Institute for Translational Epidemiology: Staff Bios

Naomi Alpert, MS graduated with a BA in Mathematics from Vassar College in 2012 and earned her MS in Biostatistics from the Icahn School of Medicine at Mount Sinai in 2016. She has extensive experience using SEER-Medicare to examine racial disparities in treatment and outcomes for elderly patients with lung cancer. Naomi also works with the National Health and Aging Trend Survey (NHATS), National Health and Nutrition Examination Survey (NHANES), and SEER Medicare Health Outcomes Survey (SEER-MHOS).

Lindsay Chabra provides administrative support to Dr. Emanuela Taioli. She received a Bachelor’s degree in Broadcast Journalism from Brooklyn College and an A.A.S. in Print Journalism from Kingsborough Community College. Lindsay is a native New Yorker who has been with the Mount Sinai Health System since 2014.

Christina Gillezeau, MPH is a Data Coordinator in the Institute for Translational Epidemiology. She received her B.A. from the University of Pennsylvania with a major in Physical Anthropology. She received her M.P.H. with a concentration in Epidemiology from the Icahn School of Medicine at Mount Sinai in 2016. Her primary areas of interest are in mental health and cancer epidemiology.

Wil Lieberman-Cribbin, MPH earned his Bachelor’s degree in Physics and Geography from Colgate University in 2014, and his Masters in Public Health degree from the Icahn School of Medicine at Mount Sinai in 2017. He has worked as a Clinical Research Coordinator since 2015.
Geetanjali Kamath, BDS, MPH, PhD is a postdoctoral fellow working on epidemiological projects in the field of cancer prevention and control. She earned her Bachelor of Dental Surgery from the Government Dental College & Hospital in Mumbai, India and her master’s and doctoral degrees in Public Health majoring in epidemiology from the University of Texas School of Public Health. Her research interests lie in the identifying causes of cancer-related disparities, including studying the distribution of biological, infectious, socioeconomic, and psychosocial risk factors in vulnerable populations. She is also interesting in studying the relationship between cancer outcomes and

Stephanie Tuminello, MPH is a Data Coordinator in the Institute for Translational Epidemiology. She received her Bachelors of Science Degree from Stony Brook University with a major in Genetics and Developmental Biology and her Master’s Degree in Public Health with a concentration in Biostatistics from the CUNY School of Public Health. Her primary research interests include lung cancer and the genetic and molecular predictors of cancer outcomes.

Maaike van Gerwen received her MD from the Radboud University of Nijmegen in the Netherlands. She worked as a general practitioner in the Netherlands and in France and is currently a PhD candidate in Clinical Research at the Icahn School of Medicine at Mount Sinai.
