Dear Research Community,

Below are COVID-19 funding opportunities from the funding opportunity database SPIN. The first table is a summary and the second includes more detailed information.

Please note that some opportunities have rapidly approaching deadlines. Previous COVID-19 funding opportunities that have been circulated via the listserve are posted on GCO's Funding Opportunities page and on the ORS Research Roadmap COVID-19 Funding Opportunities page organized by due date.

In addition, please review the SPIN Getting Started Instructions for information about beginning your individual search.

Synopsis

The COVID-19 HPC Consortium encompasses computing capabilities from some of the most powerful and advanced computers in the world. XSEDE hopes to empower researchers around the world to accelerate understanding of the COVID-19 virus and the development of treatments and vaccines to help address infections. Consortium members manage a range of computing capabilities that span from small clusters to some of the very largest supercomputers in the world.

### Omidyar Network India

**Synopsis**

Omidyar Network India has announced a call for proposals for rapid response funding to tackle the challenges posed by the Covid-19 situation and the consequent socio-economic impact. Proposals that strengthen containment, detection and treatment, support crisis management capabilities, and enhance resilience and recovery in the wake of Covid-19 are welcomed. They are committing Rs. 7.5 crore (US $1 million) to this initiative.

**CoVent-19 Challenge**

- **Contact Name**: Angelo Carter
- **Contact Telephone**: 212-733-2323
- **Contact Email**: angelo.carter@pfizer.com
- **Program URL**: Link to program URL
- **Deadline Dates (ALL)**: 08-Jun-2020 [LOI/Pre-App], 22-Jun-2020

**Synopsis**

Through this RFP it is the sponsors intent to support patient-focused programs that help patients and providers address the heightened medical and educational needs of patients with PI during this pandemic. Priority will be awarded to projects that leverage the utilization of innovative technology platforms for distant learning to reach the intended audience with a focus on patient outreach, medical support and telework.

**Research Grant for Pandemic Preparedness**

- **Contact Name**: CoVent Challenge
- **Contact Telephone**: 301-682-5507
- **Contact Email**: coventchallenge@gmail.com
- **Program URL**: Link to program URL
- **Deadline Dates (ALL)**: 01-May-2020 - 27-May-2020

**Synopsis**

Most countries have yet to see the full devastation of the COVID-19 pandemic. Efforts to flatten the curve through social distancing, good hygiene, testing, and quarantine of infected individuals will carry the exponential rise in new cases, however the sponsor still expects to face severe shortages in hospital capacity. The deficit of ventilators in the United States alone is expected to be in the hundreds of thousands. The sponsor's goal is to rapidly expand the capacity of hospitals, by expanding our current ventilation abilities, in order to survive the peak of this pandemic. The CoVent-19 Challenge is fostering the innovation of a rapidly deployable, minimum viable mechanical ventilator for patients with COVID-19 related ventilator-dependent lung injury. Our goal is to close the gap between our actual resources and those in need around the world. The CoVent-19 Challenge is an open innovation 8-week Grand Challenge for engineers, innovators, designers, and makers.
Omidyar Network India has announced a call for proposals for rapid response funding to tackle the challenges posed by the Covid-19 pandemic and the consequent socio-economic impact. Proposals that strengthen containment, detection, treatment, support crisis management capabilities, and enhance resilience and recovery in the wake of Covid-19 are welcomed. They are committing Rs. 7.5 crore (US $1 million) to this initiative.

The vision of the FY20 PRMRP is to improve the health, care, and well-being of all military Service members, Veterans, and beneficiaries, and its mission is to encourage, identify, select, and manage medical research projects of clear scientific merit and direct relevance to military health. Thus, the proposed research must be relevant to active duty Service members, Veterans, military beneficiaries, and/or the American public. The PRMRP challenges the scientific and clinical communities to address at least one of the FY20 PRMRP Topic Areas of Emerging Viral Diseases and Respiratory Health with original ideas that foster new directions along the entire spectrum of research and clinical care. The PRMRP Technology/Therapeutic Development Award is a product-driven award mechanism intended to provide support for the translation of promising preclinical findings into products for clinical applications in one or more Focus Areas published in this funding opportunity for the FY20 PRMRP Topic Areas of Emerging Viral Diseases and/or Respiratory Health. Products in development should be responsive to the healthcare needs of military Service members, Veterans, and/or beneficiaries.

**092252 - Peer Reviewed Medical Research Program: Investigator-Initiated Research Award for Emerging Viral Diseases and Respiratory Health**

The vision of the FY20 PRMRP is to improve the health, care, and well-being of all military Service members, Veterans, and beneficiaries, and its mission is to encourage, identify, select, and manage medical research projects of clear scientific merit and direct relevance to military health. Thus, the proposed research must be relevant to active duty Service members, Veterans, military beneficiaries, and/or the American public. The PRMRP challenges the scientific and clinical communities to address at least one of the FY20 PRMRP Topic Areas of Emerging Viral Diseases and Respiratory Health with original ideas that foster new directions along the entire spectrum of research and clinical care. The PRMRP Investigator-Initiated Research Award is intended to support studies that will make an important contribution toward research and/or patient care in one or more Focus Areas published in this Funding Opportunity for the FY20 PRMRP Topic Areas of Emerging Viral Diseases and/or Respiratory Health. The rationale for a research idea may be derived from a laboratory discovery, population-based studies, a clinician’s first-hand knowledge of patients, or anecdotal data. Applications must include relevant data that support the rationale for the proposed study. These data may be unpublished or from the published literature.

**092252 - Peer Reviewed Medical Research Program: Clinical Trial Award for Emerging Viral Diseases and Respiratory Health**

<table>
<thead>

The vision of the FY20 PRMRP is to improve the health, care, and well-being of all military Service members, Veterans, and beneficiaries, and its mission is to encourage, identify, select, and manage medical research projects of clear scientific merit and direct relevance to military health. Thus, the proposed research must be relevant to active duty Service members, Veterans, military beneficiaries, and/or the American public. The PRMRP challenges the scientific and clinical communities to address at least one of the FY20 PRMRP Topic Areas of Emerging Viral Diseases and Respiratory Health with original ideas that foster new directions along the entire spectrum of research and clinical care. The PRMRP Clinical Trial Award supports the rapid implementation of clinical trials with...
the potential to have a significant impact in one or more of the Focus Areas published in this funding opportunity for the FY20 PRMRP Congressionally specified Topic Areas of Emerging Viral Diseases and Respiratory Health. Clinical trials may be designed to evaluate promising new products, pharmacologic agents (drugs or biologics), devices, clinical guidance, and/or emerging approaches and technologies. Proposed projects may range from small proof-of-concept trials (e.g., pilot, first in human, Phase 0), to demonstrate feasibility or inform the design of more advanced trials, through large-scale trials to determine efficacy in relevant patient populations.

Funding from this award mechanism must support a clinical trial and cannot be used for animal studies.

Contact Email: Ricardo.Garcia@GuideWellInnovation.com
Sponsor Website: https://guidewellinnovation.com/covid-19-collaborative/
GuideWell is launching the COVID-19 Health Innovation Collaborative to identify and support solutions that can immediately increase the scope and scale of resources aimed at reducing the complex stress factors COVID-19 is bringing to bear on the U.S. health system.

**COVID-19 Detect & Protect Challenge**

**United Nations Development Programme**

**Deadline Dates (ALL) 30-Jun-2020**

The United Nations Development Programme and Hackster.io are joining forces with the world’s brightest technology companies. The sponsor is calling on hardware and software developers, product designers, scientists, hackers, makers, and innovators to come together to work for those who will be hardest hit by this pandemic. Three awards are available under this programme: The UNDP COVID-19 Detect and Protect Award; The Hackster Impact Detect Award; and The Hackster Impact Protect Award.

**Coronavirus Emergency Support Grants**

**Mother Cabrini Health Foundation**

**Deadline Dates (ALL) 04-May-2020 [LOI/Pre-App]**

The Mother Cabrini Health Foundation is dedicating $50 million to provide funding for nonprofit organizations that are addressing the health and social needs of New Yorkers as a direct result of COVID-19.

**Pioneering Ideas: Exploring the Future to Build a Culture of Health**

**Johnson (Robert Wood) Foundation**

None posted

The Johnson (Robert Wood) Foundation is seeking proposals that explore and build a culture of health for all through the lens of the future. The foundation is looking for ideas that can help create a more just and equitable future where all people have access to the resources and tools they need to live healthy lives.
The Robert Wood Johnson Foundation (RWJF) has issued a call for proposals, "Pioneering Ideas: Exploring the Future to Build a Culture of Health", seeking proposals that are primed to influence health equity in the future. They are interested in ideas that address any of these four areas of focus: Future of Evidence; Future of Social Interaction; Future of Food; Future of Work. Additionally, they welcome ideas that might fall outside of these four focus areas, but which offer unique approaches to advancing health equity and our progress toward a Culture of Health.

<tr>
<td>Synopsis</td>
<td>This funding opportunity announcement (FOA) is intended to support novel environmental health research in which an unpredictable event or policy change provides a limited window of opportunity to collect human biological samples or environmental exposure data. The primary motivation of the FOA is to understand the consequences of natural and human-made disasters, emerging environmental public health threats, and policy changes in the U.S. and abroad. A distinguishing feature of an appropriate study is the need for rapid review and funding, substantially shorter than the typical NIH grant review/award cycle, for the research question to be addressed and swiftly implemented. The shortened timeframe will be achieved by more frequent application due dates and expediting peer review, council concurrence and award issuance. The entire cycle, from submission to award, is expected to be within 3-4 months.</td>

Synopsis

NIH invites applications for discrete, specified, circumscribed projects in areas representing the specific interests and competencies of the investigator(s). This NIBIB Funding Opportunity Announcement requires that at least one clinical trial be proposed. The proposed project must be related to the programmatic interests of the NIBIB. For this Funding Opportunity Announcement, NIBIB will only support R01 applications proposing early-stage clinical trials through Phase I, first-in-human, safety, feasibility or other small clinical trials that inform early-stage technology development. NIBIB will not support applications proposing Phase II, III, IV or pivotal clinical trials or trials in which the primary outcome is efficacy, effectiveness or a post-market concern. This FOA will use the NIH Research Project (R01) award mechanism.

08802 NIBIB Trailblazer Award for New and Early Stage Investigators (R21 Clinical Trial Optional)

National Institutes of Health (NIH) invites applications for exploratory/developmental research programs of high interest to the NIBIB that integrate engineering and the physical sciences with the life and/or biomedical sciences. These studies are expected to lead to breakthroughs in development of innovative technologies, agents, methodologies, models, or their applications. These studies may involve considerable risk that should be balanced by the potential high impact on human health and related research. Applicants are expected to propose novel biomedical research approaches for which there is no preliminary data to demonstrate the feasibility of the proposed project. A project may be exploratory, developmental, proof-of-concept, or high risk-high impact, and may be technology design-directed, discovery-driven, or hypothesis-driven. Importantly, applicants must propose research approaches for which there is no existing technology to meet evolving requirements for technologies and methods relevant to the advance of research and delivery of care in pre-clinical, clinical and non-clinical settings, domestic or foreign, for conditions and diseases within the missions of participating institutes. This FOA specifies a partnership structure that is expected to help bridge gaps in knowledge and experience by engaging the strengths of academic, industrial, and other investigators. The partners on each application should establish an interdisciplinary, multi-institutional research team to work in strategic alliance to implement a coherent strategy to develop and translate a solution to their chosen problem. They are expected to plan, design, and validate that the solution will be suitable for end users. Each partnership should include at least one academic and one industrial organization. Each partnership should plan to transition a technology, method, assay, device, and/or system from a demonstration of possibility to a status useful in the chosen setting. Funding may be requested to enhance, adapt, optimize, validate, and, otherwise translate technologies that address problems in biology, pathology, risk assessment, diagnosis, treatment, and/or monitoring of disease status. This FOA defines innovation as likelihood to deliver a new capability to end users. This FOA will support clinical trials that test functionality, or validate performance in the chosen setting. This FOA is not intended to support commercial production, basic research projects, or straight clinical trials that lack translation as the primary motivation. This FOA will use the NIH Research Project (R01) award mechanism.
Dear Research Community,

Below are COVID-19 funding opportunities from the funding opportunity database SPIN. The first table is a summary and the second includes more detailed information.

Please note that some opportunities have rapidly approaching deadlines. Previous COVID-19 funding opportunities that have been circulated via the listserv are posted on GCO’s Funding Opportunities page and on the ORS Research Roadmap COVID-19 Funding Opportunities page organized by due date.

In addition, please review the SPIN Getting Started Instructions for information about beginning your individual search.

**Synopsis:** The Autism Science Foundation invites applications for its new COVID-19 Pivot Grant Program. This funding is intended to help researchers manage changes in research projects due to the COVID-19 emergency.
In response to the World Health Organization's appeal to the international community to "seize every opportunity to curb, contain, combat, and delay the spread of the virus, and mitigate its impact," the Islamic World Educational, Scientific and Cultural Organization (ISESCO) announces its Prize for Fighting Novel Coronavirus (COVID-19). The amount of the prize is US$200,000, including an award medal.

SYNOPSIS

MTEC: The MTEC mission is to assist the U.S. Army Medical Research and Development Command (USAMRDC) by providing cutting-edge technologies and supporting life cycle management to transition medical solutions to industry that treat, prevent, or contain and minimize health risks of modern warfare as required to support and maintain the health of Army personnel. MTEC fulfills this mission by identifying innovative opportunities for medical research and development, activating at-risk technologies, and transitioning them to the most viable technology developer. The MTEC mission is accomplished through the use of a collaboration database tool to foster follow-up conversations between members as needed. The Collaboration Database Tool can be accessed via https://beta.sam.gov/opp/f3012b9082ca4d109c171ad4349f7306/view.

Following contacts: Technical and membership questions – Dr. Lauren Palestrini, MTEC Director of Research, lauren.palestrini@officer.mtec-sc.org; Membership questions – Randall Fernandes, ran433832377@ati.org.

The full RPP is posted to the MTEC members-only website. Sponsor Website https://www.grants.gov/web/grants/view-opportunity.html?oppId=319006
Deadline Dates (ALL) 18-Nov-2020

Synopsis
The multi-agency Ecology and Evolution of Infectious Diseases program supports research on the ecological, evolutionary, and social drivers that influence the transmission dynamics of infectious diseases. The central theme of submitted projects must be the quantitative or computational understanding of pathogen transmission dynamics. The intent is discovery of principles of infectious disease transmission and testing mathematical or computational models that elucidate infectious disease systems. Projects should be broad, interdisciplinary efforts that go beyond the scope of typical studies. They should focus on the determinants and interactions of transmission among humans, non-human animals, and/or plants. This includes, for example, the spread of pathogens; the influence of environmental factors such as climate; the population dynamics and genetics of reservoir species or hosts; the feedback between ecological transmission and evolutionary dynamics; and the cultural, social, behavioral, and economic dimensions of pathogen transmission. Research may be on zoonotic, environmentally-borne, vector-borne, or enteric pathogens of either terrestrial or aquatic systems and organisms, including diseases of animals and plants, at any scale from specific pathogens to inclusive environmental systems. Proposals for research on disease systems of public health concern to developing countries are strongly encouraged, as are disease systems of concern in agricultural systems. Investigators are encouraged to develop the appropriate multidisciplinary team, including for example, anthropologists, modelers, ecologists, bioinformaticians, genomics researchers, social scientists, economists, oceanographers, mathematical scientists, epidemiologists, evolutionary biologists, entomologists, parasitologists, microbiologists, pathologists, or veterinarians, with the goal of integrating knowledge across disciplines to enhance our ability to predict and control infectious diseases.

092478 Mozilla Open Source Support (MOSS) Awards Program - COVID-19 Mozilla None posted 50,000.00 USD

Contact Email grants@mozillafoundation.org

Synopsis
Mozilla will provide awards of up to $50,000 each to open source technology projects which are responding to the COVID-19 pandemic in some way.

19 public health crisis through enhancements of currently funded PCORI research awards. Only PCORI-funded principal investigators with active research project funding contracts are eligible to submit a proposal in response to this announcement.

AXA Research Fund Exceptional
Flash Call for Proposals - Mitigating Risk in the Wake of the Covid-19 Pandemic
AXA Research Fund None 270,000.00 USD

Contact Email fellows@axa.com
Deadline Dates (ALL) 25-Feb-2020 [LOI/Pre-App], 27-Mar-2020

The AXA Research Fund’s mission is to support outstanding researchers committed to improving peoples’ lives through innovative research in areas of Climate & Environment, Health, New Technologies, and Socio-Economics. The AXA Research Fund has committed support to emergency research initiatives at the beginning of the crisis; however, it is also necessary to inform its aftermath as well as a potential second wave, particularly in lower income countries. It is also a time to start questioning how to better prepare for the next crisis – be it epidemic, climate or ecological – while we learn from the current one.

Rapid Access Call for Proposals: SARS-CoV-2 and Urgent Research
MAX IV None Not Available

Contact Email avilessantal@nih.gov

The purpose of this Funding Opportunity Announcement (FOA) is to
Synopsis

support investigative and collaborative research focused on understanding the long-term effects of natural and/or human-made disasters on health care systems serving health disparity populations in communities in the U.S., including the U.S. territories. NIH-designated health disparity populations include racial and ethnic minorities (Blacks/African Americans, Hispanics/Latinos, American Indians/Alaska Natives, Asians, Native Hawaiians and other Pacific Islanders), sexual and gender minorities, socioeconomically disadvantaged populations, and underserved rural populations.

SMARTSTM funding alerts are a service of InfoEd Global’s SPINTM funding opportunities
Dear Research Community,

Short-term research proposals (24 months) are invited as supplements for current grants in the Thematic, Young Researcher, CEPID or CPE modalities in progress, which redirect part of their research effort to contribute significantly to the understanding and overcoming of risk represented by the SARS-Cov-2 virus and / or possible ways for its management or prevention. The amount offered in this call is R $ 10 million.

**Synopsis**

There is an urgent need to better understand the pathobiology and clinical implications of severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) viral infection that leads to the morbidity and mortality seen with COVID-19, as well as increase knowledge about the potential emerging threat of other novel respiratory viruses. American Lung Association is looking for proposals to advance research against emerging respiratory pathogens like SARS-CoV-2. All research must directly be related to COVID-19 or other viral respiratory threats that may arise in the future.

**Synopsis**

This Eugene Washington PCORI Engagement Award Special Cycle Funding Announcement—Supporting Engagement in and Dissemination of PCOR/CER in the Context of COVID-19—aims to support projects that help communities increase their capacity to participate across all phases of the PCOR/CER process while responding to contextual changes as a result of the COVID-19
This is an opportunity to explore virtual/distanced methods of engagement and generate new questions and evidence needs across stakeholder groups.

**Deadline Dates (ALL)**

The COVID-19 virus is having an immediate and alarming impact on the community of people with disabilities. Safe attendant care and the absence of attendants who are sheltering in place has put the community at risk. People with a history of mental health disabilities are experiencing increased anxiety, amplification of symptoms, and isolation. Access to resources and support organizations has been curtailed. People without sight have the challenge of accessing their community safely. This is only a small sampling of the many concerns and vast vulnerabilities for people with disabilities. There are significant local, state, and national policy implications for people with disabilities as a result of the COVID-19 virus. There are reports of rationing of medical treatments and for this community to be seen as less worthy of life saving intervention. It is imperative that these issues be addressed quickly and thoughtfully to influence the decisions being made by government and health institutions. Policy and procedure will save lives. Through this rapid response opportunity, the Disability Inclusion Fund will provide support for organizations on the front lines serving people with disabilities during this crisis. This will include mutual aid and support for organizing, policy, and systems-change advocacy.

**Synopsis**

Dear Research Community,

Below are COVID-19 funding opportunities recently released from the the NIH and from the funding opportunity database SPIN. The NIH Table of Contents is excerpted below followed by a summary table of funding opportunities from SPIN and then a table with more detailed information from SPIN.

Please note that some opportunities have rapidly approaching deadlines. Previous COVID-19 funding opportunities that have been circulated via the listserve are posted on GCO's Funding Opportunities page and on the ORS Research Roadmap COVID-19 Funding Opportunities page organized by due date.

In addition, please review the SPIN Getting Started Instructions for information about beginning your individual search.

We appreciate your interest in partnering with BARDA. Due to the COVID-19 response, any white papers or full proposals submissions, other than those that are in support of COVID-19, will be put into a queue. Once the response to COVID-19 has subsided, we will resume normal review of submissions for other research areas of interest.

BARDA will not be able to meet the timelines highlighted in the Broad Agency Announcement. Thank you for understanding this unprecedented response and delays that will occur. The latest BARDA Broad Agency Announcement (BAA) is amendment 16 posted on April 24, 2020. Note: COVID-19 response related Areas of Interest includes: AOI 7.7.1 Diagnostic assay for human coronavirus using existing FDA-cleared platforms AOI 7.7.2 Point-of-care diagnostic assay for detection of SARS-CoV-2 virus AOI 7.7.3 Diagnostic assay for detection of COVID-19 disease (SARS-CoV-2 infection), Including Serology Tests AOI 8.3 COVID-19 Vaccine AOI 9.2 COVID-19 Therapeutics AOI 9.3 Immunomodulators or therapeutics targeting lung repair AOI 9.5 Pre-exposure and post-exposure prophylaxis AOI 10 Respiratory protective devices AOI 11 Ventilators AOI 17 Advanced Manufacturing Technologies

All contracting related inquiries should be sent to BARDA-BAA@hhs.gov. BARDA clarified the language for rolling review of COVID-19 response related full proposals. BARDA will continuously review and expedite COVID-19 response related white papers and full proposals. Offeror should also complete the Submission Data Integration Table. The final white paper submission deadline is October 31, 2020. The final full proposal submission deadline is October 31, 2020 or as specified in the invitation letter.

The Army is conducting a change of mission to focus on combating the COVID-19 pandemic. With this new mission, the Army will protect the force, posture the force to maintain global operational readiness, and support the national effort to fight against COVID-19. The Army continually assesses how we will best protect Soldiers, Civilians and their families, maintain force readiness to meet global challenges, and provide support to the FEMA-lead national COVID-19 response. The total cash prize offered is $1,000,000.

Deadline Dates 12-Jun-2020 (ALL)

The Stevens Initiative is providing resources to help education, exchange, and non-profit organizations in the United States and the Middle East and North Africa conduct virtual exchange programs to engage young people and educators affected by the pandemic.

The Initiative views virtual exchange as programs that: use online technology to connect individuals and small groups between countries; are based on a curriculum or activity plan; involve qualified facilitators (such as educators or others); and involve sustained communication and collaboration synchronously (in real-time) or asynchronously over a period of time.

The Initiative encourages proposals by consortia that include organizations with relevant and complementary experience, capacities, and networks.

### Important Information about NIH Deadlines in SPIN

Below is an example of an NIH grant that appears in a SPIN search. Note that the deadline date for this R21 Parent Announcement is listed as May 7, 2020. May 7 is the deadline for AIDS and AIDS-Related Applications only. Please be sure to click on the Program URL for additional information.

#### 078901 NHIRN Exploratory/Developmental Research Grant Program (Parent R21 Clinical Trial Not Allowed)

**Contact Email:** grantsinfo@nih.gov

**Synopsis:** The NIH Exploratory/Developmental Grant supports exploratory and developmental research projects by providing support for the early and conceptual stages of these projects. These studies may involve considerable risk but may lead to a breakthrough in a particular area, or to the development of novel techniques, agents, methodologies, models, or applications that could have a major impact on a field of biomedical, behavioral, or clinical research.

In the Program URL, information about deadlines is in the Application Due Date(s) section. The excerpt is below from the R21 Parent Announcement. If you were to click on the standard dates link, you would see that the next R21 deadline for new grant applications is June 16.
The link to the NIH "standard dates" table is also here with an additional excerpt below. You can search the table by typing the activity code for which you are applying for in the search box.

**Deadline Dates (ALL)** 30-Apr-2020, 14-Oct-2020 [Optional] [LOI/Pre-App], 13-Nov-2020

**Synopsis**

NIDA is interested in research that addresses research gaps related to the delivery of integrated treatment services for HIV and opioid use disorder (OUD) among the justice-involved population in the US, with a goal of improving treatment management and implementation. A quarter of all people infected with HIV pass through the justice system each year, making it an important system for HIV prevention and treatment. Community re-entry from incarceration is a time of heightened risk for opioid relapse, mortality, HIV risk behaviors, and discontinuation of HIV treatment. Given these elevated levels of risk, justice-involved people who inject drugs (PWID) should be prioritized for screening and linkage to the full continuum of HIV prevention and treatment services, including Pre-exposure prophylaxis (PrEP) and highly active antiretroviral therapy (HAART). There is a need to better understand the effectiveness of the clinical interventions as received in this population, as well as the methods by which those interventions are delivered (navigation/mobile services).

**Global Health Security Partner Enhancement : Expanding Efforts to Improve Surveillance and Laboratory Data Interoperability**

The U.S. government's (USG) Global Health Security Agenda (GHSA) envisions a world safe and secure from global health threats posed by infectious diseases, and the current Ebola epidemic in West Africa further underscores the economic and humanitarian impacts of infectious diseases. The U.S. Centers for Disease Control and Prevention (CDC) is working to help Ministries of Health meet key International Health Regulations (IHR) (2005) requirements through implementation of the GHSA. CDC seeks to work with partner countries and other USG agencies in a collaborative effort to achieve specific goals in three focus areas: Preventing avoidable epidemics, Detecting threats early, Responding rapidly and effectively.

**Deadline Dates (ALL)** 22-May-2020

The U.S. Consulate General, Public Affairs Section in Chennai announces a funding opportunity that seeks to host a workshop for 40 disaster management specialists (government officials, NGOs, academics, citizen first responders) from the Indo-Pacific region. Led by U.S., Indian, and regional experts, the workshop will encourage data sharing, dissemination of best practices, more institutional partnerships, and the development of a common “all-hazards” vernacular. Recent alumni of USG exchange programs focused on Disaster Management will be invited as key resource persons.
