Subject: [GCO] InfoEd Updates - New! Major Goals Box for Other Support Info

Research Alert

Dear Research Community,

In this mailing, we would like to bring your attention to the new Other Support Box in InfoEd.

New InfoEd Other Support Major Goals Box

We are pleased to report that creating Other Support pages is one step easier in InfoEd.

When you go to complete your eForm for new and other competitive applications, complete the new data entry box at the bottom of the form. There's a place to enter the major goals of your project, which means that you and your colleagues can all share the **same** description and we can say goodbye to 8 different versions of goals for the same project! Would you agree that it just doesn't get better than this? Check out this screenshot.

Proposal Detail
Principal Investigator

Title

15. Major Goals of the project (The wording in this section will be used for other support.)

The goal of this study is to provide two sets of canines beauty cream to remove unwanted wrinkles. We posit that the Gottlieb No More Tears, Hypoallergenic formula will actually reverse the effects of the ageing processes such as glycation, habitual sleeping positions, loss of body mass, sun damage, or temporarily, as the result of prolonged immersion in water doing the doggy paddle. Canine age wrinkling in the skin is promoted by habitual barking, growling, and howling as well as smoking and poor hydration caused by empty water bowls. |

If you have any questions, please feel free to contact the GCO.

Sincerely, Allison Gottlieb
