

**Funding Opportunities Monthly Edition
September 2026 Due Dates**

Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in Sept 2026.

The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

The Development Office offers assistance with many not for profit opportunities. Please contact the Development Office's Corporate and Foundation Relations team at DevCorpFound@mountsinai.org / 212-659-8500 below for assistance or questions.

126935	RFA-CA-24-026--National Cancer Institute Youth Enjoy Science Research Education Program (R25 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	RFA-CA-24-026	28-Sep-2026	2,000,000 USD
Contact Name Contact Telephone Contact Email Sponsor Website Program URL Deadline Dates (ALL) Synopsis Sangeeta Ghosh, PhD sangeeta.ghosh@nih.gov Link to program URL 28-Sep-2026 The NCI's mission is to conduct and support research, training, health information dissemination, and other programs concerning cancer. This funding opportunity seeks to facilitate educational activities that encourage students from diverse backgrounds, including those from groups underrepresented in biomedical research, to become knowledgeable about cancer and available to focus on cancer later in their careers. To promote broad interest in pursuing a career in biomedical research via early intervention strategies, the NCI Youth Enjoy Science (YES) Program will support efforts to create and maintain an institutional program to engage grades 6-12 and/or undergraduate students in cutting edge cancer research experiences. The proposed institutional programs may also provide research experiences for the grade 6-12 teachers and undergraduate faculty members. The goals are to inspire interest in biomedical sciences, help envision research as a career path, and strengthen practical research and career skills. In alignment with these goals, institutions may develop unique programs that capitalize on their research strengths and are responsive to their target populations.					
129319	Integrating Biospecimen Science Approaches into Clinical Assay Development (U01 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-25-325	10-Sep-2026	1,250,000 USD
Contact Name Contact Telephone Contact Email Sponsor Website Program URL Deadline Dates (ALL) Abhi Rao, Ph.D. 240-276-5715 abhi.rao@nih.gov Link to sponsor website Link to program URL 10-Sep-2026 , 04-Feb-2027 , 04-Jun-2027 , 10-Sep-2027					

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) intends to support extramural research to investigate and mitigate challenges in clinical assay development and subsequent analytical validation due to preanalytical variability in tumor tissue biopsies, blood biospecimens utilized as "liquid biopsies", or other biospecimens as described in this NOFO. Extramural research funded under this NOFO may include investigations of preanalytical variability associated with the procurement and study of small biopsies (core biopsies, small excision samples), blood utilized for "liquid biopsies", tissue swabs, tissue secretions, pleural and esophageal aspirates, feces, or bodily fluids like sweat, urine, CSF, breast milk and saliva. Investigator-designed experiments will explore how different biospecimen preanalytical conditions affect emerging and clinically relevant biomarkers quantified by a variety of testing platforms. The results from this research program will improve the understanding of how analytical quantification of clinically relevant biomarkers is affected by variation in biospecimen collection, processing, and storage procedures. The overall goal is to expedite biomarker clinical assay development through evidence-based standardization of biopsy handling practices.			
128525	Dissemination and Implementation Research in Health (R03 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-25-233	07-Sep-2026	100,000 USD
	Contact Name	Gila Neta, Ph.D.			
	Contact Telephone	240-276-6785			
	Contact Email	gila.neta@nih.gov			
	Sponsor Website				
	Program URL	Link to program URL			
	Deadline Dates (ALL)	07-Sep-2026 , 16-Oct-2026 , 07-Jan-2027 , 16-Feb-2027 , 07-May-2027 , 16-Jun-2027 , 07-Sep-2027 , 16-Oct-2027 , 07-Jan-2028			
	Synopsis	The purpose of this Notice of Funding Opportunity (NOFO) is to support studies that will identify, develop, and/or test strategies for overcoming barriers to the adoption, adaptation, integration, sustainability, scale-up, and spread of evidence-based interventions, practices, programs, tools, treatments, guidelines, and policies (herein referred to collectively as evidence-based interventions). Studies that promote equitable dissemination and implementation of evidence-based interventions among underrepresented communities are encouraged. Conversely, there is a benefit in understanding circumstances that create a need to stop or reduce (de-implement) the use of practices that are ineffective, unproven, low-value, or harmful. In addition, studies to advance dissemination and implementation research methods and measures are encouraged. Applications that focus on re-implementation of evidence-based health services that may be disrupted amidst disasters (e.g., pandemics, climate change) remain relevant. All

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
Deadline Dates (ALL) 07-Sep-2026 , 05-Oct-2026 , 07-Jan-2027 Synopsis Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) is soliciting research projects that implement early phase (Phase 0, I, and II) investigator-initiated clinical trials focused on cancer-targeted diagnostic and therapeutic interventions of direct relevance to the research mission of DCTD and OHAM. The proposed project must involve at least 1 clinical trial related to the scientific interests of one or more of the following research programs: Cancer Therapy Evaluation Program, Cancer Imaging Program, Cancer Diagnosis Program, Radiation Research Program, Complementary and Alternative Medicine Program and/or the HIV and AIDS Malignancies Research Programs. Applicants may propose to conduct an early phase trial by itself, or in combination with another research aim(s) as appropriate. This NOFO does not accept Phase III clinical trials.

	Contact Name Edward R. Sauter, M.D., Ph.D. Contact Telephone 240-276-7657 Contact Email edward.sauter@nih.gov Sponsor Website Program URL Link to program URL Deadline Dates (ALL) 05-Sep-2026 [Optional][LOI/Pre-App], 05-Oct-2026 , 06-Jan-2027 [Optional][LOI/Pre-App], 05-Feb-2027 , 06-May-2027 [Optional][LOI/Pre-App], 05-Jun-2027 , 05-Sep-2027 [Optional][LOI/Pre-App], 05-Oct-2027 Synopsis Through this Funding Opportunity Announcement (FOA), the National Cancer Institute (NCI) invites applications for support of investigator-initiated studies addressing mechanisms by which bariatric surgery impacts cancer risk, and seeks to draw in talented scientists who study bariatric surgery to investigate its effects on cancer, rather than shorter term outcomes such as weight loss and diabetes.				
128629	Clinical Characterization of Cancer Therapy-induced Adverse Sequelae and Mechanism-based Interventional Strategies (R01 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	PAR-25-145	05-Sep-2026 [Optional][LOI/Pre-App]	Not Specified
	Contact Name Kelly Filipski PhD, MPH Contact Telephone 240-276-6841 Contact Email Kelly.Filipski@nih.gov Sponsor Website Program URL Link to program URL Deadline Dates (ALL) 05-Sep-2026 [Optional][LOI/Pre-App], 05-Oct-2026 , 06-Jan-2027 [Optional][LOI/Pre-App], 05-Feb-2027 , 06-May-2027 [Optional][LOI/Pre-App], 05-Jun-2027 , 05-Sep-2027 [Optional][LOI/Pre-App], 05-Oct-2027 Synopsis The purpose of this Notice of Funding Opportunity (NOFO) is to promote research studies designed to address adverse sequelae of cancer therapies that persist and become chronic co-morbidities or develop as delayed posttreatment effects. This NOFO supports basic, translational, and clinical research projects that seek to identify the mechanisms of therapy-induced adverse sequelae, clinically characterize the adverse sequelae, and translate the mechanistic understanding into therapeutic approaches to prevent or minimize the development of long-term sequelae. The scope of research projects includes mechanistic studies with translational endpoints and longitudinal clinical phenotyping to				

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	identify and validate clinical endpoints (biomarkers, imaging, patient-reported outcomes or combined elements) for future use in clinical trials that will evaluate the efficacy of interventions designed to prevent or reduce specific adverse sequelae. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).				
128619	Molecular Imaging of Inflammation in Cancer (R01 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-24-311	05-Sep-2026 [Optional][LOI/Pre-App]	2,499,995 USD
	Contact Name Contact Telephone Contact Email Sponsor Website Program URL Deadline Dates (ALL) Synopsis	Charles Lin , Ph.D. 240-276-6108 linp3@nih.gov Link to program URL 05-Sep-2026 [Optional][LOI/Pre-App], 05-Oct-2026 , 06-Jan-2027 [Optional][LOI/Pre-App], 05-Feb-2027 , 06-May-2027 [Optional][LOI/Pre-App], 05-Jun-2027 , 05-Sep-2027 [Optional][LOI/Pre-App], 05-Oct-2027 Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) invites research grant applications (R01) for the development and application of current and emerging molecular imaging methods to gain fundamental insights into cancer inflammation in vivo. The motivation for this initiative is the recognition that much of the current imaging research on inflammation in cancer relies heavily on in vitro and ex vivo methods. These approaches have limited potential to provide significant insights into the dynamic interactions between cancer and inflammation. Utilizing molecular imaging probes in pre-clinical and clinical investigations allows for precise temporal resolution at molecular and cellular levels. This information is valuable for identifying and characterizing in vivo inflammatory cellular physiology in cancer and for detecting molecular changes in response to treatment. This NOFO encourages applications focused on developing integrated imaging approaches to investigate the role of inflammation in cancer through strong cross-discipline collaboration between cancer basic science researchers and imaging scientists. These collaborations are expected to advance the science and understanding of cancer inflammation interactions.			
128621	Integration of Imaging and Fluid-Based Tumor Monitoring in Cancer Therapy (R01 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	PAR-25-175	05-Sep-2026 [Optional][LOI/Pre-App]	499,999 USD
	Contact Name	Shane Woodward

Synopsis	Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) encourages the submission of exploratory/developmental research grant (R21) applications that focus on different aspects of cancer control by modifying behavior, screening, and understanding etiologic factors contributing to the development of cancer, and developing ways to control cancer. The overarching goal is to provide support to promote the early and conceptual stages of research efforts on novel scientific ideas that have the potential to substantially advance population-based cancer research, such as the development of novel techniques, agents, methodologies, models, or applications that could have a major impact on a field of cancer research (e.g. epidemiologic, biomedical, behavioral, health care delivery or clinical).

129611	NEI Research Grant for Vision-Related Secondary Data Analysis (R21 Clinical Trial Not Allowed)	National Eye Institute/NIH/DHHS	PAR-25-357	07-Sep-2026	275,000 USD

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Deadline Dates (ALL) 07-Sep-2026 , 16-Oct-2026 , 07-Jan-2027 , 16-Feb-2027 , 07-May-2027 , 16-Jun-2027 , 07-Sep-2027 , 16-Oct-2027 , 07-Jan-2028 Synopsis The purpose of this Notice of Funding Opportunity (NOFO) is to conduct secondary data analyses using existing data collected from humans participating in vision-related clinical trials, epidemiologic, and other clinical research studies or represented in clinical and health care database resources (e.g., electronic health records). This NOFO may be used to develop new statistical methodologies or test hypotheses using existing data, but this NOFO must not be used to support the collection of new data. This NOFO encourages applications from institutions/organizations that propose to conduct vision-related secondary analyses of data collected from humans. Applications may be related to, but must be distinct from, the specific aims of the original data collection. The NEI supports an extensive portfolio of clinical trials and large-scale epidemiologic research projects wherein numerous data collection activities are required to meet each project's specific aims. The resultant wealth of data generated by these studies often provides unique, cost-effective opportunities to investigate additional research questions or develop new analytical approaches secondary to a project's originally intended purpose. Data are not limited to those collected under NEI support, but such data are of the highest programmatic interest.				
129739	NEI Clinical Research Study Planning Grant Program (R34 Clinical Trial Not Allowed)	National Eye Institute/NIH/DHHS	PAR-25-358	07-Sep-2026	300,000 USD

At the time of submission, applications requesting support for these activities are expected to provide detailed information regarding the study rationale, design, analytic techniques, protocols and procedures, facilities and environment, organizational structure, and collaborative arrangements. This information is best conveyed in a Manual of Procedures (MOP), the development of which represents a costly and time-consuming activity. This clinical research planning grant funding opportunity supports applicants in their planning efforts to				

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
		conduct collaborative clinical research. The grant may be used to support the development of a MOP, as well as to conduct preliminary studies to refine study procedures or document recruitment potential. The grant must not be used to generate data on the effects of a proposed intervention. This NEI FOA is applicable to both epidemiologic and clinical trial research studies.

	Synopsis	This Notice of Funding Opportunity (NOFO), issued by the National Heart, Lung, and Blood Institute (NHLBI) invites submission of investigator-initiated Program Project (P01) applications. The proposed programs may address scientific areas relevant to the NHLBI mission including the biology and diseases of the heart, blood vessels, lung, and blood; blood resources; and sleep disorders. Programs may also include implementation science, health disparities, and translation research that addresses the mission of the Institute. Each application submitted in response to this NOFO must include at least three related research projects that share a common central theme, focus, and/or overall objective. Higher budgets may be requested for applications that include at least four projects, one of which includes an Early Stage Investigator as Project Leader.			
125098	NHLBI Early Phase Clinical Trials for Therapeutics and/or Diagnostics for HLBS Disorders (R61/R33 Clinical Trial Required)	National Heart, Lung, and Blood Institute/NIH/DHHS	PAR-25-026	03-Sep-2026 [Optional][LOI/Pre-App]	Not Specified

125065	Deadline Dates (ALL) 03-Sep-2026 [Optional][LOI/Pre-App], 07-Sep-2026 , 02-Oct-2026 , 07-Jan-2027 Synopsis The objective of this funding opportunity is to support investigator-initiated, Phase I clinical trials for diagnostic and therapeutic interventions for heart, lung, blood, and sleep (HLBS) disorders in adults and children. In addition to supporting clinical trial start-up and implementation activities, this FOA will provide support for final stage preclinical activities needed for the implementation of the proposed trial. All the activities proposed in the R61 phase must be directly related to the therapeutic/diagnostic in preparation for the clinical trial. The proposed trial can be single or multisite. This FOA will utilize a bi-phasic, milestone-driven mechanism of award where the first phase can be used to finalize required pre-trial activities such as stability, shipping studies, and site training.				
	NHLBI Early Phase Clinical Trials for Therapeutics and/or Diagnostics for HLBS Disorders (R33 CT Required)	National Heart, Lung, and Blood Institute/NIH/DHHS	PAR-25-025	02-Sep-2026 [Optional][LOI/Pre-App]	4,545,000 USD

The proposed trial can be single or multi-site. Applicants applying for funding under this NOFO should be ready to initiate the clinical trial within the first quarter of the project period. Discussion, submission, and attainment of applicable regulatory (FDA, DSMB, IRB) approvals, and establishment of drug (and placebo, if applicable) supplies, and any necessary third-party agreements should be established by the time of award. If time and support for these and other pre-clinical and/or trial readiness activities are desired, applicants should consider the companion NOFO PAR-25-026, which utilizes an R61/R33 phased approach.

The objectives are to establish these tools and technologies as robust, well-characterized solutions that fulfill an unmet need and are capable of enhancing our understanding of life science processes or the practice of medicine. Awards will focus on supporting multidisciplinary teams that apply an integrative, quantitative bioengineering approach to developing technologies. The goal of the program is to support technological innovations that deliver new capabilities which can realize meaningful solutions within 5 – 10 years.

	Synopsis	Rapid advances in genotyping and next generation sequencing technologies have led to the identification of genetic variants that are associated with a wide variety of congenital defects including structural congenital anomalies (SCAs), intellectual developmental disabilities (IDDs) and inborn errors of metabolism (IEMs). Large quantities of genomic data collected from pediatric congenital anomalies cohorts are available to the research community through several databases such as the Database of Genotypes and Phenotypes (dbGaP), the Gabriella Miller Kids First Data Resource Portal, the European Genome-Phenome Archive and Clinical Genome Resource (ClinGen). The purpose of this initiative is to promote the screening, functional validation and characterization of congenital anomaly-associated genetic variants identified through public facing databases and individual efforts using in-silico tools, appropriate animal models, in vitro systems or multi-pronged approaches. This initiative addresses a challenging gap between identifying sequence variations of potential interest and recognizing which of those variations have functional effects on the phenotype of interest

	Program URL Link to program URL Deadline Dates (ALL) 07-Sep-2026 , 16-Oct-2026 , 07-Jan-2027 , 16-Feb-2027 , 07-May-2027 , 16-Jun-2027 , 07-Sep-2027 , 16-Oct-2027 , 07-Jan-2028 Synopsis The NICHD Small Research Grant Program (Clinical Trial Required) supports clinical trials that fall within the NICHD mission. This funding opportunity announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Studies conducted with specific applications toward processes or products in mind should submit under the appropriate ‘Clinical Trials Required’ FOA.				
128235	Continuation or Revision of NIDCR Clinical Trial Planning and Implementation Cooperative Agreement (UH3 Clinical Trial Required)	National Institute of Dental and Craniofacial Research/NIH/DHHS	PAR-25-062	08-Jul-2026	Not Specified

Extension of an ongoing clinical trial through a competing renewal application will be supported when there is need for additional time to complete the trial or when an extended period of follow-up is well justified to assess longer term outcomes. Competitive revisions will be supported when there is compelling justification for modifying the scope of the ongoing clinical trial. NIDCR strongly encourages applicants to contact the Scientific/Research contact assigned to the ongoing clinical trial for which they are planning a competing renewal or competitive revision prior to submitting an application

	to this NOFO.				
129024	NIDCR Behavioral and Social Intervention Clinical Trial Planning and Implementation Cooperative Agreement (UG3/UH3 Clinical Trial Required)	National Institute of Dental and Craniofacial Research/NIH/DHHS	PAR-25-188	09-Sep-2026	Not Specified
	Contact NameJill Mattia, Ph.D. Contact Telephone301-451-7770 Contact Emailjill.mattia@nih.gov Sponsor Website Program URLLink to program URL Deadline Dates (ALL)09-Sep-2026 , 08-Oct-2026 , 08-Jan-2027 , 08-Feb-2027 , 06-May-2027 , 08-Jun-2027 , 08-Sep-2027 , 08-Oct-2027 , 08-Jan-2028 SynopsisThe purpose of this Notice of Funding Opportunity (NOFO) is to provide support for the planning and implementation of well-designed, rigorously conducted, behavioral/biopsychosocial intervention studies relevant to dental, oral, and craniofacial health as well as associated medical and mental health status or comorbidities. A broad range of intervention research projects that meet the NIH Definition of a Clinical Trial are appropriate for this opportunity. Awards made under this NOFO will initially support a milestone-driven planning phase (UG3) for 1 year, with possible transition to a clinical trial implementation phase (UH3) of up to five years. The UG3/UH3 application must be submitted as a single application. Applications that employ traditional methods as well as novel/advanced features (e.g., mobile health, artificial intelligence, telehealth, responsive health system records, multiple assignment randomized trial designs (SMART) or sequential randomization designs), etc., are encouraged. This NOFO will not support the testing of drugs, devices, or biologics regulated by the FDA; the corresponding NOFO for clinical trials in these areas is PAR-25-057.

	Synopsis	The purpose of the NIDCR Mentored Career Development Award to Promote Broad Participation in Research is to strengthen the dental, oral, and craniofacial research workforce by expanding the pool of well-trained postdoctoral fellows and early career faculty engaged in these areas of research This Notice of Funding Opportunity (NOFO) provides salary and research support for a sustained period of protected time for intensive research career development under the guidance of an experienced mentor. This NOFO is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary study to a clinical trial. Applicants to this NOFO are permitted to propose research experience in a clinical trial led by a mentor or co-mentor.			
128678	NIDCR Dentist Scientist Career Transition Award for Intramural Investigators (K22 Clinical Trial Not Allowed)	National Institute of Dental and Craniofacial Research/NIH/DHHS	PAR-25-027	07-Sep-2026	Not Specified

	Synopsis	The purpose of the NIDCR Dentist Scientist Career Transition Award for Intramural Investigators (K22) program is to facilitate transition of highly qualified dentist scientists from NIH Intramural postdoctoral research positions to extramural, academic tenure-track or equivalent faculty positions at eligible U.S. institutions. The award will provide support for two years of mentored postdoctoral research training in the NIH Intramural Research Program, and three years of independent research funding at the extramural institution. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Under this NOFO applicants are permitted to propose a research experience in a clinical trial led by a mentor or co-mentor. Those proposing a clinical trial or an ancillary clinical trial as lead investigator, should apply to the companion NOFO (FON).

Studies appropriate for this NOFO are those testing a drug, biologic, device, or procedure to improve dental, oral, or craniofacial diseases or conditions, including trials for any phase of testing for a Food and Drug Administration (FDA)-regulated product. Awards made under this NOFO will initially support a one-year milestone-driven planning phase (UG3), with possible transition to a clinical trial implementation phase (UH3) of up to five years. Progression to the UH3 phase is based on an administrative review and is dependent on success in meeting UG3 milestones, NIDCR program priorities, and availability of funds. The UG3/UH3 application must be submitted as a single application with the final design of the UH3 clinical trial including detail about the study population, intervention(s), and outcome(s) described in the application, following the instructions described in this NOFO. The UG3 planning phase permits both scientific and operational planning activities, though the planning phase cannot be used to test for intervention safety or efficacy or assess the study's primary outcome. The UH3 phase of the award will support the conduct of one investigator-initiated clinical trial. Applications designed to test behavior change interventions or those used as tools to understand mechanisms of behavior change will not be supported by this NOFO.

These priorities were most recently outlined by the NIH Office of AIDS Research (OAR) in NOT-OD-20-018, UPDATE: NIH HIV/AIDS Research Priorities and Guidelines for Determining HIV/AIDS Funding. Potential topics could address multiple overarching priorities. These include elucidation of unique pathophysiological mechanisms contributing to HIV comorbidities, coinfections, and complications (CCCs) affecting organs, tissues, and processes within the mission of the NIDDK. Likewise, interrogations into biological mechanisms underlying HIV reservoirs in NIDDK-relevant tissues are important for developing strategies for sustained viral suppression or elimination of HIV from the body. Finally, health-impeding social determinants of health may affect CCCs or viral reservoirs within NIDDK's mission through multiple pathways.

	Synopsis	The goal of the Medical Scientist Training Program (MSTP) is to develop a diverse pool of well-trained clinician-scientist leaders available to address the nation's biomedical research needs. Specifically, this funding announcement provides support to eligible, domestic organizations to develop and implement effective, evidence-informed approaches to dual-degree training and mentoring that will keep pace with the rapid evolution of the biomedical research enterprise and lead to the completion of both a clinical degree (for example, M.D., D.O., D.V.M., D.D.S., Pharm.D., etc.) and a research doctorate degree (Ph.D.). With the dual qualifications of a rigorous scientist and clinician, graduates will be equipped with the skills to develop research programs that accelerate the translation of research advances to the understanding, detection, treatment, and prevention of human disease, and to lead the advancement of biomedical research. Areas of particular importance to NIGMS are optimizing training efficiency, fostering the persistence of alumni in research careers, and enhancing the diversity of the clinician-scientist workforce. NIGMS expects that the proposed research training program will incorporate didactic, research, mentoring and career development elements to prepare trainees for careers that will have a significant impact on the health-related research needs of the nation. This Funding Opportunity Announcement (FOA) does not allow appointed Trainees to lead an independent clinical trial but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor.

---------	---------------	--------------	----------------	---------------	----------------

potential to enable acquisition of biomedical knowledge. Projects should be justified in terms of technical innovation and utility of such technical innovation for impacting future biomedical research. Outcomes or products of the proposed project should significantly advance the current state of the art and be sufficiently characterized for application in addressing a broad range of biomedical research questions. These outcomes may include, but are not limited to: laboratory instruments and other devices, algorithms and software, chemical reagents and processes, biological molecules or systems that have been modified by human intervention to become research tools. The goal of this FOA is to support the development of technologies with demonstrated proof-of-concept that have remaining significant technical challenges to full implementation and broad utility. As such, applications should not propose to test specific biological questions. Applications proposing to test specific biological questions are not responsive to this FOA and will be administratively withdrawn without review. Applications with a focus on optimization, hardening, or obvious extrapolations of established technology will be a lower priority for funding.

Synopsis	The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that complement and/or enhance the training of a workforce to meet the nation's biomedical, behavioral and clinical research needs. To accomplish the stated overarching goal, this NOFO will support educational activities with a primary focus on: Research Experiences; Mentoring Activities. Both research experiences and mentoring activities are required. These Research Education Mentoring Programs are expected to enhance the professional development of the mentees and foster career trajectories towards independent research to reduce the incidence of HIV worldwide and to decrease the burden of living with HIV. The terms participant and mentee are used throughout this NOFO to refer to individuals who are enrolled in the research education program.

The purpose of this NOFO is to support the early stage testing of pharmacologic interventions with novel mechanisms of action or neuromodulatory device-based interventions for the treatment of symptoms or domains of altered functions in individuals with mental illness (e.g., schizophrenia, depression, autism, obsessive compulsive disorder, anxiety, bipolar disorder). Early intervention studies are also encouraged where symptoms of a disorder have been identified in subjects (a prodromal phase) prior to full diagnostic criteria being met. Ultimately, this NOFO is intended to support evaluation of pharmacologic or neuromodulatory device-based interventions using a protocol design where the presumed mechanism of action of the intervention is adequately tested, to provide meaningful information where target modulation yields a well-controlled, dose-dependent neurophysiological/clinical/behavioral effect. Pediatric, adult, and geriatric-focused interventions are appropriate for this NOFO.The R61/R33 NOFOs are intended to support biphasic high-risk applications. Support for a single phased award that does not need the developmental (R61) phase is available in the companion R33, PAR-25-183. Applicants pursuing other stages of the clinical trial pipeline should consider one of the companion NOFOs listed above.

Early intervention studies are also encouraged where symptoms of a disorder have been identified in subjects (a prodromal phase), prior to full diagnostic criteria being met. Ultimately, this NOFO is intended to support early-stage testing of pharmacologic or neuromodulatory device-based interventions using a protocol design where the presumed mechanism of action of the intervention is adequately tested to provide meaningful information where target modulation yields a well-controlled, dose-dependent neurophysiological/clinical/behavioral effect. Pediatric, adult, and geriatric-focused interventions are appropriate for this NOFO. This R33 NOFO supports single-phased clinical trial awards. Applicants proposing high-risk projects are encouraged to apply to one of the companion NOFOs, PAR-25-184 or PAR-25-180.				
128983	Development of Psychosocial Therapeutic and Preventive Interventions for Mental Disorders (R33 Clinical Trial Required)	National Institute of Mental Health/NIH/DHHS	PAR-25-181	15-Sep-2026 [Optional][LOI/Pre-App]	Not Specified

---------	---------------	--------------	----------------	---------------	----------------

through to effectiveness trials. The purpose of this NOFO is to encourage pilot research developing and testing innovative psychosocial intervention approaches in which the target and/or intervention strategy is novel. Consistent with NIMH's experimental therapeutics approach, this NOFO is intended to speed the translation of emergent research on mechanisms and processes underlying mental disorders into promising novel psychosocial preventative or therapeutic interventions. Targets may include, but are not limited to, potentially modifiable behavioral, cognitive, affective and/or interpersonal factors or processes, neural circuits or neural activity subserving specific behaviors or cognitive processes, and/or other neurobiological mechanisms. Novel psychosocial interventions may be standalone interventions or novel augmentations to efficacious interventions for which there is an empirical rationale by which the augmentation (and corresponding target) is expected to substantially enhance outcomes. The R33 is intended to support the replication of target engagement and to test whether engaging the intervention target/mechanism mediates changes in clinical outcomes. Ultimately, trials must be designed so that results, whether positive or negative, will provide information of high scientific utility and will support "go/no-go" decisions about further development and/or testing of the intervention. Applicants pursuing other stages of the clinical trial pipeline should consider one of the companion NOFOs listed above.

Synopsis	NIMH solicits clinical trial applications through a series of notice of funding opportunities (NOFOs) that cover the intervention development pipeline, from first-in-human, early testing of new interventions, confirmatory efficacy trials, through to effectiveness trials. The purpose of this NOFO is to encourage cooperative agreement applications to support early stage clinical trials of novel mechanism of action investigational drugs or novel neuromodulatory devices for the treatment of psychiatric disorders in areas of unmet medical need. The NOFO will support milestone-driven

	early stage trials, including First-in-human (FIH), Phase Ib, Phase II/PoC and early feasibility studies (EFS), in pediatric and adult populations. These studies are designed to objectively and dose dependently assess target engagement in the central nervous system (CNS), along with safety and tolerability. Phase II/PoC studies additionally must evaluate the drug's/device's impact on clinically relevant physiological systems (functional measures) and clinical indicators of effect. The overall objective of this NOFO is to facilitate rapid collection of data to "de-risk" novel mechanism of action investigational drugs, novel drugs for use in pediatric populations with psychiatric disorders, and devices or combination treatments in order to attract private or other public funding (when appropriate) for further clinical development as Food and Drug Administration (FDA)-approved treatments. A key aspect of this NOFO is the formation of collaborative partnerships between the biomedical researchers and biotechnology or industry researchers to facilitate psychiatric drug or device development. This NOFO is designed for applicants seeking funding for cooperative agreements supporting early stage clinical trials as outlined above. Applicants pursuing other stages of the clinical trial pipeline or funding for clinical research not involving cooperative agreements should consider one of the companion NOFOs listed above.				
128979	Confirmatory Efficacy Clinical Trials of Non-Pharmacological and Pharmacological Interventions for Mental Disorders (R01 Clinical Trial Required)	National Institute of Mental Health/NIH/DHHS	PAR-25-179	15-Sep-2026 [Optional][LOI/Pre-App]	Not Specified

	intervention. Interventions to be studied include, but are not limited to, behavioral, cognitive, interpersonal, and device-based (both invasive/surgically implanted as well as noninvasive/transcranial) approaches, or a combination thereof. Pharmacological interventions to be studied under this grant mechanism are expected to primarily focus on drugs approved for marketing by the FDA (for any indication). These will include medications off-patent which are undergoing development for a new mental health indication. Confirmatory efficacy trials studying monotherapy, combination treatments, and stepped approaches, including multiple treatment modalities, may be supported. Interventions appropriate for efficacy testing must be based on a compelling scientific rationale, previous demonstration that the intervention engages and alters the hypothesized mechanism of action (target), a preliminary efficacy signal, and must address an unmet therapeutic need. Support will be provided for a trial of the intervention's efficacy that includes measurement of the hypothesized mechanism of action and the relationship between change in the target mechanism and change in functional or clinical effects. Ultimately, this NOFO is intended to support a sufficiently-powered efficacy trial to determine the intervention's potential for significant clinical benefit. Applicants pursuing other stages of the clinical trial pipeline should consider one of the companion NOFOs listed above.

App]					
	Contact Name Mary Acri, Ph.D. Contact Telephone 301-910-8230 Contact Email mary.acri@mail.nih.gov Sponsor Website Program URL Link to program URL Deadline Dates (ALL) 16-Sep-2026 [Optional][LOI/Pre-App], 16-Oct-2026 , 17-Jan-2027 [Optional][LOI/Pre-App], 16-Feb-2027 , 17-May-2027 [Optional][LOI/Pre-App], 16-Jun-2027 , 16-Sep-2027 [Optional][LOI/Pre-App], 16-Oct-2027 Synopsis The purpose of this notice of funding opportunity (NOFO) is to encourage research applications that pilot test patient navigation Emergency Department (ED) diversion models for non-urgent mental health problems. A non-urgent ED visit is that for which a delay of several hours would not increase the potential for an adverse outcome to occur. For the purposes of this NOFO, NIMH defines a patient navigation model as an evidence-based intervention that is delivered by a mental health provider, an allied provider such as a nurse, or a lay provider (e.g., peer, community health worker) whose role is to (a) utilize triage tools to identify mental health acuity, (b) provide emotional support and build mental health knowledge amongst caregivers, c) facilitate linkages to mental health services and additional resources as needed to support the family, and (d) address barriers to help-seeking. This NOFO is for 1) established navigator models that have limited evidence and need pilot testing to detect a signal, and (2) development and pilot testing of components of navigator models. Support for larger-scale or fully powered studies is provided through a companion NOFO that utilizes the R01 mechanism: PAR-25-289 (R01 Clinical Trial Required).				
128553	Pilot Effectiveness Trials for Post-Acute Interventions and Services to Optimize Longer-term Outcomes (R01 Clinical Trial Required)	National Institute of Mental Health/NIH/DHHS	PAR-25-206	05-Sep-2026 [Optional][LOI/Pre-App]	750,000 USD

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	[Optional][LOI/Pre-App], 05-Jun-2027 , 05-Sep-2027 [Optional][LOI/Pre-App], 05-Oct-2027 NIMH seeks applications for pilot projects to evaluate the preliminary effectiveness of therapeutic and service delivery interventions for the post-acute management of mental health conditions that are matched to the stage of illness in terms of both their focus (e.g., consolidating and maintaining gains from initial treatment, managing residual symptoms/impairment, preventing relapse, promoting adherence and appropriate service use) and intensity/burden. In this pilot phase of effectiveness research, the trial should be designed to evaluate the feasibility, tolerability, acceptability, safety, and potential effectiveness of the approach; to address whether the intervention engages the target(s)/mechanisms(s) presumed to underlie the intervention effects; and to obtain preliminary data needed as a pre-requisite to a larger-scale effectiveness trial (e.g., comparative effectiveness study, practical trial) designed to definitely test the effectiveness of interventions to improve post-acute outcomes. This notice of funding opportunity (NOFO) supports pilot research to evaluate the feasibility, tolerability, acceptability, safety, and preliminary indications of effectiveness of post-acute phase intervention approaches, to generate the preliminary data needed as a prerequisite to well powered effectiveness trials, and to inform the design of definitive effectiveness trials. Support for fully-powered, definitive effectiveness studies focused on post-acute phase interventions is provided via the R01 NOFO, PAR-25-207.				
128559	Effectiveness Trials for Post-Acute Interventions and Services to Optimize Longer-term Outcomes (R01 Clinical Trial Required)	National Institute of Mental Health/NIH/DHHS	PAR-25-207	05-Sep-2026 [Optional][LOI/Pre-App]	Not Specified

Invasive neural recordings provide an unparalleled window into the human brain to explore the neural circuitry and neural dynamics underlying complex moods,				

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	emotions, cognitive functions, and behaviors with high spatial and temporal resolution. Additionally, the ability to stimulate, via the same electrodes, allows for direct causal tests by modulating network dynamics. This FOA aims to target a gap in the scientific knowledge of neural circuit function related to mental health disorders. Researchers should target specific questions suited to invasive recording modalities that have high translational potential. Development of new therapies is outside the scope of this FOA, though development of novel tools/methods to enable relevant mental health studies is encouraged. This NOFO uses the R01 grant mechanism, encouraging longer-term projects, whereas its companion R21 NOFO, PAR-25-291, seeks grant applications encouraging shorter, higher-risk studies with little (or no) preliminary data.				
129095	Accelerating Solutions to Improve Access and Quality of Empirically-Supported Practices for Youth Mental Health (R01 Clinical Trial Optional)	National Institute of Mental Health/NIH/DHHS	PAR-25-310	05-Sep-2026 [Optional][LOI/Pre-App]	Not Specified

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	intervention development pipeline, from first-in-human, early testing of new interventions, confirmatory efficacy trials, through to effectiveness trials. This NOFO complements NIMH's suite of clinical trial funding opportunities by supporting milestone-driven feasibility and infrastructure development (R61) research followed by well-powered clinical trials (R33) to test the effectiveness of system interventions or strategies that improve the organization, delivery, coordination, and outcomes of mental health care for priority populations. System interventions - which may span, for example, structural, policy, and organizational domains - attend to issues about the access, equity, engagement/utilization, value (cost/financing), management, or quality and safety of mental health services, with the goal of improved care processes and clinical, functional, or population level outcomes. Accordingly, the focus of system interventions may include multiple factors/levels related to care delivered within or across a variety of care settings, such as health systems and organizations, mental health and community clinics, schools, and social welfare or justice systems. Projects may test the impact of policies and practices, interventions to facilitate care transitions and continuity across settings, and interventions to improve linkages/coordination across systems. Researchers will have up to two years in the R61 phase to demonstrate feasibility and adequate infrastructure to justify conducting the main trial (R33). Applicants pursuing other stages of intervention development and testing should refer to companion NOFOs listed at Support for Clinical Trials at NIMH.

Bachman, PhD julia.bachman@nih.gov Link to program URL 18-Aug-2026 [Optional][LOI/Pre-App], 17-Sep-2026 , 16-Dec-2026 [Optional][LOI/Pre-App], 15-Jan-2027 This notice of funding opportunity (NOFO) aims to encourage research grant applications for initial translational efforts that will enable a drug discovery program for novel, non-opioid, and non-addictive treatments for pain. The program provides funding to develop and validate assays to support a distinct testing funnel and conduct screening efforts to identify and characterize potential therapeutic agents including small molecules, biologics, and natural products. Preliminary in vivo pharmacokinetic, pharmacodynamic, and efficacy studies may also be supported. The goal of this NOFO is to advance projects to the point where they meet the entry criteria for the Pain Therapeutics Development Program or other later-stage translational programs. This NOFO is part of the NIH Helping to End Addiction Long Term (HEAL) initiative to accelerate the discovery and preclinical development of safe and effective therapeutics to treat pain with little or no addiction liability.

	Deadline Dates (ALL) 07-Sep-2026 , 20-Sep-2026 [Optional][LOI/Pre-App], 20-Oct-2026 , 07-Jan-2027 , 23-Jan-2027 [Optional][LOI/Pre-App], 22-Feb-2027 , 07-May-2027 , 22-May-2027 [Optional][LOI/Pre-App], 21-Jun-2027 , 07-Sep-2027 , 20-Sep-2027 [Optional][LOI/Pre-App], 20-Oct-2027 , 07-Jan-2028 Synopsis The purpose of this Notice of Funding Opportunity (NOFO) is to promote the development of fit-for-purpose candidate biomarkers and composite biomarker that enable more efficient clinical trials advance therapeutic development or clinical practice help guide clinical care decisions. Specifically, the goal of this phased funding mechanism is to first identify or confirm candidate biomarker(s) or biomarker signatures using human samples and/or data, followed by an independent retrospective or prospective clinical study to conduct initial clinical validation of the biomarker/signature's clinical utility for one or two defined Context(s) of Use. In the first phase, applicants are expected to demonstrate that the biomarker acceptably identifies or predicts the concept of interest and may include optimization of the detection method using carefully standardized human samples or datasets. The overarching purpose of this initiative is to deliver candidate biomarkers or biomarker signatures that are ready for definitive analytical and clinical validation studies. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
Deadline Dates (ALL) 25-Sep-2026 Synopsis The purpose of the Resource-Related Research Projects (R24) grant is to support investigator-initiated resources designed to provide materials and services to support and advance biomedical, behavioral, and social sciences research on a national basis. An R24 resource grant mechanism is a non-hypothesis-driven activity to provide data, materials, tools, or services that are essential to making timely, high quality, and cost-efficient progress in a field. Hypothesis-driven research applications should not be submitted in response to this program announcement but to another mechanism that encourages this type of research. Resources should be designed to provide services to the broad alcohol research community and should not be limited by any specific regional focus. The resource should be available to any qualified investigator, and should be highly quality controlled, and not duplicate resources available commercially or through other sources.

Synopsis	The purpose of the NIDCD Research Career Enhancement Award for Established Investigators (K18) program is to enable established, proven investigators to augment or redirect their research programs through the acquisition of new research skills to answer questions relevant to the hearing, balance, smell, taste, voice, speech and language sciences. This Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion NOFO. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. This Notice of Funding Opportunity (NOFO) is designed specifically for applicants proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary study to an existing trial, as part of their research and career development. Applicants not planning an independent clinical trial, or proposing to gain research experience in a clinical trial led by another investigator, must apply to companion NOFOs PAR-24-140 and PAR-24-143

Synopsis	This notice of funding opportunity (NOFO) encourages formative research, intervention development, and pilot-testing of interventions for people who use drugs. Primary outcomes of interest include the feasibility, acceptability and safety of novel or adapted interventions that target HIV prevention, treatment or services research. Interventions here may include behavioral, social, or structural approaches, as well as combination biomedical and behavioral approaches that prevent the acquisition or transmission of HIV infection, or improve clinical outcomes for persons living with HIV. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

Significant Risk (SR) clinical studies that will require an Investigational Device Exemption (IDE) from the FDA, such as chronic implants, will be supported by this NOFO. The clinical study is expected to provide information about the device function or final design that cannot be practically obtained through additional non-clinical assessments (e.g., bench top or animal studies) due to the novelty of the device or its intended use. This NOFO is a milestone-driven cooperative agreement program and will involve participation of NIH program staff in negotiating the final project plan before award and monitoring of research progress. Individuals, institutions, or businesses developing their own devices or that already have established collaborations with device manufacturers are welcome to apply directly to RFA-NS-25-022 or this NOFO. As part of the BRAIN Initiative, NIH has initiated a Public-Private Partnership Program (BRAIN PPP) that includes agreements (Memoranda of Understanding, MOU) with a number of device manufacturers willing to make such devices available, including devices and capabilities not yet market approved but appropriate for clinical research. In general, it is expected that the devices' existing safety and utility data will be sufficient to enable new FDA IDE and IRB approvals without need for significant additional non-clinical data. For more information on the BRAIN PPP, see <https://braininitiative.nih.gov/research/neural-recording-modulation/public-private-partnerships-program>. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

driven cooperative agreement program and will involve participation of NIH program staff in negotiating the final project plan before award and monitoring of research progress. As part of the BRAIN Initiative, NIH has initiated a Public-Private Partnership Program (BRAIN PPP) that includes agreements (Memoranda of Understanding, MOU) with a number of device manufacturers willing to make such devices available, including devices and capabilities not yet market approved but appropriate for clinical research. In general, it is expected that the devices' existing safety and utility data will be sufficient to enable new FDA IDE and IRB approvals without need for significant additional non-clinical data. For more information on the BRAIN PPP, see <https://braininitiative.nih.gov/research/neural-recording-modulation/public-private-partnerships-program>. Individuals, institutions, or businesses developing their own devices or that already have established collaborations with device manufacturers are welcome to apply directly to RFA-NS-25-021 or this NOFO. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP).

Deadline Dates (ALL)	08-Aug-2026 , 07-Sep-2026 , 08-Dec-2026 , 07-Jan-2027 , 08-Apr-2027 , 07-May-2027 , 08-Aug-2027 , 07-Sep-2027 , 08-Dec-2027 , 07-Jan-2028 , 08-Apr-2028 , 07-May-2028
Synopsis	This Notice of Funding Opportunity (NOFO) will support students at institutions with NIH-funded institutional predoctoral dual-degree training programs. The purpose of the Kirschstein-NRSA, dual-doctoral degree, predoctoral fellowship (F30) is to enhance the integrated research and clinical training of promising predoctoral students, who are matriculated in a combined MD/PhD or other dual-doctoral degree training program (e.g. DO/PhD, DDS/PhD, AuD/PhD, DVM/PhD, PharmD/PhD), and who intend careers as physician/clinician-scientists. Candidates must propose an integrated research and clinical training plan and a research training project in scientific health-related fields relevant to the missions of the participating NIH Institutes and Centers. The fellowship experience is expected to clearly enhance the individual's potential to develop into a productive, independent physician/clinician-scientist. This Notice of Funding

NIH Funding Opportunities

The proposed resource must provide a significant benefit to currently funded high priority projects in need of further coordination and support in the areas specified. This mechanism may also be used to support development of a new resource to the broader scientific community of the National Institute of Allergy and Infectious Diseases (NIAID). It is anticipated that the request for resource support through the R24 activity code will occur on an infrequent basis and only in circumstances where other mechanisms of support from the NIAID are not appropriate. The proposed resources should be relevant to the scientific areas of the NIAID mission including the biology, pathogenesis, and host response to microbes, including HIV; the mechanisms of normal immune function and immune dysfunction resulting in autoimmunity, immunodeficiency, allergy, asthma, and transplant rejection; and translational research to develop vaccines, therapeutics, and diagnostics to prevent and treat infectious, immune-mediated, and allergic diseases.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	This notice of funding opportunity (NOFO) invites submission of investigator-initiated Program Project (P01) applications. The proposed Programs should address scientific areas relevant to the NIAID mission including: biology and pathogenesis of infectious microbes, including HIV; host-microbe interactions; mechanisms regulating immune system development and function across the lifespan, and in response to infectious pathogens; immune dysfunction resulting in allergy, asthma, autoimmunity, immunodeficiency, or transplant rejection; and translational research to develop vaccines, therapeutics, and diagnostics to prevent and treat infectious and immune-mediated diseases. Each application submitted to this NOFO must include at least two related, synergistic Research Projects that share a common central theme, focus, and/or overall objective; and an Administrative Core. An application may include Scientific Core(s), if needed for the proposed research.

	Synopsis	The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that increase understanding of biomedical research among pre-college (pre-kindergarten to grade12) individuals, and to encourage awareness of and continued interest in careers in science, technology, engineering, and mathematics (STEM). To accomplish the stated over-arching goal, this NOFO will support educational activities with a primary focus on: Courses for Skills Development Research Experiences Mentoring Activities Curriculum or Methods Development Outreach

SRP Center grants will support problem-based, solution-oriented research Centers that consist of multiple, integrated projects representing both the biomedical and environmental science and engineering disciplines; as well as cores tasked with administrative (which includes Center leadership, data management, and training); translational research and engagement; and research support functions. The scope of the SRP Centers is taken directly from the Superfund Amendments and Reauthorization Act of 1986, which limits competition for this program to accredited institutes of higher education. Please see Section III. Eligibility for additional information. In accordance with NIH standard peer-review processes, the application(s) will be peer-reviewed, and only meritorious application(s) will be considered for funding.

Kirschstein National Research Service Award (NRSA) Institutional Research Training Grants (T32) to eligible, domestic institutions to develop and/or enhance predoctoral and postdoctoral research training, including short-term research training, to help ensure that a diverse and highly trained workforce is available to meet the needs of the Nation's biomedical, behavioral, and clinical research agenda. Research training programs are expected to incorporate engaging, didactic, research, and career development elements to prepare trainees for careers that will have a significant impact on the health-related research needs of the Nation. Programs proposing only short-term predoctoral research training should not apply to this announcement, but rather to the Kirschstein-NRSA Short-Term Institutional Research Training Grant Program (T35) exclusively reserved for predoctoral, short-term research training. This Funding Opportunity Announcement (FOA) does not allow appointed

	Synopsis	The National Institutes of Health (NIH) will award Ruth L. Kirschstein National Research Service Award (NRSA) Short-Term Institutional Research Training Grants (T35) to eligible, domestic institutions to develop and/or enhance research training opportunities for predoctoral students interested in careers within biomedical, behavioral, or clinical research workforce. Many NIH Institutes and Centers (ICs) use this NRSA program exclusively to support intensive, short-term research training experiences for health professional students (medical students, veterinary students, and/or students in other health-professional programs) during the summer. This program is also intended to encourage training of graduate students in the physical or quantitative sciences to pursue interests in careers within the biomedical research workforce by providing short-term exposure to, and involvement in, the health-related sciences. The training should be of sufficient depth to enable the trainees, upon completion of the program, to have a thorough exposure to the principles underlying the conduct of biomedical research. This Notice of Funding Opportunity (NOFO) does not allow Trainees to lead an independent clinical trial, but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor.

Synopsis	This Notice of Funding Opportunity (NOFO) invites applications for P30 Cancer Center Support Grants (CCSGs) to support NCI-Designated Cancer Centers. CCSGs support three types of Cancer Centers: 1) Comprehensive Cancer Centers, which demonstrate reasonable depth and breadth of research activities in each of three major areas: basic laboratory; clinical; and prevention, control and population-based research, and which have substantial transdisciplinary research that bridges these scientific areas; 2) Clinical Cancer Centers, which are primarily focused on basic laboratory; clinical; and prevention, cancer control, and population-based research; or some combination of these areas; and 3) Basic Cancer Centers, which focus on basic laboratory research. The purpose of all types of NCI-Designated Cancer Centers is to capitalize on all institutional cancer research capabilities, integrating meritorious research into a single transdisciplinary research enterprise across all institutional boundaries. Cancer Centers supported through this NOFO are expected to serve as major sources of discovery of the nature of cancer and of development of more effective approaches to prevention, diagnosis, and therapy; to contribute significantly to the development of Shared Resources that support research; to collaborate and coordinate their research efforts with other NCI-funded programs and investigators; and to disseminate research findings for the benefit of the community.

---------	---------------	--------------	----------------	---------------	----------------

the biomedical research community in a variety of research areas on a local, regional, and national basis. The goal of projects supported by this NOFO is to provide research resources that facilitate optimization and enhancement of scientific rigor, transparency, and experimental reproducibility of biomedical research. Proposed Animal and Biological Material Resource Centers must have broad application to multiple NIH Institutes or Centers (ICs) to align with the ORIP's NIH-wide mission (<https://orip.nih.gov/about-orip>). This funding opportunity is designed to support both continuation of existing resources and to develop new ones when appropriate. Of special interest of the announcement is a requirement of the Center's close coordination with efforts to develop new approach methodologies (NAMs) that complement traditional animal-based research. These include cell culture, organoids, computational models, and microphysiological systems. Applied Research Component should include studies to generate comparative data to increase applicability of NAMs and promote integration of the most predictive human disease models. Prior to preparing an application, all applicants are strongly encouraged to consult with Scientific/Research staff to be advised on appropriateness of the intended resource plans for this program, competitiveness of a potential application, and ORIP's program priorities.

133394	RFA-OD-25-010--Resource-Related Research Projects for Development of Models and Related Materials for Studying Human Health and Diseases (R24 Clinical Trials Not Allowed)	National Institutes of Health/DHHS	RFA-OD-25-010	28-Sep-2026	Not Specified

Synopsis	The Office of Research Infrastructure Programs (ORIP) encourages grant applications aimed at developing, characterizing or improving research models of human health and diseases; developing biology based new approach methodologies (NAMs) applicable to human health and diseases; or improving access to information about or generated from the use of models of human disease. The models, including NAMs, and related biological materials developed must be broadly applicable to the scientific interests of two or more NIH Institutes or Centers (ICs) and must evaluate diseases and processes that impact multiple organ systems in order to align with the ORIP's NIH-wide mission and programs. Applications must describe the need for and the potential impact of the proposed resources on the research community across a range of scientific disciplines supported by multiple NIH ICs. Applications to develop

Deadline Dates (ALL) 18-Sep-2026

Synopsis This Notice of Funding Opportunity (NOFO) is one of three NOFOs for the National Cancer Institute (NCI) Community Oncology Research Program (NCORP). NCORP is designed to enhance generalizability and dissemination of clinical trial and other human subject research study results through accrual in a variety of community settings. The purpose of NCORP is to engage cancer patient populations, those at risk of cancer, and organizations in rigorous studies focused on cancer control, prevention, treatment and care delivery. NCORP is a community-based research network that: Designs and conducts clinical trials and other human subject studies for adults and children in cancer control, prevention, screening, and care delivery, as well as quality-of-life studies embedded within treatment trials; Enhances patient and provider access to treatment and imaging trials conducted under the National Clinical Trials Network (NCTN); NCORP will support the following components that will be individually awarded through the respective Request for Applications (RFAs) indicated below: NCORP Research Bases (UG1 Clinical Trials Required)(covered by this NOFO); NCORP Community Sites (UG1 Clinical Trials Not Allowed); and NCORP Academic Community Sites (UG1 Clinical Trials Not Allowed). NCORP Research Bases will serve as the program's research hubs and are expected to: Provide an established organizational structure, with scientific and statistical leadership for developing, implementing, and analyzing multi-institutional cancer control, prevention, and care delivery (CCP&CD) clinical research, as well as quality-of-life studies embedded in treatment and imaging studies. Assume responsibility for study operations and data management, including efficient protocol development; compliance with Food and Drug Administration (FDA) and Office of Human Research Protections (OHRP) regulatory and participant protection requirements; auditing; training; quality assurance; and support to Community Sites and Academic Community Sites. Be based at institutions with comprehensive cancer clinical research expertise (e.g., NCI-designated Cancer Center, or healthcare research organization - including NCI's National Clinical Trials Network (NCTN) Group Operations Centers, or a cancer foundation associated with a NCTN Group).

NIH Funding Opportunities Due: Sept 2026

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

Deadline Dates (ALL) 18-Sep-2026

Synopsis This Notice of Funding Opportunity (NOFO) is one of three NOFOs for the National Cancer Institute (NCI) Community Oncology Research Program (NCORP). NCORP is designed to enhance generalizability and dissemination of clinical trial and other human subject research study results through accrual in a variety of community settings. The purpose of NCORP is to engage cancer patient populations, those at risk of cancer, and organizations in rigorous studies focused on cancer control, prevention, treatment and care delivery. NCORP is a community-based research network that: Designs and conducts clinical trials and other human subject studies for adults and children in cancer control, prevention, screening, and care delivery, as well as quality-of-life studies embedded within treatment trials; Enhances patient and provider access to treatment and imaging trials conducted under the National Clinical Trials Network (NCTN) NCORP will support the following components that will be individually awarded through the respective Request for Applications (RFAs) indicated below: NCORP Research Bases (UG1 Clinical Trials Required); NCORP Community Sites (UG1 Clinical Trials Not Allowed)(covered by this NOFO); and NCORP Academic Community Sites (UG1 Clinical Trials Not Allowed). The NCORP Community Sites is a healthcare system, a consortium of healthcare systems, or a consortia of community hospitals and/or oncology practices, public hospitals, and/or health care centers that can enhance the representativeness of participants accrued to cancer control, prevention, treatment and care delivery clinical trials and other human subjects research conducted through NCORP and NCTN.

	Deadline Dates (ALL)	25-Sep-2026			
	Synopsis	This funding opportunity announcement (FOA) encourages grant applications that support the activities of the National Primate Research Centers (NPRCs). Nonhuman primates (NHPs) are most closely related to humans, both physiologically and genetically. Therefore, NHPs are critical animal models for basic and translational research aimed at understanding human biology, both in normal and diseased states. Proper husbandry and management of NHPs require specialized physical and intellectual resources, which are most effectively and economically provided in centralized primate centers, the resources of which are made available to investigators on a national basis. The NPRCs provide these resources to investigators/grantees who utilize NHPs in biomedical research and thereby complement and help enable the missions of the NIH Institutes and Centers.

	Synopsis	The National Institutes of Health (NIH) seeks to advance its mission by maintaining strong, productive, and secure international research collaborations in support of the NIH mission. The NIH Collaborative International Research Project (Parent Announcement) supports international research collaborations. This opportunity specifically implements an award structure of prime domestic awards with independent foreign awards that are linked to the prime. This structure provides NIH with oversight capacity for international collaborations, and allows NIH to track international funding, as identified in NOT-OD-25-104. This funding opportunity is specifically designed for NIH to support funded international collaborations between a domestic prime organization and foreign organizations. This NOFO should not be used for foreign consultants, purchasing unique equipment or supplies from foreign vendors, foreign collaborations that do not involve NIH funding, or any other foreign component that would not result in a foreign subaward. All collaborative international research project applications must include at least 1 international subproject. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes, Centers and Offices (ICOs) based on their scientific missions. The application will be evaluated as a whole, and the international subproject(s) will be evaluated on whether the project presents special opportunities for furthering research programs through the use of unusual talent, resources, populations, or environmental conditions in other countries that are not readily available in the United States or that augment existing United States resources, and whether the proposed project has specific relevance to the mission and objectives of the ICO and has the potential for significantly advancing the health sciences in the United States.

	Synopsis	Introduction The National Institute of Allergy and Infectious Diseases (NIAID), National Institutes of Health (NIH), of the Department of Health and Human Services (DHHS) supports research related to the basic understanding of microbiology and immunology leading to the development of vaccines, therapeutics, and medical diagnostics for the prevention, treatment, and diagnosis of infectious and immune-mediated diseases. NIAID supports a robust program in basic immunology that includes detailed analyses of human immune responses to pathogenic infections and/or vaccines. NIAID also has a key role in basic, translational and clinical studies to further the understanding of			

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

Mycobacterium tuberculosis infection and disease in people living with or without HIV. Furthermore, NIAID provides several resources to the scientific community including testing services of therapeutics, animal models, reagents for research to support biomedical drug, vaccines and diagnostics research. The NIAID Divisions of AIDS (DAIDS); Allergy Immunology and Transplantation (DAIT) and Microbiology and Infectious Diseases (DMID) have a joint requirement for the continued support of the Immune Mechanisms of Protection against Mycobacterium tuberculosis center (IMPAC-TB) program to accelerate TB vaccine development through characterization of protective tissue-specific and systemic immune responses that prevent or contain Mtb infection and the advancement of tools and resources to support TB vaccine development. The objective of the IMPAC-TB program renewal is to address these knowledge gaps and accelerate TB vaccine development by supporting research that further characterizes both tissue-specific and systemic protective immune responses, that prevent or contain Mtb infection, and furthers the advancement of tools and resources that facilitate TB vaccine development (e.g., biological models and in vitro systems, computational and modeling platforms). This program will continue to support the comprehensive understanding of protective immunity to Mtb and the impact of HIV/SIV infection on responses to Mtb infection and TB vaccines. This solicitation will require the use of human samples and/or clinical studies, at least one animal model, and computational data integration and modeling for cross-comparative analyses of the human and animal studies. These requirements are in alignment with NIH's initiative to prioritize human-based research (NIH Funding Announcements to Align with NIH Initiative to Prioritize Human-based Research | Grants & Funding). In addition, investigators may consider using new approach methods (NAMS) such as organoid or other ex vivo systems to assess human immunity to Mtb or TB vaccines. This program will help identify signatures associated with risk or protection from disease/infection and identify and evaluate protective antigens/immune epitopes. The identification of immune epitopes within the IMPAC-TB program is complementary to the DAIT Immune Epitope Discovery programs, and NIAID Program will foster cross-collaborative activities. In addition, the initiative will support translation of knowledge gained about tissue-specific immune responses to advance vaccine approaches (including mucosal vaccine approaches). IMPAC-TB will support the refinement of fit-for-purpose animal models for testing vaccine candidates targeting different stages of TB disease and emerging technologies such as tissue-based models, and computational modeling for cross-species analyses. Clinical research will also be supported through clinical cohorts or clinical trials using novel vaccine candidates and will enable backtranslation to animal models. To facilitate cross-contract collaborative studies and activities, each contractor will set aside from their individual budget, \$300,000/year in total costs starting in years two through five of the contracts. These funds will be used to support small-scale studies and/or other activities. Do not propose cross-contract collaborative studies/activities in the proposal. The cross-contract collaborative studies will be proposed starting in year two of the contract by each IMPAC-TB contractor. The proposed cross-contract collaborative studies will be evaluated by NIH Program staff, the PI(s) of each IMPAC-TB contract, and the External Scientific Advisory Group (ESAG).

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

The final selection of the cross-contract collaborative study will be made by NIH. It is anticipated that two to three cost reimbursement, completion type contracts will be awarded with performance beginning about September 1, 2027. NIAID estimates that the average annual total cost (direct and indirect costs combined) for the entire program will be \$10.5 million. However, it is anticipated that the total cost for each award may vary depending upon the scope of the project and the technical objectives and will be approximately \$5 million total costs per year. The length of time for which funding is requested should be consistent with the nature and complexity of the proposed research and should not exceed five years. Any responsible offeror may submit a proposal which shall be considered by the Agency. This BAA will be available electronically on/about June 2, 2026, and may be accessed through SAM.gov. This notice does not commit the Government to award a contract. No collect calls will be accepted. No facsimile transmissions will be accepted. For this solicitation, the NIAID requires proposals to be submitted via the NIAID electronic Contract Proposal Submission (eCPS) website. Submission of proposals by facsimile or e-mail is not acceptable. For directions on using eCPS, go to the website <https://ecps.nih.gov/> and then click on "How to Submit."

25-Sep-2026

Synopsis

Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) solicits applications for research on developing a comprehensive and cohesive understanding of cancer metastasis. Towards this goal, the NCI will support U54 Specialized Centers that together will continue to serve as the hub of the Metastasis Research Network (MetNet). Each MetNet Center should propose an overarching scientific theme that will be pursued through two or three scientific inter- and multidisciplinary basic research projects. The projects should use integrative system level approaches to elucidate and integrate a mechanistic understanding of the non-linear, dynamic, and emergent processes in metastasis. Overarching themes should encompass the interplay between at least two central elements in the metastatic process such as early dissemination, cellular, soluble and/or physical microenvironment crosstalk, dormancy, or mechanisms of responses by metastatic cells to therapies. Studies on all types of cancer are welcome, including rare and pediatric metastatic cancers. Research proposed by MetNet Centers is expected to advance our

	Deadline Dates (ALL)	25-Sep-2026			
	Synopsis	Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) invites applications for P50 Research Center Grants for Specialized Programs of Research Excellence (SPORE). Based on the research proposed, applications may be jointly funded with the National Institute of Dental and Craniofacial Research (NIDCR). The program will fund P50 SPORE grants to support state-of-the-art investigator-initiated translational research that will contribute to improved prevention, early detection, diagnosis, and treatment of an organ-specific cancer or a highly related group of cancers. For the purpose of this NOFO, a group of highly related cancers are those that are derived from the same organ system, such as gastrointestinal, neuroendocrine, head and neck, and other cancers. Other programmatically appropriate groups of cancers may include those centered around a common biological mechanism critical for promoting tumorigenesis and/or cancer progression in organ sites that belong to different organ systems. For example, a SPORE may focus on cancers caused by the same infectious agent or cancers promoted and sustained by dysregulation of a common signaling pathway. In addition, a SPORE may focus on cross-cutting themes such as pediatric cancers or cancer health disparities. The research supported through this program must be translational and must stem from research on human biology using cellular, molecular, structural, biochemical, and/or genetic experimental approaches. SPORE projects must have the goal of reaching a translational human endpoint within the project period of the grant.			
135685	NIH Small Business Innovation Research (SBIR) Phase IIB Strategic Breakthrough Award (Parent [R44] Clinical Trial Optional)	National Institutes of Health/DHHS	PA-27-101	05-Sep-2026	Not Specified

The Phase IIB Strategic Breakthrough provides previously funded NIH SBIR or STTR projects additional support for later-stage research and development (R&D).				
128985	Development of Psychosocial Therapeutic and Preventive Interventions for Mental Disorders (R61/R33 Clinical Trial Required)	National Institutes of Health/DHHS	PAR-25-182	15-Sep-2026 [Optional][LOI/Pre-App]	Not Specified
	Contact Name Alexander Talkovsky, Ph.D. Contact Telephone 301-827-7614 Contact Email alexander.talkovsky@nih.gov Sponsor Website Program URL Link to program URL Deadline Dates (ALL) 15-Sep-2026 [Optional][LOI/Pre-App], 15-Oct-2026 , 18-Jan-2027 [Optional][LOI/Pre-App], 17-Feb-2027 , 16-May-2027 [Optional][LOI/Pre-App], 15-Jun-2027 , 15-Sep-2027 [Optional][LOI/Pre-App], 15-Oct-2027 Synopsis NIMH solicits clinical trial applications through a series of notice of funding opportunities (NOFOs) that cover the intervention development pipeline, from first-in-human, early testing of new interventions, confirmatory efficacy trials, through to effectiveness trials The purpose of this NOFO is to encourage pilot research developing and testing innovative psychosocial intervention approaches in which the target and/or intervention strategy is novel. Consistent with NIMH's experimental therapeutics approach, this NOFO is intended to speed the translation of emergent research on mechanisms and processes underlying mental disorders into promising novel psychosocial preventative or therapeutic interventions. Targets may include, but are not limited to, potentially modifiable behavioral, cognitive, affective, and/or interpersonal factors or processes, neural circuits or neural activity subserving specific behaviors or cognitive processes, and/or other neurobiological mechanisms. Novel psychosocial interventions may be standalone interventions or novel augmentations to efficacious interventions for which there is an empirical rationale by which the				

NIH Funding Opportunities Due: Sept 2026

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	augmentation (and corresponding target) is expected to substantially enhance outcomes. Support will be provided for up to two years (R61 phase) for preliminary milestone-driven testing of a novel intervention's impact on a target process or mechanism associated with mental disorder risk, causation, or maintenance (target engagement). Up to 3 years of additional support (R33 phase) will be provided for studies with findings that meet the "go/no-go" milestones embedded in the R61 phase. The R33 phase is intended to support the replication of target engagement and to test whether engaging the intervention target/mechanism mediates changes in clinical outcomes. Ultimately, trials must be designed so that results, whether positive or negative, will provide information of high scientific utility and will support "go/no-go" decisions about further development and/or testing of the intervention. Applicants pursuing other stages of the clinical trial pipeline should consider one of the companion NOFOs listed above.				
136023	RFA-DK-27-119 -- Silvio O. Conte Digestive Diseases Research Core Centers (P30 - Clinical Trial Optional)	National Institutes of Health/DHHS	RFA-DK-27-119	29-Sep-2026	3,750,000 USD
	Contact Name Contact Telephone 301-451-3759 Contact Email NIDDK_DD@nih.gov Sponsor Website Link to sponsor website Program URL Link to program URL Deadline Dates (ALL) 29-Sep-2026 , 10-Feb-2027 Synopsis This Notice of Funding Opportunity (NOFO) invites applications for Silvio O. Conte Digestive Diseases Research Core Centers (DDRCCs). The DDRCCs are part of an integrated program of digestive and liver diseases research support provided by the NIDDK. The purpose of this Centers program is to bring together basic and clinical investigators to enhance communication, collaboration, and effectiveness of ongoing research related to digestive and/or liver diseases within the NIDDK's mission. DDRCCs are based on the core concept, whereby shared resources aimed at fostering productivity, synergy, and new research ideas among the funded investigators are supported in a cost-effective manner. Each proposed DDRCC must be organized around a central theme that reflects the focus of the digestive or liver diseases research of the Center members. The central theme must be within the primary mission of the NIDDK, and not thematic areas for which other NIH Institutes or Centers are considered the primary source of NIH funding.				
136076	Limited Competition: Centers of Biomedical Research Excellence: Expansion/Sustainability Phases (COBRE-E/S) (P30 - Clinical Trial Not Allowed)	National Institutes of Health/DHHS	PAR-27-055	25-Sep-2026	7,500,000 USD

Synopsis	The Institutional Development Award (IDeA) program supports biomedical research capacity building in states that have historically received low levels of NIH funding. The Centers of Biomedical Research Excellence: Expansion/Sustainability Phases (COBRE-E/S) Notice of Funding Opportunity (NOFO) supports the expansion and sustainability of biomedical research centers in IDeA-eligible institutions. These centers will focus on building research capacity in broad scientific areas of strategic importance for the institutions. The goal of COBRE-E is to expand research capacity by growing the institutional faculty base and supporting research projects and core facilities in the new area. The objective of COBRE-S is to sustain the infrastructure by continuing the growth of the faculty base and consolidating research cores. This is a Notice of Funding Opportunity (NOFO) for a Limited Competition that will invite application(s) from eligible organization(s) to apply. Please see Section III. Eligibility for additional information. In accordance with NIH standard peer-review processes, the application(s) will be peer-reviewed, and only meritorious application(s) will be considered.

	Synopsis	The NIH Small Research Grant Program supports small research projects that can be carried out in a short period of time with limited resources. This program supports different types of projects including pilot and feasibility studies; secondary analysis of existing data; small, self-contained research projects; development of research methodology; and development of new research technology. This Funding Opportunity Announcement does not accept applications proposing clinical trial(s).

131736	Blueprint MedTech Translator (UG3/UH3 - Clinical Trial Optional)	National Institutes of Health/DHHS	PAR-25-383	28-Sep-2026	Not Specified
	Contact Name Nick Langhals, PhD Contact Telephone 301-496-1779 Contact Email Blueprint-MedTech@nih.gov Sponsor Website Program URL Link to program URL Deadline Dates (ALL) 28-Sep-2026 , 28-Jan-2027 , 28-May-2027 , 28-Sep-2027 , 28-Jan-2028 Synopsis This Notice of Funding Opportunity (NOFO) is to encourage applications from investigators to pursue translational activities and clinical studies to advance the development of medical devices to prevent, monitor, diagnose, and treat disorders within the missions of the participating NIH institutes and centers, as well as the NIH Brain Research through Advancing Innovative Neurotechnologies (BRAIN) and The Helping to End Addiction Long-term (HEAL) Initiatives. Activities supported in this program include implementation of clinical prototype devices, non-clinical safety and efficacy testing, design verification and validation activities leading to either a submission of an Investigational Device Exemption (IDE) to the U.S. Food and Drug Administration (FDA) - for a Significant Risk (SR) study - or an Institutional Review Board (IRB) approval - for a Non-Significant Risk (NSR) study. Additional activities also include subsequent clinical studies, feasibility or pivotal trials, as appropriate. Check the relevant institute interest statements and websites for additional limitations and clinical study requirements. The clinical study is expected to provide information about the device function or final design that cannot be practically obtained through additional non-clinical assessments (e.g., bench top or animal studies) due to the novelty of the device or its intended use. This NOFO is a milestone-driven

cooperative agreement program and will involve participation of NIH program staff in negotiating the final project plan before award and monitoring of research progress. Participants in Blueprint MedTech receive funding for all activities to be conducted in their own organization. In addition, applicants will collaborate with NIH-funded resource and service providers to receive assistance with specialty areas including design optimization; prototype development and pilot-scale manufacturing; bench and safety testing; commercialization planning; legal and intellectual property protection; large animal testing; biocompatibility and sterilization testing; clinical study advising and support; and regulatory, quality system, and reimbursement support. Individuals, institutions, or businesses developing their own devices or that already have established collaborations with device manufacturers are welcome to apply directly to this NOFO or any of the companion opportunities. For more information, see the Blueprint MedTech website: <https://neuroscienceblueprint.nih.gov/neurotherapeutics/blueprint-medtech>

Synopsis	The purpose of this Notice of Funding Opportunity (NOFO) is to encourage investigators to pursue translational activities and small clinical studies to advance the development of low risk therapeutic and diagnostic devices for disorders that affect the nervous or neuromuscular systems. Activities supported in this program include implementation of clinical prototype devices, non-clinical safety and efficacy testing, design verification and validation activities, obtaining Institutional Review Board (IRB) approval for a Non-Significant Risk (NSR) study (R61 phase), as well as a subsequent small clinical study (R33 phase). The clinical study is expected to provide information about the device function or final design that cannot be practically obtained through additional non-clinical assessments (e.g., bench top or animal studies) due to the novelty of the device or its intended use. This NOFO utilizes an Exploratory/Developmental Phased Award and will involve participation of NIH program staff in negotiating the final project plan before award and monitoring of research progress. Transition from the R61 to the R33 phase is contingent upon the successful completion of proposed milestones.

	Program URL Link to program URL Deadline Dates (ALL) 07-Sep-2026 , 05-Oct-2026 , 07-Jan-2027 , 05-Feb-2027 , 07-May-2027 Synopsis The Office of Disease Prevention (ODP) and participating National Institutes of Health (NIH) Institutes, Centers, and Offices (ICOs) are issuing this NOFO seeking applications to test innovative approaches to implementing SBIRT/P for alcohol, tobacco, and other drugs (ATOD) use and misuse in adult populations that experience health disparities. SBIRT/P, (a term used for purposes of this funding announcement), involves screening individuals for risk of ATOD use and misuse, briefly intervening with a conversation about harmful substance use, and referring individuals for treatment or preventive services, as needed. Proposed research should include prospective tests of SBIRT/P and should leverage collaborations with healthcare and community partners Specific research interests of participating NIH ICOs are detailed within.				
128630	Natural History of Disorders Screenable in the Newborn Period (R01 Clinical Trial Optional)	National Institutes of Health/DHHS	PAR-25-227	06-Sep-2026 [Optional][LOI/Pre-App]	Not Specified
	Contact Name Melissa Parisi, MD, PhD Contact Telephone 301-435-6880 Contact Email parisima@mail.nih.gov Sponsor Website Program URL Link to program URL Deadline Dates (ALL) 06-Sep-2026 [Optional][LOI/Pre-App], 05-Oct-2026 , 06-Jan-2027 [Optional][LOI/Pre-App], 05-Feb-2027 , 06-May-2027 [Optional][LOI/Pre-App], 05-Jun-2027 , 06-Sep-2027 [Optional][LOI/Pre-App], 05-Oct-2027 Synopsis This Notice of Funding Opportunity (NOFO) encourages applications that will expand knowledge of the natural history of disorders that currently are, or may become, part of statewide newborn screening programs. A comprehensive understanding of the natural history of a condition is necessary to facilitate appropriate interventions for infants identified by newborn screening. Characterization of the sequence and timing of symptom development provides information crucial for developing targeted, age-appropriate treatments and for establishing a baseline against which to assess novel interventions. In addition, for some conditions, establishment of genotype-phenotype correlations may facilitate prediction of the clinical course; for others, identification of modifying genetic, epigenetic, or environmental factors may enhance understanding of clinical outcomes. Comprehensive data on the natural history of a condition will facilitate the field's ability to: 1) identify the underlying biological mechanisms; 2) understand the genetic and clinical

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Deadline Dates (ALL) 07-Sep-2026 , 12-Oct-2026 , 07-Jan-2027 , 12-Feb-2027 , 07-May-2027 Synopsis The primary purpose of the NIH Mentored Clinical Scientist Research Career Development Awards (K08) program is to prepare qualified individuals for careers that have a significant impact on the health-related research needs of the Nation. This program represents the continuation of a long-standing NIH program that provides support and "protected time" to individuals with a clinical doctoral degree for an intensive, supervised research career development experience in the fields of biomedical and behavioral research, including translational research. This Parent Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion NOFO. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions.

No funding will be provided under this NOFO. The genomic data and related phenotypic data will be deposited in a public NIH-designated controlled-access database such as the database for Genotypes and Phenotypes (dbGaP) and NHLBI's BioData Catalyst (BDC). The overall goal is to move from simply cataloging genetic associations to understanding how genetic factors contribute to HLBS diseases at the molecular and cellular levels. This transformation will help move TOPMed from genetic Map to Mechanism with potential applications of AI and ML tool sets where possible, enabling functional genomics research that will accelerate mechanistic personalized medicine.

	Synopsis	This Notice of Funding Opportunity (NOFO) encourages applications for NIGMS Biomedical Technology Optimization and Dissemination (BTOD) Centers to support late-stage technology optimization and sustainable dissemination of the technologies to the wider biomedical research community. A BTOD Center should be at the leading edge of its field with respect to both technology optimization and engagement with relevant research communities. BTOD projects must address biomedical research areas within the NIGMS mission. Potential applicants are strongly encouraged to consult with NIGMS staff about adherence of their proposed research strategy to the Institute's goals and mission and its responsiveness to this NOFO.			
136211	Seed Instrumentation Support (SIS) Program (S10 Clinical Trial Not Allowed)	National Institutes of Health/DHHS	PAR-27-021	25-Sep-2026	400,000 USD

This NOFO intends to build upon NIA's substantial investments to foster the development of clinician-scientists across specialties and disciplines. The specific goals of this initiative are to convey scientific and research knowledge on aging research; foster networking and collaboration between clinician-scientist leaders in aging research and clinician-investigators across specialties and disciplines who wish to focus on aging research; provide mentoring and career development support for emerging clinician-scientists committed to pursuing aging research in their clinical specialty or discipline; and advance interdisciplinary research projects in aging. Ultimately, the Clin-STAR CC is intended to provide a multi-faceted national research platform leading to improved patient-centered care for older adults across specialties and disciplines.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	This Notice of Funding Opportunity (NOFO) invites eligible academic or research institutions to apply for funding support to purchase latest scientific equipment that will enhance and modernize research-supporting operations of existing shared biomedical research facilities. Targeted are laboratory research core facilities, animal research facilities, and other similar shared-use research spaces. The goal of this NOFO is to strengthen research-auxiliary activities of biomedical research facilities and to enhance the efficiency of their operations. The NOFO does not support the purchase of scientific research instruments or their components, nor components of building-level infrastructure equipment that indirectly support research activities.			
124639	Utilizing Equipment to Study Environmental Extrinsic Factors and Enhance Rigor and Reproducibility of Animal Research (R24 Clinical Trials Not Allowed)	Office of Research Infrastructure Programs/NIH/DHHS	PAR-24-167	25-Sep-2026	1,600,000 USD
	Contact Name	Monika Aggarwal, PhD			
	Contact Telephone	301-435-0777

	Sponsor Website				
	Program URL	Link to program URL			
	Deadline Dates (ALL)	25-Sep-2026			
	Synopsis	The Office of Research Infrastructure Programs (ORIP) invites grant applications from core facilities, resource centers, animal vivaria, or individual investigators of other shared resources to systematically study the roles of critical environmental extrinsic factors in biological, behavioral, and treatment studies using animal model species, with the objective of enhancing the rigor and reproducibility of animal research. The research area must be broadly applicable to the scientific interests of two or more NIH Institutes or Centers (ICs) and must evaluate the biological processes that impact multiple organ systems in order to align with the ORIP's NIH-wide mission and programs. The program supports the acquisition or update of modern equipment for measuring, monitoring, recording, and reporting environmental, biological or biobehavioral variables. The equipment requested must be capable of recording and reporting multiple parameters simultaneously.			
123616	Limited Competition: Specific Pathogen Free Macaque Colonies to Support HIV/AIDS Research (U42 Clinical Trial Not Allowed)	Office of Research Infrastructure Programs/NIH/DHHS	PAR-24-129	07-Sep-2026	Not Specified
	Contact Name	Biao Tian, PhD			

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Contact Telephone 301-594-5367 Contact Email biao.tian@nih.gov Sponsor Website Program URL Link to program URL Deadline Dates (ALL) 07-Sep-2026 , 07-Jan-2027 Synopsis The purpose of this Notice of Funding Opportunity (NOFO) is to provide continuing support for specific pathogen-free (SPF) macaque colonies previously funded under the auspices of PAR-21-089 and PAR-18-669 that support Human Immunodeficiency Virus (HIV)/Acquired Immunodeficiency Syndrome (AIDS) research. Breeding colonies are essential to sustain appropriate SPF macaques for research related to HIV/AIDS. Pedigree SPF macaques are free of certain viruses, which may confound the results of HIV/AIDS-related investigations or present a risk to the personnel who care for the animals. The SPF macaques are genetically characterized for major histocompatibility complex (MHC) class I types, because MHC class I genotypes have large effects on macaque immune responses to Simian Immunodeficiency Virus (SIV) that can induce AIDS in nonhuman primates (NHPs) and on human immune responses to HIV.				
128780	Development of Animal Models and Related Biological Materials for Research (R21 Clinical Trial Not Allowed)	Office of Research Infrastructure Programs/NIH/DHHS	PAR-25-273	07-Sep-2026	275,000 USD
	Contact Name Sige Zou, Ph.D. Contact Telephone 301-435-0749 Contact Email sige.zou@nih.gov Sponsor Website Program URL Link to program URL Deadline Dates (ALL) 07-Sep-2026 , 16-Oct-2026 , 07-Jan-2027 , 16-Feb-2027 , 07-May-2027 , 16-Jun-2027 , 07-Sep-2027 , 16-Oct-2027 , 07-Jan-2028 Synopsis This notice of funding opportunity (NOFO) encourages innovative research to develop, improve, characterize, and preserve animal models as well as animal model related biological materials, technologies, and new approach methodologies (NAMs) for studies relevant to human health and disease. This NOFO also seeks projects aimed at improving the diagnosis and control of diseases that could confound or interfere with animal use in biomedical research. The proposed project must have broad applicability to multiple NIH Institutes or Centers (ICs) to align with

	research disciplines. The Foundation-wide Mid-scale Research Infrastructure opportunity is intended to provide NSF with an agile, Foundation-wide process to fund experimental research capabilities in the mid-scale range between MRI and Major Multi-user Facilities.				
129255	Security, Privacy, and Trust in Cyberspace (SaTC 2.0)	National Science Foundation	25-515	28-Sep-2026	Not Specified
	Contact Name Contact Telephone Contact Email Sponsor Website Program URL Deadline Dates (ALL) Synopsis Daniela A. Oliveira 703-292-4352 satc@nsf.gov Link to program URL 28-Sep-2026 , 25-Jan-2027 The Security, Privacy, and Trust in Cyberspace (SaTC 2.0) program aims to build trust in global cyber ecosystems. Trust is the core tenet of this program and, for the purposes of this solicitation, is broadly defined to include our confidence in the security, privacy, and resilience of cyberspace, particularly in the face of malicious intent. Achieving this level of confidence in cyberspace requires not only understanding the vulnerabilities in a system that could be exploited and how they can be addressed, but also understanding the social and technical dimensions of trust in cyber systems, along with the educational efforts needed to increase public awareness of risks in cyberspace, and building a well-trained corps of privacy and security professionals.

	and engineering-focused research products into safe and sustainable ecosystems that address national and societal challenges. Open-source tools such as software, hardware, machine learning models, languages, and data platforms are designed to be shared as they are publicly-accessible and modifiable. These tools spark innovation in critical fields as varied as artificial intelligence (AI) and cloud computing, banking, healthcare, research, education, next-gen manufacturing, mobility, and National security (including cybersecurity). PESOSE supports the creation of managing organizations for these ecosystems, ensuring strong governance, distributed development, and broad user communities across academia, industry, and government. PESOSE also supports enhancements to the safety, security, and privacy of Open-Source Ecosystems (OSE) by addressing significant vulnerabilities, both technical and socio-technical, to improve the resistance of the ecosystem against threats. This solicitation seeks three types of proposals, allowing teams to propose specific activities to: 1) scope and plan the establishment of an OSE, 2) establish and expand a sustainable OSE based on a robust, promising open-source product that meets an emergent societal or national need, and 3) improve the safety, security, and privacy of an existing OSE and its products.

	Synopsis	Plasma science is a transdisciplinary field of research where fundamental studies in many disciplines, including plasma physics, plasma chemistry, materials science, and space science, come together to advance knowledge for discovery and technological innovation. The primary goal of the ECosystem for Leading Innovation in Plasma Science and Engineering (ECLIPSE) program is to identify and capitalize on opportunities for bringing fundamental plasma science investigations to bear on problems of societal and technological need within the scope of science and engineering supported by the participating NSF programs. The ECLIPSE meta-program has been created to foster an inclusive community of scientists and engineers, an ecosystem spanning multiple NSF Directorates, in the pursuit of translational research at the interface of fundamental plasma science and technological innovation. The ECLIPSE program builds on the long history of NSF leadership in supporting multi-disciplinary research in plasma science and engineering, and is intended to enhance organizational unity within NSF, and potentially with other funding agencies, in considering proposals and supporting projects that may otherwise struggle to find a natural home within the existing hierarchy of Directorates, Divisions, and programs within the Foundation.

NSF Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

on opportunities for major scientific and engineering breakthroughs through new computational and data-analysis approaches and best practices. The CDS&E meta-program supports projects that harness computation and data to advance knowledge and accelerate discovery above and beyond the goals of the participating individual programs. The intellectual drivers may be in an individual discipline or cut across more than one discipline in various Divisions and Directorates. A CDS&E proposal should enable and/or utilize the development and adaptation of advances in research and infrastructure in computational and data science. The CDS&E meta-program encourages research that pushes the envelope of science and engineering through computation and data, welcoming proposals in any research area supported by the participating divisions. A proposal may address topics that develop or enable interactions among theory, computing, experiment, and observation to achieve progress on hitherto intractable science and engineering problems. Areas of emphasis for CDS&E vary by program.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

contains four different funding levels designed to support major (but not all) stages of research that will lead to clinical application. Each level specifies a distinct research scope. This program announcement discusses the Breakthrough Award Level 3. Distinctive Features: For this funding mechanism, small-scale clinical trials are allowed but not required. Applications proposing projects with a clinical trial should be submitted under the Clinical Trial option. The research team must include two or more breast cancer consumer advocates. This funding mechanism allows for a single Principal Investigator (PI), or two partnering PIs referred to as the Initiating PI and the Partnering PI. For the Partnering PI Option (PPIO), only the Initiating PI will submit a pre-application, but both PIs will need to submit at the full application stage. Be advised, failure to submit all associated (Initiating and Partnering PI) applications by the deadline may result in administrative withdrawal. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$12.6 million (M) to fund approximately two Breakthrough Award Level 3 applications with total cost caps of \$5.6M for applications with a single PI or \$7.0M if applying under the PPIO. The maximum period of performance is four years. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.

	formal proposals will be accepted by invitation only. While white papers will be considered if received prior to 6:00pm Eastern Standard Time (EST) on 10 JUL 2030, the following submission dates are suggested to best align with projected funding: FY26 by 30 Dec 2025 FY27 by 30 Sep 2026 FY28 by 30 Sep 2027 FY29 by 30 Sep 2028 FY30 by 30 Sep 2029 Offerors should monitor the Contract Opportunities on the SAM website at https://SAM.gov in the event this announcement is amended. CONCISE SUMMARY OF TECHNOLOGY REQUIREMENT: Seeking to develop cyber operations prototypes for transition into operational DoD platforms to facilitate superiority in the Cyber Domain. ARA ESTIMATED FUNDING: Total funding for this ARA is approximately \$950M. Individual awards will not normally exceed sixty (60) months with dollar amounts normally ranging from \$10M to \$50M. There is also the potential to make awards up to \$99.98M. ANTICIPATED INDIVIDUAL AWARDS: Multiple Awards are anticipated. However, the Air Force reserves the right to award zero, one, or more Procurement Contracts or Other Transactions, for all, some, or none of the solicited effort based on the offeror's ability to perform desired work and funding fluctuations. There is no limit on the number of OTs that may be awarded to an individual offeror. TYPE OF INSTRUMENTS THAT MAY BE AWARDED: FAR based procurement contracts or other transactions (OT) under 10 USC 4021, 10 USC 4022 and 10 USC 4023 (previously 10 USC 4002, 2371, 10 USC 4003, 2371b and 4004, 2373) In the event that an Other Transaction for Prototype agreement is awarded as a result of this competitive ARA, and the prototype project is successfully completed, there is the potential for a prototype project to transition to award of a follow-on production contract or transaction. The Other Transaction for Prototype agreement itself will also contain a similar notice of a potential follow-on production contract or agreement. AGENCY CONTACT INFORMATION: All white paper submissions and any questions of a technical nature shall be directed to the cognizant Technical Point of Contact (TPOC) as specified below (unless otherwise specified in the technical area): ARA PROGRAM MANAGER: Tanya Macrina AFRL/RIGA 525 Brooks Rd Rome, NY 13441-4505 Telephone: (315) 330-2282 Email: afrl.riga.firehawk@us.af.mil Questions of a contractual/business nature shall be directed to the cognizant contracting officer, as specified below (email requests are preferred): Amber Buckley Telephone (315) 330-3605 Email: Amber.Buckley@us.af.mil Emails must reference the solicitation ARA number and title of the acquisition. Pre-Proposal Communication between Prospective Offerors and Government Representatives: Dialogue between prospective offerors and Government representatives is encouraged. Technical and contracting questions can be resolved in writing or through open discussions. Discussions with any of the points of contact shall not constitute a commitment by the Government to subsequently fund or award any proposed effort. Only Contracting Officers are legally authorized to commit the Government. Offerors are cautioned that evaluation ratings may be lowered and/or proposal rejected if proposal preparation (Proposal format, content, etc.) and/or submittal instructions are not followed. SEE ATTACHMENT FOR FULL ANNOUNCEMENT DETAILS.

	Synopsis	The Defense Advanced Research Projects Agency (DARPA) is issuing a Quantum Benchmarking Initiative topic (QBIT) to solicit innovative approaches addressing challenges related to quantum computing. The QBIT will examine approaches to constructing a utility-scale fault-tolerant quantum computer and computational workflows that include quantum compute steps. Proposed research should investigate approaches that enable revolutionary advances in design, engineering, testing, and evaluation of such systems. Specifically excluded is research that primarily results in evolutionary improvements to the existing state of practice. The purpose of this QBIT is to encourage new entrants to QBI, ensuring DARPA has visibility into all approaches and potential solutions. While this QBIT is not intended to solicit proposals from performers selected under prior QBI or US2QC solicitations, those performers are not precluded from submitting new proposals under this PA if they

 Deadline Dates (ALL) 01-Sep-2026

Synopsis

This notice constitutes a combined synopsis and Broad Agency Announcement (BAA) for the acquisition of research and development (R&D) in accordance with Federal Acquisition Regulation 35.016, "Broad agency announcement," as supplemented with additional information included in this notice. No other solicitation will be issued. Only the information provided in this notice is available. Requests for other forms of solicitation shall be disregarded. In support of Technical Data Management Transformation (TDMT) and supply chain resilience, the Department of Defense (DoD) has published the DoD Digital Engineering Strategy (June 2018) <https://fas.org/man/eprint/digeng-2018.pdf>; the DoD Digital Modernization Strategy (July 2019) <https://media.defense.gov/2019/Jul/12/2002156622/-1/-1/1/DOD-DIGITAL-MODERNIZATION-STRATEGY-2019.PDF>; and the Supply Chain Materiel Management Policy (March 2019) <https://www.esd.whs.mil/Portals/54/Documents/DD/issuances/dodi/414001p.pdf>. The Defense Logistics Agency (DLA) Strategic Plan (<https://www.dla.mil/Info/strategicplan/>) supports these DOD policies through five lines of effort that provide global, end-to-end supply chain solutions. The DLA Research and Development (R&D) Program Office is looking for white paper proposals that support these policies and are consistent with the scope of this BAA. Offerors are encouraged to propose innovative solutions. Consideration will be given to all approaches that enable improved processes aligning with both DoD and DLA Strategic Initiatives. This BAA will remain open for five (5) years and will have a one-time initial closing date for receipt of proposals (45 days after initial posting). The Government anticipates awarding multiple contracts to include Indefinite Delivery, Indefinite Quantity (IDIQ) contracts and definitive one-time contracts as a result of this BAA.

white papers will be considered if received prior to 1700 Eastern Standard Time (EST) on 19 Sep 2028, the following submission dates are suggested to best align with projected funding: FY24 by 15 Dec 2023 FY25 by 20 Sep 2024 FY26 by 19 Sep 2025 FY27 by 18 Sep 2026 FY28 by 17 Sep 2027 Offerors should monitor the Contract Opportunities on the SAM website at <https://SAM.gov> in the event this announcement is amended.

CONCISE SUMMARY OF

TECHNOLOGY REQUIREMENT: Seeking innovative research to develop and demonstrate an ultra-broadband radio operating above 100 GHz for future air force communications capabilities in contested spectrum environments. Collaboration is encouraged. This BAA is a follow-on to BAA FA8750-18-S-7016 entitled Terahertz (THz) Communications. BAA ESTIMATED FUNDING: Total funding for this BAA is approximately \$9.9M. Individual awards will not normally exceed 36 months with dollar amounts normally ranging from \$200K to \$4M. There is also the potential to make awards up to any dollar value as long as the value does not exceed the available BAA ceiling amount. ANTICIPATED INDIVIDUAL AWARDS: Multiple Awards are anticipated. However, the Air Force reserves the right to award zero, one, or more Procurement Contracts, Other Transactions, or assistance instruments, for all, some, or none of the solicited effort based on the offeror's ability to perform desired work and funding fluctuations. There is no limit on the number of OTs that may be awarded to an individual offeror. TYPE OF INSTRUMENTS THAT MAY BE AWARDED: FAR based Procurement contracts, DODGARS based grants and cooperative agreements or other transactions (OT) under 10 USC 4021, 10 USC 4022 and 10 USC 4023(previously 10 USC 4002, 2371, 10 USC 4003, 2371b and 4004, 2373) depending upon the nature of the work proposed. In the event that an Other Transaction for Prototype agreement is awarded as a result of this competitive BAA, and the prototype project is successfully completed, there is the potential for a prototype project to transition to award of a follow-on production contract or transaction. The Other Transaction for Prototype agreement itself will also contain a similar notice of a potential follow-on production contract or agreement. AGENCY CONTACT INFORMATION: All white paper submissions and any questions of a technical nature shall be directed to the cognizant Technical Point of Contact (TPOC) as specified below (unless otherwise specified in the technical area): BAA PROGRAM

 Deadline Dates (ALL) | 30-Sep-2026

Synopsis | Description: Finding Innovative Solutions for Test (FAST) Commercial Solutions Opening (CSO) This Commercial Solutions Opening (CSO) solicitation is issued in accordance with DoD Class Deviation 2018-00016 "DoD Commercial Solutions Opening Pilot Program." Federal Agency Name: Air Force Test Center Federal Agencies Capable of Issuing Contracts/Agreements: The FAST CSO is targeted to the Air Force Test Center (AFTC) and other associated partners in test, including the Air Force Research Laboratory (AFRL) and the Air Force Operational Test and Evaluation Center (AFOTEC). However, other organizations seeking innovative solutions to their test needs may issue Calls and subsequent awards/agreements under this CSO. Organizations outside of AFTC, AFRL, and AFOTEC can contact the Contracting Point of Contact (POC) identified within this document. CSO Number: FA9302-21-S-C001 Commercial Solutions Opening (CSO) Type: This is an open CSO with Calls. Meaning this CSO will be "amended" to issue Calls as objectives requiring innovative solutions are identified by various organizations within the defense test community. These Calls will be issued by organizations, posted on betasam.gov in separate instances, and the Calls will reference the FAST CSO. The FAST CSO will remain open for the issuance of Calls until 30 Sep 22. All contract awards or agreements made against Calls under this CSO must be made on or before 30 Sep 22. The CSO general solicitation method is a pilot program. The intent is to extend FAST should the pilot program be extended or made permanent[1]. Contracts and agreements issued against this CSO are considered "commercial" notwithstanding the definition of Commercial Item in FAR 2.101. This document is not a request

---------	---------------	--------------	----------------	---------------	----------------

for white papers or proposals. Please note, interested parties will not be reimbursed for costs associated with responding to this CSO, to include responses to Calls issued against this CSO. **Calls:** Calls will include areas of interest (AOI) defined by the organizations issuing the calls. Each call can be designed to meet the needs of the issuing organization. Descriptions of potential Call structures can be found below. Calls will include instructions to interested parties, due dates for white papers/proposal submissions, and selection criteria. **Call Structures:** **One-Step:** The one-step process is used to request full technical and cost proposals from each interested party. The proposals are evaluated in accordance with the solicitation criteria and all of a selected proposal, part of a selected proposal, or none of the proposals are selected. **Two-Step:** The two-step process is sometimes used when a large number of proposals are anticipated. Potential interested parties are invited to submit brief descriptive white papers in lieu of full proposals. The Call must state whether an unfavorable white paper evaluation will bar the interested parties from further consideration. Full proposals are requested from those interested party selected in the white paper evaluation process. When proposals are received, they are evaluated, and selection decisions are made. **Open:** This approach allows for White Paper and/or proposal submission at any time within a specified period or at any time during the Call's availability. A Call issued against the FAST CSO will be available for maximum of one year. With this approach, White Papers and/or proposals are evaluated as received. **Closed:** This approach allows for white paper and/or proposal submittals at a specified date and time as set forth within the Call. Late bid and proposal provisions (IAW FAR 52.215-1(c)(3)) are usually included in the Call. **White Paper/Proposal Submission:** White Papers and/or proposals must be submitted to the Contracting Point of Contact (POC) identified within each Call. **Solicitation Request:** White papers or Proposals are not requested at this time. White papers or proposals will be solicited via Calls. **Evaluations Factors:** The primary evaluation factors for selecting proposals for award shall be technical, importance to agency programs, and funds availability. Price shall be considered to the extent appropriate, but at a minimum, to determine that the price is fair and reasonable. Calls may add to these factors (e.g., past performance). **Debriefings:** Debriefings will be handled in accordance with FAR 52.212-1(l). The cognizant Contracting Officer for each Call will determine the best method to provide debriefings (i.e., phone call, in-person brief, or written). **North American Industry Classification System (NAICS) Code:** NAICS codes will be identified within each Call issued against this CSO. **Type of Contract/Instrument:** The government intends to award FAR Part 12, fixed price type contracts as a result of this solicitation; however, the government also reserves the right to award an Other Transaction for Prototype project pursuant to 10 USC 2371b. The government may also award follow-on production contracts related to Other Transaction for Prototype projects issued under this CSO. The government further reserves the right to award all, part, or none of the proposals received. **Estimated Program Cost:** There is no cumulative ceiling estimated for this CSO. However, individual awards are not anticipated to exceed \$100M. Should an offeror desire to submit a solution in excess of this value, the offeror shall contact both the cognizant FAST CSO Contracting Officer and the Call Contracting Officer for the stated area of interest.

---------	---------------	--------------	----------------	---------------	----------------

Detailed estimated cost or funding profiles may be included in Calls and amendments for Open Periods. Anticipated Number of Awards: It is anticipated that organizations will award multiple awards supporting efforts described within Calls. However, organizations issuing Calls reserve the right to award zero, one, or more contracts/agreements for all, some or none of the solicited effort based on the offeror's ability to perform desired work and funding limitations. Brief Program Summary: The objective of the FAST CSO is to provide a mechanism by which the government can partner with industry. To do so, the government must broaden its horizons – in order to bring innovative solutions required to accelerate the efficiency and effectiveness of our nation's test mission. Awards and agreements will be issued to industry partners offering "innovative solutions" to the described objectives, desired end states, or capability gaps defined by organizations issuing Calls. To be considered, the solutions offered must meet the definition of an innovative solution. For the purposes of this CSO, innovative means any technology, process, or method including research and development, that is new as of the date of the proposal submission; or any new application of an existing technology, process, or method as of the proposal date. Additionally, this CSO may result in the award of research and development contracts/agreements ranging from basic research through operational systems development. Communication Between Prospective Offerors and Government Representatives: Open communication is encouraged. Questions, suggestions, or feedback related to the FAST CSO can be provided to the FAST CSO POC identified within this document. Calls: Specific communications related to objectives within a Call, will be treated in accordance with instructions provided within that Call. Open communications are encouraged otherwise. Communications with any of the points of contact shall not constitute a commitment by the Government to subsequently fund or award any proposed effort. Additionally, only Contracting Officers and Agreements Officers are legally authorized to commit the Government. Technical POCs: Government technical POCs will be identified within each Call. Contracting POCs: Contracting Officer Charles C. Richardson Charles.richardson.16@us.af.mil 661-275-3248 Contract Specialist Carlos A. Barrera carlos.barrera.8@us.af.mil 661-277-8438 CSO Primary PCO Questions, suggestions, or feedback pertaining to the FAST CSO can be sent to the following email: AFTC.PZIEC.FASTCSO@us.af.mil. This email will be monitored by AFTC/PZIEC Contracting Officers. This team will be unable to answer specific questions related to Calls issued against this CSO, and interested parties are to direct questions related to Calls to those POCs identified within the Call. Miscellaneous Information: System for Award Management (SAM) Registration: SAM is the primary Government repository for prospective federal awardee information and the centralized Government system for certain contracting, agreements, grants, and other assistance related processes. By submission of an offer to a Call under this CSO, the offeror acknowledges the requirement that a prospective awardee shall be registered in the SAM database prior to award, during performance, and through final payment of any contract, basic agreement, basic ordering agreement, or blanket purchasing agreement resulting from this solicitation. Contractors may obtain information on registration and annual confirmation requirements via the SAM accessed through <https://www.acquisition.gov> or by calling 866-606-

---------	---------------	--------------	----------------	---------------	----------------

8220. Security: Unless otherwise stated in a Call, interested parties should submit unclassified white papers or proposals. If an interested party deems a classified white paper or proposal is necessary, refer to the Contracting POC listed within the Call. Individual Calls will identify whether a Contract Security Classification Specification (DD 254) is applicable to the Call. If a DD 254 is required, offerors must possess all required personnel security clearance, facility clearance, and other infrastructure requirements necessary to perform any proposed classified work in accordance with the referenced DD 254. Cybersecurity: Offerors should be aware of the provision DFARS 252.204-7019 Notice of NIST SP 800-171 DoD Assessment Requirements and clause DFARS 252.204-7020 NIST SP 800-171 DoD Assessment Requirements. If an offeror is required to implement NIST SP 800-171, the offeror shall have a current assessment (i.e., not more than 3 years old) for each covered contractor information system that is relevant to the offer, contract, task order, delivery order, or agreement. DoD Assessments are described in the NIST SP 800-171 DoD Assessment Methodology located at https://www.acq.osd.mil/dpap/pdi/cyber/strategically_assessing_contractor_implementation_of_NIST_SP_800-171.html. [1] See DARS Tracking Number 2018-O0016 Class Deviation – Defense Commercial Solutions Opening Pilot Program. The class deviation allowing the use of a CSO remains in effect until 30 Sep 2022.

There is also the potential to make awards up to any dollar value as long as the value does not exceed the available BAA ceiling amount. ANTICIPATED INDIVIDUAL AWARDS: Multiple Awards are anticipated. However, the Air Force reserves the right to award zero, one, or more Procurement Contracts, Other Transactions or assistance instruments for all, some, or none of the solicited effort based on the offeror's ability to perform desired work and funding fluctuations. There is no limit on the number of OTs that may be awarded to an individual offeror. TYPE OF INSTRUMENTS THAT MAY BE AWARDED: Far based Procurement contracts, DODGARS based grants and cooperative agreements or other transactions (OT) under 10 USC 4002, 10 USC 4003 and 10 USC 4004 (previously 10 USC 2371, 10 USC 2371b and 2373) depending upon the nature of the work proposed. AGENCY CONTACT INFORMATION: All white paper submissions and any questions of a technical nature shall be directed to the cognizant Technical Point of Contact (TPOC) as specified below (unless otherwise specified in the technical area): BAA PROGRAM MANAGER: Gerard Wohlrab AFRL/RITGB 525 Brooks Rd Rome, NY 13441-4505 Telephone: (315) 330-4663 Email: gerard.wohrlab@us.af.mil Questions of a contractual/business nature shall be directed to the cognizant contracting officer, as specified below (email requests are preferred): Amber Buckley Telephone (315) 330-3605 Email: Amber.Buckley@us.af.mil Emails must reference the solicitation BAA number and title of the acquisition. Pre-Proposal Communication between Prospective Offerors and Government Representatives: Dialogue between prospective offerors and Government representatives is encouraged. Technical and contracting questions can be resolved in writing or through open discussions. Discussions with any of the points of contact shall not constitute a commitment by the Government to subsequently fund or award any proposed effort. Only Contracting Officers are legally authorized to commit the Government. Offerors are cautioned that evaluation ratings may be lowered and/or proposal rejected if proposal preparation (Proposal format, content, etc.) and/or submittal instructions are not followed. SEE ATTACHMENT FOR FULL ANNOUNCEMENT DETAILS.

	Synopsis	NAICS CODE: 541715 FEDERAL AGENCY NAME: Department of the Air Force, Air Force Materiel Command, AFRL - Rome Research Site, AFRL/Information Directorate, 26 Electronic Parkway, Rome, NY, 13441-4514 ARA ANNOUNCEMENT TYPE: Initial announcement ADVANCED RESEARCH ANNOUNCEMENT (ARA) TITLE: Signals Intelligence Focused Technologies for Exploitation and Reporting (SIFTER) ARA NUMBER: FA8750-24-S-7007 PART I - OVERVIEW INFORMATION This announcement is for an Open, 2 Step ARA which is open and effective until 28 September 2029. Only white papers will be accepted as initial submissions; formal proposals will be accepted by invitation only. While white papers will be considered if received prior to 3pm Eastern Standard Time (EST) on 28 September 2029, the following submission dates are suggested to best align with projected funding: FY25 by 21 OCT 2024 FY26 by 25 SEP 2025 FY27 by 25 SEP 2026 FY28 by 25 SEP 2027 FY29 by 25 SEP 2028 Offerors should monitor the Contract Opportunities on the SAM website at https://SAM.gov in the event this announcement is amended. CONCISE SUMMARY OF TECHNOLOGY REQUIREMENT: Seeking innovative research to investigate algorithms, methodologies, and techniques for the demonstration and evaluation of enhanced signal information exploitation, dissemination, and analytics of existing and emerging adversarial systems. Areas of emphasis include 1) onboard processing enhancements of manned and unmanned Intelligence, Surveillance, and Reconnaissance (ISR) platforms; 2) high speed signal detection and prosecution technology demonstration, 3) cross domain multi-sensor/multi-platform data analytics, and 4) Open System Architecture (OSA) compliance for demonstration in operationally relevant environments. This ARA is a follow-on to ARA FA8750-22-S-7002 entitled "Signals Information Exploitation Technology Enhancements (SIETE). ARA ESTIMATED FUNDING: Total funding for this ARA is approximately \$99.9M. Individual awards will not normally exceed 60 months with dollar amounts normally ranging from \$1,000,000 to \$5,000,000. There is also the potential to make awards up to any dollar value as long as the value does not exceed the available ARA ceiling amount. ANTICIPATED INDIVIDUAL AWARDS: Multiple Awards are anticipated. However, the Air Force reserves the right to award zero, one, or more Procurement Contracts or Other Transactions, for all, some, or none of the solicited effort based on the offeror's ability to perform desired work and funding fluctuations. There is no limit on the number of OTs that may be awarded to an individual offeror. TYPE OF INSTRUMENTS THAT MAY BE AWARDED: FAR based procurement contracts or other transactions (OT) under 10 USC 4021, 10 USC 4022 and 10 USC 4023 (previously 10 USC 4002, 2371, 10 USC 4003, 2371b and 4004, 2373) In the event that an Other Transaction for Prototype agreement is awarded as a result of this competitive ARA, and the prototype project is successfully completed, there is the potential for a prototype project to transition to award of a follow-on production contract or transaction. The Other Transaction for Prototype agreement itself will also contain a similar notice of a potential follow-on production contract or agreement. AGENCY CONTACT

Deadline Dates (ALL)	30-Sep-2026
Synopsis	Secretary of the Air Force Concepts Development and Management (SAF/CDM), Office of Commercial and Economic Analysis (OCEA) Commercial Solutions Opening (CSO) FA7146-20-S-C001 for Commercial and Economic Research and Innovation (CERI) CSO DESCRIPTION / OBJECTIVES. Federal Agency Name. Secretary of the Air Force Concepts Development and Management (SAF/CDM), Office of Commercial and Economic Analysis (OCEA) Commercial Solutions Opening (CSO) Summary FA7146-20-S-C001 Title: OCEA Commercial and Economic Research and Innovation (CERI) Type: Open Two-Step CSO with Calls Open Period: Initiation to 1 September 2026 (for receipt of White Papers) Ordering Period: Initiation to 30 September 2026 (for awards) The CSO Open Period will be from initiation until rescinded. This is the period during which Contractors may submit White Papers. The Government may make awards throughout the Ordering Period until rescinded. Awarded efforts may include performance that proceeds beyond the end of the Ordering Period. Purpose. This CSO is initiated under the Defense Commercial Solutions Offering Pilot Program (DARS Tracking Number: 2018-O0016), as authorized by Section 879 of the NDAA for FY17 (Pub. L. 114-328). Its authority has transitioned from NDAA FY2017 guidance to DFARS Subpart 212.70 Defense Commercial Solutions Opening. CSOs allow for competitive selection of innovative commercial items, technologies, and services if the award results from: • A CSO that is general in nature identifying areas of mission or technical interest, including criteria for selecting proposals and soliciting the participation of all Contractors capable of satisfying the Government's needs • A technical evaluation by subject matter/technical experts. A CSO may be used to award a contract or an Other Transaction that meets the definition of innovative as: any technology, process or method, including research and development, that is new as of the date of proposal submission; or any new

Other Federal Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
134121	FCO -- Resilient Analytic Platforms for Intelligence Delivery application of an existing technology, process or method as of the proposal date. The Government may issue Amendments to this CSO during the Open Period to change or correct content, as needed. The Government may also issue Calls during the Open Period requesting targeted White Papers for a specific Objective, Focus Area, and/or capability. OCEA seeks innovative commercial solutions or new capabilities that fulfill OCEA requirements, close existing capability gaps, and/or offer technological advancements in meeting the Objectives and Focus Areas detailed in the CSO attachment. Eligibility. This CSO is a full and open acquisition. White Papers will be considered from all interested vendors, including small businesses and non-traditional contractors. Foreign participation is allowed as specified in the attachment. CSO STRUCTURE/EXPECTATIONS. All White Papers/Proposals shall be submitted in accordance with this CSO. White Papers and Proposals must be submitted to Contracting POCs only, as specified in the CSO attachment and within each Amendment or Call. Contractors are advised that the submittal of a White Paper or Proposal is not a promise or guarantee of award. The Government intends to review all White Papers/Proposals and reserves the right to award some, all, part, or none of a Contractor's proposal content. The Contracting POC for this CSO is: Jennifer Villarreal Procuring Contracting Officer jennifer.villarreal.4@us.af.mil Please cc the following email for white paper submission: SAF.AA.CDM.CDMC.OCEA.CSO@us.af.mil STEPS. This CSO will follow a Two-Step process prior to any award. First Step - White Paper Submission. Contractors may submit White Papers, which will include a Cover Page, Technical/Management section and Rough Order of Magnitude, at any time throughout the Open Period upon initiation of this CSO. Multiple White Papers may be submitted, and all White Papers will be reviewed. While the Government does not intend to pay for White Papers submitted under Step 1, select Calls may provide for funding on a case-by-case basis. White Papers submitted in response to a Call will be accepted and evaluated as detailed within the individual Call. The Government will review submitted White Papers and each White Paper will be rated as "Highly Recommended," "Selectable" or "Not Selectable" based on Technical/Management and Price/Affordability. Second Step - Invitation to Propose. White Papers may result in an invitation to submit full Technical/Management and Price proposals via an Invitation to Propose (ItP). The ItP will detail all the terms and conditions for the action, to include proposal submission instructions, as well as proposal due date and time. An ItP is required to submit a proposal. A Contractor submitting a proposal without first submitting a White Paper will not be considered or eligible for award. A Contractor may only submit one proposal in response to an ItP. The Period of Performance for individual awards will be addressed in each ItP. Award. The Air Force anticipates making multiple awards under the Federal Acquisition Regulations or via Other Transaction Agreement authority as a result of this CSO. A proposal must meet the evaluation criteria specified in the ItP and the needs of the Government. Therefore, the Air Force reserves the right to award no contracts or any number of contracts for all, part, or none of the proposal(s) submitted by Offerors based on the Offeror's ability to perform desired work and funding availability. Only white papers will be accepted as initial submissions; formal proposals will be accepted by invitation only. While white papers will be considered if received prior to 3PM Eastern Standard Time (EST) on 6 FEB 2031, the following submission dates are suggested to best align with projected funding: FY26 by 25 FEB 2026 FY27 by 30 SEP 2026 FY28 by 30 SEP 2027 FY29 by 30 SEP2028 FY30 by 30 SEP 2029 Offerors should monitor the Contract Opportunities on the SAM website at https://SAM.gov in the event this announcement is amended. CONCISE SUMMARY OF TECHNOLOGY REQUIREMENT: Seeking innovative white papers for the research, development, integration, test and evaluation of advanced technologies and techniques. This effort will focus on novel cloud-based tools, automating processing workflows, standards development and enterprise integration of existing intelligence capabilities into consolidated, cyber- resilient dashboards and analysis platforms. The goal is to establish a robust foundation for planning, decision-making, and action by delivering tailored, customer-specific intelligence, analytic capabilities, and solutions. These capabilities and solutions need to be designed with cybersecurity integrated upfront and maintained throughout their lifecycle. This ARA builds upon the foundation laid by previous AFRL BAAs FA8750-21-S-7006 Geospatial Intelligence Processing and Exploitation (GeoPEX), FA8750-17-S-7004 Knowledge Aided Geospatial-Intelligence (GEOINT) Latency reduction (KAGLAR) and BAA- RIK-14-03 Assured Cyber Architectures (ACA), extending the scope to a broader range of intelligence disciplines and a more comprehensive cyber defense posture. ARA ESTIMATED FUNDING: Total funding for this ARA is approximately \$237M. Individual awards will not normally exceed thirty-six (36) months with dollar amounts normally ranging from \$10M to \$50M. There is also the potential to make awards up to \$99M. ANTICIPATED INDIVIDUAL AWARDS: Multiple Awards are anticipated. However, the Air Force reserves the right to award zero, one, or more Procurement Contracts or Other, for all, some, or none of the solicited effort based on the offeror's ability to perform

TYPE: Initial announcement BROAD AGENCY ANNOUNCEMENT BAA: Aerial Layer Networking & Transmission Technologies
 BAA NUMBER: FA8750-23-S-7002 PART I – OVERVIEW
 INFORMATION This announcement is for an Open, 2 Step BAA which is open and effective until 30 Sep 2027. Only white papers will be accepted as initial submissions; formal proposals will be accepted by invitation only. While white papers will be considered if received prior to 0500 PM Eastern Standard Time (EST) on 30 Sep 2027, the following submission dates are suggested to best align with projected funding: FY23 by 2 Mar 2023 FY24 by 15 September 2023 FY25 by 15 September 2024 FY26 by 15 September 2025 FY27 by 15 September 2026 Offerors should monitor the Contract Opportunities on the SAM website at <https://SAM.gov> in the event this announcement is amended.

CONCISE SUMMARY OF TECHNOLOGY REQUIREMENT: Today's aerial layer 'network' architecture requires significant pre-planning and has limited interoperability. AFRL desires innovations to move from this current state to a significantly more on demand, self-forming, self-healing aerial layer network. Research in network monitoring and management, robust aerial networks, and proof of concept capabilities are sought to advance this objective. This BAA is a follow-on to BAA FA8750-19-S-7001 entitled "Timely, Secure & Mission Responsive Aerial Warfighting Network Capabilities". BAA ESTIMATED FUNDING: Total funding for this BAA is approximately \$99.5M. Individual awards will not normally exceed 36 months with dollar amounts normally ranging from \$1M to \$10M. There is also the potential to make awards up to \$49.5M. ANTICIPATED INDIVIDUAL AWARDS: Multiple Awards are anticipated. However, the Air Force reserves the right to award zero, one, or more Procurement Contracts, Other Transactions, or assistance instruments, for all, some, or none of the solicited effort based on the offeror's ability to perform desired work and funding fluctuations. There is no limit on the number of OTs that may be awarded to an individual offeror. TYPE OF INSTRUMENTS THAT MAY BE AWARDED: FAR based Procurement contracts, DODGARS based grants and cooperative agreements or other transactions (OT) under 10 USC 4021, 10 USC 4022 and 10 USC 4023 (previously 10 USC 4003, 2371, 10 USC 4003, 2371b and 4004, 2373) depending upon the nature of the work proposed. In the event that an Other Transaction for Prototype agreement is awarded as a result of this competitive BAA, and the prototype project is successfully completed, there is the potential for a prototype project to transition to award of a follow-on production contract or transaction. The Other Transaction for Prototype agreement itself will also contain a similar notice of a potential follow-on production contract or agreement. Deadline Dates (ALL)	30-Sep-2026
Synopsis	This Commercial Solutions Openings (CSOs), issued in accordance with DFARS 212.70, is a competitive solicitation seeking proposals for innovative, commercial technologies and services that accelerate attainment of capabilities detailed in Attachment 7 (of the included attachment) to meet ACC's mission. ACC HQ intends to obtain innovative solutions or potential new capabilities that fulfill requirements, close capability gaps, or provide potential technology advancements. Solutions may include existing technologies or procedures, not currently in use by the United States Air Force (USAF), that would enhance or streamline USAF mission capabilities. "Innovative", as defined in DFARS 212.70, means any technology, process, application, or method, including research and development, which is new as of the date of proposal submission. This CSO seeks the best commercial approaches to meet various technology objectives of ACC. All items, technologies, and services acquired using this CSO will be treated as commercial items. The Government encourages white-paper proposals that span a wide spectrum of possible technical and business solutions in response to the specific technology topics listed in attachment 7 (of the included attachment). The Government reserves the right to award to any combination of proposals which offer the best overall value to the Government, and to oversee all processes and

	approaches once initiated. Awards of efforts as a result of this announcement will be in the form of FAR Part 12 contracts or other transactions (OT) as codified in 10 U.S.C. § 4022. Funding is not currently available for the topics provided in Attachment 7 (of the included attachment). Industry responses will be carefully reviewed and prioritized, with funding sought by ACC HQ to pursue innovative and optimal solutions. The price and affordability of proposed technologies will contribute to ACC’s interest in pursuing proposed solutions. Any awards resulting from this CSO will be made based on the evaluation results outlined in the attached document. The Government reserves the right to fund all, some, one, or none of the proposals submitted; may elect to fund only part of a submitted proposal; and may incrementally fund any or all awards under this CSO. All awards are subject to the availability of funds. Questions regarding the administrative or technical content of this CSO and any white paper submissions (must be forwarded via email to ACCAMIC.MFT.CSO@us.af.mil.

	Program URL Link to program URL Deadline Dates (ALL) 30-Sep-2026 Synopsis This requirement is the future of the Initial Entry Rotary Wing (IERW) Training Program at Fort Rucker, Alabama, known as Flight School Next (FSN). The United States Government (USG) seeks a Contractor-Owned, Contractor-Operated (COCO) solution using commercially available services and equipment on a single contract to provide annual training for 900 -1500 rotary wing pilots. The innovative commercial service to be acquired will be the first-time use of a fully commercial training platform for U.S. Army Aviation training. The contractor shall provide all services and equipment required to train pilots to a U.S. Army standard equivalent to the Federal Aviation Administration's (FAA) commercial helicopter pilot certification, including single engine aircraft, parts, maintenance, instructors (both academic and flight), and simulation (if required). The place of performance to train the rotary wing pilots will be located at Fort Rucker, Alabama. The intent of the FSN Program is to increase the proficiency of U.S. Army aviators using commercially available equipment and instruction practices.

The overarching goal of the OCA is to conduct innovative and impactful ovarian cancer research while developing successful, highly productive ovarian cancer researchers in a collaborative research and career development environment. Distinctive Features: The OCA is a virtual career development and research training platform that consists of Early-Career Investigators (ECIs), their Designated Mentors, and an Academy Dean and Assistant Dean. The OCA-ECI Award is not a traditional career development award; the ECI is expected to participate in monthly webinars and annual workshops and to communicate and collaborate with other members of the Academy (other ECIs, Mentors, the Dean and Assistant Dean) as well as with the advocacy community. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$4.5M to fund approximately four

	Synopsis	The OCRP Clinical Trial Award supports the rapid implementation of clinical trials with the potential to have a significant impact on the treatment or management of ovarian cancer. Distinctive Features: Clinical trials may be designed to evaluate promising new products, pharmacologic agents (drugs or biologics), devices, clinical guidance and/or emerging approaches and technologies. Proposed projects may range from small proof-of-concept trials (e.g., pilot, first-in-human, phase 0) to demonstrate the feasibility or inform the design of more advanced trials through large-scale trials to determine efficacy in relevant patient populations. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$5.6M to fund approximately two Clinical Trial Award applications with total cost caps of \$2.8M per award. The maximum period of performance is 4 years. It is anticipated that awards made from this fiscal year 2026 (FY26) funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. 	Sponsor Website Program URL Link to program URL Deadline Dates (ALL) 16-Sep-2026 [LOI/Pre-App], 07-Oct-2026 Synopsis The fiscal year 2026 (FY26) Pancreatic Cancer Research Program (PCARP) Focused Pilot Award supports the exploration and development of impactful and innovative concepts under a patient-centered focus area of pancreatic cancer research that could ultimately lead to major advancements that will have a profound effect on patients' overall quality of life. The research this award supports should strive to produce robust preliminary data that can serve as a foundation for future clinical or real-world research application. This award mechanism allows, but does not require, preliminary data. Applications can support clinical research studies; however, this mechanism does not allow clinical trials. Preclinical animal studies do not meet the intent of this mechanism. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$1.2 million (M) to fund approximately four Focused Pilot Award applications with total cost caps of \$0.3M per award. The maximum period of performance is 2 years. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.

ovarian cancer. Distinctive Features: Research funded under this FY26 funding opportunity will support translational research and small-scale, early-phase clinical trials in ovarian cancer. Preliminary data are required, however, these data do not necessarily need to be derived from the ovarian cancer research field. The ECI must be within 12 years of their last postdoctoral research position (Ph.D.), clinical fellowship (M.D.), or equivalent at the time of full application submission deadline. The ECI must commit no less than 25% effort to this award and/or OCCTA activities for the first two years. The Designated Mentor must be a clinical trialist with a strong record of mentoring and training early-career investigators.

Deadline Dates (ALL)	25-Aug-2026 [LOI/Pre-App], 10-Sep-2026
Synopsis	The fiscal year 2026 (FY26) Vision Research Program (VRP) Mentored Clinical Research Award (MCRA) supports patient-oriented vision injury research conducted by highly motivated military or civilian clinicians in training. The MCRA may be used to support a standalone study of high impact to vision injury care or the generation of clinical research data in preparation for a more expansive study. Research must align with at least one of the FY26 VRP Focus Areas. The MCRA may not be used to support preclinical research or clinical trials. Distinctive Features: · Key personnel must include an established clinician or Ph.D. clinical scientist, who will serve as Principal Investigator (PI) and a clinician in training (e.g., a fellow, resident, junior clinician, clinician in a Ph.D. program), who will conduct the proposed research under mentorship of the PI, with support from supporting personnel as appropriate. · The clinician in training should have sufficient time remaining in their training program to complete the research proposed under the MCRA. · Scored peer review criteria include Research Idea/Rationale, Research Strategy and Feasibility, Impact and Personnel. · Programmatic review criteria include adherence to the intent of the MCRA, contribution to program portfolio, relative impact and relevance to military health. · Applicants must submit documentation of Institutional Review Board (IRB)/Ethics Committee (EC) approval or exemption by January 1, 2027, in order for the MCRA application to be considered for funding. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$150,000 to fund approximately two MCRA applications with total cost caps of \$75,000 per award. The maximum period of performance is 18 months. It is anticipated that awards made from this FY26

	Deadline Dates (ALL)	25-Aug-2026 [LOI/Pre-App], 10-Sep-2026			
	Synopsis	The fiscal year 2026 (FY26) Hearing Restoration Research Program (HRRP) Focused Research Award (FRA) supports promising research that accelerates drug discovery and therapeutic development for hearing restoration after military-relevant auditory system injury. The FRA may be used to support preclinical studies and/or clinical research. Research must align with at least one of the FY26 HRRP Focus Areas. The FRA cannot be used to support clinical trials, tinnitus research or vestibular research Distinctive Features: • The FRA offers two Funding Levels to support research at different stages and the exploration/development of ideas of different maturity levels. • Funding Level 2 includes a Partnering Principal Investigator (PI) Option (PPIO) for two PIs, an Initiating PI and a Partnering PI. • Scored peer review criteria include Research Idea/Rationale, Research Strategy and Feasibility, Impact, and Personnel. • Programmatic review criteria include adherence to the intent of the FRA, contribution to the HRRP portfolio, relative impact, and relevance to military health. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$400K to fund approximately one FRA - Funding Level 1 application with a total cost cap of \$400K and approximately \$2.4M to fund approximately two FRA - Funding Level 2 applications with total cost caps of \$1.2M per award. The maximum period of performance is 2 years for FRA - Funding Level 1 and 3 years for FRA - Funding Level 2. It is anticipated that awards made from this fiscal year 2026 (FY26) funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.

	Contact Telephone 301-682-5507 Contact Email help@eBRAP.org Sponsor Website Link to sponsor website Program URL Link to program URL Deadline Dates (ALL) 23-Jul-2026 [LOI/Pre-App], 22-Sep-2026 Synopsis The fiscal year 2026 (FY26) Peer Reviewed Medical Research Program (PRMRP) Clinical Trial Award supports the rapid implementation of clinical trials with the potential to have significant impact on the treatment and management of a disease or condition addressed in one of the congressionally directed FY26 PRMRP topic areas and FY26 PRMRP strategic goals. Distinctive Features: Must support a clinical trial. Supports two different application categories, based on the phase of planning for the clinical trial: Clinical Trial Only or Clinical Trial with Planning Phase. The Clinical Trial with Planning Phase option is intended to support the final phase of regulatory activities and planning activities that are necessary to be completed prior to initiation of the clinical trial. The planning phase cannot be used to finalize the intervention or support animal studies. Applications that already have regulatory approvals in place and are submitting to the Clinical Trial Only option may be prioritized over those requesting the Planning Phase option. Animal studies are not supported. Studies must complete all preclinical empirical laboratory work prior to the award start date. Supports three funding levels, each offered with and without a Planning Phase: Funding Level 1: Supports phase 0 or phase 1 clinical trials or non-phased trials with fewer than 100 participants. Funding Level 2: Supports phase 2 clinical trials or non-phased trials with fewer than 300 participants. Funding Level 3: Supports phase 3 clinical trials or non-phased trials with more than 300 participants. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$94.5M to fund approximately 9 Clinical Trial Award applications with total cost caps of \$800,000 for the planning phase of a Clinical Trial with Planning Phase, \$6M for Funding Level 1, \$10M for Funding Level 2, and \$20M for Funding Level 3 per award. The maximum period of performance is 4 years for the clinical trial, and 12 months for the planning phase. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.

	Sponsor Website Link to sponsor website Program URL Link to program URL Deadline Dates (ALL) 18-Aug-2026 [LOI/Pre-App], 02-Sep-2026 Synopsis The fiscal year 2026 (FY26) Lung Cancer Research Program (LCRP) Patient-Centered Outcomes and Survivorship Award (PCOSA) promotes evidence-based and patient-centered approaches to improve health and lung cancer related outcomes and enhance the patient experience in defined populations. Research must address at least one of the FY26 LCRP areas of emphasis in the Health Outcomes and Survivorship category. Distinctive Features: • This funding mechanism requires the research team to include an advocate who is a lung cancer patient/survivor or caregiver. • This funding mechanism allows proposed projects to include translational or clinical research, including pilot clinical trials. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$1.95M to fund approximately two PCOSA applications with total cost caps of \$975,000 per award. The maximum period of performance is 3 years. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. 	Synopsis	The fiscal year 2026 (FY26) Traumatic Brain Injury and Psychological Health Research Program (TBIPHRP) Health Services Research Award (HSRA) intends to fund high-impact research that bridges the gap between research, practice and policy by building real-world evidence on how interventions, clinical practices/guidelines, or policies can be deployed to targeted populations at the appropriate time. In order to meet this intent, the mechanism supports health services research approaches. Distinctive Features: ... · The HSRA will support health services research approaches that include comparative effectiveness research; implementation of interventions, diagnostics and clinical practices/guidelines; and validation of data science insights. · Applications must include clinical research or clinical trials. Prospective or retrospective clinical research or clinical trials involving human subjects, human subject data/records, and human anatomical substances are allowed. · Preliminary data are required. · Basic, preclinical and animal research are prohibited. · For research prospectively enrolling human subjects, inclusion of community-based participatory research (CBPR) approaches is required. · Early-Career Investigator Partnering Option: This option accommodates two Principal Investigators (PIs), one of which is an Early-Career Investigator. If recommended for funding, each PI will receive a separate award.

	Synopsis	The fiscal year 2026 (FY26) Kidney Cancer Research Program (KCRP) Idea Development Award (IDA) supports the development of high-impact ideas that advance the understanding of kidney cancer and ultimately lead to improved patient outcomes. The research project should include a well-formulated, testable hypothesis based on strong scientific rationale and a well-developed and articulated research approach. Personnel on the proposed team should have a strong background in kidney cancer research. Distinctive Features: Partnering Principal Investigator Option: Supports meaningful and productive partnerships between two investigators, termed the Initiating Principal Investigator (PI) and Partnering PI, collaborating on a single application. Only the Initiating PI will submit a pre-application, but all PIs will need to submit full applications. The Partnering PI's application is an abbreviated package specific to their distinct portion of the research project. Be advised, all associated applications for a research project may be withdrawn if the initiating or partnering application is rejected or administratively withdrawn.

Alzheimer's disease and Alzheimer's disease related dementia (AD/ADRD) and their care partner(s). Distinctive Features: Clinical research and clinical trials are allowed; however, clinical trials solely testing or evaluating pharmacological interventions do not meet the intent of this funding opportunity. Studies utilizing animal models do not meet the intent of the mechanism and are not allowed. Preliminary data are required. Community collaboration is required for research prospectively enrolling human subjects. The AZRP encourages studies to leverage existing cohorts/datasets. Cohorts consisting of individuals 65 years or younger are also encouraged. Career Initiation or Transition (CIT) Partnership Option: The TrCA includes an option for more than one PI and supports both new and existing collaborative partnerships. If recommended for funding, each PI will be named on separate awards to the recipient organization(s). If utilizing this option, at least one independent investigator must meet the CIT Partnership Option eligibility requirements at the time of application submission. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$5.4M to fund approximately three TrCA applications with total cost caps of \$1.6M per award for the single PI option and \$1.9M combined for the CIT Partnership Option. The maximum period of performance is 4 years. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.

	Deadline Dates (ALL)	04-Sep-2026 [LOI/Pre-App], 18-Sep-2026			
	Synopsis	The fiscal year 2026 (FY26) Duchenne Muscular Dystrophy Research Program (DMDRP) Idea Development Award (IDA) promotes new ideas that are still in the early stages of development and have the potential to yield impactful data and new avenues of investigation. This award supports impactful, high-risk/high-reward research that could lead to critical discoveries or major advancements that will accelerate progress in improving outcomes for individuals with Duchenne muscular dystrophy (DMD) in the near term. Applications should include a well-formulated, testable hypothesis based on strong scientific rationale. The DMDRP strongly encourages research projects investigating therapies designed to demonstrate efficacy cross the life span, including infants, toddlers and nonambulatory individuals. Distinctive Features: The FY26 DMDRP IDA mechanism offers three eligibility career categories: • The Established Investigator category is for independent investigators at all academic levels, or equivalent • The New Investigator - Early-Stage category is for independent investigators early in their careers (i.e., within 10 years of their first faculty appointment or equivalent). Applicants in this category will be reviewed separately from Established Investigators. • The New Investigator - Transitioning category is for independent investigators at all academic levels, or equivalent, in an area other than muscular dystrophy who are seeking to transition to a career in DMD, thereby bringing their expertise to the field. Applicants in this category will be reviewed separately from Established Investigators. Preliminary data relevant to DMD that supports the feasibility of the research hypotheses and research approaches are required for all applications. Clinical trials or clinical trial aims are not allowed.

	Kidney Cancer Patient Advocates Panel. The AKCI's overarching goal is to conduct innovative and impactful kidney cancer research while also developing a vital resource, a network of highly productive kidney cancer researchers conducting cutting edge research that advances the state of the field in kidney cancer and leads to new treatments for individuals living with kidney cancer. Distinctive Features: · Early-Career Scholar: The FY26 KCRP AKCI-ECSA focuses on both the Scholar's research and their career potential in the kidney cancer field. · Designated Mentor: The Designated Mentor must have a strong record of successful mentorship coupled with a strong record of funding (past and present) and publications in kidney cancer research. · Preliminary Data: Preliminary data to support the feasibility of the research and approaches are required; however, these data do not need to be derived from the kidney cancer research field.

	Deadline Dates (ALL)	22-Sep-2026 [LOI/Pre-App], 14-Oct-2026			
	Synopsis	The fiscal year 2026 (FY26) Melanoma Research Program (MRP) Survivorship Research Award addresses the relatively new and underfunded area of melanoma-specific survivorship by supporting a broad range of innovative and impactful research that has the intended outcome of improving the health and well-being of melanoma survivors, their families and/or their care partners in the near term. Proposed studies focusing exclusively on animal models or considering survival only without consideration of quality of life, overall health and/or function are not responsive to this funding opportunity. Distinctive Features: The application must include at least one melanoma consumer collaborator, defined as a melanoma survivor, family member and/or care partner who can provide lived experience expertise to the research project team, or a melanoma-community supporting organization to support the planning, execution, and implementation of the proposed research. Clinical trials are allowed.

All applications must address one of the FY26 PCRP Overarching Challenges. Distinctive Features: This funding mechanism allows for multiple Principal Investigators (PIs). Only the initiating PI will submit a pre-application, but all PIs will need to submit full applications. The partnering PI application is an abbreviated package specific to their distinct portion of the research project. Be advised, all associated applications for a research project may be withdrawn if the initiating or partnering application is rejected or administratively withdrawn.

	Synopsis	The fiscal year 2026 (FY26) Breast Cancer Research Program (BCRP) Transformative Breast Cancer Consortium Award supports collaborations and ideas that will transform the lives of individuals with, and/or at risk for, breast cancer and will significantly accelerate progress toward ending breast cancer. Applications must propose a synergistic, highly integrated, multidisciplinary and multi-institutional consortium of leading scientists, clinicians and breast cancer consumer advocates that will address a major problem in a way that a single investigator or group could not accomplish. The consortium's collaborative efforts must make a transformative impact in breast cancer. All applications must address at least one of the FY26 BCRP overarching challenges or provide adequate justification for exception. If the application addresses a different fundamental issue, the application must couple it with at least one of the overarching challenges. Distinctive Features: This funding mechanism allows for up to five Principal Investigators (PIs) which includes the Consortium Director and three or four Project Team PIs. Applications must include at least one breast cancer consumer advocate per project team. Only the Consortium Director will submit a pre-application, but all PIs will need to submit at the full application stage. Be advised, failure to submit all associated (Consortium Director and Project Team PIs) applications by the full application deadline may result in administrative withdrawal. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$35 million (M) to fund approximately one Transformative Breast Cancer Consortium Award application with a total cost cap of \$35M. The maximum period of performance is four years. It is anticipated that the award made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. The award supported with FY26 funds will be made no later than September 30, 2027.

All applications must address at least one of the FY26 BCRP overarching challenges or provide adequate justification for exception. Applications must address the challenge in a way that can lead to a breakthrough and have major impact. The FY26 Breakthrough Award mechanism contains four different funding levels designed to support major (but not all) stages of research that will lead to clinical application. Each level specifies a distinct research scope. This program announcement discusses the Breakthrough Award Level 4. Distinctive Features: Clinical trials are required. The research team must include two or more breast cancer consumer advocates. This funding mechanism allows for a single Principal Investigator (PI), or two partnering PIs referred to as the Initiating PI and the Partnering PI. For the Partnering PI Option (PPIO), only the Initiating PI will submit a pre-application, but both PIs will need to submit at the full application stage. Be advised, failure to submit all associated (Initiating and Partnering PI) applications by the deadline may result in administrative withdrawal. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$21 million (M) to fund approximately one Breakthrough Award Level 4 application with a total cost cap of \$21M. The maximum period of performance is four years. It is anticipated that the award made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. The award supported with FY26 funds will be made no later than September 30, 2027.

Synopsis The fiscal year 2026 (FY26) Duchenne Muscular Dystrophy Research Program (DMDRP) Clinical/Translational Research Award (CTRA) supports advanced translational research to accelerate promising ideas in Duchenne muscular dystrophy (DMD) research toward clinical applications. Research must address at least one of the FY26 CTRA Focus Areas. Research projects investigating therapies that will be efficacious across the life span are strongly encouraged. Distinctive Features:

Other Federal Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	The FY26 CTra offers two funding levels: • Funding Level 1 to support smaller, less complex preclinical and/or clinical research. • Funding Level 2 to support larger, more complex preclinical and/or clinical research. The FY26 CTra also offers a Partnering PI Option (PPIO) to support meaningful and productive partnerships between two investigators collaborating on the proposed research project. The PPIO has two eligibility categories: • Early-Career Partnering PI category for an independent, early-career investigator within 10 years of their first faculty appointment (or equivalent) by the time of application submission. • Established Interdisciplinary Partnering PI for independent investigators at all academic levels, or equivalent, in an area other than muscular dystrophy, seeking to transition to a career in DMD, thereby bringing their expertise to the field. Preliminary data are required for all applications. Pilot clinical trials and clinical trial readiness studies to better inform development of drugs, devices, and other interventions are allowed.				
136118	Reconstructive Transplant Research--Concept Award	Department of the Army/Department of Defense	HT942526RTRPCA	02-Sep-2026 [LOI/Pre-App]	200,000 USD

The Concept Award does not support clinical trials. Distinctive Features: Innovation: Innovative research may introduce a new paradigm, challenge existing paradigms, examine existing problems from new perspectives, or exhibit other highly creative qualities. Research that is an incremental advance upon published data is not considered innovative. Relevance: Projects should address at least one of the FY26 RTRP Focus Areas. Preliminary Data: Presentation of preliminary data is not allowed; however, applications should demonstrate the ability to achieve interpretable results. A rationale for the proposed work must be provided. Early-Career Investigators: Early-career investigators are encouraged to apply. Investigators at or above the level of postdoctoral fellow are eligible to apply.

Synopsis		The fiscal year 2026 (FY26) Lung Cancer Research Program (LCRP) Idea Development Award (IDA) supports conceptually innovative, high-risk/high-reward research that could lead to critical discoveries or major advancements that will accelerate progress toward eradicating deaths and suffering from lung cancer. This mechanism promotes new ideas that are in the early stages of development and have the potential to yield impactful data and new avenues of investigation. Research must address at least one of the FY26 LCRP areas of emphasis. Distinctive Features: This FY26 LCRP IDA mechanism has a New Investigator category that is designed to allow applicants early in their faculty appointments to compete for funding separately from established investigators. Preliminary data to support the feasibility of the research hypotheses and research approaches are required; however, these data do not necessarily need to be derived from studies of lung cancer. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$6.4M to fund approximately eight IDA applications with total cost caps of \$800,000 per award. The maximum period of performance is 3 years. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.

	Deadline Dates (ALL)	08-Sep-2026 [LOI/Pre-App], 22-Sep-2026			
	Synopsis	The fiscal year 2026 (FY26) Neurofibromatosis Research Program (NFRP) Investigator-Initiated Research Award (IIRA) supports high-impact research that addresses a critical need and has the potential to make important contributions to the field of neurofibromatosis disorders or advance patient care. Research projects may focus on any phase of research, excluding clinical trials. The rationale for a research idea may be derived from laboratory discovery, population-based studies, a clinician's firsthand knowledge of patients, or anecdotal data. Applications must include preliminary and/or published data that are relevant to NF and the proposed research project. Distinctive Features: This award mechanism offers two funding levels based on participation in two optional features: • Open Science Initiative: Catalyzes research for neurofibromatosis through early access to data and data sharing within the neurofibromatosis community. • Optional Qualified Collaborator: Encourages collaborative research between basic scientists and clinical researchers, and between academic and biotechnology scientists. The funding levels are defined as follows: • Level 1: Applications without an optional feature. • Level 2: Applications including one of the optional features.

	Contact Email help@eBRAP.org Sponsor Website Link to sponsor website Program URL Link to program URL Deadline Dates (ALL) 08-Sep-2026 [LOI/Pre-App], 22-Sep-2026 Synopsis The fiscal year 2026 (FY26) Neurofibromatosis Research Program (NFRP) Neurofibromatosis Research Academy - Scholar Award (NFRA-SA) supports early-career independent investigators (Scholars) joining the Neurofibromatosis Research Academy to pursue a neurofibromatosis project that may include basic, translational, and/or clinical research. The proposed research should address at least one of the FY26 NFRP Areas of Emphasis, under the leadership of the NFRA Director and Deputy Director. The overarching goal of the NFRA is to conduct innovative and impactful research in the field of neurofibromatosis disorders while developing successful, highly productive NF researchers in a collaborative research and career development environment. Distinctive Features: • Scholar: The Scholar, named as the Principal Investigator, must be less than 10 years of completion of their terminal degree by the time of the application deadline (excluding time spent in residency, clinical training, or on family medical leave). • Career Guide: This award mechanism requires each Scholar to designate a Career Guide for guidance. The Career Guide is not required to be at the same institution as the Scholar; however, if the (primary) Career Guide is from a different institution, the application must identify a secondary Career Guide at the Scholar's institution.				
135261	Amyotrophic Lateral Sclerosis Research Program--Therapeutic Development Award	Department of the Army/Department of Defense	HT942526ALSRPTDA	30-Sep-2026	Not Specified

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

collaborators with substantial experience in the relevant ALS model systems, endpoints and pathophysiology. Applications supported by this award must begin with lead compounds in hand and must already demonstrate proof-of-concept efficacy data in at least one appropriate preclinical model system of ALS, including whole-animal and cellular model systems. Distinctive Features: Mechanism-specific, predictive/cohort-selective, target engagement and pharmacodynamic biomarker development, in parallel to the main therapeutic effort, is a critical component of the FY26 ALSRP Therapeutic Development Award. If appropriate mechanism-specific biomarkers are already available or currently in development, how the existing biomarkers will improve trial design, patient selection, and efficiency or interpretation of the proposed ALS therapeutic approach must be apparent in the application. Development of biomarkers for the purposes of diagnosis, prognosis, or measurement of general disease progression without consideration of the therapeutic development process will not be supported. Therapeutic candidates which have already been granted an IND are not appropriate for this mechanism. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$12.0 million (M) to fund approximately six Therapeutic Development Award applications with total cost caps of \$2.0M per award. The maximum period of performance is three years. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.

---------	---------------	--------------	----------------	---------------	----------------

limited to susceptibility/risk, diagnostic, monitoring/disease progression, prognostic, predictive, response, or safety biomarkers. Clinical Outcomes projects may focus on the identification, development, and/or validation of clinician-, observer-, or patient-reported, and/or performance outcome measures for ALS. Projects may include the optimization of current outcome measures already in use. Applications may utilize digital health measures, including wearable devices, smart-phone sensors, video or voice recordings, imaging studies, or other devices which record disease-relevant physiological data and/or outcomes. Community Collaboration is an important element of the FY26 ALSRP COBA. Applicants will be expected to articulate how the proposed research question or study design was informed by the ALS lived experience community. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$7.0 million (M) to fund approximately seven COBA applications with total cost caps of \$1.0M per award. The maximum period of performance is three years. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.

Deadline Dates (ALL)	30-Sep-2026
Synopsis	The fiscal year 2026 (FY26) Amyotrophic Lateral Sclerosis Research Program (ALSRP) Pilot Clinical Trial Award (PCTA) supports the rapid implementation of clinical trials with the potential to have a significant impact on the treatment or management of amyotrophic lateral sclerosis (ALS). Projects may range from phase 1 to small-scale phase 2 trials. Applications must address one of the following focus areas: Biomarker-Driven Interventions: Disease-modifying interventions, with mechanism-specific biomarkers to predict which clinical trial participants are likely to respond, demonstrate target engagement, and effects on the intended biological pathway. Clinical Care: Improving aspects of clinical care and symptom management for ALS. Distinctive Features: Funding from this award mechanism must support a clinical trial. The clinical trial should begin no later than 12 months after the award date or 18 months for U.S. Food and Drug Administration (FDA)-regulated studies. Projects proposing a therapeutic intervention (drug, biologic, and/or device) must

	Deadline Dates (ALL)	30-Sep-2026			
	Synopsis	The fiscal year 2026 (FY26) Amyotrophic Lateral Sclerosis Research Program (ALSRP) Therapeutic Idea Award (TIA) supports new, innovative, high-risk, high-gain ideas aimed at amyotrophic lateral sclerosis (ALS) drug or therapy discovery. The studies supported by this award mechanism are expected to be hypothesis-driven and generate preliminary data for future avenues of therapeutic investigation. Distinctive Features: Potential impact and innovation are important features of the TIA. Applications may demonstrate the ability to achieve interpretable results in the absence of preliminary data supporting the hypothesis. While the inclusion of preliminary data is not prohibited, the strength of the application should rely on the approach. The Congressionally Directed Medical Research Programs (CDMRP) expects to allot roughly \$10.08 million (M) to fund approximately 12 Therapeutic Idea Award applications with total cost caps of \$840,000 per award. The maximum period of performance is two years. It is anticipated that awards made from this FY26 funding opportunity will be funded with FY26 funds, which will expire for use on September 30, 2032. Awards supported with FY26 funds will be made no later than September 30, 2027.

Deadline Dates (ALL) 15-Sep-2026

Synopsis

The Council for International Exchange of Scholars will provide approximately four Research, Teaching, or Teaching/Research awards in scientific development at an appropriate host institute in Egypt. Grant duration is 3 to 9 months. The award is open to Early Career Academics, Mid-Career Academics, and Senior Academics. A Ph.D. (or other terminal degree) is required. Evidence of scholarly research and/or a teaching record in the proposed project's field of specialization after having obtained the Ph.D. is required. All U.S. citizens are eligible to apply, regardless of dual citizenship or residency. An invitation letter is optional. The Binational Fulbright Commission in Egypt seeks and confirms all Fulbright U.S. Scholar affiliations at Egyptian universities following receipt of host country project clearances for shortlisted candidates. U.S. Scholars in the sciences may also be affiliated with public research institutions in Egypt. A letter of invitation is not required during the application stage. All teaching will be in English; additional language proficiency is not required. For research projects in the sciences, Arabic language proficiency is also not required.

Synopsis The Council for International Exchange of Scholars will provide approximately two Teaching, or Teaching/Research awards in any discipline at the American University in Cairo (AUC). Grant length is 4 to 9 months. The award is open to Early Career Academics, Mid-Career Academics, and Senior Academics. A Ph.D. and higher education teaching experience is required. For grants that include a research component, evidence of scholarly research in the proposed project's field of specialization is also required. All U.S. citizens are eligible to apply, regardless of dual citizenship or residency. An invitation letter is required. All teaching will be in English; additional language proficiency is not required. For projects that include a research component, proficiency in Arabic is generally not required for scholars affiliated with AUC; however, the scholar should clarify the feasibility of conducting the research in English. An Arabic language proficiency report is only required if the project will include research in Arabic.

	Synopsis	European Association for Cardio-Thoracic Surgery (EACTS) offers a Robotic Thoracic Surgery Fellowship through the Francis Fontan Fund. The fellowship programme will provide the successful candidate with the opportunity to acquire both theoretical and practical skills on robotic thoracic surgery. This fellowship includes simulations, integrated system training, and live procedure-observation using the latest robotic systems. If appropriate, the fellowship will start with simulation training at dedicated centres with exposure to wetlab facilities (cadaver, pig model, kind heart). The fellowship will include two separate 3-week stays in high-volume robotic centres (situated in Paris, Calabria or London) for in-depth exposure and experience in basic and complex procedures. The participants will all be able to master basic techniques and train in simulation environment (level 1 and 2) and will be introduced to level 3. Contacts with proctors can ensure a continuous learning and implementation of techniques afterwards. The training is based on didactic lectures, videos, surgery observation and hands-on animal laboratory sessions exposing the fellow to virtual training simulation programme in addition to the various aspects of the evaluation, multi-disciplinary treatment, surgical techniques and post-operative care of patients with thoracic diseases mainly lung cancer and thymoma. To help with simulation training, living and travel costs associated with this Fellowship, EACTS offers a grant of €12,000. They will also provide a bursary towards the cost of attendance at the 2027 EACTS Annual Meeting.

Synopsis

Proposals are invited against the following topic: HORIZON-CL4-2026-SPACE-03-61: Scientific analysis and exploitation of space data The aim of this topic is the analysis (including validation) and exploitation of acquired and available data provided by scientific and exploration instruments and missions in their pre-operative, operative, post-operative or data exploitation phase, focusing on astronomy and astrophysics, cosmology, heliophysics, deep space and solar system exploration, ensuring complementarity with activities already supported by agencies during development phases. Such data may also originate from CubeSat and small satellite missions for advancing space science and exploration. More specifically, data to be analysed are expected to result from science and exploration missions (including cubesat to small satellite missions) from ESA, national space agencies, research organisations and universities missions. Earth observing missions are not considered in the scope of this topic. This analysis may require innovative and advanced data processing techniques, the use of advanced artificial intelligence techniques, novel statistical approaches, multidimensional data fusion while optimizing the use of advanced computing hardware architectures, as well as novel data (re)presentation and visualization techniques. Projects may rely on data available through ESA Space Science Archives when possible or other means (e.g. instrumentation teams). Combination and correlation of this data with international scientific mission data, as well as with relevant data produced by ground-based infrastructures all over the world, is encouraged to further increase the

	scientific return and to enable new research activities using existing data sets. These activities shall add scientific value through analysis of the data, leading to scientific publications and higher-level data products, tools and methods. When possible, enhanced data products should be suitable for feeding back into the ESA Space Science archives. Resulting analyses should help preparing future European and international missions. International cooperation is encouraged in particular with countries active in space exploration and space science. In this topic, the integration of the gender dimension (sex and gender analysis) in research and innovation content should be addressed only if relevant in relation to the objectives of the research effort.

Synopsis

Proposals are invited against the following topic: HORIZON-CL4-2026-SPACE-03-86: Space critical Equipment for EU non-dependence -Space Refuelling Interface Unrestricted access to state-of-art space equipment and related technologies is a pre-requisite for the EU space industry responding to EU space missions. However, especially for some families of equipment, the available solutions in EU do not meet the current high-performance space requirements. Currently, alternative products sourced from outside EU, are either affected by non-EU export control, that limits its use, or present challenges in terms of trustable supply chains for the implementation of EU space missions with a security dimension. Within the frame of this topic, it is expected to finance and implement a development project aiming at maturing critical equipment with the final goal of lowering the dependency from outside EU. This will be done by establishing a long-term sustainable supply chain for supporting EU strategic autonomy in the space sector. The selection of the supply chains shall reflect this objective. Therefore, the supply chain shall preferably be built fully based in EU and when

this can only be achieved partially, services procured from outside EU shall nevertheless ensure that the overall supply chain will remain trustable and not affected by non-EU export control. The latest scenario is subject to the approval of the granting authority (i.e. DG-DEFIS and HaDEA). The space equipment and related technologies relevant for this topic represent a direct implementation of the EU Observatory of Critical Technologies (OCT) Technology Roadmap, named Robotics Manipulators for Space Applications: Space Refuelling Interface. Further details will be provided at the latest at the opening of the Call, in a Guidance document published on the Funding & Tenders Portal. Space is a low volume market affected by a dynamic industrial landscape compared to the terrestrial market therefore, technological spin in and/or bilateral collaborations should be enhanced between European non-space and space industries. Furthermore, proposed activities should be complementary to relevant national or other activities at EU level. Complementary activities should be clearly identified, described and the proposal should report how the complementarity is ensured. To achieve the non-dependence objective, applicants are expected to include a dedicated proposal's paragraph covering: The description of the technology and/or technology processes used for developing the equipment and high-level breakdown of the supply chain to be used. Applicants should demonstrate that the supply chain and final product are free of any legal export restrictions or limitations, such as those established in the International Traffic in Arms Regulations (ITAR) or equivalent instruments applicable in other non-EU jurisdictions. Applicants shall also report, in a dedicated subsection, if and which part of the supply chain is affected by non-EU export controls such as the Export Administration regulation (EAR) i.e. EAR99. The description of the suitable technology development process that has been identified and set up within the consortium for avoiding export restrictions of non-EU states and assess vulnerabilities of the supply chain. Proposals covering space equipment and related technology developments that are targeting a final TRL equal or higher than 5 should include a list of proposed applicable standards (e.g. EN, ECSS, ESCC, MIL, JEDEC,...) that are considered relevant for implementing a formal space evaluation and/or

---------	---------------	--------------	----------------	---------------	----------------

qualification. Additionally, projects that aim at a formal space qualification should include as deliverable the full data pack planned to be submitted to the qualification authority. This deliverable should be marked sensitive. Hardware that will successfully complete the space evaluation/qualification is expected promote the EU support by displaying the EU emblem on the package. The proposal is expected to include specific tasks as part of the work plan and related dedicated confidential deliverables to be provided within six months from the start of the project, with the objective of: Analysing and describing, in detail, the full supply chain, each entity and its role in the supply chain, level of criticality and, if relevant, identify dependencies from outside EU; Describing the industrial technical roadmap and a business plan for commercialization with accurate understanding of applications needs, space mission insertion, including time to market indication, of the developed product. Reporting the list of relevant non-EU export control with extra territorial applicability for the specific technology/product under development, independently from the supply chain established for the EU-COM project. Undertaking a comprehensive literature review of the relevant technology/product reporting the state-of-the-art and highlighting potential gaps between current EU solutions and competition from outside EU. Unless otherwise agreed with the granting authority, beneficiaries must ensure that none of the entities that participate as subcontractors are established in countries which are not eligible as set out in the call conditions. The consortium as a whole and individual beneficiaries should ensure that, for a period of up to four years after the end of the project, supply and availability of the hardware, manufacturing, assembly processes developed and/or qualified within the project should be made available to any entity in the EU plus Norway and Iceland, at fair and reasonable market prices and conditions and with no legal restrictions and limitations stemming for example from International Traffic in Arms Regulations (ITAR) or equivalent instruments applicable in non-EU jurisdictions. Additionally, beneficiaries that intend to transfer ownership or grant an exclusive licence must formally notify the granting authority before the intended transfer or licensing takes place; the granting authority may, up to four years after the end

Synopsis	Proposals are invited against the following topic: HORIZON-CL4-2026-SPACE-03-85: Critical Facilities Serving Space EEE components for EU non-dependence - High and Very High Energy Irradiation Test Facility Market Deployment Unrestricted access to state-of-art space EEE components and related technologies is a pre-requisite for the EU space industry responding to EU space missions. However, especially for some families of components, the available solutions in EU do not meet the current high-performance space requirements. This is also the case for testing facilities, especially high and very high energy testing facilities which are not available in EU. Currently, alternative irradiation testing facilities located outside EU, are either overbooked or often prioritized under the light on national security limiting their use by EU space stakeholder or severely delaying their access. This represents a challenge in terms of reliable and trustable supply chains for the implementation of EU space missions. Within the frame of this topic, it is expected to finance and implement a development project aiming at maturing the development of a dedicated irradiation test facility open to EU space stakeholders with focus on testing EEE components for space applications and final goal of lowering the dependency from outside EU. This will be done by moving from small scale prototype irradiation testing demonstrations to a fully-fledged irradiation test facility with sufficient beam time spread across the entire year supporting EU strategic autonomy in the space sector. The selection of the supply chains shall reflect this objective. Therefore, the supply chain shall preferably be built fully based in EU and when this can only be achieved partially, services procured from outside EU shall nevertheless ensure that the overall supply chain will remain trustable, not subject to national prioritization and not affected by non-EU export control. The latest scenario is subject to the approval of the granting authority (i.e. DG-DEFIS and HaDEA). The focused space development relevant for this topic has been identified based on needs related to strategic institutional space

Applicants shall also report, in a dedicated subsection, if and which part of the supply chain is affected by non-EU export controls such as the Export Administration regulation (EAR) i.e. EAR99. The description of the suitable technology development process that has been identified and set up within the consortium for avoiding export restrictions of non-EU states and assess vulnerabilities of the supply chain. Proposals covering space EEE components and related technology developments that are targeting a final TRL equal or higher than 5 should include a list of proposed applicable standards or technical guidance (e.g. EN, ECSS, ESCC, MIL, JEDEC,...) that are considered relevant for implementing a formal space evaluation and/or qualification. Additionally, projects that aim at a formal space qualification should include as deliverable the full data pack planned to be submitted to the qualification authority. This deliverable should be marked sensitive. Hardware that will successfully complete the space evaluation/qualification is expected promote the EU support by

	displaying the EU emblem on the package. The proposal is expected to include specific tasks as part of the work plan and related dedicated confidential deliverables to be provided within six months from the start of the project, with the objective of: Analysing and describing, in detail, the full supply chain, each entity and its role in the supply chain, level of criticality and, if relevant, identify dependencies from outside EU; Describing the industrial technical roadmap and a business plan for commercialization with accurate understanding of applications needs, space mission insertion, including time to market indication, of the developed product. Reporting the list of relevant non-EU export control with extra territorial applicability for the specific technology/product under development, independently from the supply chain established for the EU-COM project. Undertaking a comprehensive literature review of the relevant technology/product reporting the state-of-the-art and highlighting potential gaps between current EU solutions and competition from outside EU. Unless otherwise agreed with the granting authority, beneficiaries must ensure that none of the entities that participate as subcontractors are established in countries which are not eligible as set out in the call conditions. The consortium as a whole and individual beneficiaries should ensure that, for a period of up to four years after the end of the project, supply and availability of the hardware, manufacturing, assembly processes developed and/or qualified within the project should be made available to any entity in the EU plus Norway and Iceland, at fair and reasonable market prices and conditions and with no legal restrictions and limitations stemming for example from International Traffic in Arms Regulations (ITAR) or equivalent instruments applicable in non-EU jurisdictions. Additionally, beneficiaries that intend to transfer ownership or grant an exclusive licence must formally notify the granting authority before the intended transfer or licensing takes place; the granting authority may, up to four years after the end of the project, object to a transfer of ownership or the exclusive licensing of results.

Deadline Dates (ALL)	02-Sep-2026				
Synopsis	This call for tenders aims to ensure clinical trial preparedness for Filovirus outbreaks through the establishment of an EU-based reserve of investigational vaccines as a critical preparedness measure, given the sporadic yet high-consequence nature of these pathogens. Specifically, the call aims to establish, pilot and maintain an investigational reserve of Filovirus candidate vaccines against Ebola Sudan (SUDV), Ebola Bundibugyo (BDBV) and/or Marburg (MARV), which - in case of an outbreak - could be used to advance their development by embedding them in outbreak-associated clinical trials, facilitated through international agreements and frameworks to support such preparedness. These provisions will allow for the rapid deployment of candidate vaccines for their later-stage development. Tenderers will further have to ensure the rapid deployment of the investigational doses, subject to specific conditions being met (such as the occurrence of an outbreak and the expressed consent of the Contracting Authority).

Synopsis Alzheimer's disease and related disorders represent one of the most significant medical, social and societal challenges in the world. It is essential to better understand the fundamental mechanisms of this disease and to accelerate the transfer of discoveries to humans. Facilitating thinking and innovation beyond the scope of current knowledge to generate new hypotheses is a priority for the Alzheimer's Foundation. Through its call for projects, the Alzheimer Foundation supports all types of innovative and/or risky projects in the field of Alzheimer's disease and more broadly neurocognitive diseases.

	Synopsis	The International Consortium for Antimicrobial Stewardship in Agriculture (ICASA), a multi-partner consortium created by the Foundation for Food & Agriculture Research (FFAR), launched the ICASA 2026 Request for Applications (RFA) to solicit research that advances antimicrobial stewardship in animal agriculture. The requested research will provide U.S. swine and beef producers with practical solutions, such as new technologies and management practices, that promote judicious antibiotic use and improve animal health and welfare. All applications submitted should focus on beef, swine or cross-sector priorities. Projects may request ICASA funds of USD \$100,000 - \$500,000 per proposed project.

	Synopsis	The Greenwall Foundation is requesting proposals for the Fall 2026 cycle of its bioethics grants program, Making a Difference in Real-World Bioethics Dilemmas. The Making a Difference program supports research to help resolve important emerging or unanswered bioethics problems in clinical, biomedical, or public health decision-making, policy, or practice. The Foundation's vision is to make bioethics integral to decisions in health care, policy, and research. The sponsor's mission is to expand bioethics knowledge to improve clinical, biomedical, and public health decision-making, policy, and practice. Projects funded under the Making a Difference program should promote the Foundation's vision and mission through innovative bioethics research that will have a real-world, practical impact. In addition, the Foundation is committed to building a broad and inclusive bioethics that welcomes everyone, elevates many perspectives, asks a wide range of questions, and learns from diverse

approach that describes, analyzes, and, most importantly, influences the complex interplay between technology and humankind-striving for a better society while maintaining full respect for universal human rights. Addressing the challenges of the digital age requires collaboration across disciplines, from computer science to the humanities, to ensure that technological advancements align with human values and social well-being. The program's research area is clearly distinguished from the Digital Humanities. Please note that we will not consider applications that merely apply digital means and new technologies to research in the humanities. Candidates for Digital Humanism Junior Visiting Fellowships are expected to pursue research on digitalization's intersection with societal, economic, and geopolitical dimensions, as well as other relevant research foci from the humanities and social sciences. The selected candidates will be invited to spend a term of three consecutive months at the IWM in Vienna between February and June 2027 in order to pursue their research projects as Digital Humanism Junior Visiting Fellows. The fellowship period will be synchronized to overlap with the presence of the Senior Digital Humanism Visiting Fellow.

Synopsis	The Lymphoma Research Foundation (LRF) Lymphoma Scientific Research Mentoring Program (LSRMP) is an education and mentoring program with two tracks: the Clinical Track, for clinical fellows and junior faculty with a focus in clinical research in the field of lymphoma, including epidemiology, and the Laboratory/Translational Track, for researchers at the levels of postdoctoral fellow, clinical fellow, or junior faculty with an interest in laboratory-based research including, bench, translational and pathology research as well as statistical research. The Foundation considers "lymphoma" to encompass all lymphoma subtypes, as well as chronic lymphocytic leukemia (CLL). The program is two years in length and offers a broad education on research and career development as well as managing career and quality of life issues.

	Synopsis	The Patient-Centered Outcomes Research Institute (PCORI) has issued a PCORI Funding Announcement (PFA) inviting applications for high-quality comparative clinical effectiveness research (CER) projects. PCORI will commit up to \$120 million in direct costs through this funding opportunity. This funding opportunity contains three categories for funding: Category 1 will support research projects with direct costs up to and including \$5 million. Category 2 will support research projects with direct costs greater than \$5 million and up to a maximum of \$12 million. Applications for funding under Category 2 will be expected to justify the proposed research's size and scope and why additional funds are necessary to support the scale, scope and complexity of personnel and material resources needed to address the research question. Category 3 will support research projects with direct costs up to \$12 million that utilize PCORnet® to conduct observational studies and/or pragmatic trials that are national in scale. Category 3 PCORnet Studies® must include two or more Clinical Research Networks and share study progress, performance metrics and best practices with the network to promote continuous learning and improvement. PCORnet Studies will leverage the PCORnet Common Data Model® as appropriate. Additional details about Category 3 can be found on the PCORI website.

For this PFA, developmental disabilities (DD) are chronic disabilities that originate at birth or in the developmental period and cause impairment in physical, learning, language and/or behavioral areas. Intellectual disabilities, which fall under the umbrella term of DD, involve limitations to cognitive function (i.e., reasoning, learning, problem solving) and adaptive behavior. PCORI has allotted up to \$60 million under this PFA to fund high-quality comparative effectiveness studies that respond to research questions of interest. The proposed budget for studies under this initiative can include up to \$12 million in direct costs.

Synopsis | The Foundation has a strategic mission to fund research of the highest quality that contributes to Sweden's future competitiveness. According to its statutes, the Foundation shall also promote "the mobility of researchers internationally and between universities, institutes and companies". The target group of this call is well established individuals in academia, research institutes and industry who can be expected to return to their original appointment after a limited period of exchange service in a sector in which the person is not currently active. The purpose of the programme is to increase personal mobility, knowledge transfer, and cross-fertilization between sectors.
