

Icahn School of Medicine at  
Mount Sinai

Grants and Contracts Office

**Funding Opportunities Monthly Edition  
March 2026 Due Dates**

## Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in March 2026.

The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

The Development Office offers assistance with many not for profit opportunities. Please contact the Development Office's Corporate and Foundation Relations team  
at [DevCorpFound@m Mountsinai.org](mailto:DevCorpFound@m Mountsinai.org) / 212-659-8500 below for assistance or questions.

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
123615	<a href="#">International Research Scientist Development Award (IRSDA) (K01)</a> <a href="#">Independent Clinical Trial Not Allowed</a>	Fogarty International Center/NIH/DHHS	PAR-24-113	09-Mar-2026	Not Specified
	<p>Contact Name <a href="#">Christine Jessup, Ph.D.</a></p> <p>Contact Telephone <a href="#">301-496-1653</a></p> <p>Contact Email <a href="mailto:Christine.Jessup@nih.gov">Christine.Jessup@nih.gov</a></p> <p>Sponsor Website <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 09-Mar-2026</p> <p>The purpose of the International Research Scientist Development Award (IRSDA) is to provide support and protected time (three to five years) to advanced postdoctoral U.S. research scientists and recently-appointed U.S. junior faculty (applicants must be at least two years beyond conferral of doctoral degree) for an intensive, mentored research career development experience in a low- or middle-income country (LMIC), as defined by the World Bank (<a href="http://data.worldbank.org/about/country-classifications/country-and-lending-groups">http://data.worldbank.org/about/country-classifications/country-and-lending-groups</a>), including "low-income," "lower-middle-income," and "upper-middle-income" countries) leading to an independently-funded research career focused on global health. This Notice of Funding Opportunity (NOFO) invites applications from postdoctoral research scientists and junior faculty from any health-related discipline who propose career development activities and a research project that is relevant to the health priorities of the LMIC under the mentorship of LMIC and U.S. mentors. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary study to a clinical trial. Applicants to this NOFO are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. Applicants proposing a clinical trial or an ancillary study to an ongoing clinical trial as lead investigator should apply to the companion NOFO ( PAR-24-114).</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p><b>Synopsis</b></p> <p>The purpose of the International Research Scientist Development Award (IRSDA) is to provide support and protected time (three to five years) to advanced postdoctoral U.S. research scientists and recently-appointed U.S. junior faculty (applicants must be at least two years beyond conferral of doctoral degree) for an intensive, mentored research career development experience in a low- or middle-income country (LMIC), as defined by the World Bank (<a href="http://data.worldbank.org/about/country-classifications/country-and-lending-groups">http://data.worldbank.org/about/country-classifications/country-and-lending-groups</a>), including "low-income," "lower-middle-income," and "upper-middle-income" countries) leading to an independently-funded research career focused on global health. This Notice of Funding Opportunity (NOFO) invites applications from postdoctoral research scientists and junior faculty from any health-related discipline who propose career development activities and a research project that is relevant to the health priorities of the LMIC under the mentorship of LMIC and U.S. mentors. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary clinical trial, as part of their research and career development. Applicants not planning an independent clinical trial, or proposing to gain research experience in a clinical trial led by another investigator, must apply to companion NOFO (PAR-24-113).</p>				
123858	<a href="#">Natural Product Multi-Site Clinical Trial Data Coordinating Center (Collaborative U24 Clinical Trial Required)</a>	National Center for Complementary and Integrative Health/NIH/DHHS	PAR-24-313	20-Feb-2026	Not Specified
	<p>Contact Name: <a href="#">Wendy Weber, N.D., Ph.D, M.P.H.</a></p> <p>Contact Telephone: <a href="#">301-402-1272</a></p> <p>Contact Email: <a href="mailto:weberwj@mail.nih.gov">weberwj@mail.nih.gov</a></p> <p>Sponsor Website: <a href="#">Link to program URL</a></p> <p>Program URL: <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL): <a href="#">20-Feb-2026</a> , <a href="#">17-Mar-2026</a> , <a href="#">22-Jun-2026</a> , <a href="#">14-Jul-2026</a></p> <p><b>Synopsis</b></p> <p>This Notice of Funding Opportunity (NOFO), utilizing the U24 grant funding mechanism, encourages applications for a collaborating Data Coordinating Center (DCC) application that accompanies an investigator-initiated multi-site clinical trial (Phase III and beyond) application submitted under PAR-24-312. The DCC application must be specific to the collaborating Clinical Coordinating Center (CCC) application. The objective of the DCC application is to propose a comprehensive plan that provides overall project coordination and administrative, data management, and biostatistical support for the proposed clinical trial. Both a DCC application and a corresponding CCC application need to be submitted simultaneously for consideration by NCCIH. Trials for which this NOFO applies must be relevant to the research mission of NCCIH and considered a high priority by the Center. For additional information about the mission, strategic vision, and research priorities of NCCIH, applicants are encouraged to consult the NCCIH website: (<a href="https://www.nccih.nih.gov">https://www.nccih.nih.gov</a>). Applicants are strongly encouraged to contact the appropriate Scientific/Research contact for the area of science for which they are planning to</p>				

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	develop an application prior to submitting to this NOFO. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).				
123791	<a href="#">NCCIH Natural Product Mid Phase Clinical Trial Cooperative Agreement (R01 Clinical Trial Required)</a>	National Center for Complementary and Integrative Health/NIH/DHHS	PAR-25-271	23-Feb-2026	1,750,000 USD
	Contact Name <span>Sekai Chideya, M.D., MPH</span> Contact Telephone <span>301-827-1916</span> Contact Email <span><a href="mailto:sekai.chideya@nih.gov">sekai.chideya@nih.gov</a></span> Sponsor Website <span></span> Program URL <span><a href="#">Link to program URL</a></span> Deadline Dates (ALL) <span>23-Feb-2026 , 17-Mar-2026 , 20-Oct-2026 , 13-Nov-2026</span>				
	<p>This Funding Opportunity Announcement (FOA) invites cooperative agreement applications for investigator-initiated mid-phase clinical trials of natural products. All applications submitted under this FOA must be supported by sufficient preliminary data of bioavailability and documentation that the natural product produces a replicable and measurable impact on a biological signature (i.e., measure of the mechanism of action). Only in cases when it is not possible/practical to measure a biological signature in the patient population of interest or when there is a fundamental understanding of the product's mechanism of action will this preliminary data requirement be waived. Applications submitted to this FOA should propose a mid-phase clinical trial to do the following: determine the optimal dose or formulation of a given natural product for use in a future multi-site clinical trial; or determine which patient phenotypes will be responders versus non-responders to the natural product to inform inclusion/exclusion criteria of a future efficacy study. Clinical trials submitted under this FOA are expected to be hypothesis based, milestone-driven, and directly related to the research priorities and mission of NCCIH. This FOA will not support single-site or multi-site efficacy or effectiveness trials, nor will it support trials to test natural products for the treatment or prevention of cancer. Applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact for the area of science for which they are planning to develop an application prior to submitting to this FOA.</p>

Clinical coordinating centers (CCC) should develop and implement the proposed fully powered multisite clinical trial</p>				

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
<p>(Phase III and beyond). The objective of a CCC application is to present the scientific rationale and a comprehensive scientific and operational plan for the clinical trial. CCC applications are expected to describe plans for project management, participant recruitment and retention strategies, performance milestones, scientific conduct, and dissemination of results. CCC applications submitted under this NOFO will utilize a two-phase, milestone-driven cooperative agreement (UG3/UH3) funding mechanism. In addition, an accompanying data coordinating center (DCC) application (U24), submitted under PAR-24-087 and proposing a data analysis and data management plan for the clinical project, is required. Both a CCC application and a corresponding DCC application need to be submitted simultaneously for consideration by NCCIH. For additional information about the mission, strategic vision, and research priorities of NCCIH, applicants are encouraged to consult the NCCIH website (<a href="https://nccih.nih.gov/about/plans">https://nccih.nih.gov/about/plans</a>). Applicants are encouraged to contact the appropriate Scientific/Research Contact for the area of science for which they are planning to develop an application prior to submitting to this NOFO. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).</p>					
123153	<a href="#">Investigator Initiated Clinical Trials of Complementary and Integrative Interventions Delivered Remotely or via mHealth (R01 Clinical Trial Required)</a>	National Center for Complementary and Integrative Health/NIH/DHHS	PAR-25-268	20-Feb-2026	Not Specified
	Contact Name: Beda Jean-Francois, Ph.D. Contact Telephone: 202-313-2144 Contact Email: <a href="mailto:beda.jean-francois@nih.gov">beda.jean-francois@nih.gov</a> Sponsor Website: <a href="#">Link to program URL</a> Deadline Dates (ALL): 20-Feb-2026 , 17-Mar-2026 , 22-Jun-2026 , 13-Jul-2026 , 20-Oct-2026 , 17-Nov-2026 Synopsis: This Notice of Funding Opportunity (NOFO) encourages applications for investigator-initiated fully remotely delivered and conducted clinical trials to assess the efficacy or effectiveness of complementary and integrative health interventions in NCCIH- designated areas of high research priority. Applications submitted under this NOFO are expected to propose a remotely delivered and conducted fully powered clinical trial with no in-person contact between research staff and study participants and may utilize mHealth tools or technologies. Applicants must provide justification for the remotely delivered approach and provide preliminary data on the feasibility and safety of the approach, along with evidence that the intervention has promise of clinical benefit. Applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact for the area of science for which they are planning to develop an application prior to submitting to this NOFO. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP

123152	<a href="#">Feasibility Clinical Trials of Mind and Body Interventions for NCCIH High Priority Research Topics (R34 Clinical Trial Required)</a>	National Center for Complementary and Integrative Health/NIH/DHHS	PAR-25-274	20-Feb-2026	450,000 USD
	Contact Name <a href="#">Jennifer N. Baumgartner, Ph.D.</a> Contact Telephone <a href="#">301-402-4084</a> Contact Email <a href="mailto:jennifer.baumgartner@nih.gov">jennifer.baumgartner@nih.gov</a> Sponsor Website <a href="#">Link to program URL</a> Deadline Dates (ALL) <a href="#">20-Feb-2026</a> , <a href="#">17-Mar-2026</a> , <a href="#">22-Jun-2026</a> , <a href="#">13-Jul-2026</a> , <a href="#">20-Oct-2026</a> , <a href="#">17-Nov-2026</a>				
	<p>The goal of this notice of funding opportunity (NOFO) is to support feasibility trials of complementary and integrative health approaches with physical and/or psychological therapeutic inputs (often called mind and body interventions) for conditions that have been identified by NCCIH as high-priority research topics. This funding opportunity is intended to support feasibility clinical trials that provide new information that are scientifically necessary for the planning and conduct of a subsequent clinical efficacy or effectiveness study, pragmatic trial, or dissemination and implementation trial within NCCIH's mission. NCCIH expects that applications to this NOFO will describe the planned future clinical trial and in so doing demonstrate that the proposed (R34) research is scientifically necessary to design or plan the subsequent competitive full-scale clinical trial. Under this R34, the data collected should be used to fill gaps in scientific knowledge necessary to develop a competitive full-scale clinical trial, including, but not limited to the following: examining feasibility and acceptability of interventions lacking published data; tailoring or adapting the content or structure of an intervention to a specific population, modality, or setting; refining the intervention to determine the most appropriate frequency or duration; determining feasibility of recruitment, retention, and data collection procedures; refining and assessing the feasibility of protocolized multi-component interventions; or examining acceptability and adherence of control conditions. The subsequent full-scale clinical trial should have the potential to make a significant impact on public health. Prior to submitting to this NOFO, applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact person for the science area of the planned application. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>				
123147	<a href="#">NCCIH Multi-Site Feasibility Clinical Trials of Mind and Body Interventions (R01 Clinical Trial Required)</a>	National Center for Complementary and Integrative Health/NIH/DHHS	PAR-25-267	20-Feb-2026	Not Specified

	<p>Contact Name   Pete Murray, Ph.D.</p> <p>Contact Telephone   301-496-4054</p> <p>Contact Email   <a href="mailto:peter.murray@nih.gov">peter.murray@nih.gov</a></p> <p>Sponsor Website   <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL)   20-Feb-2026 , 17-Mar-2026 , 22-Jun-2026 , 14-Jul-2026 , 20-Oct-2026 , 17-Nov-2026</p> <p>Synopsis   This notice of funding opportunity (NOFO) invites applications for investigator-initiated clinical trials of complementary and integrative health approaches with physical and/or psychological therapeutic inputs (often called mind and body interventions) in NCCIH-designated areas of high research priority. Applications submitted under this NOFO are expected to propose a multisite feasibility clinical trial that will provide new information that is scientifically necessary for the planning and conduct of a subsequent clinical efficacy or effectiveness study, pragmatic trial, or dissemination and implementation trial within NCCIH's mission. NCCIH expects that applications to this NOFO will describe the planned future clinical trial and in so doing demonstrate that the proposed (R01) research is scientifically necessary to design or plan the subsequent fully powered, full-scale clinical trial. Under this R01, the data collected should be used to fill gaps in scientific knowledge, including, but not limited to the following: assessing whether the intervention can be delivered with fidelity across sites; demonstrating feasibility of recruitment, accrual, and randomization of participants across sites; demonstrating participant adherence to the intervention, as well as retention of participants throughout the study across sites; refining and assessing the feasibility of protocolized multimodal interventions, and/or demonstrating feasibility of data collection across sites in preparation for a future fully powered, multisite efficacy or effectiveness trial. The need for multisite feasibility trials is expected to be justified by sufficient preliminary data from previous single site feasibility or acceptability trial(s) or the published literature. The data collected should be used to fill gaps in scientific knowledge and be necessary to develop a competitive fully powered multisite clinical trial that has the potential to make a significant impact on public health. Prior to submitting to this NOFO, applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact person for the science area of the planned application. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

	<p>Deadline Dates (ALL) <b>04-Mar-2026 , 02-Jul-2026 , 02-Nov-2026 , 04-Mar-2027</b></p> <p><b>Synopsis</b> This Notice of Funding Opportunity Announcement (NOFO) solicits cooperative agreement (UG3/UH3) applications for implementation of investigator-initiated, single or multi-site, interventional clinical trials (all phases). Investigators who have completed all necessary preparation (e.g., the trial design, protocol synopsis, data analysis plan, etc.) through other means may apply for a NIAMS UG3/UH3. The UG3 phase is designed to allow the investigators to prepare the final aspects needed to start the trial, (e.g., establishing the single IRB (sIRB), contracts and reliance agreements with sites, hiring of staff, etc.). Transition to the UH3 phase to begin the trial is dependent upon completion of the UG3 milestones proposed by the investigator and approved by NIAMS. UG3 projects that meet their milestones will be administratively considered by NIAMS and prioritized for transition to the UH3 phase. NIAMS expects trials to be hypothesis-driven and have the potential for high clinical impact within the research mission of NIAMS.</p>

	<p>Sponsor Website</p> <p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 04-Mar-2026 , 02-Jul-2026 , 02-Nov-2026</p> <p>Synopsis</p> <p>The purpose of this Notice of Funding Opportunity (NOFO) is to encourage Research Project Grant (R01) applications to pursue clinical observational (CO) studies to obtain data necessary for designing clinical studies for musculoskeletal, rheumatic, or skin diseases or conditions. Research data from observational studies supported by this NOFO can enhance clinical study design by providing essential information about disease symptoms, stages, and timing of disease progression; comorbid conditions; availability of potential research participants; and outcomes that are important to patients. They also can facilitate efforts to develop and/or validate objective biomarkers or subjective outcome measures for use in a future clinical study. A future clinical study may include a clinical trial or an observational study. Applicants to this NOFO are encouraged to propose studies that address significant obstacles or questions in the design of a clinical project, such as determining the appropriate primary or secondary outcome measures or identifying the stages of disease during which patients are most likely to respond to an intervention. Only observational studies will be supported through this NOFO.</p>				
126762	<p><a href="#">Advancement and Innovation in Measurement of Language Development and Predictors (R01 Clinical Trial Not Allowed)</a></p> <p>Contact Name Virginia Salo</p> <p>Contact Telephone 301-402-3682</p> <p>Contact Email <a href="mailto:virginia.salo@nih.gov">virginia.salo@nih.gov</a></p> <p>Sponsor Website</p> <p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 05-Feb-2026 , 05-Mar-2026 , 05-Jun-2026 , 05-Jul-2026 , 05-Oct-2026 , 05-Nov-2026 , 05-Feb-2027 , 05-Mar-2027 , 05-Jun-2027 , 05-Jul-2027</p> <p>Synopsis</p> <p>The purpose of this notice of funding opportunity (NOFO) is to encourage community-engaged research that broadens the conceptualization of qualities of the environment that can support language development in children and that focuses on the development of novel measures of children's language development. The overall goal is to build the number of strengths-focused, culturally and linguistically responsive, and generalizable tools to further our understanding of children's language development and/or impairment, and predictors thereof. This NOFO requires a Community Engagement (CE) Plan, which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a CE Plan will be considered incomplete and will be withdrawn. This Notice of Fuding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).</p>	<p>National Institute of Child Health and Human Development/NIH/DHHS</p>	<p>PAR-25-112</p>	<p>05-Feb-2026</p>	<p>Not Specified</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p><b>Synopsis</b></p> <p>This Notice of Funding Opportunity (NOFO) invites applications for studies of type 1 diabetes etiology and pathogenesis using data and samples from clinical trials and studies. This opportunity is intended to fund investigative teams collaborating to answer important questions about disease mechanisms leading to improved delay and durable prevention of type 1 diabetes. This NOFO is associated with the Special Diabetes Program (<a href="https://www.niddk.nih.gov/about-niddk/research-areas/diabetes/type-1-diabetes-special-statutory-funding-program/about-special-diabetes-program">https://www.niddk.nih.gov/about-niddk/research-areas/diabetes/type-1-diabetes-special-statutory-funding-program/about-special-diabetes-program</a>) which funds research on the prevention, treatment, and cure of type 1 diabetes and its complications, including unique, innovative, and collaborative research consortia and clinical trials networks. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).</p>				
130036	<a href="#">RFA-DK-26-009 -- New Investigator Gateway Awards for Collaborative T1D Research (R03 Clinical Trial Not Allowed)</a>	National Institute of Diabetes and Digestive and Kidney Diseases/NIH/DHHS	RFA-DK-26-009	06-Feb-2026 [Optional][LOI/Pre-App]	200,000 USD
	<p>Contact Name: Olivier Blondel, Ph.D. (for HIRN-related inquiries)</p> <p>Contact Telephone: 301-451-7344</p> <p>Contact Email: <a href="mailto:blondelo@nih.gov">blondelo@nih.gov</a></p> <p>Sponsor Website: <a href="#">Link to program URL</a></p> <p>Program URL: <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL): 06-Feb-2026 [Optional][LOI/Pre-App], 06-Mar-2026</p> <p><b>Synopsis</b></p> <p>The New Investigator Gateway Award in T1D Research is designed to support a robust pipeline of innovative projects and talented new investigators in T1D research. In addition to providing support for preliminary research, the Gateway program provides an opportunity for new Program Directors/Principal Investigators (PD/PIs) to pursue their studies within the intellectual environment of a select number of large, ongoing collaborative research programs. Embedding awardees within an established scientific framework in each of these consortia will provide unique opportunities for New and Early Stage Investigators to increase their understanding of key questions in the field, to network, and to establish unique and potentially long-lasting collaborations that will propel their careers forward. Bringing New and Early Stage Investigators into existing collaborative research networks will also benefit the networks by providing new ideas and perspectives. This NOFO is associated with the Special Diabetes Program (<a href="https://www.niddk.nih.gov/about-niddk/research-areas/diabetes/type-1-diabetes-special-statutory-funding-program/about-special-diabetes-program">https://www.niddk.nih.gov/about-niddk/research-areas/diabetes/type-1-diabetes-special-statutory-funding-program/about-special-diabetes-program</a>) which funds research on the prevention, treatment, and cure of type 1 diabetes and its complications, including unique, innovative, and collaborative research consortia and clinical trials networks.</p>

	<p>Synopsis</p> <p>The purpose of this NIH HEAL Initiative PainCare Clinician Training Program (PCTP): Mentored Clinical Scientist Development Awards (K08 - Clinical Trials Not Allowed) is to support the career development of individuals with clinical doctoral degrees to create a group of new and well-trained, independent investigators. This supervised career development program will provide independent NIH research support during the early-career phase to help recipients establish independent research programs in areas supported by the NIH HEAL Initiative's Clinical Research in Pain Management program. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Under this NOFO applicants are permitted to propose a research experience in a clinical trial led by a mentor or co-mentor. Those proposing a clinical trial or an ancillary clinical trial as lead investigator should apply to the companion NOFO. This Parent Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion NOFO. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions.</p>

	Deadline Dates (ALL)	10-Mar-2026 , 05-Aug-2026 , 10-Mar-2027 , 11-Aug-2027			
	Synopsis	The National Institute on Drug Abuse (NIDA) Cutting-Edge Basic Research Award (CEBRA) is designed to foster highly innovative or conceptually creative research related to the etiology, pathophysiology, prevention, or treatment of substance use disorders (SUDs). It supports high-risk and potentially high-impact research that is underrepresented or not included in NIDA's current portfolio that has the potential to transform SUD research. The proposed research should: 1. develop, and/or adapt, revolutionary techniques or methods for addiction research or that show promising future applicability to SUD research; and /or 2. test an innovative and significant hypothesis for which there are scant precedent or preliminary data and which, if confirmed, would transform current thinking.

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis</p> <p>This notice of funding opportunity (NOFO) encourages applications for institutional research career development (K12) programs that propose to support intensive, supervised research and career development experiences leading to research independence for clinician scientists (Scholars) conducting substance use and substance use disorder (SUD) research. For this NOFO, clinician scientists may include (but are not limited to) physicians, clinical psychologists, social workers, and pharmacists. Scholars are expected to be supported for 3-4 years on consecutive 12-month appointments. Candidates selected for support as scholars must hold a doctorate and commit a minimum of 9 person months (equivalent to 75% of full-time professional effort) to conducting clinical research and career development activities associated with the proposed K12 program. Scholars appointed through the proposed program may serve as the lead for a NIH-defined clinical trial that fulfills the NIH requirement for a minimal risk trial. A minimal risk trial is one in which the probability and magnitude of harm or discomfort anticipated in the research are not greater in and of themselves than those ordinarily encountered in daily life or during the performance of routine physical or psychological examinations or tests. This Notice of Funding Opportunity (NOFO) allows appointment of Scholars (K12) proposing to serve as the lead investigator of an independent clinical trial; or proposing a separate ancillary clinical trial; or proposing to gain research experience in a clinical trial led by another investigator, as part of their research and career development. Applicants may review the information found on the NIH Office of Extramural Research "Clinical Trial Requirements for Grants and Contracts": <a href="https://grants.nih.gov/policy/clinical-trials.htm">https://grants.nih.gov/policy/clinical-trials.htm</a> for more details about how NIH is enhancing accountability and transparency of clinical research.</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p><b>Synopsis</b></p> <p>This Notice of Funding Opportunity (NOFO) invites applications to submit samples to NIH INCLUDE Project (INvestigation of Co-occurring conditions across the Lifespan to Understand Down syndromE)-supported resources to generate a large volume of integrated genomic and multi-omics data that will facilitate discovery of the molecular mechanisms of health conditions related to Down syndrome. The resulting data, and associated clinical and phenotypic data, will become part of the INCLUDE Data Hub for sharing with the research community. No funding will be provided directly to applicants under this NOFO. Applicants are encouraged to propose omics assays of existing biospecimens collected from individuals with Down syndrome and controls. The program will accept applications that propose whole genome sequencing, including both short-read and long-read, exome, epigenome, and transcriptome sequencing, as well as proteomic, metabolomic, and single-cell RNA sequencing and ATAC sequencing, when justified. Applicants are encouraged to propose cohorts of underrepresented racial and ethnic groups or to increase racial and ethnic representation of existing collections.</p>				
123784	<a href="#">NCCIH Natural Product Early Phase Clinical Trial Award (R33 Clinical Trial Required)</a>	National Institutes of Health/DHHS	PAR-25-270	23-Feb-2026	1,050,000 USD

	<p>Contact Name: <a href="#">Sekai Chideya, M.D., MPH</a></p> <p>Contact Telephone: <a href="#">301-827-1916</a></p> <p>Contact Email: <a href="mailto:sekai.chideya@nih.gov">sekai.chideya@nih.gov</a></p> <p>Sponsor Website: <a href="#">Link to program URL</a></p> <p>Program URL: <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL): <a href="#">23-Feb-2026</a> , <a href="#">17-Mar-2026</a> , <a href="#">20-Oct-2026</a> , <a href="#">13-Nov-2026</a></p>				
	<p>Synopsis: This Funding Opportunity Announcement (FOA) encourages applications for investigator-initiated, early phase, clinical trials of natural products (i.e., botanicals, dietary supplements, and probiotics), which have a strong scientific premise to justify further clinical testing. Under this FOA, trials must be designed so that results, whether positive or negative, will provide information of high scientific utility and will support decisions about further development or testing of the natural product. This FOA will provide up to three years (R61 phase) of support for milestone-driven testing of pharmacokinetics, bioavailability, and assessment of the natural product's effect (i.e., measure of mechanism of action) when used by humans on a biological signature(s). If milestones in the R61 phase are achieved, up to 3 years of additional support (R33 phase) may be awarded to replicate the impact of the natural product on the biological signature(s) when used by humans and assess whether there is an association between the degree of the impact on the biological signature and functional or clinical outcomes in a patient population. Applications are encouraged to design R33 studies to determine how to optimize the impact of the natural product on the biological signature by optimizing the delivery of the natural product by examining different doses or formulation. In addition, applications can be designed to combine the natural product with another treatment approach that is known to impact the same biological signature; or study the impact of the natural product in a target population that is more responsive. Clinical trials submitted under this FOA are expected to be hypothesis based, milestone-driven, and directly related to the research priorities and mission of NCCIH. This R61/R33 funding mechanism is intended to accelerate the translation of emerging basic science findings about natural products into early-stage clinical testing to determine whether continued clinical research is warranted. This FOA will not support efficacy or effectiveness trials, nor will it support trials to test natural products for the treatment or prevention of cancer. A maximum of 5 years will be supported by the two phases of the R61/R33 award. Applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact for the area of science for which they are planning to develop an application prior to submitting to this FOA.</p>

This supervised career development program will provide independent NIH research support during the early-career phase to help awardees establish independent research programs in areas supported by the NIH HEAL Initiative's Clinical Research in Pain Management program. This Parent Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion NOFO. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis</p> <p>This Trailblazer Award is an opportunity for NIH-defined New and Early Stage Investigators (<a href="https://grants.nih.gov/policy/early-investigators/index.htm">https://grants.nih.gov/policy/early-investigators/index.htm</a>) to pursue research programs of high interest to the NIBIB that integrate engineering and the physical sciences with the life and/or biomedical sciences. A Trailblazer project may be exploratory, developmental, proof of concept, or high risk-high impact, and may be technology design-directed, discovery-driven, or hypothesis-driven. Importantly, applicants must propose research approaches for which there are minimal or no preliminary data. A distinct feature for this FOA is that no preliminary data are required, expected, or encouraged. However, if available, minimal preliminary data are allowed. Preliminary data are defined as material which the applicant has independently produced and not yet published in a peer-reviewed journal. All preliminary data should be clearly marked and limited to one-half page, which may include one figure. Applications including data more than one-half page or more than one figure will be considered noncompliant with the FOA instructions and will not go forward to review.</p>				
131755	<a href="#">Environmental Influences on Child Health Outcomes (ECHO) Cohort Data and Biospecimen Access (X01 Clinical Trial Not Allowed)</a>	National Institutes of Health/DHHS	PAR-25-437	04-Mar-2026	Not Specified
	<p>Contact Name</p> <p>Melissa Zajdel, Ph.D.</p> <p>Contact Telephone</p> <p></p> <p>Contact Email</p> <p><a href="mailto:melissa.zajdel@nih.gov">melissa.zajdel@nih.gov</a></p> <p>Sponsor Website</p> <p></p> <p>Program URL</p> <p><a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL)</p> <p>04-Mar-2026 , 01-Jul-2026 , 04-Nov-2026 , 03-Mar-2027 , 01-Jul-2027 , 03-Nov-2027 , 01-Mar-2028</p>				
	<p>Synopsis</p> <p>The purpose of this Program Announcement with Special Receipt, Referral, and/or Review Considerations (PAR) is to solicit applications to access limited identifiable data or biospecimens from the ECHO Cohort to study high-priority areas of maternal and child health. Obtaining an award from this opportunity is necessary to participate in the ECHO Cohort ancillary studies process. The ECHO Program defines an ECHO Cohort Ancillary Study as a study that derives funding from a non-ECHO source and uses the ECHO Cohort's non-publicly available data or biospecimens. ECHO Cohort Ancillary Studies are open to the broad scientific community and require investigators who are not a part of the ECHO Cohort Consortium to apply for and receive an X01 award under this announcement. Investigators who are currently part of the ECHO Cohort Consortium who are requesting access to biospecimens as part of an ancillary study must also apply for and receive an X01 award under this announcement. While no funds are associated with awards from this announcement, these X01s allow the NIH ECHO Program Office to oversee awardees' adherence to NIH and ECHO-specific policies and procedures during performance of ECHO Cohort Ancillary Studies.</p>

Unlike cadaveric human islets, stem cell-derived islet cell products are generated from well-defined and highly controlled cell bank sources. Their banking, manufacturing, and quality control processes can be used to instill optimized cell characteristics resulting in more resilient and durable graft viability and function. This funding opportunity aims to stimulate studies on targets and pathways amenable to such engineering approaches and to encourage preclinical testing and validation of such strategies. This NOFO is associated with the Special Diabetes Program (<a href="https://www.niddk.nih.gov/about-niddk/research-areas/diabetes/type-1-diabetes-special-statutory-funding-program/about-special-diabetes-program">https://www.niddk.nih.gov/about-niddk/research-areas/diabetes/type-1-diabetes-special-statutory-funding-program/about-special-diabetes-program</a>) which funds research on the prevention, treatment, and cure of type 1 diabetes and its complications, including unique, innovative, and collaborative research consortia and clinical trials networks.</span></p>

	Synopsis	<p>This Notice of Funding Opportunity (NOFO) invites applications for Diabetes Research Centers (DRCs) that are designed to support and enhance the national research effort in diabetes, its complications, and related endocrine and metabolic diseases. The purpose of this Centers program is to bring together basic and clinical investigators to enhance communication, multidisciplinary collaboration, and effectiveness of ongoing research in Diabetes Research Center topic areas. By providing shared access to specialized technical resources (research cores) and supporting a Pilot and Feasibility Program (P&amp;F), DRCs are intended to create an environment that provides the capability for accomplishments greater than those that would be possible by individual research project grant support alone. New Center programs that bring in new approaches, propose unique scientific themes, or provide innovative resources are encouraged. Emphasis will be placed on Center programs that propose enhanced synergies with other NIDDK-funded programs as well as providing a rich mentoring environment for future diabetes researchers.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
<p>and distributed. At its core, BoSS addresses a foundational bottleneck in the delivery of advanced cell and gene therapies (CGTs): the critical dependence on ultra-cold conditions (-80 to -196°C) for storage and transport. BoSS will yield a bioprocessing system that enables scalable production of thermally stable cells, paving the way for a new era of efficient and resilient manufacturing and distribution of biologics without any need for cold storage. BoSS-developed technologies will also accelerate many other avenues in biotechnology that directly impact healthcare, including bio-surveillance, regenerative medicine, large-scale genetic testing, blood product supply, and wound repair, in addition to improving access to a wide range of existing biotherapeutics. Solution Summaries are required: For consideration as a Performer: Solution Summary due date: February 19th, 2026 5:00 PM ET For consideration as an IV&amp;V partner: Solution Summary due date: April 17th, 2026 5:00 PM ET Interested parties are invited to review the attached BoSS Innovative Solutions Opening (ISO) ARPA-H -SOL-26-136. Submissions must be made to: Solution Summary Submission Site: <a href="https://solutions.arpa-h.gov/Submit-Solution/">https://solutions.arpa-h.gov/Submit-Solution/</a> Please ensure to follow this opportunity for any updates. Rissler</p> <p>Contact Telephone   703-292-4628</p> <p>Contact Email   <a href="mailto:lrissler@nsf.gov">lrissler@nsf.gov</a></p> <p>Sponsor Website   <a href="#">Link to sponsor website</a></p> <p>Program URL   <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL)   02-Mar-2026</p> <p>Synopsis   The MCA program offers an opportunity for scientists and engineers at the mid-career stage to substantively enhance and advance their research program and career trajectory. Mid-career scientists are at a critical career transition stage where they need to advance their research programs to ensure long-term productivity and creativity but are often constrained by service, teaching, or other activities that limit the amount of time devoted to research. MCA support is expected to help lift these constraints to reduce workload inequities and enable a more diverse scientific workforce (more women, persons with disabilities, and individuals from groups that have been underrepresented) at high academic ranks.</p>

133082	<a href="#">Accelerating Research Translation</a>	National Science Foundation	25-548	15-Jan-2026	Not Specified
	<p>Contact Name <a href="#">Pradeep Fulay</a></p> <p>Contact Telephone <a href="#">703-292-2445</a></p> <p>Contact Email <a href="mailto:art@nsf.gov">art@nsf.gov</a></p> <p>Sponsor Website <a href="#">Link to sponsor website</a></p> <p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 15-Jan-2026 , 12-Mar-2026</p> <p>Synopsis The U.S. National Science Foundation (NSF) seeks to increase the scale and pace of advancing discoveries resulting from academic research into tangible solutions that benefit the public. The overarching goal for the Accelerating Research Translation (ART) program is to advance the U.S. scientific and economic leadership by building capacity and increasing the number of robust translational research ecosystems in Institutions of Higher Education (IHEs) that span across the full geography of our nation. Innovations can occur anywhere and can be opportunities for creating sustained impacts in every single region of the United States. Achieving translational outcomes as a mechanism to drive sustained economic impacts is the primary aim of the "Accelerating Research Translation" (ART) program. Led by NSF's Directorate for Technology, Innovation and Partnerships (TIP) and in collaboration with other NSF directorates and the Office of Integrative Activities, the ART program seeks proposals involving institutional leadership; research translation programs, institutes or centers; technology transfer offices; units responsible for managing research intellectual property (IP); entrepreneurial training teams; and researchers from all scientific, technological and engineering fields in collaboration with one or more of the other target categories. This updated ART solicitation expands and builds upon its previous version, NSF 23-558, by implementing Tracks that address varying stages of capacity to accelerate research translation. The ART program is aimed at providing resources that will ultimately facilitate a wide range of IHEs to achieve research translation, accelerate technology transfer, and create sustained economic and collective impacts across the U.S. It is understood that, like technology readiness levels (TRLs), there is no one measure or a combination of measures that can be used to describe the capacity of or measure the research translation readiness level (RTL) for an IHE. Some indicators that reflect on RTL include volume of sustained basic and applied research as measured by research expenditures, robust technology transfer and entrepreneurship related activities (e.g. invention disclosures, patents, licenses, royalties, partnerships with industry, non-profits etc.). Number of start-ups,</p>				

## National Science Foundation (NSF) Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	resources for entrepreneurial and innovation education and training, the presence of a dedicated technology transfer office are also some of the other indicators that reflect on the RTRL.				
132987	<a href="#">Dear Colleague Letter: U.S.-UK Center-to-Centre Collaboration Opportunities for Artificial Intelligence and Quantum Information Science and Technology</a>	National Science Foundation	NSF 25-039	01-Mar-2026	Not Specified

The proposed international collaboration should advance efforts to achieve the goals of the institute/center as outlined in the existing NSF award. Supplemental funding requests should describe activities that will confer mutual benefits and represent a true intellectual collaboration with counterparts in UK centers. NSF and UKRI intend to exchange information on supplement requests received, such as PI names, institutions, project titles and requested budgets to coordinate decisions on recommended awards. These supplemental funding requests are anticipated to be for up to \$500,000, subject to availability of funds and quality of supplemental funding requests.</p>

## Other Federal Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 13-Mar-2026</p> <p>Description A. Summary of Amendment 003 1. The Defense Logistics Agency (DLA) is conducting a commercial solutions opening (CSO) authorized by 10 U.S.C. § 3458 and Defense Federal Acquisition Regulation Supplement, Subpart 212.70, Defense Commercial Solutions Opening. DLA intends to solicit Solution Briefs in response to the addendum Areas of Interest (AOIs), which DLA may change, amend, open, and close from time to time at DLA's sole discretion. Interested offerors are encouraged to frequently check this CSO from new or revised AOIs. DLA intends to keep this CSO SP4701-24-S-C001 open until 13 March 2026; however, DLA reserves the right to close this CSO at any time. 2. In accordance with 10 U.S.C. § 3458(c)(2), any contract or agreement DLA may award under pursuant to this CSO shall be fixed-price. DLA intends to award commercial contracts in accordance with DFARS 212.7002(b); however, DLA may, at DLA's discretion, to award an other transaction agreement in accordance with 10 U.S.C. § 4022. 3. If you have any questions or concerns, please contact: Mr. Thomas Walsh Agreements and Contracting Officer DLA DCSO-P5 Thomas.Walsh@dla.mil Mrs. Lauren Runowski Agreements and Contracting Specialist DLA DCSO-P5 lauren.runowski@dla.mil 4. DLA provides no funding for any offer submitted to this CSO. DLA funding is only possible after a signed contract. B. Background: DLA is the Department of Defense's logistics combat support activity. DLA provides worldwide logistical support to the military services and other authorized customers, which may include civilian organizations and foreign countries. Potential offerors may learn more about DLA at <a href="https://www.dla.mil">https://www.dla.mil</a>. C. How to Submit a Solution Brief. Prior to the closing date of the published Area of Interest, electronically submit to the person identified in paragraph A.3. of this CSO an unclassified Solution Brief, utilizing the Solution Brief template at Attachment 1. Mark as appropriate all parts of the Solution Brief considered proprietary. By submitting a Solution Brief, the offeror agrees to DFARS 252.227-7016, Rights in Bid or Proposal Information. The Solution Brief must 'stand alone'. While the Solution Brief may include references to outside materials, links to website, etc., DLA WILL NOT AND CAN NOT consider such material. Similarly, DLA will not consider any accompanying slides, sales materials, integrated or outside videos, or the like sent with the Solution Brief. DLA may reject, without further consideration, Solution Briefs sent with extraneous materials. Offerors may submit multiple Solution Briefs for each AOI. While each Solution Brief may reference another Solution Brief, DLA WILL NOT AND CAN NOT consider that referenced</p>				

## Other Federal Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
<p>Solution Brief in evaluating this submitted Solution Brief. Solution Briefs' prices and all other terms and conditions must remain valid for 180 calendar days from the submission date of the Solution Brief. D. How DLA Will Make Any Awards. 1. DLA will first review Solution Briefs for conformance with this CSO. DLA will return Solution Briefs DLA finds not in conformance with this CSO. The offeror may, if the date and time stated in the Area of Interest has not passed, re-submit a revised Solution Brief. While DLA intends to complete this review diligently, DLA is under no obligation to complete this review soon enough for an offeror to submit a revised Solution Brief. Therefore, offerors should submit their best, conforming, Solution Briefs. 2. For Solution Briefs both received before the closing time of CSO and AOI, and also conforming to the CSO, DLA subject-matter expert technical evaluators will evaluate the Solution Brief. First, evaluators will evaluate Factor 1, Possibility of Funding, and rate the Solution Brief as either "Funding Possible" or "Funding Not Possible". If evaluated as "Funding Not Possible," evaluators will not evaluate the Solution Brief further and DLA will notify the offeror. If evaluated as "Funding Possible," evaluators will continue their evaluations through the remaining factors, assigning each remaining factor one of the following ratings: "Exceptional," "Good," "Acceptable," "Marginal," or "Unacceptable." All evaluation factors are described below. a. Factor 1: Possibility of Funding. Does funding reasonably exist to fund the proposed solution? Solutions with lower prices are favored. b. Factor 2: Technical Feasibility. How technically feasible is the proposed solution to an AOI, given the present state of the technology and science? Solutions with a lower technological risk profile are favored. c. Factor 3: Responsiveness. How responsive is the proposed solution to the AOI? Solutions responsive to the problem identified in the AOI, without creating new problems, are favored. d. Factor 4: Viability. How viable is the proposed solution given existing organizational and regulatory environments? Solutions compatible with existing DLA, DoD, and federal policies, processes, and procedures, are favored. e. Factor 5: Desirability. How desirable is the proposed solution to the eventual end-user? Solutions easily adaptable, useful, and implementable are favored. 3. After the above evaluation, the technical evaluators will then decide whether the solution proposed in the Solution Brief merits further consideration. Note that while Solution Briefs are not evaluated against other Solution Briefs, DLA has limited funding and acquisition manpower and thus cannot pursue all otherwise meritorious Solution Briefs. DLA also recognizes that industry resources in pursuing business with DLA are limited. To the extent DLA must</p>					

## Other Federal Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
<p>select between highly rated Solution Briefs to pursue further, DLA will aggregate the Factor 2 through 5 ratings together equally to discern the most highly rated Solution Briefs. If further discernment is necessary amongst highly rated Solution Briefs, DLA will then additionally consider the Factor 2 through 5 ratings in order of importance, with Factor 2 being the most important, Factor 3 being the second most important, Factor 4 being the third most important, and Factor 5 being the fourth most important. And if still additional discernment is necessary, DLA will then consider the price proposed in the Solution Brief and select for further consideration the lowest priced Solution Brief. 4. If the technical evaluators decide a proposed Solution Brief merits further consideration, technical evaluators will decide whether to further consider the proposed solution via a Pitch, Full Proposal, or both. Technical evaluators may also decide a Pitch or Full Proposal, or both, are unnecessary, and refer a Solution Brief for negotiation of a possible award as described in paragraph 5. a. Pitch: DLA would invite the offeror to 'pitch' the offeror's proposed solution in a presentation, whether via a remote meeting, a face-to-face meeting, or other mutually agreeable means. DLA will advise the offeror of the parameters of the Pitch at that time. Offerors may propose different parameters; however, the final decision rests with DLA, as represented by the person noted in paragraph A(3). During the Pitch, the parties may verbally discuss the proposed solution. After the Pitch, DLA will decide whether an additional Pitch is desired, to request a full proposal, refer the offeror to the supporting contracting activity for award negotiations, or to terminate further consideration of the offer. b. Full Proposal: DLA would invite the offeror to submit a full proposal. DLA will advise the offeror of the parameters of the full proposal at that time. Offerors may propose different parameters; however, the final decision rests with DLA. After receipt of the Full Proposal, DLA may communicate with the offeror about the Full Proposal, to better understand and review it. After reviewing the Full Proposal, DLA will decide whether an additional or revised Full Proposal is desired, to request a 'Pitch', refer the offeror to the supporting contracting activity for award negotiations, or to terminate further consideration of the offer. 5. If the technical evaluators refer an offeror to the supporting contracting activity for award negotiations, the supporting contracting activity will open negotiations with the offeror. The conduct of such negotiations are within the discretion of the cognizant Contracting Officer or Agreement Officer, as the case may be, as bounded by applicable law and policy. Offerors should note that the Contracting Officer, or Agreement Officer, is not required to award</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
		<p>any contract and may close negotiations at any time at his or her discretion. Offerors should further note that should any in negotiation resulting in an award, the prices awarded must be 'fair and reasonable'. E. Generally Applicable Information. 1. DLA provides no funds for partaking in any process described in this CSO. Any funds will be disbursed only in accordance with a signed contract or other transaction agreement. 2. Should DLA award an other transaction agreement awarded under this CSO, DLA may later award a follow-on production contract or other transaction agreement without further competition, in accordance with 10 U.S.C. § 4022. 3. Note that Chapter 21 of Title 41, United States Code, applies to all submitted proposals and any awarded contract, whether awarded under the FAR or 10 U.S.C. § 4022. 4. Note that DLA can only award to a responsible entity. Please see FAR Part 9 for further information. SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Sponsor Website</p> <p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 15-Mar-2026 , 15-Mar-2027</p> <p>NAICS CODE: 541715 FEDERAL AGENCY NAME: Department of the Air Force Materiel Command, AFRL - Rome Research Site, AFRL/Information Directorate, 26 Electronic Parkway, Rome, NY, 13441-4514 BAA  ANNOUNCEMENT TYPE: Initial announcement BROAD AGENCY  ANNOUNCEMENT (BAA) TITLE: Artificial Intelligence and Next Generation Distributed Command and Control BAA NUMBER: FA8750-23-S-700  I – OVERVIEW INFORMATION This announcement is for an Open, 2 Step which is open and effective until 30 AUG 2028. Only white papers will be accepted as initial submissions; formal proposals will be accepted by invitation only. While white papers will be considered if received prior to 1600 hours Eastern Standard Time (EST) on 30 AUG 2028, the following submission dates are suggested to best align with projected funding: FY24 by 13 SEP 2023 by 15 Mar 2024 FY26 by 15 Mar 2025 FY27 by 15 Mar 2026 FY28 by 15 Mar 2027 Offerors should monitor the Contract Opportunities on the SAM website at <a href="https://SAM.gov">https://SAM.gov</a> in the event this announcement is amended.</p> <p>CONCISE SUMMARY OF TECHNOLOGY REQUIREMENT</p> <p>Artificial Intelligence (AI) holds great potential in transforming the Department of the Air Force (DAF) and Joint Force Command and Control (C2) capabilities across strategic, operational, and tactical levels by enabling decision makers to effectively assess the battlespace, rapidly explore, create, and select the best plan, and direct and monitor forces at pace and scale in a distributed setting. This BAA is interested in exploring new and advancing existing AI and distributed C2 concepts. By accelerating the research &amp; development of AI-based and distributed capabilities to support Joint All Domain C2, the DAF can achieve a strategic decision advantage, where AI becomes a key and prevalent component to future C2 systems. With the rise of AI-based applications also comes new challenges to include the ability to effectively manage, monitor, and adapt deployed AI capabilities and effective C2 in a distributed and contested environment. Distributed operations is a critical</p>				

## Other Federal Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
<p>component of Next-Generation C2. Key to the DAF transitioning from a monolithic C2 node to multiple distributed C2 nodes is the ability to orchestrate operational processes, while optimizing for limited resources. Through the development of distributed C2 capabilities the DAF can achieve an agile, mobile, distributed, and virtualized C2 operational capability. This BAA is interested in key areas for advancing C2 capability for the DAF to include not limited to development and application of AI to C2, new concepts and techniques for the battle management and orchestration of AI at pace and scale, how the use of AI by adversaries can be considered in the C2 planning and execution process and distributed and collaborative C2 to enable C2 anywhere and anyplace. BAA ESTIMATED FUNDING: Total funding for this BAA is approximately \$99M. Individual awards will not normally exceed 48 months with dollar amounts normally ranging from \$200K to \$20M. There is also potential to make awards up to any dollar value as long as the value does not exceed the available BAA ceiling amount. ANTICIPATED INDIVIDUAL AWARDS: Multiple Awards are anticipated. However, the Air Force reserves the right to award zero, one, or more Procurement Contracts, Other Transactions, or Assistance Instruments, for all, some, or none of the sole effort based on the offeror's ability to perform desired work and funding fluctuations. There is no limit on the number of OTs that may be awarded to an individual offeror. TYPE OF INSTRUMENTS THAT MAY BE AWARDED: FAR Procurement contracts, DODGARS based grants and cooperative agreements, other transactions (OT) under 10 USC 4021, 10 USC 4022 and 10 USC 4023 (previously 10 USC 4002, 2371, 10 USC 4003, 2371b and 4004, 2373) depending upon the nature of the work proposed. In the event that an Other Transaction for Prototype agreement is awarded as a result of this competitive BAA, if the prototype project is successfully completed, there is the potential for a prototype project to transition to award of a follow-on production contract or transaction. The Other Transaction for Prototype Agreement itself will also contain a similar notice of a potential follow-on production contract or agreement. AGENCY CONTACT INFORMATION: All white paper submissions and any questions of a technical nature shall be directed to the cognizant Technical Point of Contact (TPOC) as specified below (unless otherwise specified in the solicitation).</p>

	Synopsis: This Broad Agency Announcement (BAA), which sets forth technology areas of interest to the U.S. Army's Combat Capabilities Development Command (DEVCOM) Armaments Center (AC), Picatinny Arsenal, New Jersey, is issued under the paragraph 6.102(d)(2) of the Federal Acquisition Regulation (FAR), which provides for the competitive selection of proposals. Proposals submitted in response to this BAA and selected for award are considered to be the result of full and open competition and in full compliance with the provision of Public Law 98-369, "The Competition in Contracting Act of 1984" and subsequent amendments. Proposals and white papers putting forth new and novel ideas are sought for the research and development of technologies to fill the complete spectrum of Armaments Center technology needs throughout our product life cycles through interactive collaborations with industry and academia, the Government expects to advance the development and maturation of areas of technology as applied to armament and associated systems. Proposals and white papers shall be evaluated only if they are for scientific study and experimentation directed toward advancing the state of the art or increasing knowledge and understanding within the Armaments Center's technical community.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	Action Medical Research and Action for A-T invite applications for translational medical research projects that have the potential to treat or enable medical interventions for Ataxia Telangiectasia (A-T) in childhood. Projects must be led by research-active professionals based at universities, hospitals or research institutes in any country. The call is focused on child health, with interventions being proposed targeting babies, children and young people with A-T. The fund aims to support high-quality projects for up to three years duration, providing a maximum of £250,000 per project. It is anticipated that four to five projects will be funded through this call.

	Deadline Dates (ALL)	02-Mar-2026			
	Synopsis	The American Neurotology Society (ANS) Research Grants encourage and support academic research in sciences related to the investigation of otology and neurotology. Appropriate areas of research include diagnosis, management, and pathogenesis of diseases of the ear and/or skull base. Grants that focus on addressing clinical gaps are especially encouraged. Grants may involve cell/molecular studies, animal research, or human subjects research. The maximum award request is \$25,000 per year (US dollars) and is annually renewable on a competitive basis.

During the mandatory summer workshop, participants are matched with faculty members and small groups, which provide intensive exposure to mentorship and networking resources. Each day is divided into didactic sessions and small group meetings, with mornings dedicated to lectures on patient-oriented clinical research methodology and related topics. In the afternoons, participants meet with their small groups, workshop mentors, and other faculty, including biostatisticians, to work on protocol development. Informal presentations by leaders in hematology clinical research take place in the evenings. Throughout the week, participants develop their own proposed patient-oriented clinical research projects, refining and revising their plans through interaction with faculty and peers.</p>

	Deadline Dates (ALL)	05-Mar-2026			
	Synopsis	The California Breast Cancer Research Program (CBCRP) will provide support for speculative, exploratory, high-risk/high-reward projects with a primary focus on breast cancer. Applications for this award type should challenge existing paradigms, represent a new direction for the PI, and encourage innovation by the incorporation of techniques and approaches not yet well represented in mainstream breast cancer research. CBCRP encourages researchers to attempt breakthroughs that, if successful, could be leveraged into more substantial funding. Both established researchers and new investigators are welcome to apply.

	Synopsis	This funding opportunity will catalyze discovery in digital health, advance pivotal research, and inform applications or interventions relevant to CIHR-IMHA's broad mandate areas. This funding opportunity also seeks to benefit the continued integration of technology into healthcare in Canada. This funding opportunity will support projects relevant to the following research areas: Indigenous Health Research: Indigenous Health Research is defined as any field or discipline related to health and/or wellness that is conducted by, grounded in, or engaged with, First Nations, Inuit or Métis communities, societies or individuals and their wisdom, cultures, experiences, or knowledge systems, as expressed in their dynamic forms, past and present which is aligned with the TCPS 2-Chapter 9: Research Involving the First Nations, Inuit, and Métis Peoples of Canada. Early and mid-career researchers: An early career researcher (ECR) is a researcher within five years of the date of their first independent research-related appointment. A mid-career researcher is a researcher who, at the time of application, has assumed his/her independent research position 5-15 years ago.

	Synopsis	The Foundation has long recognized the difficulty in training new thought leaders in clinical, translational, and basic science. Funding and support for endocrine fellows remains quite limited both during their training and as they move into nascent academic careers. Our Fellows Research Grant Program is an integral part of what we do to support fellows and junior faculty investigators. Obtaining new grants is often dependent on prior grant recipient history and the ability of fellows to successfully initiate new research projects. This is critical for further long-term career development.

	Deadline Dates (ALL)	17-Mar-2026			
	Synopsis	The Heart and Stroke Foundation of Canada ("Heart & Stroke") is supporting the development of a National Action Plan for Cardiac Arrest to increase survival and optimize quality of life of those impacted (directly and indirectly) by cardiac arrest. As a key pillar of the action plan, Heart & Stroke together with the Canadian Institutes of Health Research Institute of Circulatory and Respiratory Health ("CIHR-ICRH") and Brain Canada Foundation ("Brain Canada") are collectively committing \$5,000,000 CAD over five (5) years to fund the Cardiac Arrest Research Team Grants funding opportunity. This funding opportunity is coordinated with the American Heart Association ("AHA") Cardiac Arrest funding opportunity to encourage collaboration and partnership of funded Cardiac Arrest Research Teams ("Research Teams") to leverage, amplify and coordinate research activities where appropriate. Every year, approximately 60,000 people in Canada will experience an out-of-hospital cardiac arrest (OHCA). The survival rate for OHCA is around 10%. In other words, 9 out of 10 people who experience an OHCA will not survive. Data for in-hospital cardiac arrest (IHCA) is limited; however, it is believed that a similar number of individuals are affected

	Synopsis	The New Jersey Commission on Cancer Research (NJCCR) offers the Research Bridge Grant Award to support two-year research projects up to a maximum of \$200,000. This award is designed to enhance cancer-related research at New Jersey institutions by providing funding to motivated and productive investigators who anticipate a short-term interruption in funding for research projects focused on cancer prevention, diagnosis, treatment, and survivorship. Applicants must have a full-time faculty appointment (Tenure Track or Non-Tenure-Track Faculty).

program is a peer-reviewed competition designed to help launch the careers of outstanding researchers entering their first academic appointment phase. These grants support Manitoba's early-career researchers (ECRs) to achieve the research productivity and track record necessary for obtaining longer-term, more sustainable funding. This investment is integral to supporting local talent development and a strong Manitoba research ecosystem.

open to universities and non-profits globally. Schmidt Sciences' Humanities and Artificial Intelligence Virtual Institute (HAVI) is a philanthropic initiative which intends to spur innovative, domain-specific research outcomes from humanities scholars through the integral application of AI-inspired tools and techniques as well as produce insights from the humanities that will advance the development of AI. Current AI models struggle with multilingual contexts, multimodal datasets, and the nuances of historical and cultural diversity, hindering their application in humanities disciplines. HAVI aims to address these limitations by fostering interdisciplinary collaborations between AI and humanities researchers, focused on developing and applying new AI techniques to answer complex and compelling humanities research questions. The sponsor's approach expects humanities scholars to play integral roles in AI development, while AI researchers gain deeper understanding of data, models, and problem spaces from humanistic perspectives. This collaborative framework aims to produce breakthrough results that advance both AI capabilities and humanities scholarship.

	Synopsis	The Spotlight program brings WA's health and medical research and innovation sector together around one bold, uniquely Western Australian challenge each year, to drive lasting solutions with multi-year investment, cross-sector collaboration, and strong community engagement. Each round will centre on a focus area identified as a strategic priority for WA. The Spotlight 2025-26 focus area is Rheumatic Heart Disease (RHD). Activities to address RHD include a focus on prevention, diagnosis, control and treatment of Group A Streptococcus infection, ARF and RHD with consideration of the impacts of climate change, and integration of new technologies such as digital systems and genomics. Research and innovation activities for RHD should amplify and elevate the leadership role of Aboriginal people. Spotlight partners should include Aboriginal health organisations, Aboriginal local community(s), consumers, primary care, RHD experts/clinicians and government agencies. Up to \$25 million will be provided on a competitive basis to one applicant supported by a Spotlight Coordinating Team, in 2-stages.
