

**Funding Opportunities Monthly Edition
August 2026 Due Dates**

Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in Aug 2026.

The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

The Development Office offers assistance with many not for profit opportunities. Please contact the Development Office's Corporate and Foundation Relations team at DevCorpFound@mountsinai.org / 212-659-8500 below for assistance or questions.

Deadline Dates (ALL)	18-Jun-2026 , 21-Aug-2026 , 21-Oct-2026 , 23-Dec-2026 , 11-Feb-2027 , 23-Apr-2027 , 17-Jun-2027 , 23-Aug-2027 , 21-Oct-2027 , 23-Dec-2027
Synopsis	<p>This Funding Opportunity Announcement (FOA) solicits grant applications to further develop enabling technologies and transformative platforms to catalyze next-generation predictive, diagnostic and therapeutic products to address heart, lung, blood, and sleep (HLBS)-related disorders and diseases. This FOA solicits R33 applications where major feasibility gaps for the enabling technology or transformative platform have already been overcome, as demonstrated with supportive preliminary data, but still requires further development and rigorous validation to encourage downstream demonstration, utilization and adoption. Well-suited applications must offer the potential to accelerate and/or transform the areas of early detection and screening, model development, clinical diagnosis, treatment, control, prevention or epidemiology, while addressing issues associated with HLBS-related diseases and disorders. Projects proposing application of existing technologies where the novelty resides in the biological or clinical target/question being pursued are not appropriate for this solicitation. Applications considered nonresponsive to the FOA will not be reviewed. This FOA is part of a suite of Catalyze innovation grants to advance projects to the point where they can meet the entry criteria for the NHLBI Catalyze Product Definition or Preclinical FOAs.</p>

127983	NICHD Resource Program Grants in Bioinformatics (P41 Clinical Trial Not Allowed)	National Institute of Child Health and Human Development/NIH/DHHS	PAR-24-301	26-Aug-2026 [Optional][LOI/Pre-App]	8,750,000 USD

Synopsis	The purpose of this Notice of Funding Opportunity (NOFO) is to support the continued operation, maintenance, and dissemination of unique knowledge, data, and/or bioinformatics resources that are of major importance to the research community using animal models of embryonic developmental processes. These grants will support ongoing development and enhancement of the resources, user training and services, provision of community generated data storage and curation, wide dissemination of the tools and/or resources, and expansion of interoperability with other NIH bioinformatics resources.

124852	Developmental AIDS Research Centers on Mental Health and HIV/AIDS (P30 Clinical Trial Optional)	National Institute of Mental Health/NIH/DHHS	PAR-24-164	26-Jul-2026 [Optional][LOI/Pre-App]	3,000,000 USD

Synopsis	The National Institute of Mental Health (NIMH) Division of AIDS Research (DAR) encourages applications for Center Core grants (P30) to support Developmental HIV/AIDS Research Centers (D-ARC). The D-ARC is intended to provide infrastructure support that facilitates the development of high impact science in HIV/AIDS and mental health that is relevant to the NIMH mission. This Funding Opportunity Announcement (FOA) intends to support innovative, interdisciplinary research in several areas, including basic, NeuroHIV, behavioral and social, integrated biobehavioral, applied, clinical, translational, and implementation science. The intent of D-ARC support is that the proposed core activities will allow the D-ARC to compete successfully for a full NIMH AIDS Research Center (ARC) after the D-ARC

of a workforce to meet the nation’s biomedical, behavioral and clinical research needs. To accomplish the stated overarching goal, this NOFO will support educational activities with a primary focus on: Research Experiences; Mentoring Activities. Both research experiences and mentoring activities are required. These Research Education Mentoring Programs are expected to enhance the professional development of the mentees and foster career trajectories towards independent research to reduce the incidence of HIV worldwide and to decrease the burden of living with HIV. The terms participant and mentee are used throughout this NOFO to refer to individuals who are enrolled in the research education program.

Synopsis	<p>This notice of funding opportunity (NOFO) aims to encourage research grant applications for initial translational efforts that will enable a drug discovery program for novel, non-opioid, and non-addictive treatments for pain. The program provides funding to develop and validate assays to support a distinct testing funnel and conduct screening efforts to identify and characterize potential therapeutic agents including small molecules, biologics, and natural products.</p> <p>Preliminary in vivo pharmacokinetic, pharmacodynamic, and efficacy studies may also be supported. The goal of this NOFO is to advance projects to the point where they meet the entry criteria for the Pain Therapeutics Development Program or other later-stage translational programs. This NOFO is part of the NIH Helping to End Addiction Long Term (HEAL) initiative to accelerate the discovery and preclinical development of safe and effective therapeutics to treat pain with little or no addiction liability.</p>

 Deadline Dates (ALL) 15-Jul-2026 , 18-Aug-2026

Synopsis
 The Blueprint Neurotherapeutics Network (BPN) invites applications from neuroscience investigators seeking support to advance their small molecule drug discovery and development projects into the clinic. Participants in the BPN are responsible for conducting all studies that involve disease- or target-specific assays, models, and other research tools and receive funding for all activities to be conducted in their own laboratories. In addition, applicants will collaborate with NIH-funded consultants and can augment their project with NIH contract research organizations (CROs) that specialize in medicinal chemistry, pharmacokinetics, toxicology, formulations development, chemical synthesis including under Good Manufacturing Practices (GMP), and Phase I clinical testing. Projects can enter either at the Discovery or the Development stage. In the Discovery phase the goal is to characterize and optimize promising hit compounds using medicinal chemistry to establish structure activity relationships (SAR) and structure property relationships (SPR) including in vitro and in vivo properties such as metabolism, selectivity, toxicity, etc. As projects enter or advance to the Development stage the goal is to advance a single development candidate through Investigational New Drug (IND)-enabling toxicology studies and phase I clinical testing. Projects can enter the program at the Development stage and progress in a shorter period to IND enabling toxicology studies and phase I clinical testing. BPN recipient Institutions retain their assignment of intellectual property (IP) rights and gain assignment of IP rights from the BPN contractors and consultants (and thereby control the patent prosecution and licensing negotiations) for drug candidates developed in this program.

129925	NIA Postdoctoral Fellowship Award to Promote Broad Participation in Translational Research for AD/ADRD (F32 Clinical Trial Not Allowed)	National Institute on Aging/NIH/DHHS	PAR-24-332	08-Aug-2026	Not Specified

Deadline Dates (ALL) | 08-Aug-2026 , 08-Dec-2026 , 08-Apr-2027 , 08-Aug-2027 , 08-Dec-2027

Synopsis | The purpose of this Notice of Funding Opportunity (NOFO) is to promote diversity in the translational research workforce for Alzheimer's disease (AD) and Alzheimer's disease-related dementias (ADRD). This postdoctoral fellowship supports research training of promising postdoctoral candidates from diverse backgrounds, and emphasizes the development of translational research skills and their application to various aspects of AD/ADRD research (from populations studies to research that can lead to new treatments and diagnostics, including all aspects of behavioral and social research). The long-term goal of this program is to develop a diverse translational workforce that can effectively participate in and/or lead a team-science, interdisciplinary approach to studies of AD/ADRD treatment, prevention, early detection, and disease management and care. This Notice of Funding Opportunity (NOFO) does not allow candidates to propose to lead an independent clinical trial, but does allow candidates to propose research experience in a clinical trial led by a sponsor or co-sponsor.

124638	Institutional Training Programs to Advance Translational Research on Alzheimer's Disease (AD) and AD-Related Dementias (T32 Clinical Trial Not Allowed)	National Institute on Aging/NIH/DHHS	PAR-25-247	26-Aug-2026 [Optional][LOI/Pre-App]	Not Specified

 Deadline Dates (ALL) | 26-Aug-2026 [Optional][LOI/Pre-App], 25-Sep-2026

Synopsis | This Notice of Funding Opportunity (NOFO) seeks to enable the development of a diverse, translational research workforce capable of participating and/or leading cross-disciplinary team science programs focused on advancing translational research for Alzheimer's disease (AD) and AD-related dementias (ADRD). This NOFO will support institutional training programs for predoctoral and postdoctoral level researchers from various educational backgrounds (i.e., basic biology, translational and clinical research, data science, and behavioral research). The program invites eligible institutions to develop interdisciplinary training programs that will provide trainees with the knowledge and skills necessary to conduct rigorous and cutting-edge basic, translational, behavioral, population-based, and clinical research for AD/ADRD. This Notice of Funding Opportunity (NOFO) does not allow appointed Trainees to lead an independent clinical trial, but does allow them to obtain research experience in a clinical trial led by a mentor or co-

---------	---------------	--------------	----------------	---------------	----------------

research. For this NOFO, clinician scientists may include (but are not limited to) physicians, clinical psychologists, social workers, and pharmacists. Scholars are expected to be supported for 3-4 years on consecutive 12-month appointments. Candidates selected for support as scholars must hold a doctorate and commit a minimum of 9 person months (equivalent to 75% of full-time professional effort) to conducting clinical research and career development activities associated with the proposed K12 program. Scholars appointed through the proposed program may serve as the lead for a NIH-defined clinical trial that fulfills the NIH requirement for a minimal risk trial. A minimal risk trial is one in which the probability and magnitude of harm or discomfort anticipated in the research are not greater in and of themselves than those ordinarily encountered in daily life or during the performance of routine physical or psychological examinations or tests. This Notice of Funding Opportunity (NOFO) allows appointment of Scholars (K12) proposing to serve as the lead investigator of an independent clinical trial; or proposing a separate ancillary clinical trial; or proposing to gain research experience in a clinical trial led by another investigator, as part of their research and career development. Applicants may review the information found on the NIH Office of Extramural Research "Clinical Trial Requirements for Grants and Contracts": <https://grants.nih.gov/policy/clinical-trials.htm> for more details about how NIH is enhancing accountability and transparency of clinical research.

129572	Cutting-Edge Basic Research Awards (CEBRA) (R21 Clinical Trial Optional)	National Institute on Drug Abuse/NIH/DHHS	PAR-25-101	05-Aug-2026	275,000 USD

Program URL	Link to program URL
Deadline Dates (ALL)	05-Aug-2026 , 10-Mar-2027 , 11-Aug-2027
Synopsis	The National Institute on Drug Abuse (NIDA) Cutting-Edge Basic Research Award (CEBRA) is designed to foster highly innovative or conceptually creative research related to the etiology, pathophysiology, prevention, or treatment of substance use disorders (SUDs). It supports high-risk and potentially high-impact research that is underrepresented or not included in NIDA's current portfolio that has the potential to transform SUD research. The proposed research should: 1. develop, and/or adapt, revolutionary techniques or methods for addiction research or that show promising future applicability to SUD research; and /or 2. test an innovative and significant hypothesis for which there are scant precedent or preliminary data and which, if confirmed, would transform current thinking.

and/or lead to new avenues for prevention, treatment and cure of HIV among people who use addictive substances. Applications submitted under this NOFO are required to have a detailed research plan, preliminary data, and a clear description of the nexus with substance use. This initiative is open to both individual researchers and research teams. It addresses basic science, epidemiologic, clinical, intervention, and implementation research related to HIV in people with substance use and substance use disorders (SUDs). The proposed research areas must align with the NIH's HIV/AIDS Research Priorities: NOT-OD-20-018: UPDATE: NIH HIV/AIDS Research Priorities and Guidelines for Determining HIV/AIDS Funding. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

NIH Funding Opportunities Due: Aug 2026

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

Deadline Dates (ALL) 07-Jul-2026 [Optional][LOI/Pre-App], 06-Aug-2026

Synopsis This Funding Opportunity Announcement (FOA) encourages joint applications for the Global Infectious Disease (GID) Research Training programs from low- and middle-income country (LMIC) and U.S. institutions. The application should propose a collaborative training program that will strengthen the capacity of a LMIC institution to conduct infectious disease research (not including HIV/AIDS). FIC will support research training programs that focus on 1) major endemic or life-threatening emerging infectious diseases, 2) neglected tropical diseases, 3) infections that frequently occur as co-infections in HIV infected individuals or 4) infections or microbiomes associated with non-communicable disease conditions of public health importance in LMICs. Advanced scientific training related to prevention, treatment or public health approaches to any technical area of basic, epidemiological, clinical, behavioral or social science health research may be supported. Research training programs should incorporate didactic, mentored research and professional development skills components to prepare individuals for sustainable careers that will have significant impact on the priority health research needs of LMICs. This Notice of Funding Opportunity (NOFO) allows appointment of Trainees (D43) proposing to serve as the lead investigator of an independent clinical trial; or proposing a separate ancillary clinical trial; or proposing to gain research experience in a clinical trial led by another investigator, as part of their research and career development.

Synopsis This Notice of Funding Opportunity (NOFO) will support students at institutions with NIH-funded institutional predoctoral dual-degree training programs. The purpose of the Kirschstein-NRSA, dual-doctoral degree, predoctoral fellowship (F30) is to enhance the integrated research and clinical training of promising predoctoral students, who are

matriculated in a combined MD/PhD or other dual-doctoral degree training program (e.g. DO/PhD, DDS/PhD, AuD/PhD, DVM/PhD, PharmD/PhD), and who intend careers as physician/clinician-scientists. Candidates must propose an integrated research and clinical training plan and a research training project in scientific health-related fields relevant to the missions of the participating NIH Institutes and Centers. The fellowship experience is expected to clearly enhance the individual's potential to develop into a productive, independent physician/clinician-scientist. This Notice of Funding Opportunity (NOFO) does not allow fellowship candidates to propose to lead an independent clinical trial, but does allow candidates to propose research experience in a clinical trial led by a sponsor or co-sponsor.

Synopsis	The purpose of the Ruth L. Kirschstein National Research Service Award (NRSA) Individual Postdoctoral (Parent F32) award is to enable promising postdoctoral students to obtain individualized, mentored research training from appropriate faculty sponsors while conducting biomedical research in scientific health-related fields relevant to the missions of the participating NIH Institutes and Centers. The proposed mentored research training must address the candidate's identified research training and career goals and enhance the candidate's potential to successfully transition to the next phase of their biomedical research career. This Notice of Funding Opportunity (NOFO) does not allow fellowship candidates to propose to lead an independent clinical trial, but does allow candidates to propose research experience in a clinical trial led by a sponsor or co-sponsor.

	Synopsis	<p>The Advanced Research Projects Agency for Health (ARPA-H) posts this funding opportunity in support of the Hearing Enhancement through ARTificially Intelligent NeurotechnoLogY (HEARING) Program. ARPA-H anticipates multiple awards with Other Transaction (OT) award types resulting from this announcement. Interested parties are invited to review the HEARING Special Notice ARPA-H-SN-26-154 and Innovative Solutions Opening (ISO) ARPA-H-SOL-26-154. Parties interested in submitting a proposal in response to the ARPA-H HEARING ISO are required (mandatory) to submit a solution summary. No awards will be made, or funding provided as a result of solution summary submissions. The Proposers' Day event will take place in Arlington, VA. The event is intended to facilitate teaming and foster a greater understanding of the HEARING Program.</p>			

135520	RFA-DC-27-003 -- Transformative Non-Invasive/Minimally Invasive Technologies for Imaging the Olfactory System Across Scales (R01 CT Optional)	National Institutes of Health/DHHS	RFA-DC-27-003	21-Aug-2026	2,500,000 USD

	Synopsis	<p>The National Institute on Deafness and Other Communication Disorders (NIDCD), with the National Institute of Biomedical Imaging and Bioengineering (NIBIB) aims to support the development and/or adaptation of transformative in vivo high-resolution/high specificity imaging of the human olfactory system. Currently, there are limited non-invasive/minimally invasive technologies available for imaging the living human peripheral and central olfactory system with high spatial and temporal resolution. Imaging the olfactory system in the laboratory and in the clinic is essential to understanding underlying biological mechanisms as well as the etiology of an olfactory disorder. Such imaging has proven challenging due to the olfactory system's unique anatomical and functional characteristics such as restricted accessibility, multiple cell types, and low signal resolution. Addressing these challenges requires multimodal approaches including leveraging existing advanced tools and technologies and developing new tools tailored for the</p>

---------	---------------	--------------	----------------	---------------	----------------

olfactory system. Recent advances in minimally invasive and non-invasive imaging technologies, such as cell specific biomarkers, fluorescence imaging, specialized endoscopes, optical and acoustic imaging, molecular imaging, and hemodynamic and diffusion imaging have the potential to transform our ability to image and investigate the peripheral and central olfactory system in the living human with superior temporal and spatial resolution and eventually improve diagnostic accuracy of olfactory disorders. Applications must leverage advanced non-invasive/minimally invasive imaging technologies to visualize peripheral (e.g., olfactory- and non-olfactory epithelium) and central olfactory (e.g., olfactory bulb) targets at a level previously unattainable. In addition, projects should engage multidisciplinary teams combining expertise in olfaction, biomedical imaging, biochemistry, bioengineering, and biophysics, as appropriate.

132685	Stephen I. Katz Early Stage Investigator Research Project Grant (R01 Basic Experimental Studies with Human Required)	National Institutes of Health/DHHS	PAR-25-323	26-Aug-2026	Not Specified

Synopsis	<p>The Stephen I. Katz Early Stage Investigator Research Project Grant supports an innovative project that represents a change in research direction for an early stage investigator (ESI) and for which no preliminary data exist. Applications submitted to this Notice of Funding Opportunity (NOFO) must not include preliminary data. Applications must include a separate attachment describing the change in research direction. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. This Parent Notice of Funding Opportunity is for basic science experimental studies involving humans, referred to in NIH Grants Policy Statement Section 4.1.3.1 as prospective basic science studies involving human participants. These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Studies conducted with specific applications toward processes or products in mind should submit under the appropriate Clinical Trials Required or Clinical Trial Optional NOFO.</p>

	Synopsis	<p>ARPA-H intends to host a hybrid Proposers Day in early June in the Washington, D.C. metro area. Additional information will be posted when it becomes available. The Intelligent Generator of Research (IGoR) program aims to eliminate longstanding inefficiencies in research and accelerate the development of effective therapies for complex diseases by creating an AI-enabled interoperable research ecosystem. IGoR would develop: 1) mechanistic disease models that encode causal biological relationships across scales, 2) an AI orchestration layer that identifies knowledge gaps and designs optimal experiments, 3) a layered protocol architecture that enables any qualified laboratory to execute the same experiment reproducibly, and 4) a distributed marketplace of validated laboratories that execute standardized protocols and return gold-standard data. Together, these components form a cycle of hypothesis generation, experimentation, and model refinement that enables researchers to create validated knowledge at least 10x more rapidly than conventional approaches. Ultimately, IGoR will empower researchers at every level to pursue bold, unconventional research directions that are currently too slow, too complex, or too resource-intensive.</p>

Synopsis

The Astrophysics Research and Analysis Program (APRA) solicits basic research proposals for investigations that are relevant to NASA's programs in astronomy and astrophysics and includes research over the entire range of photons, gravitational waves, and particle astrophysics. Awards may be for up to four years' duration (up to five years for suborbital and CubeSat investigations), but shorter-term proposals are typical; four-year or five-year proposals must be well justified. APRA investigations may advance technologies anywhere along the full line of readiness levels, from Technology Readiness Level (TRL) 1 through TRL 9.

Only white papers will be accepted as initial submissions; formal proposals will be accepted by invitation only. While white papers will be considered if received prior to 3pm Eastern Standard Time (EST) on 4 AUG 2030, the following submission dates are suggested to best align with projected funding: FY26 by 05 SEP 2025 FY27 by 31 AUG 2026 FY28 by 31 AUG 2027 FY29 by 31 AUG 2028 FY30 by 31 AUG 2029 Offerors should monitor the Contract Opportunities on the SAM website at https://SAM.gov in the event this announcement is amended. CONCISE SUMMARY OF TECHNOLOGY REQUIREMENT: Seeking innovative research to enhance Counter-small Unmanned Aerial System (C-sUAS) kill chain and point defense capabilities through advancements in Electronic Warfare (EW), Cyberspace Operations (CO), Command and Control (C2) Automation and Autonomy, Low-Collateral Defeat (LCD), Low-Collateral Effect Interceptors (LCEI)/Blue Force Interceptors (BFI), and communications. One goal is to blur the line between EW and CO by developing cyberspace countermeasures that disrupt sUAS operations, particularly command and control links. This includes improving system resiliency in contested environments and prioritizing low-collateral damage solutions. C2 advancements aim to automate and optimize responses to sUAS threats, especially swarm attacks, through AI/ML, sensor fusion, and automated decision-making. Research into LCD/LCEI/BFI could lead to the development of low-cost, autonomous interceptors with integrated EW/CO capabilities and other C-sUAS payloads. Further research will focus on improving sensor technologies for enhanced detection, identification, and tracking, as well as developing a library for storing and indexing cyberspace effects. In parallel, efforts will be made to advance UAS Traffic Management (UTM) systems, integrating them with existing air traffic control, enabling safe integration of unmanned aircraft into the airspace. Finally, communication systems will be enhanced through advanced modeling and</p>

---------	---------------	--------------	----------------	---------------	----------------

simulation, development of resilient waveforms and networking protocols for swarm operations, and integration of AI for network optimization and spectrum management. BAA ESTIMATED FUNDING: Total funding for this BAA is approximately \$499M. Individual awards will not normally exceed sixty (60) months with dollar amounts normally ranging from \$500K to \$20M. There is also the potential to make awards up to \$99M. ANTICIPATED INDIVIDUAL AWARDS: Multiple Awards are anticipated. However, the Air Force reserves the right to award zero, one, or more Procurement Contracts or Other Transactions and assistance instruments, for all, some, or none of the solicited effort based on the offeror's ability to perform desired work and funding fluctuations. There is no limit on the number of OTs that may be awarded to an individual offeror. TYPE OF INSTRUMENTS THAT MAY BE AWARDED: FAR based Procurement contracts, CFR based grants and cooperative agreements or other transactions (OT) under 10 USC 4021, 10 USC 4022 (previously 10 USC 4002, 2371, 10 USC 4003, 2371b) depending upon the nature of the work proposed. 10 USC 4023 also allows for FAR based contracts, OTs for research, OTs for Prototype, and assistance instruments. In the event that an Other Transaction for Prototype agreement is awarded as a result of this competitive BAA, and the prototype project is successfully completed, there is the potential for a prototype project to transition to award of a follow-on production contract or transaction. The Other Transaction for Prototype agreement itself will also contain a similar notice of a potential follow-on production contract or agreement. AGENCY CONTACT INFORMATION: All white paper submissions and any questions of a technical nature shall be directed to the cognizant Technical Point of Contact (TPOC) as specified below (unless otherwise specified in the technical area): BAA PROGRAM MANAGER: Deputy BAA Manager TRISTEN M. CARRIG PETER J. FITZGERALD AFRL/RIGD AFRL/RITGB 525 Brooks Rd 525 Brooks Rd Rome, NY 13441-4505 Rome, NY 13441-4505 Telephone: (315) 330- 2558 Telephone: (315) 330-2081 Email: tristen.carrig@us.af.mil Email: peter.fitzgerald.1@us.af.mil Questions of a contractual/business nature shall be directed to the cognizant contracting officer, as specified below (email requests are preferred): Amber Buckley Email: Amber.Buckley@us.af.mil Emails must reference the solicitation (BAA) number and title of the acquisition. Pre-Proposal Communication between Prospective Offerors and Government Representatives: Dialogue between prospective offerors and Government representatives is encouraged. Technical and contracting questions can be resolved in writing or through open discussions. Discussions with any of the points of contact shall not constitute a commitment by the Government to subsequently fund or award any proposed effort. Only Contracting Officers are legally authorized to commit the Government. Offerors are cautioned that evaluation ratings may be lowered and/or proposal rejected if proposal preparation (Proposal format, content, etc.) and/or submittal instructions are not followed.

May focus on any phase of research from basic through translational science, though studies that focus solely on identifying intervention targets are discouraged. Distinctive Features: This funding opportunity contains an Early-Career Partnership Option, which allows for two Principal Investigators (PIs). If this option is selected, at least one of the named PIs must be an early-career investigator. Only the initiating PI will submit a pre-application, but all PIs will need to submit full applications. The partnering PI's application is an abbreviated package specific to their distinct portion of the research project. If recommended for funding, each PI will be named on a separate award to the recipient organization(s). Be advised, all associated applications for a research project may be withdrawn if the initiating or partnering application is rejected or administratively withdrawn. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$4.96M to fund approximately 6 Investigator-Initiated Research Award applications with total cost caps of \$0.8M for a Single PI, or \$0.96M for the Early-Career Partnership Option, per award. The maximum period of performance is 3 years. It is anticipated that awards made from this fiscal year 2026 (FY26) funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.</p>

---------	---------------	--------------	----------------	---------------	----------------

Synopsis | The fiscal year 2026 (FY26) Peer Reviewed Medical Research Program (PRMRP) Platform Clinical Translation Award supports the translational development and/or early-phase clinical trials for broadly applicable clinical technologies that will address urgent and complex needs related to two congressionally directed FY26 PRMRP topic areas. The platform product in development should address one of the FY26 PRMRP portfolio-specific strategic goals and address the health care needs of military Service Members, Veterans and their Families Distinctive Features: Allows for multiple Principal Investigators (PIs). The proposed experiments may represent a single project led by a single PI, or it may consist of partnerships between principal investigators that will occur synergistically to advance a platform product. One PI will be identified as the Initiating PI and will be responsible for the majority of the administrative tasks associated with application submission. Up to two additional PIs can be identified as Partnering PIs. If recommended for funding, each PI will be named on separate awards to the recipient organization(s). Requires a PI-convened external advisory board with patient advocate participation. The patient advocate must be a person living with, or a family member or caretaker of someone with, a disease or condition addressed in one of the applicant-selected congressionally directed FY26 PRMRP topic areas. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$30M to fund approximately two Platform Clinical Translation Award applications with total cost caps of \$15M per award. The maximum period of performance is 4 years. It is anticipated that awards made from this FY26 funding opportunity will be funded with a maximum of \$8M in FY26, with the remaining budget to be funded out of future fiscal years depending upon meeting performance-based milestones and availability of future funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.

understanding of underlying mechanisms toward solutions that have the potential for major near-term impact for patients and clear alignment to one of the congressionally directed FY26 PRMRP topic areas and one of the FY26 PRMRP portfolio-specific strategic goals. Distinctive Features: This funding mechanism allows for multiple Principal Investigators (PIs). Only the initiating PI's organization will submit a pre-application, but all PIs' organizations will need to submit full applications. The partnering PI's application is an abbreviated package specific to their distinct portion of the research project. Be advised, all associated applications for a research project may be withdrawn if the initiating or partnering application is rejected or administratively withdrawn. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$32.0M to fund approximately 10 Impact Award applications with total cost caps of \$2.8M for the Single PI Option, or \$3.6M for the Partnering PI Option. The maximum period of performance is 4 years. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.

Synopsis The fiscal year 2026 (FY26) Peer Reviewed Medical Research Program (PRMRP) Technology/Therapeutic Development Award, a product-driven award mechanism, intends to support the translation of promising preclinical findings into products for clinical applications, including prevention, detection, diagnosis, treatment, or quality of life, for a disease or condition related to one of the congressionally directed FY26 PRMRP topic areas and one of the FY26 PRMRP strategic goals. Products can be tangible items, such as drugs or devices, or can be knowledge products, such as clinical decision-making tools or practice guidelines. Products in development should address or have dual purpose potential for the health care needs of military Service Members, Veterans and their Families. Distinctive Features: For the PRMRP Technology/Therapeutic Development Award, the program expects the research proposed will take an already established proof-of-concept or prototype through the final stages of preclinical development. The PRMRP also expects that the research outcome will be a regulatory filing or translation of findings into clinical practice, as applicable. Funding Details: The Congressionally Directed

Synopsis
 The fiscal year 2026 (FY26) Peer Reviewed Medical Research Program (PRMRP) Lifestyle and Applied Health Research Award supports clinical research and/or clinical trials using a combination of scientific disciplines including occupational science, psychology, psychometrics, biostatistics and epidemiology, surveillance, implementation science, and population health. Applications must address and provide a solution to one of the congressionally directed FY26 PRMRP topic areas and one of the FY26 PRMRP strategic goals. Distinctive Features: This funding opportunity requires patient advocate participation. The patient advocate will be a person living with, or a family member or caretaker of someone with, a disease or condition addressed in one of the congressionally directed FY26 PRMRP topic areas. Animal research is not allowed. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$16.8M to fund approximately four Lifestyle and Applied Health Research Award applications with total cost caps of \$4.2M per award. The maximum period of performance is 4 years. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.

used to support a standalone study of high impact to vision injury care or the generation of clinical research data in preparation for a more expansive study. Research must align with at least one of the FY26 VRP Focus Areas. The MCRA may not be used to support preclinical research or clinical trials. Distinctive Features: · Key personnel must include an established clinician or Ph.D. clinical scientist, who will serve as Principal Investigator (PI) and a clinician in training (e.g., a fellow, resident, junior clinician, clinician in a Ph.D. program), who will conduct the proposed research under mentorship of the PI, with support from supporting personnel as appropriate. · The clinician in training should have sufficient time remaining in their training program to complete the research proposed under the MCRA. · Scored peer review criteria include Research Idea/Rationale, Research Strategy and Feasibility, Impact and Personnel. · Programmatic review criteria include adherence to the intent of the MCRA, contribution to program portfolio, relative impact and relevance to military health. · Applicants must submit documentation of Institutional Review Board (IRB)/Ethics Committee (EC) approval or exemption by January 1, 2027, in order for the MCRA application to be considered for funding. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$150,000 to fund approximately two MCRA applications with total cost caps of \$75,000 per award. The maximum period of performance is 18 months. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.

Synopsis

This funding mechanism supports interventional research at the individual and/or health care system level which will result in near-term impact on the health-related quality of life of individuals living with lupus. The emphasis is on near-term impact on quality of life. Research must address at least one of the fiscal year 2026 (FY26) Lupus Research Program (LRP) Transformative Vision Award (TVA) focus areas. This mechanism allows for clinical trials but does not allow animal studies. Distinctive Features: • Applications must include preliminary data. • Applications must include at least one lupus consumer advocate as a member of the research team. • This funding mechanism allows for up to three Principal Investigators (PIs). Only the initiating PI will submit a pre-application, but all PIs will need to submit full applications. The partnering PI(s) application is an abbreviated package specific to their distinct portion of the research project. Be advised, all associated applications for a research project may be withdrawn if the initiating or partnering application(s) is rejected or administratively withdrawn. • An individual may be named as PI on only one application per LRP award mechanism (Idea Award, Impact Award, Transformative Vision Development Award, TVA), for a maximum of four applications to the FY26 LRP. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$2M to fund approximately

Synopsis The fiscal year 2026 (FY26) Spinal Cord Injury Research Program (SCIRP) Translational Research Award (TRA) supports translational research that will accelerate the movement of promising ideas in spinal cord injury (SCI) research into clinical applications. Distinctive Features: • This funding opportunity contains an Early-Career Partnership Option, which allows for two principal investigators (PIs). If this option is selected, at least one of the named PIs must be an early-career investigator. Only the initiating PI will submit a pre-application, but all PIs will need to submit full applications. The partnering PI's application is an abbreviated package specific to their distinct portion of the research project. If recommended for funding, each PI will be named on a separate award to the recipient organization(s). Be advised, all associated applications for a research project may be withdrawn if the initiating or partnering application is rejected or administratively withdrawn. • Applications to this funding opportunity must name at least one SCI community partner (e.g., SCI Lived-Experience Consultant, representative of community-based organizations) who will provide advice and consultation throughout the planning and implementation of the research project. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$8.32M to fund approximately 4 Translational Research Award applications with total cost caps of \$2.0M for a Single PI, or \$2.16M for the Early-Career Partnership Option, per award. The maximum period of performance is 3 years. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.

All applications must address at least one of the FY26 MSRP IIRA focus areas. Research projects may focus on any phase of research, excluding clinical trials. The rationale for a research idea may be derived from laboratory discovery, clinical trial results, population-based studies, a clinician's firsthand knowledge of patients, or anecdotal data. Applications must include preliminary and/or published data that are relevant to MS and the proposed research project. Distinctive Features: This funding mechanism includes two options: Established Investigator or New Investigator. The New Investigator option supports applicants early in their faculty appointments. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$6.0M to fund approximately six MSRP Investigator-Initiated Research Award applications with total cost caps of \$1.0M per award. The maximum period of performance is 3 years. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.

(EHDA) supports the initial exploration of innovative, high-risk, high-gain, and potentially groundbreaking concepts in the Multiple Sclerosis (MS) research field. The studies supported by this award mechanism are expected to lay the groundwork for future avenues of scientific investigation. All applications must address at least one of the FY26 MSRP EHDA focus areas. The proposed research project should include a well-formulated, testable hypothesis based on strong scientific rationale and study design. The presentation of preliminary and/or published data is not required. Distinctive Features: This funding mechanism includes two options: Established Investigator and New Investigator. The New Investigator option supports applicants early in their faculty appointments. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$2.00M to fund approximately eight MSRP Exploration - Hypothesis Development Award applications with total cost caps of \$0.25M per award. The maximum period of performance is 2 years. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.

Synopsis The fiscal year 2026 (FY26) Multiple Sclerosis Research Program (MSRP) Early Investigator Research Award (EIRA) supports Multiple Sclerosis-focused research opportunities for individuals in the early stages of their careers, under the guidance of one or more designated Mentors. All applications must address at least one of the FY26 MSRP EIRA focus areas Distinctive Features: This opportunity allows for early-stage investigators to develop a research project, investigate a problem or question in MS research, and further their intellectual development as an MS researcher of the future. All application components for the EIRA are expected to be written by the Principal Investigator (PI), with appropriate direction from the Mentor(s). The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$1.20M to fund approximately four MSRP Early Investigator Research Award applications with total cost caps of \$0.30M per award. The maximum period of performance is 2 years. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made

Deadline Dates (ALL)	30-Jul-2026 [LOI/Pre-App], 13-Aug-2026
Synopsis	<p>The fiscal year 2026 (FY26) Multiple Sclerosis Research Program (MSRP) Clinical Trial Award (CTA) supports the rapid implementation of clinical trials with the potential to have a significant impact on the treatment or management of multiple sclerosis. All applications must address at least one of the FY26 MSRP CTA focus areas. Clinical trials may evaluate promising new products, pharmacologic agents (drugs or biologics), devices, clinical guidance and/or emerging approaches and technologies. Distinctive Features: The FY26 CTA offers two funding levels. The following are generalized descriptions of the scope of research appropriate for each funding level: • Funding Level 1 (CTA-FL1) supports small-scale, proof-of-principle clinical trials (e.g., pilot, first-in-human, phase 0) to demonstrate feasibility or inform the design of more advanced trials, or other clinical trials that are appropriate for this funding level. Preliminary data relevant to the proposed clinical trial are required. • Funding Level 2 (CTA-FL2) supports larger-scale clinical trials at phase 1 or phase 2 that seek to show preliminary evidence of safety or efficacy (i.e., benefit of clinical or preclinical outcomes) in relevant patient populations. Clear description and justification should be provided, which could include, but is not limited to, the intervention type, trial duration, sample size, outcome measures, assessment tools and frequency of assessment. Preliminary data relevant to the proposed clinical trial in MS populations are required. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$4.0M to fund approximately two MSRP CTA-FL1 applications and one MSRP CTA-FL2 application with total cost caps of \$1.0M for the CTA-FL1 and \$2.0M for the CTA-FL2. The maximum period of performance is 3 years for the CTA-FL1 and 4 years for the CTA-FL2. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.</p>

Distinctive Features: Preliminary Data is not required. Applications should demonstrate the ability to achieve interpretable results in the absence of preliminary data supporting the hypothesis. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$2.1M to fund approximately six Exploration-Hypothesis Development Award applications with total cost caps of \$350,000 per award. The maximum period of performance is 2 years. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Primary objectives of this mechanism include: • Accelerating the translation of current and emerging techniques or interventions into clinical use by addressing specific barrier(s) to clinical success for the purpose of de-risking or informing the design of definitive trials. • Identifying the most effective diagnosis, treatment and rehabilitation options to support critical decision-making for patients, clinicians, care partners and policymakers. Distinctive Features: • This funding opportunity contains an Early-Career Partnership Option, which allows for two principal investigators (PIs). If this option is selected, at least one of the named PIs must be an early-career investigator. Be advised, all associated applications for a research project may be withdrawn if the initiating or partnering application is rejected or administratively withdrawn. • Applications to this funding opportunity must name at least two spinal cord injury (SCI) community partners who will provide advice and consultation throughout the planning and implementation of the research project. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$6.12M to fund approximately 3 Clinical Translation Research Award applications with total cost caps of \$2.0M for a Single PI or \$2.16M for the Early-Career Partnership Option per award. Synopsis

The fiscal year 2026 (FY26) Spinal Cord Injury Research Program (SCIRP) Clinical Trial Award (CTA) supports the rapid implementation of clinical trials with the potential to have a significant impact on the treatment or management of spinal cord injury (SCI) Distinctive Features: This funding opportunity contains an Early-Career Partnership Option, which allows for two Principal Investigators (PIs). If this option is selected, at least one of the named PIs must be an early-career investigator. Only the Initiating PI will submit a pre-application, but all PIs will need to submit full applications. The Partnering PI's application is an abbreviated package specific to their distinct portion of the research project. If recommended for funding, each PI will be named on a separate award to the recipient organization(s). Be advised, all associated applications for a research project may be withdrawn if the initiating or partnering application is rejected or administratively withdrawn. Applications to this funding opportunity must name at least two spinal cord injury (SCI) community partners (e.g., SCI Lived-Experience Consultants, representatives of community-based organizations) who will provide advice and consultation throughout the planning and implementation of the research project. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$9.76M to fund approximately 2 Clinical Trial Award applications with total cost caps of \$4.8M for a Single PI, or \$4.96M for the Early-Career Partnership Option, per award. The maximum period of performance is 4 years. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.

Synopsis This funding mechanism supports innovative, high-risk/high-reward research that could ultimately lead to a critical discovery or major advancement relevant to lupus. The emphasis is on innovation. Research must address at least one of the fiscal year 2026 (FY26) Lupus Research Program (LRP) Idea Award (IA) focus areas. This funding mechanism does not allow clinical trials. Distinctive Features: • Early-career investigators are eligible to serve as Principal Investigators (PIs) on applications to the FY26 LRP Idea Award. • Preliminary data are permitted but not required. • Applications should describe future directions of the work. • An individual may be named as PI on only one application per LRP award mechanism (IA, Impact Award, Transformative Vision Development Award, Transformative Vision Award), for a maximum of four applications to the FY26 LRP. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$1.5M to fund approximately five Idea Award applications with total cost caps of \$300,000 per award. The maximum period of performance is 2 years. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.

Deadline Dates (ALL)	12-Aug-2026 [LOI/Pre-App], 02-Sep-2026
Synopsis	The fiscal year 2026 (FY26) Prostate Cancer Research Program (PCRP) Early Investigator Research Award (EIRA) supports prostate cancer research conducted by investigators in the early stages of their careers with guidance from an experienced mentor. All applications must address one of the FY26 PCRP Overarching Challenges. Distinctive Features: --Early-Career Investigator: Serves as the principal investigator. Includes investigators possessing a doctoral degree or equivalent with fewer than three years of postdoctoral research experience at the application submission deadline, excluding clinical residency or clinical fellowship training. --Mentorship: Applications must include at least one mentor who demonstrates experience in prostate cancer research and successful mentorship. --Researcher Development Plan: Applications must include a researcher development plan articulating an individualized strategy for acquiring necessary skills, competence, and expertise to complete the project and foster the Principal Investigator's (PI's) career development.

Synopsis

The fiscal year 2026 (FY26) Prostate Cancer Research Program (PCRP) Physician Research Award (PRA) Supports a mentored research experience to prepare physicians with clinical duties for careers in prostate cancer research. All applications must address one of the FY26 PCRP Overarching Challenges. Distinctive Features: · Early-Career Clinician Investigator: Serves as the Principal Investigator (PI). Includes investigators with clinical duties in the last year of an accredited medical residency or medical fellowship program, or within five years of initiating a faculty appointment. · Mentorship: Applications must include at least one mentor who demonstrates experience in prostate cancer research and successful mentorship. · Researcher Development Plan: Applications must include a research development plan articulating an individualized strategy for acquiring necessary skills, competence and expertise to complete the projects and foster the PI's career development.

Synopsis

This funding opportunity announcement seeks to solicit a Director and Deputy Director to lead the Epilepsy Research Program (ERP) Virtual Post-Traumatic Epilepsy Research Center (ViP-TERC). The ViP-TERC is a unique, interactive virtual research center providing intensive mentoring, national networking, collaborations, and a peer group for new post-traumatic epilepsy (PTE) investigators. The overarching goal of the ViP-TERC is to develop successful, highly productive PTE researchers in a collaborative research and career development environment to enhance quality and expand quantity of the PTE research field. Distinctive Features: This funding mechanism is a partnering mechanism, requiring an Initiating Principal Investigator (PI), who will serve as the ViP-TERC Director, and a Partnering PI, who will serve as the ViP-TERC Deputy Director. The ViP-TERC Deputy Director's application is an abbreviated package specific to their distinct portion of the project. If recommended for funding, each PI will be named on separate awards to the recipient organization(s). Be advised, all associated applications may be withdrawn if the initiating or partnering application is rejected or administratively withdrawn. An investigator may be named on only one fiscal year 2026 (FY26) ERP Virtual Post-Traumatic Epilepsy Research Center - Leadership Award application as a PI.

Deadline Dates (ALL)	17-Aug-2026
Synopsis	<p>The Flight Advancement of Structures for Hypersonics (FLASH) Innovative Naval Prototype (INP) program integrates advanced hypersonic vehicle technologies that will demonstrate the viability of the concept to be fielded as a surface-launched, tactical range, hypersonic strike capability. FLASH will design, develop, manufacture and flight test a number of prototype vehicles to inform decisions concerning the FLASH capability. FLASH will address vehicle structural, aerodynamic and thermal performance, vehicle controllability and affordability related to its technologies and assess compatibility with the Vertical Launch System (VLS) and Virginia Payload Module (VPM). The FLASH concept, which leverages prior Applied Research, was selected by Navy Leadership as an INP in FY 2026 due to promising technology maturation. A number of precursor, subscale ground and flight test efforts are planned to advise full-scale FLASH vehicle demonstrations. In support of this effort, the program office seeks to gather technical, performance, scalability, risk reduction options, technology/material readiness level (TRL/MRL), availability and cost information to include (technical on-site/financial) participation interest from other government and industry partners in a number of Critical Enabling Technology (CET) areas and engineering thrust categories to include: High TRL/Flight Qualified Command and Control Systems and System Components High Temperature Structures, Thermal Protection Systems, Assemblies and Components Scaled Design Verification and Flight Test Demonstration Capabilities Multidisciplinary Design, Analysis and Optimization (MDAO) Additional performance related mission requirements that will likely impact this technology acquisition effort will be accessible via a CUI and/or classified addendum. Requests for access to the addendum should be directed to ONR Code 543 with the following contact information and this specific BAA call number. Eligible attendees of the planned Industry day will</p>

---------	---------------	--------------	----------------	---------------	----------------

also be assisted in accessing the information as appropriate. The primary focus of the FLASH program is to demonstrate a tactically relevant range, low cost, hypersonic capability via advanced aerodynamics, control techniques and resulting relaxed reliance on exquisite materials. Therefore, existing compatible and the minimum necessary onboard mission systems will be sought for vehicle integration to enable negligible GNC flight test risk. This demonstration philosophy allows for the concentrated development efforts of the program to laser-focus on the extremely promising aero and aerothermodynamic concepts developed in previous applied research efforts that are of highest risk, highest interest and highest payoff to the ONR and the war fighter.

	Synopsis	The Tau Pipeline Enabling Program (T-PEP) seeks to accelerate the discovery of potential new therapies for tauopathies. This program intends to enrich the pipeline for therapy development by facilitating the translation of academia-derived ideas into practical application. In short, T-PEP bridges the gap between innovative but resource-constrained researchers and the larger pharmaceutical companies that are looking for drug candidates to be taken into human trials. The overarching goal of T-PEP is to promote the advanced study of a wide range of novel targets, agents, and/or therapeutic strategies that will accelerate the development of disease-modifying interventions for tauopathies.

preference is for proof of concept, pivotal, Phase I or Phase IIA clinical repurposing trials. Eligible trials may be conducted at accredited US-based academic, nonprofit and governmental research institutions and/or health systems involved with medical research, including Veterans Administration (VA) health systems and hospitals. For this RFP, repurposed therapies must be approved and/or generally recognized as safe for human use by some regulatory agency, such as the US Food and Drug Administration, European Medicines Agency, Health Canada or Japan's Pharmaceuticals and Medical Devices Agency, and may include drugs, devices, nutraceuticals or diagnostics, as well as combination therapies. These repurposed therapies must be tested in a new indication for which they are not already approved or used widely in clinical practice as standard of care. Repurposed therapies also may be added to current standard of care to improve patient outcomes and/or quality of life. Community engagement must go beyond patient engagement and include collaborations with community-based organizations (i.e. community health, social services and/or faith-based organizations - including veterans-focused groups). Community engagement is required for any trials addressing health disparities and is optional for all other trials.

Deadline Dates (ALL)	18-Aug-2026
Synopsis	Retina Research Foundation (RRF) Pilot Study Grants allow investigators to perform novel retina research that will result in preliminary data necessary for future applications to larger funding sources, including the NIH. The RRF pilot grants are awarded annually. If satisfactory progress on annual review is noted, grants may be renewed up to three times (for 3 years). RRF pilot grant awards are typically \$25,000 to \$50,000. The number and size of the grant awards varies each year depending on the RRF's income from donations and investments.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Fundi
	Synopsis	This award is designed for individuals in the early stages of their career, typically Fellows, including those without significant research experience who plan to embark on careers in rheumatic disease research. The purpose of this award is to provide a structured research training program for rheumatologists or health professionals in the field of rheumatology. This mentored career development award provides support for salary as well as research and/or education costs for the early years of research training in an environment where trainees may interact with established rheumatology investigators. The goal of funding at this level is to provide an opportunity for young scientists to embark on focused research and research training that will allow them to be competitive for the next level of career development awards (e.g. NIH K award). Through this award, the Foundation provides a means for ensuring more qualified, highly trained investigators in the field of rheumatology.
