

**Funding Opportunities Monthly Edition  
July 2026 Due Dates**

## Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in July 2026.

The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

The Development Office offers assistance with many not for profit opportunities. Please contact the Development Office's Corporate and Foundation Relations team at [DevCorpFound@mountsinai.org](mailto:DevCorpFound@mountsinai.org) / 212-659-8500 below for assistance or questions.

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
121826	<a href="#">Revision Applications for Validation of Biomarker Assays Developed Through NIH-Supported Research Grants (R01 Clinical Trial Not Allowed)</a>	National Cancer Institute/NIH/DHHS	PAR-24-304	10-Jul-2026	450,000 USD
	<p>Contact Name   Sumana Dey, Ph.D.</p> <p>Contact Telephone   240-276-5748</p> <p>Contact Email   <a href="mailto:sumana.dey@nih.gov">sumana.dey@nih.gov</a></p> <p>Sponsor Website  </p> <p>Program URL   <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL)   10-Jul-2026 , 14-Oct-2026</p> <p>Synopsis   Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) encourages revision applications (formerly called "competing revisions") from currently funded NCI R01 research projects. The applicants should propose projects that are expected to accelerate the pace of translation of NCI-supported methods/assays/technologies (referred to as "assays") to the clinic. Specifically, the focus of applications submitted in response to this NOFO should be on the adaption and clinical validation of molecular/cellular/imaging markers (referred to as "markers" or "biomarkers") for cancer detection, diagnosis, prognosis, monitoring, and prediction of response in treatment, as well as markers for cancer prevention and control. Applications may support the acquisition of well-annotated specimens from NCI-supported or other clinical trials or observational cohorts/consortia for the purpose of clinical validation of the assay. Research projects proposed in response to this NOFO encourage multidisciplinary interaction among scientific investigators, assay developers, clinicians, statisticians, and clinical laboratory staff. Clinical laboratory scientist(s) and statistical experts are highly encouraged to comprise integral parts of the application. This NOFO is not intended to support early-stage development of technology or the conduct of clinical trials, but rather the adaption and validation of assays to the point where they could be integrated into clinical trials as investigational assays/tools/devices.</p>

Deadline Dates (ALL) 23-May-2026 [Optional][LOI/Pre-App], 22-Jun-2026 , 14-Jul-2026

Synopsis This notice of funding opportunity (NOFO) encourages applications for investigator-initiated multisite clinical trials (e.g., efficacy, effectiveness, or pragmatic trials) to study the effects of complementary and integrative health approaches with physical and/or psychological therapeutic inputs (often called mind and body interventions), and/or multicomponent interventions that include physical, psychological, and/or nutritional approaches in NCCIH-designated areas of high research priority. Clinical coordinating centers (CCC) should develop and implement the proposed fully powered multisite clinical trial (Phase III and beyond). The objective of a CCC application is to present the scientific rationale and a comprehensive scientific and operational plan for the clinical trial. CCC applications are expected to describe plans for project management, participant recruitment and retention strategies, performance milestones, scientific conduct, and dissemination of results. CCC applications submitted under this NOFO will utilize a two-phase, milestone-driven cooperative agreement (UG3/UH3) funding mechanism. In addition, an accompanying data coordinating center (DCC) application (U24), submitted under PAR-24-087 and proposing a data analysis and data management plan for the clinical project, is required. Both a CCC application and a corresponding DCC application need to be submitted simultaneously for consideration by NCCIH. For additional information about the mission, strategic vision, and research priorities of NCCIH, applicants are encouraged to consult the NCCIH website (<https://nccih.nih.gov/about/plans>). Applicants are encouraged to contact the appropriate Scientific/Research Contact for the area of science for which they are planning to develop an application prior to submitting to this NOFO. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

Deadline Dates (ALL)	22-Jun-2026 , 14-Jul-2026
Synopsis	<p>This Notice of Funding Opportunity (NOFO), utilizing the U24 grant funding mechanism, encourages applications for a collaborating Data Coordinating Center (DCC) application that accompanies an investigator-initiated multi-site clinical trial (Phase III and beyond) application submitted under PAR-24-312. The DCC application must be specific to the collaborating Clinical Coordinating Center (CCC) application. The objective of the DCC application is to propose a comprehensive plan that provides overall project coordination and administrative, data management, and biostatistical support for the proposed clinical trial. Both a DCC application and a corresponding CCC application need to be submitted simultaneously for consideration by NCCIH. Trials for which this NOFO applies must be relevant to the research mission of NCCIH and considered a high priority by the Center. For additional information about the mission, strategic vision, and research priorities of NCCIH, applicants are encouraged to consult the NCCIH website: (<a href="https://www.nccih.nih.gov">https://www.nccih.nih.gov</a>). Applicants are strongly encouraged to contact the appropriate Scientific/Research contact for the area of science for which they are planning to develop an application prior to submitting to this NOFO. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).</p>

submitted under this NOFO are expected to propose a remotely delivered and conducted fully powered clinical trial with no in-person contact between research staff and study participants and may utilize mHealth tools or technologies. Applicants must provide justification for the remotely delivered approach and provide preliminary data on the feasibility and safety of the approach, along with evidence that the intervention has promise of clinical benefit. Applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact for the area of science for which they are planning to develop an application prior to submitting to this NOFO. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.

Deadline Dates (ALL)	22-Jun-2026 , 14-Jul-2026 , 20-Oct-2026 , 17-Nov-2026

Synopsis This notice of funding opportunity (NOFO) invites applications for investigator-initiated clinical trials of complementary and integrative health approaches with physical and/or psychological therapeutic inputs (often called mind and body interventions) in NCCIH-designated areas of high research priority. Applications submitted under this NOFO are expected to propose a multisite feasibility clinical trial that will provide new information that is scientifically necessary for the planning and conduct of a subsequent clinical efficacy or effectiveness study, pragmatic trial, or dissemination and implementation trial within NCCIH’s mission. NCCIH expects that applications to this NOFO will describe the planned future clinical trial and in so doing demonstrate that the proposed (R01) research is scientifically necessary to design or plan the subsequent fully powered, full-scale clinical trial. Under this R01, the data collected should be used to fill gaps in scientific knowledge, including, but not limited to the following: assessing whether the intervention can be delivered with fidelity across sites; demonstrating feasibility of recruitment, accrual,

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

and randomization of participants across sites; demonstrating participant adherence to the intervention, as well as retention of participants throughout the study across sites; refining and assessing the feasibility of protocolized multimodal interventions, and/or demonstrating feasibility of data collection across sites in preparation for a future fully powered, multisite efficacy or effectiveness trial. The need for multisite feasibility trials is expected to be justified by sufficient preliminary data from previous single site feasibility or acceptability trial(s) or the published literature. The data collected should be used to fill gaps in scientific knowledge and be necessary to develop a competitive fully powered multisite clinical trial that has the potential to make a significant impact on public health. Prior to submitting to this NOFO, applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact person for the science area of the planned application. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.

123152	<a href="#">Feasibility Clinical Trials of Mind and Body Interventions for NCCIH High Priority Research Topics (R34 Clinical Trial Required)</a>	National Center for Complementary and Integrative Health/NIH/DHHS	PAR-25-274	22-Jun-2026	450,000 USD

Deadline Dates (ALL)	22-Jun-2026 , 13-Jul-2026 , 20-Oct-2026 , 17-Nov-2026

**Synopsis** The goal of this notice of funding opportunity (NOFO) is to support feasibility trials of complementary and integrative health approaches with physical and/or psychological therapeutic inputs (often called mind and body interventions) for conditions that have been identified by NCCIH as high-priority research topics. This funding opportunity is intended to support feasibility clinical trials that provide new information that are scientifically necessary for the planning and conduct of a subsequent clinical efficacy or effectiveness study, pragmatic trial, or dissemination and implementation trial within NCCIH’s mission. NCCIH expects that applications to this NOFO will describe the planned future clinical trial and in so doing demonstrate that the proposed (R34) research is scientifically necessary to design or plan the subsequent competitive

---------	---------------	--------------	----------------	---------------	----------------

full-scale clinical trial. Under this R34, the data collected should be used to fill gaps in scientific knowledge necessary to develop a competitive full-scale clinical trial, including, but not limited to the following: examining feasibility and acceptability of interventions lacking published data; tailoring or adapting the content or structure of an intervention to a specific population, modality, or setting; refining the intervention to determine the most appropriate frequency or duration; determining feasibility of recruitment, retention, and data collection procedures; refining and assessing the feasibility of protocolized multi-component interventions; or examining acceptability and adherence of control conditions. The subsequent full-scale clinical trial should have the potential to make a significant impact on public health. Prior to submitting to this NOFO, applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact person for the science area of the planned application. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.

Synopsis | The National Human Genome Research Institute (NHGRI) seeks to broaden the types of knowledge, skills, expertise, experience, and perspectives brought to bear in research addressing the ethical, legal, and social implications (ELSI) of advances in human genetics or genomics. The Building Partnerships and Broadening Perspectives to Advance Ethical, Legal, and Social Implications (ELSI) Research (BBAER) Program will support: 1) transdisciplinary ELSI research addressing timely, complex, and understudied topics associated with advances in human genetics and genomics, 2) the establishment of ELSI research teams that include partnerships with relevant communities affected by and with an interest in the proposed research, 3) research capacity building to develop, conduct, and sustain ELSI research, and 4) workforce development opportunities for early career scholars, research team members, and other BBAER project staff. This Notice of Funding Opportunity (NOFO) is for a limited competition that solicits UM1 applications from domestic organizations located in the United States and its territories that received less than \$30 million per year in total NIH funding for the past three fiscal years. These organizations are underrepresented among those receiving NHGRI funding for ELSI research.

 Deadline Dates (ALL) 02-Jul-2026 , 02-Nov-2026 , 04-Mar-2027

Synopsis  
 This Notice of Funding Opportunity Announcement (NOFO) solicits cooperative agreement (UG3/UH3) applications for implementation of investigator-initiated, single or multi-site, interventional clinical trials (all phases). Investigators who have completed all necessary preparation (e.g., the trial design, protocol synopsis, data analysis plan, etc.) through other means may apply for a NIAMS UG3/UH3. The UG3 phase is designed to allow the investigators to prepare the final aspects needed to start the trial, (e.g., establishing the single IRB (sIRB), contracts and reliance agreements with sites, hiring of staff, etc.). Transition to the UH3 phase to begin the trial is dependent upon completion of the UG3 milestones proposed by the investigator and approved by NIAMS. UG3 projects that meet their milestones will be administratively considered by NIAMS and prioritized for transition to the UH3 phase. NIAMS expects trials to be hypothesis-driven and have the potential for high clinical impact within the research mission of NIAMS.

	Sponsor Website				
	Program URL	<a href="#">Link to program URL</a>			
	Deadline Dates (ALL)	02-Jul-2026 , 02-Nov-2026			
	Synopsis	<p>The purpose of this Notice of Funding Opportunity (NOFO) is to encourage Research Project Grant (R01) applications to pursue clinical observational (CO) studies to obtain data necessary for designing clinical studies for musculoskeletal, rheumatic, or skin diseases or conditions. Research data from observational studies supported by this NOFO can enhance clinical study design by providing essential information about disease symptoms, stages, and timing of disease progression; comorbid conditions; availability of potential research participants; and outcomes that are important to patients. They also can facilitate efforts to develop and/or validate objective biomarkers or subjective outcome measures for use in a future clinical study. A future clinical study may include a clinical trial or an observational study. Applicants to this NOFO are encouraged to propose studies that address significant obstacles or questions in the design of a clinical project, such as determining the appropriate primary or secondary outcome measures or identifying the stages of disease during which patients are most likely to respond to an intervention. Only observational studies will be supported through this NOFO.</p>			
126762	<a href="#">Advancement and Innovation in Measurement of Language Development and Predictors (R01 Clinical Trial Not Allowed)</a>	National Institute of Child Health and Human Development/NIH/DHHS	PAR-25-112	05-Jun-2026	Not Specified

Synopsis	The purpose of this notice of funding opportunity (NOFO) is to encourage community-engaged research that broadens the conceptualization of qualities of the environment that can support language development in children and that focuses on the development of novel measures of children’s language development. The overall goal is to build the number of strengths-focused, culturally and linguistically responsive, and generalizable tools to further our understanding of children’s language development and/or impairment, and predictors thereof. This NOFO requires a Community Engagement (CE) Plan, which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a CE Plan will be considered incomplete and will be withdrawn. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

Synopsis	This Notice of Funding Opportunity (NOFO) will accept applications for competing renewal or competitive revision of ongoing clinical trials supported by the National Institute of Dental and Craniofacial Research (NIDCR). Extension of an ongoing clinical trial through a competing renewal application will be supported when there is need for additional time to complete the trial or when an extended period of follow-up is well justified to assess longer term outcomes. Competitive revisions will be supported when there is compelling justification for modifying the scope of the ongoing clinical trial. NIDCR strongly encourages applicants to contact the Scientific/Research contact assigned to the ongoing clinical trial for which they are planning a competing renewal or competitive revision prior to submitting an application to this NOFO.

Synopsis | This Notice of Funding Opportunity (NOFO) from the NIH Brain Research through Advancing Innovative Neurotechnologies (BRAIN) Initiative is intended to support dissemination facilities for scaled-up production and distribution of a specific set of brain cell type-specific access reagents to study circuit function. Production and Distribution Facilities will be supported to disseminate hundreds of reagents specifically from Reagent Resource for Design and Development projects developed under RFA-MH-25-100. This NOFO will support facilities to interface with these specific reagent development projects, scale up reagent production, disseminate reagents broadly, and coordinate reagent data distribution. The types of reagents to be produced and distributed could include but are not limited to viral vectors, nucleic acid constructs, and nanoparticles designed for selective access to hundreds of brain cell types. Such reagents will enable neuroscientists to probe circuit function with high precision in experimental animals and ex vivo human tissue and cells. Facilities are needed to contribute to the production and distribution of reagents broadly to neuroscience researchers. This NOFO is part of the BRAIN Initiative Armamentarium project, whose overall goal is to generate tools to specifically access, manipulate, and monitor brain cell types across multiple vertebrate species. This NOFO will foster close interaction between technologists, disseminators, and neurobiologists in a research consortium including investigators funded by other Armamentarium NOFOs. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn.

Deadline Dates (ALL)	15-Jun-2026 [Optional][LOI/Pre-App], 14-Jul-2026
Synopsis	<p>The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that complement and/or enhance the training of a workforce to meet the nation’s biomedical, behavioral and clinical research needs. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on: Courses for Skills Development Research Experiences The purpose of this funding opportunity announcement is to encourage applications for the initiation or continuation of nationally available neuroscience research education programs that will significantly advance the mission of NINDS. The primary focus of programs submitted under this FOA should be on intensive hands-on experience that will provide research experience, an in-depth understanding of techniques, analytic approaches and theory, and expertise that is only possible from a nationally organized program. Within the context of gaining expertise primarily through hands-on experience, programs must also include immersive coursework and expert discussion when appropriate. Programs appropriate for this NOFO must include a nationwide recruitment process to encourage applications from prospective participants and an established application and selection process.</p>

to accelerate the development of diverse biotherapeutic modalities — including but not limited to antibodies, peptides, proteins, oligonucleotides, gene therapies, cell therapies, and other emerging therapeutic modalities — for the treatment of nervous and neuromuscular system disorders. The Blueprint Neurotherapeutics Network for Biologics (BPN Biologics) program provides support for biologics-based therapy discovery and development activities from lead optimization through first-in-human clinical trials. This NOFO is a phased, milestone-driven cooperative agreement that involves close collaboration and regular interactions with NIH program staff. Awarded projects will receive funding for investigator-led research activities to be conducted in their own laboratories and assistance from NIH-funded consultants with industry and regulatory experience. Participants may also augment their project through collaboration with NIH-funded contract research organizations that specialize in manufacturing, nonclinical studies, and early phase clinical trials. Recipient institutions will retain their rights to existing intellectual property and are assigned rights to any new IP developed within the program.

 Deadline Dates (ALL) 15-Jul-2026 , 18-Aug-2026

Synopsis The Blueprint Neurotherapeutics Network (BPN) invites applications from neuroscience investigators seeking support to advance their small molecule drug discovery and development projects into the clinic. Participants in the BPN are responsible for conducting all studies that involve disease- or target-specific assays, models, and other research tools and receive funding for all activities to be conducted in their own laboratories. In addition, applicants will collaborate with NIH-funded consultants and can augment their project with NIH contract research organizations (CROs) that specialize in medicinal chemistry, pharmacokinetics, toxicology, formulations development, chemical synthesis including under Good Manufacturing Practices (GMP), and Phase I clinical testing. Projects can enter either at the Discovery or the Development stage. In the Discovery phase the goal is to characterize and optimize promising hit

compounds using medicinal chemistry to establish structure activity relationships (SAR) and structure property relationships (SPR) including in vitro and in vivo properties such as metabolism, selectivity, toxicity, etc. As projects enter or advance to the Development stage the goal is to advance a single development candidate through Investigational New Drug (IND)-enabling toxicology studies and phase I clinical testing. Projects can enter the program at the Development stage and progress in a shorter period to IND enabling toxicology studies and phase I clinical testing. BPN recipient Institutions retain their assignment of intellectual property (IP) rights and gain assignment of IP rights from the BPN contractors and consultants (and thereby control the patent prosecution and licensing negotiations) for drug candidates developed in this program.

	Synopsis	<p>The purpose of the National Institute on Drug Abuse (NIDA) Animal Genetics Program is to identify genetic, genomic, and molecular (epi)genetic variants that underlie neural and behavioral processes and phenotypes relevant to SUD risk, the SUD trajectory and SUD comorbidities. This opportunity supports research that links genetic, genomic and molecular mechanisms to neural circuit function and behavior. Applications may seek to identify any type of genomic and/or epigenomic variants that contribute to the genetic architecture of addiction, including single nucleotide variants (SNVs), indels, large and small structural variants, and all types of mobile DNA. NIDA encourages applications that take genomics, multi-omics, data-based, and/or artificial intelligence/machine learning approaches that integrate multi-level 'omics data, delineate gene networks, and/or uncover the function of known or newly discovered genetic or epigenetic variants. Other areas of interest include variant identification at the circuit level and the application of neuroscience to variant identification studies in tissues and cells. NIDA expects these studies to uncover novel mechanisms that contribute to various stages across the SUD trajectory and inform future studies about potential targets and therapeutic strategies for addiction. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).</p>

	Synopsis	<p>CAREER: The Faculty Early Career Development (CAREER) Program is a Foundation-wide activity that offers the National Science Foundation's most prestigious awards in support of early-career faculty who have the potential to serve as academic role models in research and education and to lead advances in the mission of their department or organization. Activities pursued by early-career faculty should build a firm foundation for a lifetime of leadership in integrating education and research. NSF encourages submission of CAREER proposals from early-career faculty at all CAREER-eligible organizations and especially encourages women, members of underrepresented minority groups, and persons with disabilities to apply. PECASE: Each year NSF selects nominees for the Presidential Early Career Awards for Scientists and Engineers (PECASE) from among the most meritorious recent CAREER awardees.</p>

Americans. Unlike initiatives centered around K - 16 education, AI-Ready America additionally reaches businesses, public-serving organizations, and individuals, among others, expanding access to AI knowledge, tools, and resources. The program also emphasizes practical implementation through hands-on assistance and workforce upskilling, including experiential learning such as internships, project-based work, and apprenticeships, to ensure stakeholders can effectively apply and innovate with AI. The program supports: State/Territory Coordination Hubs (Coordination Hubs) - one in every state, the District of Columbia (DC), or territory in the United States - connecting partners, strengthening planning and deployment, and rapidly scaling approaches; A National Coordination Lead (National Lead) - facilitating collaboration and knowledge sharing among Coordination Hubs, coordinating priority economic sectors, and informing national AI strategies; and AI-Ready Catalyst Award Competitions - a series of topic-driven competitions issued over the course of the program to pilot and scale innovative approaches that address critical national AI readiness needs. This funding opportunity focuses on Coordination Hubs. The National Lead will be funded as an Other Transaction (OT) offered through an Other Transaction Agreement Solutions Offering. AI-Ready Catalyst Award Competitions will be announced through an NSF-approved mechanism, with proposals submitted according to the instructions provided at the time of announcement.

Synopsis	<p>Description Pilot and Aircrew Curriculum Revision and Maintenance II (PACRM II) Multiple Award Contract (MAC) Notice of Tentative Acquisition Strategy and Draft Scope attached. 26 August 2025. *****The Department of the Navy, Naval Air Warfare Center Training Systems Division (NAWCTSD), Orlando, FL, seeks potential sources to provide Pilot and Aircrew Curriculum Revision and Maintenance services for Navy and Marine Corps? Training Programs. This acquisition is necessary to ensure continued currency and accuracy of various training program?s curriculum and electronic classroom systems via a streamlined acquisition process. The PACRM supports various Navy and non-Navy customers. The predecessor approach in satisfying the requirement was the PACRM Multiple Award Contract (MAC) Indefinite Delivery / Indefinite Quantity (ID/IQ) Small Business Set-aside Contract. The PACRM MAC II approach allows streamlined, quick response procurements to meet the long-term needs of Naval and Marine Corps training commands and other Government training support activities. The PACRM services are intended to support various contract vehicle and administrative support for the revision and maintenance of Pilot, Aircrew, and Technical Training curriculum, to include support of electronic classrooms, network systems, and Foreign Military Sales (FMS) programs in support of various platforms. 0001-update time from Response time in system from AM to PM.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	The Alzheimer's Association Health Services Research in Alzheimer's Disease and Related Disorders (HSR-ADRD) Funding Program seeks to support research that strengthens dementia detection, diagnosis, and post-diagnostic care pathways along the care continuum. Projects may address a range of health services research questions, including, but not limited to, studies examining barriers and solutions to timely access, quality, and care coordination. By supporting rigorous and innovative research, this program aims to generate actionable evidence to improve person-centered, coordinated, and equitable brain health and dementia care. Each HSR-ADRD award is limited to a total of \$250,000 U.S. (direct and indirect costs) for a duration of up to two years (awards should be a minimum one year).

	Synopsis	The AATS Thoracic Surgical Oncology Research Training Fellowship Program is designed to provide an industry-academic clinical practicum with a unique opportunity for thoracic surgeons to train in clinical trial design, writing, endpoint selection and data interpretation among other important aspects of being a clinical trialist. Each fellowship provides \$100,000 over 12 months for the fellow to work on site at the facility of one of AATS's pharmaceutical industry partners. Applicants must plan to spend 9-12 months onsite: however, time spent at the industry site over this period may be flexible and will be determined upon mutual agreement between the

Synopsis	The mission of the California Institute for Regenerative Medicine (CIRM) is to accelerate world class science to deliver transformative regenerative medicine treatments in an equitable manner to a diverse California and world. CIRM's CLIN2 funding program will support the completion of phase 1, 2, or 3 clinical trials- including pivotal trials- for regenerative medicine therapies that address significant unmet medical needs and have the potential to provide transformative benefits to patients, their families, and the healthcare system. Through this program, CIRM creates funding opportunities for regenerative medicine clinical research that otherwise do not exist or are of limited scope. CIRM will devote internal resources and leverage a network of world-class subject matter experts to help ensure that funded projects have a comprehensive clinical development strategy aimed at obtaining marketing approval with a well-developed plan for ensuring access and affordability. CIRM anticipates funding between 9-16 CLIN2 awards in fiscal year 2025-2026, contingent on the number of applications at each funding level that are recommended. The award amount ranges from \$8 million to \$15 million and is dependent on the stage of the clinical trial and the for-profit versus non-profit status of the

Synopsis

The Cancer Prevention and Research Institute of Texas (CPRIT) is accepting applications for the Texas New Technologies Company Awards for Product Development Research to support the ongoing research and development of new and emerging technologies for the detection, diagnosis, prognosis, monitoring, or treatment of cancer. CPRIT created this RFA to fund new and emerging technology projects that do not easily fit into any of the three other CPRIT Product Development Research RFAs. Proposals may include, but are not limited to, bioinformatics, artificial intelligence, production of radionuclides or their precursors, manufacture of cell-based therapies, processes to improve the quality of the samples used for cancer research or clinical care, and biomanufacturing of therapeutics.

treatment strategies within OMPT. They will have strong potential for clinical translation and meaningful contributions to strengthen evidence-based OMPT practice and to influence clinical decision - making, implementation, or future research directions. For the purposes of this grant, OMPT is defined as a subspecialty of physical therapy featuring a systematic, active approach for the management of a broad spectrum of physical disorders. Based on a patient - centered advanced clinical reasoning model taught in the American Academy of Orthopaedic Manual Physical Therapist's fellowship training, OMPT has key distinguishing characteristics that include expertise in hands - on iterative examination and treatment strategies inclusive of thrust and non - thrust manipulation. Essential to OMPT is a focus on continuous reassessment throughout all aspects of care, the synergistic application of carefully designed and dosed exercise, and a patient - centered long - term mindset driven by available scientific and clinical evidence and the biopsychosocial framework of each individual patient. All the funded research must be carried out in the United States. The grant will award \$40,000 for a period of either one or two years.

	Synopsis	The National Comprehensive Cancer Network and Pfizer Global Medical Grants (Pfizer) are collaborating to offer a new grant opportunity seeking proposals for investigator-initiated research to improve mPCa care. Pfizer is providing \$1 Million in funding to support quality improvement studies to advance health care quality, the delivery of quality care, and improve health care provider performance in mPCa care. The Grantor will serve as the funding organization. Grants are available to all investigators from institutions within the United States. There is a funding cap of \$250,000 per study. Exceptional studies with budgets above this amount will be considered based on scientific merit and must contain a robust justification.

This program is supported by the Japan Foundation. At the core of the Next Gen Japan Program is the idea that scholarly engagement and collaboration by students and scholars across disciplines, the boundaries of the nation-state, and cultures are central to effectively addressing the pressing concerns facing societies today. The Next Gen Japan Visiting Professor Grants provides Japan-based faculty who research Japanese society an opportunity for intellectual engagement with US faculty, students, and local communities. It further provides the professor with professional development experience in presenting their work in English and conducting their own research in the US. Hosting institutions, likewise, will gain access to international scholars and exposure to research from outside the United States.

Synopsis	This program has been established to promote, nurture and amplify scientific discovery and innovation in Western New York and the region. The WNYBC Discovery and Innovation Award will support basic, translational, and/or clinical research projects that will improve health outcomes, health equity, and/or preventing complications of hemophilia and/or hemostatic or thrombotic disorders.
