We dedicate this annual report to all those individuals around the world who are in need—of medical care, of compassion, of justice. It is to them we commit our lives. And we are so very grateful to our supporters who make our work possible. We could not carry out our vital mission without you. Thank you!

—The Arnhold Global Health Institute Team

Wish List

Help The Arnhold Global Health Institute improve the health of thousands around the world through your support

$50,000
Support Maternal and Child Health in Mozambique and the Dominican Republic for one year

Women and children disproportionately suffer from the impact of poverty and lack of health services. In Mozambique and the Dominican Republic, The Arnhold Global Health Institute combats illness and death during pregnancy and early childhood by training community health workers to provide prenatal care, facilitate safe deliveries, provide life-saving emergency care to newborn infants, and treat the conditions that claim young lives—malaria, diarrhea and pneumonia. Working with local health systems, Institute faculty and students prepare local health-workers to become a powerful, sustainable and influential workforce in their own communities.

$25,000
Sponsor the Global Mental Health Program for one year

The Arnhold Global Health Institute’s Global Mental Health Program serves populations where access to mental health care is highly underdeveloped, including Liberia, India, Belize, St. Vincent and the Grenadines, and Haiti. The program has established psychiatric consultation services in a Liberian hospital with no prior psychiatric care, started Alcoholics Anonymous groups where there was no support for substance abuse, and is now working to provide access to mental health services in rural villages in India and in a Haitian orphanage.

$10,000
Purchase a portable ultrasound machine for use at maternal health sites across Africa and Latin America

A gift of $10,000 will purchase a portable ultrasound machine to be used in obstetric care and gynecological surgery at Institute sites around the world. The Institute’s work focuses on vulnerable populations, particularly women and children, where access to hospitals and equipment is extremely limited or nonexistent, making portable equipment indispensable.

$5,000
Support a resident or student completing clinical work and research around the globe

Few of the more than 16,000 doctors graduating annually from US medical schools are trained to address the special needs of populations living in poverty. However, The Arnhold Global Health Institute believes that every medical school graduate has a responsibility to advocate for these populations. Our global health curriculum identifies idealistic and committed trainees and prepares them to become global health leaders in the countries and communities that need them most.

$1,000
Purchase simulation equipment for use in the Dominican Republic

The core of The Arnhold Global Health Institute’s work in the Dominican Republic is building local healthcare capacity through partnerships with hospitals, clinics, schools and community centers. A gift of $1,000 will purchase simulation equipment, namely a mannequin or torso, to teach crucial CPR skills and run mock patient cases with local healthcare workers in the Santiago region.

Letter from

Philip J. Landrigan, MD
Dean for Global Health

Tal Recanati
Chair of The Arnhold Global Health Institute Advisory Board

We have come a long way since our founding in 2006 as a small global health training program for first-year medical students. Spearheaded by a small group of passionate faculty and students, Mount Sinai Global Health started out as an ambitious, grassroots endeavor in the truest sense of the word: it had no funding, little recognition, and minimal faculty involvement, but it was blessed with enormous energy, deep altruism and supportive friends.

In the past year the scope of our program has expanded profoundly. The passion, the dedication and desire to do good in the world persist, but now, thanks to the incredible generosity and visionary support of The Arnhold Foundation and The Mulago Foundation, we have brought the program to scale and established The Arnhold Global Health Institute. This gift provides critical short and long-term support for our mission of reducing health disparities and closing the unconscionable gap in global health. Tens of thousands of people around the globe will benefit from the Institute’s programs. For this we shall be forever grateful.

Whether through training local healthcare workers, delivering urgently-needed patient care, conducting pioneering research, or advocating for health and human rights, the global presence of The Arnhold Global Health Institute is both broad and deep.

In the pages that follow, we present a timeline of our milestones and achievements over nearly a decade of work. The programs highlighted represent only a small fraction of our total impact. Guided by local communities, our trainees, faculty, and staff remain committed to ensuring quality, sustainable programs both at home and abroad.

We offer our heartfelt thanks to the The Arnhold Foundation and The Mulago Foundation and to all who have supported global health at Mount Sinai — through gifts of time, philanthropy and talent. Congratulations to the supporters, volunteers, faculty, staff and students who have made a vision of global health at Mount Sinai a remarkable reality. Thank you for being a part of our story.
At its core, The Arnhold Global Health Institute recognizes health as a most fundamental human right and works to address the most pressing of global health challenges across multiple disciplines including maternal and child health, mental health, non-communicable diseases, immigrant and refugee health, and climate change.
