## Research Awards & Funding Opportunities

Dear Research Community,

Below are COVID-19 funding opportunities recently released from the NIH and the funding opportunity database SPIN. The first table of InfoEd funding opps is a summary followed by a second with more detailed information.

Please note that some opportunities have rapidly approaching deadlines. Previous COVID-19 funding opportunities that have been circulated via the listserv are posted on [GCO's Funding Opportunities](#) page and on the [ORS Research Roadmap COVID-19 Funding Opportunities](#) page organized by due date. COVID-19 opportunities funded by the CTSA program of NCATS can also be found in [The Conduit newsletter](#).

In addition, please review the [SPIN Getting Started Instructions](#) for information about beginning your individual search.

Deadline Dates (ALL) 31-Oct-2020

Synopsis

The impacts of COVID-19 to BC workers, employers and the workers' compensation system are broad and diverse. COVID-19 has changed the way work is done. Including where and how workers are expected to perform their job and how they interact with the workplace. New ways of working present new risks and challenges, while also providing new opportunities. Safe and durable return to work and recovery of injured workers requires new supports and changes to care delivery and return to work planning, while prevention approaches must adapt to new guidelines, workplaces and technologies. WorkSafeBC is interested in research projects to address both direct and indirect impacts arising from the COVID-19 pandemic unique to occupational health and safety, injured or ill worker recovery, and safe and sustainable return to work or stay-at-work.

Deadline Dates (ALL) 01-Oct-2020

Synopsis

The CIPHER Grant Programme directly supports the development of early-stage investigators, awarding up to US\$150,000 for up to two years to address research gaps in paediatric and adolescent HIV in resource-limited settings. The purpose of the Collaborative Initiative for Paediatric HIV Education and Research (CIPHER) Grant Programme is to fund research projects with the potential to address critical research questions that remain unanswered in the global response in order to inform policy change and ensure better outcomes in infants, children and adolescents living with and affected by HIV in resource-limited settings. Designed for early-stage investigators, a key aim of the programme is to build research capacity within resource-limited settings by fostering the next generation of investigators in paediatric and adolescent HIV. It is intended to attract young investigators from inside and outside the field of HIV. This will help encourage innovative ideas and lead to the design of evidence-based approaches and interventions to overcome major obstacles in the field.

 Deadline Dates (ALL) 21-Aug-2020 [Optional][LOI/Pre-App], 15-Sep-2020

Synopsis The National Institutes of Health (NIH) is issuing this funding opportunity announcement (FOA) in response to the declared public health emergency issued by the Secretary, Department of Health and Human Services (DHHS), for 2019 Novel Coronavirus (COVID-19). This emergency FOA from the National Institutes of Health (NIH) provides an expedited funding mechanism as part of the Rapid Acceleration of Diagnostics-Radical (RADx-rad) initiative. This RFA will support the early stage development of an innovative platform that integrates biosensing with touchscreen or other digital devices to achieve detection and tracing of SARS-CoV-2 in real-time. Projects are expected to demonstrate proof-of-concept of SARS-CoV-2 detection with high sensitivity and specificity, sensor functionality, and automatic detection by touchscreen or other digital devices. To achieve the goal of this FOA, the proposed project needs to be milestone driven and carried out by a multidisciplinary team with complementary expertise. The funding for this initiative is provided from the Paycheck Protection Program and Health Care Enhancement Act, 2020.

Synopsis Research projects may need to adapt quickly in the context of COVID-19. The Short Term Research Management program (STReaM) makes experienced research management staff available to help researchers in the North America region navigate these challenges. STReaM will continue to accept requests for support through its regular application process. The team can offer hands-on support to help think through challenging obstacles, such as impacts to timelines, adapting to virtual research methods, and navigating difficult conversations with stakeholders. Researchers conducting projects in the North America region are invited to request this support, regardless of the project phase.

Please note that the sponsor will not accept human subjects research requiring in-person interactions with subjects.

097665 [Dear Colleague Letter: Sentinel Cells for Surveillance and Response to Emergent Infectious Diseases \(Sentinels\)](#) National Science Foundation NSF 20-105 ContinuousNot SubmissionSpecified

Contact Name Anthony Garza  
Contact Telephone  
Contact Email [aggarza@nsf.gov](mailto:aggarza@nsf.gov)  
Sponsor Website  
Program URL [Link to program URL](#)  
Deadline Dates (ALL)

Synopsis

With this Dear Colleague Letter (DCL), the sponsor highlights the interest of existing programs in the Directorate for Biological Sciences (BIO) and the Directorate for Engineering (ENG) in interdisciplinary research for the development of novel biological platforms that are capable of sensing and responding to emerging infectious agents. The mechanism of sensing should be adaptable and or evolvable such that the sentinel cells, or other appropriate biotechnology solutions, are robust to a range of emergent threats, and/or can easily be reprogrammed and deployed once a new threat is identified. The platform's response should be one or more of the following: alert the user, destroy the threat, protect the host, initiate an immune response or other strategies that would ensure mitigation of the threat. Sentinel cells and organisms that detect and respond to infectious agents with expanding footprints in a host population or expanding host ranges are of particular interest, as the early detection of these infectious agents might have value in preventing future pandemics. In addition, fundamental science and technology that would lead to the development of the envisioned sentinel cells and organisms are also of interest. Investigators are encouraged not to be limited in their approach, but to think broadly about innovations leveraging biology and engineering to advance adaptable detection of emerging biological threats.

Deadline Dates (ALL) 15-Aug-2020 [Optional][LOI/Pre-App], 15-Sep-2020

Synopsis

The National Institutes of Health (NIH) is issuing this funding opportunity announcement (FOA) in response to the declared public health emergency issued by the Secretary, Department of Health and Human Services (DHHS), for the 2019 Novel Coronavirus (COVID-19). This emergency FOA provides an expedited funding mechanism as part of the Rapid Acceleration of Diagnostics-Radical (RADx-rad) initiative. As one of the programs within the NIH Rapid Acceleration of Diagnostics-Radical (RADx-rad) program the RADx-rad Wastewater Detection of SARS-COV-2 (COVID-19) FOA will support wastewater-based testing (WBT) surveillance which can provide detailed mapping of the extent and spread of COVID-19. Wastewater testing has been shown to be orders of magnitude cheaper and faster than clinical screening, albeit serving as a complementary approach rather than substituting individual-level testing and screening. The purpose of this FOA is to solicit cooperative agreements both for field studies and for small business research and development projects in the field of WBT, to address topics such as: investigation and demonstration of specific approaches aiming to increase sensitivity and to inform and optimize sample collection; implementation and development of optimized approaches to extrapolate estimation of population-level data within the community; development of optimized intervention strategies, and incorporation of computational, statistical, and mathematical models. The funding for this initiative is provided from the Paycheck Protection Program

and Health Care Enhancement Act, 2020.

Deadline Dates (ALL)	<p>05-Oct-2020 , 07-Jan-2021 , 05-Feb-2021 , 07-May-2021 , 05-Jun-2021 , 07-Sep-2021 , 05-Oct-2021 , 07-Jan-2022 , 05-Feb-2022 , 07-May-2022 , 05-Jun-2022 , 07-Sep-2022 , 05-Oct-2022 , 07-Jan-2023 , 05-Feb-2023 , 07-May-2023 , 05-Jun-2023 , 07-Sep-2023 , 07-Jan-2024</p>				
Synopsis	<p>NIH is issuing this Funding Opportunity Announcement (FOA) in response to the declared public health emergency issued by the Secretary, HHS, for 2019 Novel Coronavirus (COVID-19). This emergency FOA provides an expedited funding mechanism as part of the Rapid Acceleration of Diagnostics-Radical (RADx-rad) initiative. This FOA invites applications to pursue development and validation studies of COVID-19 surveillance methods, not based or focused on direct viral testing of individuals, in settings and institutions, including residential, with a high density of individuals who are together for prolonged periods of time. There are numerous promising technologies which could allow for multimodal surveillance inputs. However, these technologies are often not interoperable, not optimized for integration to increase robustness and not tested for general applicability to public health or for the specific need of high-risk population surveillance. Applications are invited that translate a combination of digital surveillance modalities into platforms that can assist the professional staff of high-risk facilities in making clinically meaningful care recommendations for patients at risk of COVID-19 or other respiratory viruses. Projects proposed may use strategies that incorporate ideas and approaches from multiple disciplines, as appropriate. The funding for this initiative is provided form the Paycheck Protection Program and Health Care Enhancement Act, 2020. ?</p>

Deadline Dates (ALL) 18-Aug-2020 [Optional][LOI/Pre-App], 18-Sep-2020

Synopsis

The National Institutes of Health (NIH) is issuing this funding opportunity announcement (FOA) in response to the declared public health emergency issued by the Secretary, Department of Health and Human Services (DHHS), for the 2019 Novel Coronavirus (COVID-19). This emergency FOA provides an expedited funding mechanism as part of the Rapid Acceleration of Diagnostics-Radical (RADx-rad) initiative. Specifically, this FOA seeks to fund a single cooperative agreement for a Data Coordination Center (DCC) to serve as a communication center and data hub for RADx-rad awardees. Specifically, this FOA is seeking applications for a portable sensing device to detect volatile organic compounds (VOCs, i.e., scents or odors) emanating from skin or exhaled breath, saliva and different oral tissues from the oral cavity. These sensing devices must be able to associate VOC patterns to patients with symptomatic and asymptomatic COVID-19. These devices are expected to actively detect VOCs from skin and oral cavities of COVID-19 patients, without being invasive, or affecting the integrity of the skin and oral cavity. For VOC monitoring, these sensing devices can be Electronic-nose (E-nose) technology or Gas Chromatography (GC). Therefore, this program is called SCENT, which stands for Screening for COVID-19 by Electronic-Nose Technology. This FOA seeks to advance novel biosensing technologies that are innovative, safe, and effective using integrated artificial intelligent, pattern recognition and machine learning systems that would make it possible for the detection, diagnosis, prediction, and monitoring of COVID-19 in clinical, community and everyday settings. This FOA requires multidisciplinary collaborations to ensure project success. Disciplines may include: biomedical engineers, material scientists, biosensing experts, software engineers, chemists, dentists, clinicians, virologists, clinical trialists, biostatisticians, data analysts and/or other relevant experts in academia and industry. The funding for this initiative is provided from the Paycheck Protection Program and Health Care Enhancement Act, 2020.

Synopsis NIH is issuing this FOA in response to the declared public health emergency issued by the Secretary, HHS, for 2019 Novel Coronavirus (COVID-19). This emergency FOA from the National Institutes of Health (NIH) provides an expedited funding mechanism as part of the Rapid Acceleration of Diagnostics-Radical (RADx-rad) initiative. The goal of the RADx-rad initiative is to encourage the development of novel, non-traditional approaches to identify the current SARS-CoV-2 virus or other markers of the COVID-19 disease that can be used in future outbreaks of COVID-19 and that could be applicable to other, as yet unknown, viruses. Specifically, the goal of this FOA is to solicit applications to enhance the utility of chemosensory testing as a COVID-19 screening tool by using objective tests to examine the onset and prognostic value of chemosensory loss and to encourage the development and/or deployment of home-based and on-site chemosensory tests. The funding for this initiative is provided from the Paycheck Protection Program and Health Care Enhancement Act, 2020.

## Research Awards & Funding Opportunities

Dear Research Community,

Below is a COVID-19 funding opportunity recently released from the funding opportunity database SPIN.

Please note that some opportunities have rapidly approaching deadlines. Previous COVID-19 funding opportunities that have been circulated via the listserv are posted on [GCO's Funding Opportunities](#) page and on the [ORS Research Roadmap COVID-19 Funding Opportunities](#) page organized by due date. COVID-19 opportunities funded by the CTSA program of NCATS can also be found in [The Conduit newsletter](#).

In addition, please review the [SPIN Getting Started Instructions](#) for information about beginning your individual search.

	Deadline Dates (ALL)	06-Oct-2020 , 08-Feb-2021 , 08-Jun-2021 , 08-Oct-2021			
Synopsis	<p>This Funding Opportunity Announcement (FOA) will support pilot, feasibility or exploratory research in 7 priority areas in substance use epidemiology, prevention, and health services, including: 1) responses to sudden and severe emerging drug issues (e.g. the ability to look into a large and sudden spike in opioid or synthetic cannabinoid use/overdoses in a particular community); 2) responses to emerging marijuana trends and topics related to the shifting policy landscape; 3) responses to unexpected and time-sensitive prescription drug abuse research opportunities (e.g., new state or local efforts); 4) responses to unexpected and time-sensitive medical system issues (e.g. opportunities to understand addiction services in the evolving health care system); 5) responses to unexpected and time-sensitive criminal or juvenile justice opportunities (e.g. new system and/or structural level changes) that relate to drug abuse and access and provision of health care service; 6) partnerships between researchers and state or local organizations to support the evaluation of new local policies, programs, or practices in response to public health emergencies (e.g., the opioid crisis); 7) research collecting and examining data on the risks and outcomes associated with substance use and COVID-19 infection in the general population and among underserved populations, such as racial, ethnic and gender minorities, individuals with low socioeconomic status, and those who are incarcerated or homeless. It should be clear that the knowledge gained from the proposed study is time-sensitive and that an expedited rapid review and funding are required in order for the scientific question to be answered (i.e. an imminent policy change will not allow for standard review and funding timeline).</p>

Synopsis

This opportunity offers access to biomedical imaging technologies to scientists who have COVID-19 related research projects that need imaging resources. Euro-BioImaging can facilitate access to 40+ biological and biomedical imaging technologies in one of 21 Nodes. Nodes are internationally renowned imaging facilities - located across 8 countries and the European Molecular Biology Laboratory, EMBL.

Deadline Dates (ALL) 31-Aug-2020

Synopsis

CURE awards grants for novel research projects that address finding the cures for epilepsy and address the goal of “no seizures, no side-effects.” The Epilepsy Research Continuity Find (ERCF) will provide reimbursements of up to \$15,000 for research related expenses incurred as a result of institutional shutdowns during the COVID-19 pandemic and for which institutional support was not available or provided.

## Research Awards & Funding Opportunities

Dear Research Community,

Below are COVID-19 funding opportunities recently released from the funding opportunity database SPIN. The first table of InfoEd funding opps is a summary followed by a second with more detailed information.

Please note that some opportunities have rapidly approaching deadlines. Previous COVID-19 funding opportunities that have been circulated via the listserv are posted on [GCO's Funding Opportunities](#) page and on the [ORS Research Roadmap COVID-19 Funding Opportunities](#) page organized by due date. COVID-19 opportunities funded by the CTSA program of NCATS can also be found in [The Conduit newsletter](#).

In addition, please review the [SPIN Getting Started Instructions](#) for information about beginning your individual search.

The Grants and Contracts Office

 Deadline Dates (ALL) 09-Oct-2020  
 AFTD Pilot Grants provide seed funding for innovative research with the potential to improve the understanding and treatment of frontotemporal degeneration (FTD) across the full spectrum of FTD disorders: behavioral variant FTD, primary progressive aphasia, progressive supranuclear palsy, corticobasal syndrome, and FTD-ALS. Pilot Grant-funded projects are intended to generate data that will support follow-on funding applications to the National Institutes of Health or other public or private agencies.

098691 [Fellowship Program](#) IBSA Foundation for Scientific Research 31-Dec-2020 35,700 USD

 Deadline Dates (ALL) 03-Feb-2021 , 29-Oct-2021 , 28-Oct-2022 , 30-Oct-2023

NIOSH/CDC invites applications for the NIOSH Centers of Excellence for Total Worker Health (TWH). The purpose of this FOA is to solicit meritorious applications for Centers of Excellence for TWH to develop and conduct a broad range of multidisciplinary research, intervention, outreach and education, and evaluation activities that advance the overall safety, health, and well-being of the diverse population of workers in our nation. Center structure should

Synopsis

take advantage of diverse scientific resources and focus on local, regional, or national worker safety and health issues. Centers should emphasize creating and implementing evidence-based solutions to address evolving challenges and opportunities related to worker safety, mental and physical health, and well-being. Collaborations in partnership with academic institutions, nonprofit organizations, and other groups focused on occupational safety and health are expected. Applicants must concisely describe the occupational health burden within their service area and directly link research and outreach activities to help alleviate the burden. Applicants should also clearly articulate the anticipated impacts of the proposed work, both during the project period and beyond.

099005 [Junior Faculty Research Grants for the Study of Lung Cancer and COVID-19 Infection](#) International Lung Cancer Foundation 15-Sep-2020 50,000 USD

Contact Name  
 Contact Telephone 1-720-598-1952  
 Contact Email [foundation@iaslc.org](mailto:foundation@iaslc.org)  
 Sponsor Website [Link to sponsor website](#)  
 Program URL [Link to program URL](#)  
 Deadline Dates (ALL) 15-Sep-2020

Synopsis

The purpose of this program is to fund groundbreaking research related to COVID-19 infected lung cancer patients. The intent of the support is to allow junior faculty researchers, as defined as fewer than 7 years in a faculty position after training, to obtain preliminary data that will enable them to successfully compete for national peer-reviewed grant support.

099054 [Diversity and Inclusion Health Equity Research Grant](#) Foundation for Women's Cancer 21-Sep-2020 [LOI/Pre-App] 75,000 USD

Contact Name  
 Contact Telephone 312-578-1439  
 Contact Email [research@sgo.org](mailto:research@sgo.org)  
 Sponsor Website [Link to sponsor website](#)  
 Program URL [Link to program URL](#)  
 Deadline Dates (ALL) 21-Sep-2020 [LOI/Pre-App], 21-Dec-2020

Synopsis

Research among diverse populations has demonstrated disparities in treatment outcomes, access to care, genetic testing rates, and disease survival across many diseases. This new Diversity and Health Equity Research Grant is a one-year project where the funding is available for two \$75,000 Research grants.
