Dear Research Community,

Below are COVID-19 funding opportunities recently released from the funding opportunity database SPIN.

Please note that some opportunities have rapidly approaching deadlines. Previous COVID-19 funding opportunities that have been circulated via the listserve are posted on GCO's Funding Opportunities page and on the ORS Research Roadmap COVID-19 Funding Opportunities page organized by due date.

In addition, please review the SPIN Getting Started Instructions for information about beginning your individual search.

Synopsis

The SMDM COVID Decision Modeling Initiative (CDMI) seeks to develop and advance new ideas and scalable approaches to address uncertainties during the COVID-19 pandemic by catalyzing innovation in decision models for rapid uptake and impact.

Mechanism for Time-Sensitive Drug Abuse Research (R21 Clinical Trial Optional)

078460 National Institute on Drug Abuse/NIH/DHHS PAR-19-064 06-Oct-2020 275,000 USD

Deadline Dates (ALL) 06-Oct-2020, 08-Feb-2021, 08-Jun-2021, 08-Oct-2021

This Funding Opportunity Announcement (FOA) will support pilot, feasibility or exploratory research in 7 priority areas in substance use epidemiology, prevention, and health services, including: 1) responses to sudden and severe emerging drug issues (e.g. the ability to look into a large and sudden spike in opioid or synthetic cannabinoid use/overdoses in a particular community); 2) responses to emerging marijuana trends and topics related to the shifting policy landscape; 3) responses to unexpected and time-sensitive prescription drug abuse research opportunities (e.g., new state or local efforts); 4) responses to unexpected and time-sensitive medical system issues (e.g. opportunities to understand addiction services in the evolving health care system); 5) responses to unexpected and time-sensitive criminal or juvenile justice opportunities (e.g. new system and/or structural level changes) that relate to drug abuse and access and provision of health care service;6) partnerships between researchers and state or local organizations to support the evaluation of new local policies, programs, or practices in response to public health emergencies (e.g., the opioid crisis); 7) research collecting and examining data on the risks and outcomes associated with substance use and COVID-19 infection in the general population and among underserved populations, such as racial, ethnic and gender minorities, individuals with low socioeconomic status, and those who are incarcerated or homeless.It should be clear that the knowledge gained from the proposed study is time-sensitive and that an expedited rapid review and funding are required in order for the scientific question to be answered (i.e. an imminent policy change will not allow for standard review and funding timeline).

NIA Multi-site COVID-19 Related Clinical Trial Implementation Grant on Aging-Related Topics In At-risk Older Adult Populations (R01 Clinical Trial Required)

096052 National Institute on Aging/NIH/DHHS PAR-20-234 01-Jul-2020 Not Specified

Contact Name Sergei Romashkan, M.D., Ph.D.
Contact Telephone 301-435-3047
Contact Email romashks@mail.nih.gov

This Funding Opportunity Announcement (FOA) invites applications for implementation of investigator-initiated multi-site clinical trials (all phases or stages) of interventions focused on specific aging-related issues to reducing transmission, risk, morbidity, mortality, severity, or complications of Coronavirus Disease 2019 (COVID-19). Applications on the following priority topics are invited: Efficacy and safety of interventions that target aging-related biological mechanisms that may influence risk or severity of COVID-19 infection among at-risk older adults Efficacy and safety of preventive and treatment interventions in older patients with differing comorbid conditions that make them especially vulnerable to adverse outcomes of COVID-19 infection Effectiveness of health and/or custodial care practices to reduce transmission risk or improve outcomes of COVID-19 infection in nursing homes or other residential settings serving at-risk older persons, including the development and testing of infection control training procedures for healthcare workers Rapid pragmatic trials in (at least two) health systems, nursing homes, or adult living facilities, ensuring replication across large pragmatic trial sites and leveraging electronic health records to promote quality improvement in physician, hospital, palliative care, and hospice practices to improve outcomes for older patients with COVID-19, especially those with cognitive impairment, Alzheimer's disease or Alzheimer's disease-related dementias (AD/ADRD), or underlying comorbidities.
at-risk older adults age 65 and older for whom electronic medical records are available and long-term outcomes can be tracked, and in institutions serving those populations Trials in older adults with AD/ADRD, older adults from populations with NIH-defined health disparities, and/or other vulnerable populations (e.g. incarcerated, homeless, living in institutions) ?

Deadline Dates (ALL): 13-Oct-2020 [Optional] [LOI/Pre-App], 13-Nov-2020  

The National Human Genome Research Institute (NHGRI) and the Eunice Kennedy Shriver National Institute of Child Health and Human Development are coordinating efforts for establishing a Developmental Genotype-Tissue Expression (dGTEx) Project, to catalog and analyze transcriptional profiles from a wide variety of tissues obtained from neonates, children, and adolescents in a post-mortem setting. The purpose of this FOA is to solicit applications to develop and implement a Laboratory, Data Analysis, and Coordinating Center (LDACC) for the Developmental Genotype-Tissue Expression (dGTEx) Project. The LDACC will perform 2 major functions: a molecular laboratory, and a data analysis and coordinating center. As a molecular laboratory, the LDACC will work with the Biospecimen Procurement Center (BPC) funded by NICHD to process tissue samples for sequencing and biobanking. Responsibilities as a data analysis and coordinating center include ensuring close coordination with the BPC, monitoring study progress and laboratory performance, performing basic analysis of data for
