabilities.

Synopsis		<p>The purpose of this Notice of Funding Opportunity (NOFO) is to advance the development of novel informatics and data science approaches that can help individuals understand and improve their health through actionable insights. The NLM and participating institutes listed in this NOFO seek applications that further the science of personal health informatics by providing meaningful and actionable insights to individuals through innovative personal health data collection, integration, analysis, and personalized risk assessments and interpretation. Applications seeking to advance the understanding of how informatics tools, systems, and platforms can best present the results, interpretation, and limitations of personalized assessments for the benefit of individuals are encouraged. Applications should include end user engaged approaches and real-world evaluation to inform the design of generalizable, reusable, and scalable personal health informatics tools, systems, and platforms for the benefit of individuals in understanding and improving their health.</p>

	<p>population approaches to increasing awareness of the relationship between alcohol and cancer risk, understanding and changing social norms related to alcohol consumption, developing and/or evaluating alcohol policy approaches, and the development, testing, and implementation of population-level interventions to reduce alcohol-related cancer risk. Applications that address multiple levels of consumption, such as moderate and heavy drinking, are of particular interest, as well as those focusing on alcohol use disorder (AUD) from the perspective of cancer prevention and control. Proposals addressing understudied areas are encouraged, as is attention to underrepresented minority (URM) populations experiencing cancer and alcohol-related disparities such as American Indian, Alaskan Native, and sexual and gender minority populations.</p>				
124219	Long-Term Effects of Disasters on Healthcare Systems in Populations with Health Disparities (R01- Clinical Trial Optional)	National Institutes of Health/DHHS	PAR-24-109	06-Jan-2026 [Optional][LOI/Pre-App]	Not Specified

Synopsis	This Funding Opportunity Announcement (FOA) encourages pilot and preliminary research in preparation for larger-scale services research effectiveness trials. Relevant trials may test a wide range of approaches, including interventions, practices, and policies designed to optimize access to, and the quality, effectiveness, affordability and utilization of drug, tobacco, or alcohol use disorder treatments and related services, as well as services for comorbid medical and mental disorder conditions. Relevant approaches may include both those that are novel, and those that are commonly used in practice but lack an evidence base. This FOA provides resources for assessing the feasibility, acceptability, and utility of these approaches, in addition to usual trial preparation activities. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Careers (MOSAIC) program is to support a cohort of early career, independent investigators from diverse backgrounds (for example, individuals from underrepresented groups) conducting research in NIH mission areas. The program has two components: an individual career transition award for postdoctoral scholars (K99/R00) and a research education cooperative agreement (UE5) awarded to organizations to provide these scholars with additional mentoring, networking and professional development activities to support their transition to and success in independent, tenure-track or equivalent research-intensive faculty careers. The MOSAIC program supports NIH's efforts to develop a biomedical research workforce that will benefit from the full range of perspectives, experiences and backgrounds needed to advance discovery. The goal of the MOSAIC Postdoctoral Career Transition Award to Promote Diversity (K99/R00) program is to facilitate a timely transition of promising postdoctoral researchers from diverse backgrounds from their mentored postdoctoral research positions to independent, tenure-track or equivalent research-intensive faculty positions. The program is designed to support postdoctoral researchers who have demonstrated meaningful contributions and proposed compelling future plans to promote broad participation in the biomedical research workforce, such as activities that promote inclusive, supportive, and accessible biomedical research environments that support the success of trainees and scientists from all backgrounds, including individuals from underrepresented groups. This Notice of Funding Opportunity (NOFO) is designed specifically to support candidates proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary study to an existing trial, as part of their research and career development. Candidates not planning an independent clinical trial, or proposing to gain research experience in a clinical trial led by another investigator, must work with their institutions to apply to companion NOFO PAR-24-225.</p>

Research is needed to understand and address misinformation, uncertainty, distrust, and hesitancy regarding uptake of vaccines (e.g., SARS-CoV-2, pneumococcal, influenza, hepatitis B, human papilloma virus (HPV), varicella, tetanus, diphtheria, and pertussis [Tdap]) among individuals in the U.S. and its territories, especially in populations at increased risk for morbidity and mortality due to long-standing systemic health and social inequities, as well as chronic medical conditions. This NOSI is focused on individuals across the life span (i.e., all ages). The purpose of this NOSI is to solicit research that will: 1) understand and address barriers to increasing reach, access, and uptake of vaccinations among populations experiencing health disparities; 2) evaluate organizational, local, state, and federal policies and initiatives that mitigate or exacerbate disparities in vaccine access, uptake, and series completion, and 3) evaluate community-engaged interventions (e.g., expand reach, address psychosocial barriers, and social determinants of health [SDOH]) to facilitate vaccination uptake in clinical and community contexts.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	The purpose of this notice of funding opportunity (NOFO) is to support translational and clinical research to (1) advance precision medicine in pregnant persons, lactating persons, and children through the development of novel tools, models, and other technologies that could have a direct clinical or health impact; (2) enhance the understanding of the underlying mechanisms of drug action, including the role of pediatric ontogeny and the dynamic physiological changes that occur during pregnancy and lactation; and (3) discover and develop novel therapeutics or enhance the usage of existing drugs or drug repurposing for safer and more effective medications in pregnant and lactating persons, neonates, and children. The overall goal is to improve safe and effective precision therapeutics for pregnant and lactating persons, fetuses, neonates, and children, including those with disabilities.

	Synopsis	<p>The purpose of the NIDCR Dual Degree Dentist Scientist Pathway to Independence Award (K99/R00) program is to develop and maintain a strong cohort of independently funded dentist scientists dedicated to improving dental, oral and craniofacial health. This program is designed to facilitate a timely transition of outstanding dual degree dentist scientists from mentored, postdoctoral research positions to independent, tenure-track or equivalent faculty positions by providing support for two years of mentored training and three to five years of independent research. An option for five years of independent (R00) support is available to accommodate clinical training in a dental specialty program at no more than 3 person-months (25% full-time professional effort) in any year of the R00 phase. This Notice of Funding Opportunity (NOFO) is designed specifically for candidates proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Under this NOFO, candidates are permitted to propose a research experience in a clinical trial led by a mentor or co-mentor.</p>

The program will provide independent NIH research support during this transition to assist awardees in launching independent research careers. This Notice of Funding Opportunity is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion NOFO. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary study to an existing trial, as part of their research and career development. Applicants not planning an independent clinical trial, or proposing to gain research experience in a clinical trial led by another investigator, must apply to companion NOFO (RFA-MH-22-331).</p>				
114061	<p>Notice of Special Interest (NOSI): Explainable Artificial Intelligence for Decoding and Modulating Neural Circuit Activity Linked to Behavior</p>	National Institutes of Health/DHHS	NOT-MH-23-110	07-Jan-2026	Not Specified

Deadline Dates (ALL) | 16-Feb-2026 , 16-Jun-2026

Synopsis | Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) along with other participating Institutes encourages submission of applications proposing to conduct secondary data analysis and integration of existing datasets and database resources, with the ultimate aim to elucidate cancer risk and related outcomes (e.g., risk prediction or reduction, survival, or response to treatment, etc.). The goal of this initiative is to address key scientific questions relevant to cancer by supporting the analysis of existing clinical, environmental, surveillance, health services, vital statistics, behavioral, lifestyle, genomic, and molecular profiles data. Applicants are encouraged to leverage and perform innovative analyses of the existing data. Applications may include new research aims that are being addressed with existing data, new or advanced methods of analyses, or novel combinations and integration of datasets that allow the exploration of important scientific questions in cancer research.

121564	Developing Novel Theory and Methods for Understanding the Genetic Architecture of Complex Human Traits (R21 Clinical Trial Not Allowed)	National Institutes of Health/DHHS	PAR-25-256	16-Feb-2026	275,000 USD

	Deadline Dates (ALL)	16-Feb-2026 , 16-Jun-2026 , 16-Oct-2026			
	Synopsis	The goal of this NOFO is to support applications for novel theory and methods development that enable better understanding of how genetic and non-genetic factors contribute to complex trait variation across individuals, families, and populations. Approaches should account for interdependencies across scales of biological, social, and ecological organization, make extensive use of theory, modeling, and validation with available large-scale datasets, and may be interdisciplinary drawing from the natural and social sciences.

	Synopsis	This Notice of Special Interest (NOSI) highlights interest in receiving grant applications focused on mechanistic, genetic, and other studies to evaluate causes and consequences of, and risk factors for sudden death in the young (SDY). Studies are required to use phenotypic data and/or DNA samples and/or associated sequence data from the NIH/CDC Sudden Death in the Young (SDY) Case Registry as foundations for their research. Studies may use SDY Case Registry phenotypic data and/or samples and/or sequence data alone or in combination with other cohorts. Results of such studies are required to adhere to the NIH Data Sharing Policy so that the data is disseminated widely and provides an evidence base to advance discussions about screening and prevention of SDY.

	Synopsis	The purpose of this Notice of Funding Opportunity (NOFO) is to support innovative observational and intervention-based research to identify and characterize the pathways and mechanisms through which health and health care disparities occur among sexual and gender minority populations of minoritized racial/ethnic and socio-economic statuses. Per Notice Number: NOT-MH-24-170: Research Priorities The National Institute of Mental Health (NIMH) will only accept nonclinical trials applications that reflect the mission and scientific priorities as identified in the strategic plan NIMH » The National Institute of Mental Health Strategic Plan (nih.gov) and also NIMH's Approach to Mental Health Disparities Research. Clinical trial applications will not be accepted under this notice. Per NOT-MH-20-067, NIMH expects that grant applications involving human research participants will collect a minimum set of Common Data Elements.			
128630	Natural History of Disorders Screenable in the Newborn Period (R01 Clinical Trial Optional)	National Institutes of Health/DHHS	PAR-25-227	06-Jan-2026 [Optional][LOI/Pre-App]	Not Specified

A comprehensive understanding of the natural history of a condition is necessary to facilitate appropriate interventions for infants identified by newborn screening. Characterization of the sequence and timing of symptom development provides information crucial for developing targeted, age-appropriate treatments and for establishing a baseline against which to assess novel interventions. In addition, for some conditions, establishment of genotype-phenotype correlations may facilitate prediction of the clinical course; for others, identification of modifying genetic, epigenetic, or environmental factors may enhance understanding of clinical outcomes. Comprehensive data on the natural history of a condition will facilitate the field's ability to: 1) identify the underlying biological mechanisms; 2) understand the genetic and clinical heterogeneity and phenotypic expression of the condition; 3) improve diagnostic accuracy; 4) facilitate clinical trials by providing comprehensive natural history data; 5) prevent, manage, and treat symptoms and complications of the condition; 6) furnish physicians and families with needed support and predictive information about the condition; and 7) establish data collection systems or patient registries to collect longitudinal data (e.g., child/family outcomes following newborn screening).</p>

	Synopsis	The purpose of this Funding Opportunity Announcement (FOA) is to stimulate efforts to translate scientific discoveries and engineering developments into methods or tools that address problems in basic research to understand disease, or in applied research to assess risk, detect, prevent, diagnose, treat, and/or manage disease. The rationale is to deliver new capabilities to meet evolving requirements for technologies and methods relevant to the advance of research and delivery of care in pre-clinical, clinical and non-clinical settings, domestic or foreign, for conditions and diseases within the missions of participating institutes. This FOA specifies a partnership structure that is expected to help bridge gaps in knowledge and experience by engaging the strengths of academic, industrial, and other investigators. The partners on each application should establish an inter-disciplinary, multi-institutional research team to work in strategic alliance to implement a coherent strategy to develop and translate a solution to their chosen problem. They are expected to plan, design, and validate that the solution will be suitable for end users. Each			

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>partnership should include at least one academic and one industrial organization. Each partnership should plan to transition a technology, method, assay, device, and/or system from a demonstration of possibility to a status useful in the chosen setting. Funding may be requested to enhance, adapt, optimize, validate, and otherwise translate technologies that address problems in biology, pathology, risk assessment, diagnosis, treatment, and/or monitoring of disease status. This FOA defines "innovation" as likelihood to deliver a new capability to end users.</p>

	Synopsis	<p>The Adolescent Brain Cognitive DevelopmentSM (ABCD) Study is the largest longitudinal study of brain development and child health in the U.S., collecting data from more than 11,000 children across the country beginning when they were 9-10 years old and continuing for a decade. In addition to behavioral assessments, youth undergo neuroimaging and provide biospecimens, including oral fluids for hormone analysis, urine and hair for substance use and exposure, deciduous teeth for environmental exposures, and blood for genetic analysis and metabolic and hematologic assays. This initiative allows investigators to apply for access to biological samples from the ABCD Study®. More information about the ABCD Study can be found on the NIDA ABCD Study web page. Additional information about this resource is available on the NIDA funding opportunities page, under Supplemental Information for NOFOs. ABCD Study biospecimens are managed through the NIH Brain Development Cohorts (NBDC) Biorepository and Analysis Center, which offers a web portal with services related to biospecimen access. Visit the NBDC portal to query available samples using the Biospecimen Explorer, submit a Biospecimen Availability Inquiry to determine the resource availability and impact on existing samples, and learn more about this resource.</p>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	This Notice of Funding Opportunity (NOFO) encourages research grant applications to develop in vitro, ex vivo or in vivo assays and conduct iterative screening efforts to identify and characterize potential therapeutic agents for neurological or neuromuscular disorders. This NOFO is part of a suite of Innovation Grants to Nurture Initial Translational Efforts (IGNITE). This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).			
132878	Development of Interventions to Prevent and Treat Substance Use Disorders and Overdose (UG3/UH3 - Clinical Trial Optional)	National Institutes of Health/DHHS	PAR-25-446	22-Dec-2025	15,000,000 USD
	Contact Name	Ivan D. Montoya, M.D., M.P.H.			
	Contact Telephone	301-827-5936

	Program URL	Link to program URL			
	Deadline Dates (ALL)	22-Dec-2025 , 20-Feb-2026 , 20-Apr-2026 , 22-Jun-2026 , 20-Aug-2026 , 20-Oct-2026 , 21-Dec-2026 , 22-Feb-2027 , 20-Apr-2027 , 21-Jun-2027 , 20-Aug-2027 , 20-Oct-2027 , 20-Dec-2027 , 22-Feb-2028 , 20-Apr-2028 , 20-Jun-2028 , 21-Aug-2028			
	Synopsis	The purpose of this notice of funding opportunity (NOFO) is to seek grant applications to support research on the discovery and development of interventions to prevent and/or treat substance use disorders (SUDs) and overdose, including interventions to treat co-morbid SUDs. This includes preclinical and clinical research studies that will have high impact and quickly yield the necessary results to advance candidate interventions closer to regulatory approval or clinical adoption. This NOFO will utilize the UG3/UH3 activity code.

Synopsis

This Notice of Funding Opportunity (NOFO) invites Research Project Grant (R01) applications that propose to study the ethical, legal and social implications (ELSI) of human genetic or genomic research. Applications may propose studies using either single or mixed methods. Approaches may include but are not limited to empirical qualitative and quantitative methods, and conceptual, legal, and normative analyses. Applied research designed to address ELSI issues in genetics and genomics will also be considered responsive. Direct engagement with communities and other interested groups is encouraged, but not required. Plan for Enhancing Diverse Perspectives The NIH recognizes that diverse teams working together and capitalizing on innovative ideas and distinct perspectives outperform homogeneous teams. There are many benefits that flow from a diverse scientific workforce, including: fostering scientific innovation, enhancing global competitiveness, contributing to robust learning environments, improving the quality of the research, advancing the likelihood that underserved populations participate in, and benefit from research, and enhancing public trust. To support the best science, the NIH encourages inclusivity in research. Examples of structures that promote diverse perspectives include but are not limited to: Transdisciplinary research projects and collaborations among researchers from fields such as computational biology, physics, engineering, mathematics, computer and data sciences, as well as bioethics. Engagement from different types of institutions and organizations (e.g., research-intensive, undergraduate-focused, minority-serving, community-based). Individual applications and partnerships that enhance geographic and regional heterogeneity. Investigators and teams composed of researchers at different career stages. Participation of individuals from diverse backgrounds, including groups traditionally underrepresented in the biomedical, behavioral, and clinical research workforce (see NOT-OD-20-031), such as underrepresented racial and ethnic groups, those with disabilities, those from disadvantaged backgrounds, and women. Opportunities to enhance the research environment to benefit early- and mid-career investigators. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.

122256	Ethical, Legal and Social Implications (ELSI) Exploratory/Developmental Research Grant (R21 Clinical Trial Optional)	National Institutes of Health/DHHS	PAR-25-369	19-Feb-2026	275,000 USD

	Deadline Dates (ALL)	07-Jan-2026 , 25-Feb-2026 , 07-May-2026 , 25-Jun-2026 , 07-Sep-2026 , 25-Oct-2026 , 07-Jan-2027 , 25-Feb-2027 , 07-May-2027 , 25-Jun-2027 , 07-Sep-2027 , 25-Oct-2027 , 07-Jan-2028			
	Synopsis	The purpose of the Research Enhancement Award Program (REAP) for Health Professional Schools and Graduate Schools is to support small scale research grants at institutions that do not receive substantial funding from the NIH, with an emphasis on providing biomedical research experiences primarily for health professional, undergraduate and graduate students and enhancing the research environment at applicant institutions. Eligible institutions must award baccalaureate or advanced science degrees and have received no more than \$6 million dollars per year of NIH support (in both direct and F&A/indirect costs) in 4 of the last 7 fiscal years. For institutions composed of multiple schools and colleges, the \$6 million funding limit is based on the amount of NIH funding received by all the schools and colleges within the institution as a whole. Help determining the Organization Funding Level can be found here or https://grants.nih.gov/grants/funding/r15.htm .			
129834	National Cooperative Drug/Device Discovery/Development Groups (NCDDG) for the Treatment of Mental Disorders (U19 Clinical Trial Optional)	National Institutes of Health/DHHS	PAR-25-353	25-Feb-2026	Not Specified
	Contact Name	Yael Mandelblat-Cerf, Ph.D.			

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Contact Telephone 301-793-7563</p> <p>Contact Email yael.mandelblat-cerf@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 25-Feb-2026 , 25-Jun-2026 , 25-Oct-2026 , 25-Feb-2027 , 25-Jun-2027 , 25-Oct-2027</p> <p>Synopsis The purpose of this notice of funding opportunity (NOFO) is to: accelerate innovative drug and device discovery; develop pharmacologic and neuromodulatory tools for basic and clinical research on mental health, develop and validate tools (pharmacologic or neurostimulation) in support of experimental therapeutic studies of innovative new candidates for mental disorders, and support early-stage human studies to rapidly assess the safety, tolerability, and pharmacodynamics of promising drug candidates/devices and new indications for novel Investigational New Drug (IND)-ready agents or Investigational Device Exemption (IDE)-ready devices for the treatment of mental disorders. This NOFO encourages applications to advance the discovery, preclinical development, and proof of concept (PoC) testing of new, rationally based candidate agents and neurostimulation approaches to treat mental disorders and to develop novel ligands and circuit-engagement devices as tools to further characterize existing or to validate new drug/device targets. Partnerships between academia and industry are strongly encouraged. This NOFO supports a research program of multiple projects directed toward a specific major objective, basic theme or program goal, requiring a broadly based, multidisciplinary, and often long-term approach. Projects seeking support for a discrete, specified, circumscribed project to be performed by the named investigator(s) in an area representing his or her specific interest and competencies should consider the companion NOFO (PAR-25-352). This NOFO will also support applications proposing preclinical discovery of biotechnology products and biologics with potential as candidate therapeutics including, but not limited to, large biologic macromolecules, (e.g., proteins, antibodies, and peptides), gene-based therapies (i.e., oligonucleotide- and viral vector-based), cell therapies, and novel emerging therapies (e.g., microbial and microbiome therapies).</p>				
132926	NIDCD Clinical Research Center Grant (P50 Clinical Trial Optional)	National Institutes of Health/DHHS	PAR-25-445	02-Feb-2026	7,500,000 USD

For this announcement, Clinical Research is defined as research involving individuals with a sensory and/or communication disorder, or data/tissues from individuals with a sensory and/or communication disorder. Examples of such research include but are not limited to, studies of the prevention, pathogenesis, pathophysiology, diagnosis, treatment, management or epidemiology of a disease or disorder of hearing, balance, smell, taste, voice, speech, or language. Although the intent is that all the research will involve individuals with sensory and/or communication disorders or data/tissues from individuals with sensory and/or communication disorders, when the clinical research goal(s) warrant(s) limited departures from this intent, alternatives (e.g., non-human research, human subjects without a sensory or communication disorder, human at risk for a sensory and/or communication disorder) are possible with appropriate and strong scientific justification and in consultation with NIDCD staff. Applications may propose a low-risk clinical trial but are not required to (optional). Non-responsive applications will not be reviewed. Prospective applicants are strongly encouraged to read this funding opportunity carefully and communicate with the scientific/research contact listed at the end of this award as early as possible to discuss their application plans.</p>				
133023	NHLBI TOPMed: Omics Phenotypes of Heart, Lung, and Blood Disorders (X01 - Clinical Trial Not Allowed)	National Institutes of Health/DHHS	PAR-25-447	08-Jan-2026	Not Specified

No funding will be provided under this NOFO. The genomic data and related phenotypic data will be deposited in a public NIH-designated controlled-access database such as the database for Genotypes and Phenotypes (dbGaP) and NHLBI's BioData Catalyst (BDC). The overall goal is to move from simply cataloging genetic associations to understanding how genetic factors contribute to HLBS diseases at the molecular and cellular levels. This transformation will help move TOPMed from genetic Map to Mechanism with potential applications of AI and ML tool sets where possible, enabling functional genomics research that will accelerate mechanistic personalized medicine.</p>				
133058	Mind and Body Interventions to Restore Whole Person Health via Emotional Well-Being Mechanisms (R61/R33 Clinical Trial Required)	National Institutes of Health/DHHS	PAR-25-449	09-Feb-2026	2,375,000 USD
	<p>Contact Name Erin Burke Quinlan, Ph.D.</p> <p>Contact Telephone 301-451-0636</p> <p>Contact Email erin.quinlan@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 09-Feb-2026 , 08-Jun-2026 , 07-Oct-2026 , 08-Feb-2027 , 08-Jun-2027 , 07-Oct-2027 , 08-Feb-2028 , 07-Jun-2028</p> <p>Synopsis The National Center for Complementary and Integrative Health (NCCIH) announces this Notice of Funding Opportunity (NOFO) to solicit applications for research on how mind and body interventions through psychological and/or physical practices (e.g., mindfulness meditation, yoga, acupuncture, massage, and other brain- and/or body-based interventions) impact mechanisms of emotional well-being (EWB) and their associations with whole person health (WPH), consistent</p>

---------	---------------	--------------	----------------	---------------	----------------

with the NIH priority to address the health needs of the American people and improve their well-being. The NOFO will support rigorous and well-powered human mechanistic research studies that are supported by strong preliminary data. The studies should examine the effects of mind and body interventions on innovative mechanisms of EWB (as the primary outcome), as well as the associated relationship with the Whole Person Health Index (WPHI, as a secondary outcome). To enhance research safety, rigor, and efficiency of NIH-funded mechanistic clinical trials, this initiative will use a two-phased award funding mechanism (R61/R33). The funding will support an initial phase (R61) to establish feasibility benchmarks for a subsequent proposed second phase (R33) mechanistic clinical trial, which will be contingent upon successful achievement of R61 benchmarks ("Go/No-Go Criteria"). Applications should provide preliminary data that are comparable in quality and quantity to those expected for an R01 application.

	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email</p> <p>Sponsor Website</p> <p>Program URL</p> <p>Deadline Dates (ALL)</p> <p>Synopsis</p>	<p>Jamie Lahvic, Ph.D.</p> <p>NIATraining@mail.nih.gov</p> <p>Link to program URL</p> <p>12-Feb-2026 , 12-Mar-2026 , 12-Jun-2026 , 12-Jul-2026</p> <p>The purpose of the NIA Career Transition Award (CTA) is to facilitate the transition of mentored, postdoctoral researchers to tenure-track or equivalent faculty positions conducting research that advances the mission of NIA. This award does not provide postdoctoral phase funding; therefore, candidates should be prepared to transition to tenure-track or equivalent faculty positions within 12 months after confirmation of a positive funding decision. After transition to an approved faculty position at an extramural institution/organization, the award will provide three years of protected research time through salary and research support. This Notice of Funding Opportunity (NOFO) is designed specifically for candidates proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial.</p>			
114250	Trailblazer Award for New and Early Stage Investigators (R21 Clinical Trial Optional)	National Institutes of Health/DHHS	PA-25-169	07-Jan-2026	400,000 USD

A Trailblazer project may be exploratory, developmental, proof of concept, or high risk-high impact, and may be technology design-directed, discovery-driven, or hypothesis-driven. Importantly, applicants must propose research approaches for which there are minimal or no preliminary data. A distinct feature for this FOA is that no preliminary data are required, expected, or encouraged. However, if available, minimal preliminary data are allowed. Preliminary data are defined as material which the applicant has independently produced and not yet published in a peer-reviewed journal. All preliminary data should be clearly marked and limited to one-half page, which may include one figure. Applications including data more than one-half page or more than one figure will be considered noncompliant with the FOA instructions and will not go forward to review.</p>				
118583	NLM Grants for Scholarly Works in Biomedicine and Health (G13 Clinical Trial Not Allowed)	National Library of Medicine/NIH/DHHS	PAR-23-183	26-Feb-2026	160,000 USD

	Sponsor Website				
	Program URL	Link to program URL			
	Deadline Dates (ALL)	07-Jan-2026 , 16-Feb-2026 , 07-May-2026			
	Synopsis	<p>The Office of Research Infrastructure Programs (ORIP) within the Division of Program Coordination, Planning, and Strategic Initiatives announces an opportunity to apply for small grant support for ORIP-supported Special Emphasis Research Career Award (SERCA) K01 recipients who have completed the first two years (24 months) of the SERCA K01 award. ORIP seeks to enhance the ability of ORIP SERCA K01 recipients to conduct research as they transition to fully independent investigator status. The R03 mechanism supports projects including pilot and feasibility studies; secondary analysis of existing data; small, self-contained research projects; development of research methodology; and development of new research technology. The R03 is intended to support research projects that can realistically be completed in two years and that require limited levels of funding. This Funding Opportunity Announcement does not accept applications proposing clinical trial(s).</p>

The goal of this solicitation is to support research that (1) develops cell-like systems to identify the minimal requirements for the processes of life, (2) designs synthetically-modified cells to address fundamental questions in the evolution of life or to explore biological diversity beyond that which currently exists in nature, and (3) leverages basic research in cell design to build novel synthetic cell-like systems and cells for innovative biotechnology applications. Highest funding priority is given to proposals that have outstanding intellectual merit and broader impacts, while proposals with weaknesses in either category (or those that are perceived as likely to have an incremental impact) will not be competitive. Proposals submitted to this solicitation should address social, ethical, and safety issues associated with designing and building synthetically modified cells as an integrated component of the project.</p> </div> </div>

	<p>and verification. This has been in the form of both formal methods and interactive theorem provers, as well as using techniques from artificial intelligence. Recent technological advances have led to a surge of interest in machine-assisted mathematical reasoning from the mathematical sciences, formal methods, and AI communities. In turn, advances in this field have potential impact on research in AI.</p>				
117040	A Science of Science Approach to Analyzing and Innovating the Biomedical Research Enterprise	National Science Foundation	23-569	09-Feb-2026	1,000,000 USD
	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email</p> <p>Sponsor Website</p> <p>Program URL</p> <p>Deadline Dates (ALL)</p>	<p>Mary Feeney</p> <p>703-292-7197</p> <p>mfeeney@nsf.gov</p> <p>Link to sponsor website</p> <p>Link to program URL</p> <p>09-Feb-2026</p>			
	Synopsis	<p>The National Science Foundation (NSF) and the National Institutes of Health (NIH) are interested in proposals that will propel our understanding of the biomedical research enterprise by drawing from the scientific expertise of the science of science policy research community. NSF promotes the progress of science by maintaining the general health of research and education across all fields of science and engineering. The Social, Behavioral and Economic Sciences (SBE) Directorate within NSF supports basic research on people and society. The SBE sciences focus on human behavior and social organizations; how social, economic, political, cultural and environmental forces affect the lives of people from birth to old age; and how people in turn shape those forces. SBE's Science of Science: Discovery, Communication and Impact Program (SoS:DCI) supports research designed to advance the scientific basis of science and innovation policy. The NIH is the U.S. federal agency charged with supporting biomedical research in the U.S. The National Institute of General Medical Sciences (NIGMS) within the NIH supports basic biomedical research that increases understanding of biological processes and lays the foundation for advances in disease diagnosis, treatment and prevention. Both NSF and NIH believe that there are opportunities and needs for building and supporting research projects with a focus on the scientific research enterprise. The two agencies also recognize that when programmatic goals are compatible, coordinated management and funding of a research program can have a positive synergistic effect on the level and scope of research and can leverage the investments of both agencies. Therefore, NIGMS and SBE are partnering to enable collaboration in research between the SoS:DCI program and NIGMS. This partnership will result in a portfolio of high-quality research to provide scientific analysis of important aspects of the biomedical research enterprise and efforts to foster a diverse, innovative, productive and efficient scientific workforce, from which future scientific leaders will emerge.</p>

	Deadline Dates (ALL)	09-Feb-2026			
	Synopsis	<p>This GCR solicitation targets multidisciplinary teams who are embracing convergence research as a means of developing highly innovative solutions to complex research problems. GCR proposals are expected to be bold and address scientific or technical challenges and bottlenecks which if resolved have the potential to transform scientific understanding and solve vexing problems. Successful GCR projects are anticipated to lead to paradigm shifting approaches within disciplines, establishment of new scientific communities, or development of transformative technologies that have the potential for broad scientific or societal impact. The aim of GCR is to cultivate and grow the earliest foundations of convergent approaches for addressing a specific and compelling problem. As such, proposals submitted to this solicitation are expected to explore novel avenues not previously investigated that are at the forefront of advancing science through deep integration. Proposers must make a convincing case that the research to be conducted is within NSF's purview, integrates across NSF directorate or division boundaries, and is currently not supported by other NSF programs or solicitations. The proposers must outline a five-</p>

[Non-Profit Indirect Cost \(IC\) Waiver Policy Implementation Guidance](#)

[European Union Sponsored Projects](#)

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	The ALS Association's Hoffman ALS Clinical Trial Awards Program seeks to de-risk clinical programs of novel or repurposed approaches for ALS by providing up to \$1,000,000 in total funding over 2 or 3 years to support early- to mid-stage (phase 1 or phase 2a) trials. Both disease-modifying and symptomatic treatments are in scope, as are early studies testing imaging tracers. We are particularly interested in funding programs targeting TDP-43 and/or protein aggregation. Funding will be prioritized for trials with a clear biological rationale and an integrated biomarkers strategy, and where outcomes are aligned with the trial phase. These awards are open to industry and academic investigators. Successful applicants will provide strong preclinical data supporting the biological rationale for the proposed treatment/tracer and a clear plan for clinical development. Biomarker-driven clinical trials, along with other methods for increasing the probability that trials definitively answer relevant scientific questions, will be prioritized for funding. Long-term development plans should describe essential "go/no-go" decision milestones and a plan to attract follow-on funding if results are positive.

	Synopsis	The Four Directions Summer Research Program is a unique summer research opportunity at Mass General Brigham for undergraduate rising sophomores, juniors and seniors and first-year medical students, with a commitment to the health of Native American communities. Students engage in a basic science research project under the direction of a faculty mentor. Additional activities include clinical shadowing, career development seminars, talking circles, networking events and more. Upon completion of the program, students leave Mass General Brigham with new skills, experiences and knowledge that can be used to empower themselves, their communities and future generations of Native peoples from all Four Directions.

	Synopsis	This funding opportunity builds upon previous investments in vaccine research for pandemic preparedness. The first iteration of this award was launched in 2021 as the CIHR-CEPI Leadership Award for Excellence in Vaccine Research for Infectious Diseases of Epidemic Potential. It supported the career development of mid-career researchers (i.e., researchers who, at the time of the funding start date, assumed their first independent research position 5-15 years ago) and aimed to contribute to national and international efforts to prevent and prepare for future global health threats and position Canada as a leader in this research area. This funding opportunity will build capacity and provide mid-career vaccine researchers in Canada with: Exposure to national and global expertise, Access to cutting-edge technologies and facilities, and Expanded academic, public health, and industrial networks that are crucial for driving

	Synopsis	<p>Proposals are invited against the following topic: HORIZON-CL6-2025-02-FARM2FORK-01-two-stage: Emerging and future risks to plant health Successful proposals should contribute to the objectives of the common agricultural policy, as well as to the European Green Deal's goals for resilient and sustainable agri-food systems, the EU biodiversity strategy for 2030, and support Regulation 2016/2031[1] on protective measures against pests of plants. Successful proposals will deliver on the expected impacts of the destination by enabling agri-food systems to enhance the EU's strategic autonomy through promoting food security and long-term sustainability with multidisciplinary approaches, including One Health. They will also empower farmers and key actors in the agricultural sector to manage sustainable, efficient, profitable, and circular farming systems with low greenhouse gas emissions, contributing to climate-neutrality and resilience. Project results are expected to contribute to all of the following expected outcomes: the understanding of drivers of plant pest emergence, including the influence of climate change, ecosystem degradation and globalisation, is increased; cost-effective preventive and/or curative measures to new and/or emerging plant pests are developed; economic, social, and environmentally sound solutions for effective pest</p>

	Synopsis	Proposals are invited against the following topic: HORIZON-MISS-2025-05-SOIL-01-two-stage: Living labs to enhance soil health in Continental, Boreal and Alpine biogeographical regions This topic is part of the EU Mission 2025 call: A Soil Deal for Europe. Activities under this topic respond directly to the goal of the Mission 'A Soil Deal for Europe' (Mission Soil) to set up 100 living labs and lighthouses to lead the transition to healthy soils by 2030. They support the specific objectives 1 to 8 of the Mission Soil (see the Mission implementation plan). Activities should also contribute to meeting the European Green Deal ambitions and targets and more specifically those of the EU Biodiversity Strategy for 2030, the EU soil strategy for 2030 and the proposal for a Soil Monitoring and Resilience Directive, the Zero Pollution Action Plan, the Communication on Boosting Biotechnology and Biomanufacturing in the EU, as well as to Sustainable Development Goals 15 on Life on land and 3 on Good health and well-being. Project results are expected to contribute to all of the following outcomes: Increased capacities for participatory, interdisciplinary and transdisciplinary R&I to co-create, and co-implement economically viable soil health solutions. Improved soil health

	Synopsis	The purpose of the Lundbeck Foundation Start-Up programme is to support the development of Danish neuroscience by facilitating the process for recruiting researchers to Danish Universities or hospitals from abroad or from industry. The Lundbeck Foundation has a strategic goal to make Denmark a frontrunner in the field of neuroscience by funding Danish-based research that promotes a better understanding of the brain and better prevention, diagnosis, and treatment of brain disorders. At the same time, the grants must help to ensure that Denmark has the best graduates and scientists at all career levels in the fields of biomedical, clinical and health sciences in Denmark. Lundbeck Foundation believes that diversity strengthens science and for this reason diversity, including, but not limited to, gender and ethnic origin, is encouraged. It is therefore important that we receive applications for recruitment from all backgrounds.

Synopsis	<p>The Genomics Health Futures Mission (the Mission) aims to support research to improve testing, diagnosis and treatment for genetic diseases, guide prevention and help personalise treatment options to better target and improve health outcomes and reduce unnecessary interventions and health costs. Under the 3rd MRFF 10-Year Investment Plan, the Mission is allocated \$191.2 million over 4 years from 2024-25 to 2027-28, with further investment from 2028-29 to 2033-34 subject to evaluation. Genomics is already transforming our ability to diagnose conditions and provide targeted interventions, especially for people with rare genetic diseases and cancer. Genomics is also improving the prevention and control of infectious disease. Continually improving genomics technologies and their applications offers an opportunity to generate individual, public health, social and economic benefits in Australia and globally. To maximise these benefits, new ways of thinking and working are required to develop and disseminate advances in genomics technologies, and to support their timely adoption and implementation into health care and disease prevention and treatment. The scope of the Mission is to fund research to integrate genomics knowledge and technology into clinical practice and public health impact. It aims to: - ensure Australians live longer and healthier lives through access to genomics knowledge and technology - deliver improved diagnostics and targeted treatments, including precision medicine - avoid unnecessary health costs improve patient experience and outcomes - position Australia as a global leader in genomics research The objectives and outcomes of this grant opportunity align with the Roadmap and Implementation Plan for the Mission. The objectives and intended outcomes of this grant opportunity are aligned with the following Australian</p>

	Synopsis	<p>The Northeast Sustainable Agriculture Research and Education (SARE) Program offers competitive grants to farmers, educators, service providers, researchers, nonprofit staff, graduate students and others to address key issues affecting the sustainability of agriculture throughout our region. Northeast SARE is one of four regional SARE programs funded by the USDA National Institute of Food and Agriculture (NIFA). By law, projects that Northeast SARE funds must help improve farming in at least one of the following ways: 1. Maintain and enhance the quality and productivity of the soil; 2. Conserve soil, water, energy, natural resources, and fish and wildlife habitat; 3. Maintain and enhance the quality of surface and ground water; 4. Protect the health and safety of persons involved in the food and farm system; 5. Promote the well being of animals; and 6. Increase employment opportunities in agriculture.</p>

	Synopsis	<p>The Research Infrastructure Support (RIS) program aims to provide a sustainable health and medical research environment and to promote excellence in health and medical research in Western Australia. RIS will provide support to eligible Western Australian medical research institutes, universities, and hospitals' for the indirect costs of research and for costs associated with operating shared research-dedicated facilities, services and equipment. Research infrastructure refers to resources essential for supporting quality research, where these resources are not directly funded by research grants. Examples include indirect costs such as laboratory consumables, computers, and support staff, research services and equipment. Under Stream 1 eligible medical research institutes, universities and hospitals will receive a share of \$17.5 million to support their indirect costs of research. This includes a dedicated allocation for eligible medical research institutes. Stream 1 funding will be awarded based on research excellence demonstrated through the previous three-year average of eligible research grant income. Under Stream 2 eligible medical research institutes, universities and hospitals will receive a share of \$7.5 million for the operational costs associated with running shared research facilities, services and equipment in order to make them more broadly accessible to the health and medical research sector. Stream 2 funding will be awarded based on the previous three-year average of eligible operational costs.</p>
