Coronavirus Funding Opportunity Announcements

Released by the GCO Nov and Dec 2020

- Coronavirus (11/5/20)
- Coronavirus (11/16/20)
- Coronavirus (11/25/20)
- Coronavirus (12/15/20)
Dear Research Community,

Below are COVID-19 funding opportunities recently released from the funding opportunity database SPIN. The first table of InfoEd funding opps is a summary followed by a second with more detailed information.

Please note that some opportunities have rapidly approaching deadlines. Previous COVID-19 funding opportunities that have been circulated via the listserv are posted on GCO's Funding Opportunities page and on the ORS Research Roadmap COVID-19 Funding Opportunities page organized by due date. COVID-19 opportunities funded by the CTSA program of NCATS can also be found in The Conduit newsletter.

In addition, please review the SPIN Getting Started Instructions for information about beginning your individual search.

**Deadline Dates (ALL)**

Unless swift action is taken, some 265 million people in low and middle-income countries will be in acute food insecurity by the end of 2020, due to conflict, climate shocks, poverty and #COVID19. The COVID-19 pandemic is exacerbating food insecurity, interrupting supply chains, and moving more people into hunger than previously predicted. WFP seeks cutting-edge solutions to transform emergency response and to achieve SDG2: Zero Hunger by 2030 for communities impacted by COVID19 and beyond. Innovations are needed more than ever before to achieve this goal. In the The WFP Innovation Challenge 2020, the sponsor is looking for innovations that seek to disrupt hunger.

### SenSARS

**Synopsis**

The COVID-19 pandemic has highlighted the need for improved environmental sensing of pathogens. Sensing SARS-CoV-2 virus in the air with high sensitivity and specificity could provide a new mechanism for public health monitoring, enabling safer conditions for a wide range of basic activities including work, travel, and school. SenSARS aims to identify SARS-CoV-2 signatures suitable for rapid indoor air monitoring and use these signatures to develop and demonstrate a technology readiness level (TRL) 4 prototype sensor.

**Contact Name**: SenSARS
**Contact Telephone**: Not Specified
**Contact Email**: SenSARS@darpa.mil
**Sponsor Website**: Link to sponsor website

**Deadline Dates (ALL)**: 01-Dec-2020

### Challenges

**Synopsis**

The Trinity Challenge is set across three areas designed to reflect the most pressing needs for building preparedness for resilience in health emergencies. People from across the world are encouraged to form Challenge Teams and submit applications that respond to these questions with their ideas and innovations. Successful applications will receive support from Members to develop their solutions. Applicants will benefit from the data, resources and support of The Trinity Challenge’s global coalition. Categories include:

Within the spirit of the overall programme, calling for best practices related to COVID-19 for projects and initiatives delivering robust and sustainable solutions to address the global pandemic and achieve Agenda 2030. This call for proposals is aimed at highlighting the importance and enhancing visibility of cross-sector integrated solutions, helping people prepare, respond and recover from the effects of the COVID-19 global pandemic.

The Health Data for Action: (Data Access Award) program aims primarily to award data access at no cost from one of eight anticipated
data providers to successful applicants. Most selected projects will not receive a financial award for personnel or other project-related costs. However, limited funding up to $100,000 per project is available for a small number of projects from principal investigators who have not previously received external research funding.

Deadline Dates (ALL) 18-Jan-2021 [Optional][LOI/Pre-App], 18-Feb-2021

The purpose of this NOFO is to understand the needs of emergency-affected and displaced populations and estimate morbidity and mortality in the context of the COVID-19 pandemic. The overall goals of this operational research are to a) improve mortality and cause of death estimation during the acute emergency phase, b) understand COVID-19 disease transmission, contributing factors and secondary health consequences, c) study the effects of various hand hygiene interventions on mitigating the spread of COVID-19 and d) understand the mental health impact of COVID-19 to reduce associated morbidity and mortality among displaced populations and in emergency settings.

Synopsis  
This Notice of Special Interest (NOSI) highlights the urgent need for social, behavioral, economic, health communication, and epidemiologic research relevant to the 2019 Novel Coronavirus (SARS-CoV-2) and COVID-19. This NOSI encourages urgent competitive supplements and administrative supplements to existing longitudinal studies that address key social and behavioral questions related to the COVID-19 pandemic, including adherence to and transmission mitigation from various containment and mitigation efforts; social, behavioral, and economic impacts from these containment and mitigation efforts; and downstream health impacts resulting from these social, behavioral, and economic impacts, including differences in risk and resiliency based on gender, race and ethnicity, socioeconomic status, and other social determinants of health.

EdTech Hub is excited to launch a call for proposals to fund a series of small research projects (3-6 months) related to Covid-19 response and recovery using educational technology (EdTech). The selected research projects will investigate the practical application of EdTech, generate primary research, and develop recommendations that aim to be useful during Covid-19 response, recovery, and beyond.

Synopsis

XPRIZE and Cognizant have partnered to unlock the technological breakthroughs needed to make this possible by launching the Pandemic Response Challenge. The Pandemic Response Challenge tasks participants with developing models that predict local outbreaks with more accuracy, along with prescriptive intervention and mitigation approaches that minimize infection cases and economic costs.

27-Nov-2020
The IMMANA Competitive Research Grants are aimed at accelerating the development of innovative and interdisciplinary methods, metrics and tools to advance the scientific understanding of the linkages between agriculture and food systems and health and nutrition outcomes, in order to better inform policy and programmatic actions to improve nutrition outcomes in low and middle-income countries (LMICs).

**Synopsis**

**Strengthening Public Health Research and Implementation Science (Operations Research) to Control and Eliminate Infectious Diseases Globally**

- **Contact Name**: Sheila Okoth, Scientific Project Officer
- **Contact Telephone**: 404-718-4405
- **Contact Email**: jyo3@cdc.gov
- **Deadline Dates (ALL)**: 20-Jan-2021 [Optional][LOI/Pre-App], 22-Feb-2021
- **Synopsis**: The purpose of this NOFO is to: Conduct and monitor epidemiologic and laboratory-based science, surveillance, and research related to COVID-19 and other global public health threats in Africa, Southeast Asia, Eastern Europe and Central Asia, and the Middle East and North Africa (MENA), including, but not limited to, assessments of the extent of pathogen exposures or transmission based on serologic testing, improved understanding of immune responses to infectious pathogens, and assessments of various approaches to collecting and analyzing the results of serologic testing; and, Incorporate the results of these public health activities into operational disease detection, prevention, and response or control programs in regions noted above, strengthen public health capacity as outlined in the Global Health Security Agenda, and disseminate findings across the region, with partners, and globally.

**US Enhanced Surveillance Network to Assess Burden, Natural History, and Effectiveness of Vaccines to Prevent Enteric and Respiratory Viruses in Children**

- **Contact Name**: Deborah Loveys Ph.D
- **Contact Telephone**: 404-718-8834
- **Contact Email**: hft6@cdc.gov
- **Deadline Dates (ALL)**: 07-Jan-2021 [Optional][LOI/Pre-App], Not Specified [LOI/Pre-App]

**Center for Global Health/CDC/DHHS**

- **Program URL**: Link to program URL
The goal of this Notice of Funding Opportunity (NOFO) is to support a network of US institutions to develop and implement standard research protocols to conduct prospective active surveillance for: a) acute gastroenteritis (AGE) due to norovirus, rotavirus and other enteric viruses; b) acute respiratory illnesses (ARI) due to respiratory viruses including, but not limited to, influenza, RSV, parainfluenza viruses, human metapneumovirus, rhinoviruses, enteroviruses (including EV-D68), adenoviruses, and coronaviruses (including SARS-CoV-2); and c) acute flaccid myelitis (AFM) syndrome and multisystem inflammatory syndrome in children (MIS-C) among pediatric patients seeking healthcare at medical institutions. The network should also provide accurate estimates of the effectiveness in this population of influenza, rotavirus, COVID-19 and other vaccines against respiratory or enteric virus-associated illnesses projected to become available during the period of performance (e.g., RSV, norovirus). Participating institutions should identify AGE, ARI, AFM and MIS-C illnesses among pediatric patients seeking healthcare or diagnostic testing for acute illness in inpatient, outpatient and emergency departments. Recipients should enroll patients meeting standard symptom criteria, and confirm viral infection using approved molecular assays. Vaccine effectiveness (VE) estimates will be calculated. Estimates of VE, burden of disease, and information on the natural history of disease will be used to: a) inform best practices for diagnosis and treatment protocols; b) inform vaccine recommendations; and c) assess public health impact of vaccination and public health programs to prevent viral illness-related healthcare encounters and medical visits among pediatric populations.
Dear Research Community,

Below are COVID-19 funding opportunities recently released from the funding opportunity database SPIN.

Please note that some opportunities have rapidly approaching deadlines. This grant honors the memory of John H. Rippey, MD, an advocate of the CAP who was devoted to improving laboratory quality assurance. The CAP Foundation is repositioning the grant to provide funding for investigation of the impact of COVID-19-related tests, principally nucleic acid amplification and serologic methods, on patient outcomes, including studies related to test accuracy, timeliness, and result communication. Applicants must demonstrate how their projects support quality assurance, quality and/or process improvements in pathology, or patient safety, with the result of improved patient care.

This purpose of this Notice of Special Interest (NOSI) is to inform the extramural community about NHGRI’s interest in supporting research on pressing public health questions that can uniquely be addressed by collaborative efforts of large international cohort studies. Specifically, this call is limited to coordinated efforts focused on the collection and analysis of data or samples from ancestrally diverse cohorts of individuals participating in the International Hundred Thousand+ Cohort Consortium.
