## Research Awards & Funding Opportunities

Dear Research Community,

Below are COVID-19 funding opportunities recently released from the NIH and the funding opportunity database SPIN. The NIH Table of Contents is excerpted below followed by a summary table of funding opportunities from SPIN and then a table with more detailed information from SPIN.

Please note that some opportunities have rapidly approaching deadlines. Previous COVID-19 funding opportunities that have been circulated via the listserv are posted on [GCO's Funding Opportunities](#) page and on the [ORS Research Roadmap COVID-19 Funding Opportunities](#) page organized by due date.

In addition, please review the [SPIN Getting Started Instructions](#) for information about beginning your individual search.

	Deadline Dates (ALL)	22-May-2020			
	Synopsis	For the 2020 award cycle, the Golden Goose Steering Committee has chosen to recognize those individuals or teams whose federally funded research has had a significant and demonstrable impact in responding to COVID-19. The sponsor aims to demonstrate the benefits of federally funded scientific research that has contributed to global understanding, breakthroughs in treatment, and innovative and science-based responses to the human and/or economic impact of the virus. This recognition is also intended to demonstrate how scientific and technological advances and innovations that result from foundational scientific research supported by the federal government can quickly emerge to meet national and global challenges. They are therefore seeking GGA nominations highlighting these scientific and technological advances relating to COVID-19 that could not have been predicted at the time of initial study or which were focused on other work and have now pivoted to address the current pandemic. It also seeks to highlight and honor examples of scientific studies or research that may not have seemed relevant to a real world problem or societal challenge or for which the results and application were totally unforeseen, but which have serendipitously led to a major breakthroughs and clear impact in our fight against COVID-19.

Synopsis In order to respond to the COVID-19 pandemic, PCORI is issuing a new research funding announcement with an accelerated timeline to support innovative, high-impact studies that fit clearly within its core mission of patient-engaged and patient-centered comparative clinical effectiveness research. The objectives of this announcement are to (1) strengthen the understanding of different approaches to mitigate the impact of COVID-19 on individuals, communities, healthcare providers, and healthcare systems; and (2) provide evidence to inform clinical and public health responses, decision making, and planning. PCORI encourages the use of diverse methods, including interventional studies and the use of natural experiments, to conduct research on an accelerated timeline. Applicants are encouraged to complete primary outcomes collection and provide actionable findings in no longer than 12 months. Hybrid designs, which can provide insight into implementation approaches in the context of evidence generation, will also be welcome. Applicants should be prepared to work independently and/or with PCORI to expedite dissemination of results.

USE CAUTION: External Message.
--------------------------------

**[American Diabetes Association COVID-19 and Diabetes Research Call for Applications.](#)**

The American Diabetes Association (ADA) is requesting applications ([see RFA](#)) for research focused on the impact of diabetes on COVID-19 and the impact of COVID-19 on diabetes and its complications.

Recent clinical results have shown that people with diabetes are at higher risk of death from COVID-19 and that COVID-19 drives an increased risk of hyperglycemia and other complications in those with and without diabetes. This is in addition to the risk due to advanced age and chronic disease. Both the biological mechanisms underlying this risk and how to minimize it remain poorly understood. There is an urgent need for research to understand the impact of diabetes on COVID-19 and vice versa. This is true at a basic and clinical level.

The main text of the application will be a **two-page application** to provide all necessary study components (Aims, Significance, Preliminary data (if applicable), Research Plan, Expected

Actionable Outcomes) with a one-page listing of critical references, PI Biosketch, and budget form. The goal of this RFA is to use a rapid application and review process to identify **at least 10 grants of up to \$100,000/each** in this area and of high scientific merit for immediate funding.

The COVID-19 and Diabetes Research Awards **expedited application deadline will be 5pm ET on May 22, 2020** for July 1, 2020 funding.

Regards,

ADA Research Programs
